Gentlemen:

Attached is the SEC Form 17-A (2024 Annual Report) of Aboitiz Power Corporation for your files.

Kindly acknowledge receipt hereof.

Thank you.

Very truly yours,

ABOITIZ POWER CORPORATION

For a discussion on the Company's bond issuances, please refer to Part I Item 1 (b).

11. Are any or all of the securities listed on a Stock Exchange?

Yes (✓)

No ()

If yes, state the name of such stock exchange and the classes of securities listed therein:

Philippine Stock Exchange, Inc.

Common

12. Check whether the registrant:

- (a) has filed all reports required to be filed by Section 17 of the Securities Regulation Code (SRC) and SRC Rule 17.1 thereunder or Section 11 of the RSA and RSA Rule 11 (a)-1 thereunder, and Sections 25 and 177 of the Revised Corporation Code of the Philippines, during the preceding 12 months (or for such shorter period that the registrant was required to file such reports);

Yes (✓)

No ()

- (b) has been subject to such filing requirements for the past 90 days.

Yes (✓)

No ()

13. State the aggregate market value of the voting stock held by non-affiliates of the registrant. The aggregate market value shall be computed by reference to the price at which the stock was sold, or the average bid and asked prices of such stock, as of a specified date within sixty (60) days prior to the date of filing. If a determination as to whether a particular person or entity is an affiliate cannot be made without involving unreasonable effort and expense, the aggregate market value of the common stock held by non-affiliates may be calculated on the basis of assumptions reasonable under the circumstances, provided the assumptions are set forth in this Form.

For 2024, aggregate voting stock of registrant held outside of its affiliates and/or officers and employees totaled 3,247,215,032 shares (for details please refer to the attached notes to financial statements and Schedule H of this report). The registrant's market price per share as of December 31, 2024 was ₱37.70.

Based on this information, the total market value of the registrant's voting stock not held by its affiliates and/or officers and employees was computed to be ₱122.42 billion (bn) as of December 31, 2024.

**APPLICABLE ONLY TO REGISTRANTS INVOLVED IN
INSOLVENCY/SUSPENSION OF PAYMENTS PROCEEDINGS
DURING THE PRECEDING FIVE YEARS:**

14. Check whether the registrant has filed all documents and reports required to be filed by Section 17 of the RSA subsequent to the distribution of securities under a plan confirmed by a court or the SEC.

Yes ()

No (✓)

DOCUMENTS INCORPORATED BY REFERENCE

15. If any of the following documents are incorporated by reference, briefly describe them and identify the part of SEC Form 17-A into which the document is incorporated:

(a) Any annual report to security holders:

- 2024 Audited Financial Statements of Aboitiz Power Corporation (with BIR ITR Filing Reference)
- 2024 Consolidated Audited Financial Statements and Supplementary Schedules
- Integrated Annual Corporate Governance Report
- Sustainability Reporting Template and 2024 Annual and Sustainability Report

(b) Any information statement filed pursuant to SRC Rule 20:

- SEC Form 20-IS (Information Statement) for the 2025 Annual Stockholders' Meeting

(c) Any prospectus filed pursuant to SRC Rule 8.1:

- None.

PART 1 – BUSINESS AND GENERAL INFORMATION

Item 1. Business

(1) Business Development

Aboitiz Power Corporation (AboitizPower) is a publicly-listed company incorporated on, and has been in business since, February 13, 1998. AboitizPower was incorporated as a holding company for the Aboitiz Group's investments in electricity generation and distribution. Ownership in AboitizPower was opened to the public through an initial public offering of its common shares in the PSE on July 16, 2007. Through its Subsidiaries and Affiliates, AboitizPower has become a leader in the Philippine power industry with a presence in the power generation, distribution, and retail electricity supply markets. As of March 24, 2025, AboitizPower had a market capitalization of ₱277.425 bn, with a common share price of ₱38.50 per share.

AboitizPower has four strategic business segments:

- (a) Power Generation, where AboitizPower is among the largest in the country, in terms of overall installed capacity¹;
- (b) Power Distribution, where AboitizPower is the second largest private utility operator, in terms of captive customer connections and energy sales²;
- (c) Retail Electricity Services (RES), where the aggregate contract capacity of the AboitizPower RES companies has the second highest customers in terms of facility count, the largest in terms of contract capacity in megawatts (MW), and the largest total retail market share³; and
- (d) Distributed Energy.

AboitizPower, which has the largest portfolio of installed renewable electricity capacity in the country to date, is a pioneer in building and operating run-of-river hydropower plants in the country⁴. The Company continues to pursue energy projects to help ensure the Philippines' energy system is secure and is able to reliably support aggregate electricity demand.

AboitizPower's portfolio of power generating assets strategically consists of a mix of renewable and non-renewable power plants. AboitizPower's baseload coal and geothermal plants and intermediate and peaking hydropower, solar, and oil-based power plants enable the Company to effectively address the country's growing aggregate energy demand. Most of AboitizPower's plants are also capable of providing ancillary services, which is critical in stabilizing grid operations. AboitizPower has an installed capacity which is equivalent to a 22.47% market share of the national grid's installed generating capacity.⁵ As of March 4, 2025, AboitizPower, through its Subsidiaries, Joint Ventures, and Associates, had a total of 6,079 MW net sellable capacity, of which 4,636 MW is attributable capacity. The Company continues to grow its portfolio of generation assets with renewables and selective baseload builds. AboitizPower's renewable investments are held primarily through its wholly-owned Subsidiary, Aboitiz Renewables, Inc. (ARI), along with ARI's Subsidiaries and Joint Ventures.

AboitizPower also owns interests in nine Distribution Utilities in Luzon, Visayas, and Mindanao, including Visayan Electric Company, Inc. (Visayan Electric) and Davao Light & Power Co., Inc. (Davao Light), the second and third largest distribution utilities in the Philippines, respectively in terms of customer size and annual sales. AboitizPower's Subsidiaries engaged in the distribution of electricity sold a total of 8,886,926 MWh during 2024.

AboitizPower's power generation business supplies power to various customers under power supply contracts, ancillary service procurement agreements (ASPA), and for trading in the Wholesale Electricity Spot Market (WESM). The power distribution business is engaged in the distribution and sale of electricity to end-users, and the RES segment includes retail electricity sales to various off-takers that are considered eligible contestable customers ("Contestable Customers") and provision of electricity-related services, such as conducting energy audits, preventive maintenance services, and installation of digital power monitoring systems. AboitizPower's Subsidiaries engaged in the supply of retail electricity sold a total of 6.09 Terawatt hours (TWh) during 2024.

¹ Based on Resolution 07-2025 published by the Energy Regulatory Commission (ERC) on March 13, 2025

² Based on DOE's Distribution Development Plan 2021-2030

³ ERC Competitive Retail Electricity Market (CREM) and Green Energy Option Program (GEOP) Monthly Statistical Data as of December 2024

⁴ Based on ERC Resolution No. 07, Series of 2025 dated March 13, 2025

⁵ Based on ERC Resolution No. 2, Series of 2024 dated March 19, 2024

As of March 24, 2025, after a series of transactions related to the share buy-back program initiated in 2023, AEV owns 53.09% of the outstanding capital stock of AboitizPower, 27.57% is owned by JERA Asia Pte. Ltd. (JERA Asia), while about 1.86% is owned by directors, officers, and other related parties; the remainder is owned by the public.⁶

Neither AboitizPower nor any of its Subsidiaries has ever been the subject of any bankruptcy, receivership or similar proceedings.

History and Milestones

The Aboitiz Group's involvement in the power industry began when members of the Aboitiz family acquired a 20% ownership interest in Visayan Electric in the early 1900s. The Aboitiz Group's direct and active involvement in the power distribution industry can be traced to the 1930s, when ACO acquired Ormoc Electric Light Company and its accompanying ice plant, Jolo Power Company, and Cotabato Light and Power Company (Cotabato Light). In July 1946, the Aboitiz Group further strengthened its position in power distribution in the Southern Philippines when it acquired Davao Light.

In December 1978, ACO divested its ownership interests in Ormoc Electric Light Company and Jolo Power Company and focused on the more lucrative franchises held by Cotabato Light, Davao Light, and Visayan Electric.

In response to the Philippines' pressing need for adequate power supply, the Aboitiz Group ventured into power generation, becoming a pioneer and industry leader in hydroelectric energy. In 1978, the Aboitiz Group incorporated Hydro Electric Development Corporation (HEDC). HEDC carried out feasibility studies (including hydrological and geological studies), hydroelectric power installation and maintenance, and also developed hydroelectric projects in and around Davao City. On June 26, 1990, the Aboitiz Group also incorporated Northern Mini-Hydro Corporation (now Cleanergy, Inc.), which focused on the development of mini-hydroelectric projects in Benguet province in northern Luzon. By 1990, HEDC and Cleanergy had commissioned and were operating 14 plants with a combined installed capacity of 36 MW. In 1996, the Aboitiz Group led the consortium that entered into a Build-Operate-Transfer (BOT) agreement with the National Power Corporation (NPC) to develop and operate the 70-MW Bakun AC hydroelectric plant (the "Bakun AC Hydro Plant") in Ilocos Sur.

The table below sets out milestones in AboitizPower's development since 1998:

Year	Milestones
1998	<i>Incorporated as a holding company for the Aboitiz Group's investments in power generation and distribution.</i>
2005	<i>Consolidated its investments in mini-hydroelectric plants in a single company by transferring all of HEDC's and Cleanergy's mini hydroelectric assets to Hedcor, Inc. (Hedcor).</i>
2007	<i>Entered into a share swap agreement with AEV in exchange for AEV's ownership interest in the following distribution utilities:</i> <i>(i) An effective 55% equity interest in Visayan Electric;</i> <i>(ii) A 100% equity interest in each of Davao Light and Cotabato Light;</i> <i>(iii) An effective 64% ownership interest in Subic Enerzone Corporation (Subic Enerzone); and</i> <i>(i) An effective 44% ownership interest in San Fernando Electric Light & Power Co., Inc. (SFELAPCO).</i> <i>As part of the reorganization of the power-related assets of the Aboitiz Group, the Company:</i> <i>(i) Acquired 100% interest in Mactan Enerzone Corporation (Mactan Enerzone) and 60% interest in Balamban Enerzone Corporation (Balamban Enerzone) from Aboitiz Land, Inc. (AboitizLand); and</i> <i>(ii) Consolidated its ownership interests in Subic Enerzone by acquiring the combined 25% interest in Subic Enerzone held by AEV, SFELAPCO, Okeelanta Corporation, and Pampanga Sugar Development Corporation.</i> <i>These acquisitions were made through a Share Swap Agreement, which involved the issuance of the Company's 170,940,307 common shares issued at the IPO price of ₱5.80 per share in exchange for the foregoing equity interests in Mactan Enerzone, Balamban Enerzone, and Subic Enerzone.</i>

⁶ Taking into account the total issued shares (which includes treasury shares acquired by the Company through the share buy-back program), AEV holds approximately 51.99% of the issued shares of AboitizPower, 27.00% is with JERA Asia, and 1.81% is owned by directors, officers, and other related parties

Year	Milestones
	Together with its partner, Statkraft Norfund Power Invest AS of Norway, through SN Aboitiz Power-Magat, Inc. (SN Aboitiz Power-Magat), acquired possession and control of the Magat Plant following its successful bid in an auction by the Power Sector Assets and Liabilities Management Corporation (PSALM). Formed Abovant Holdings, Inc. (Abovant) with the Vivant Group as the investment vehicle for the construction and operation of a coal-fired power plant in Toledo City, Cebu ("Cebu Coal Project"). Abovant entered into a Memorandum of Agreement (MOA) with Global Business Power Corporation (Global Power) of the Metrobank group for the acquisition of a 44% equity interest in Cebu Energy Development Corporation (Cebu Energy). Therma Power, Inc. (TPI) entered into a MOA with Taiwan Cogeneration International Corporation (TCIC) for the Subic Coal Project, an independent coal-fired power plant in the Subic Bay Freeport Zone. Redondo Peninsula Energy, Inc. (RP Energy) was incorporated as the project company. Acquired 50% of East Asia Utilities Corporation (EAUC) from El Paso Philippines Energy Company, Inc. and 60% of Cebu Private Power Corporation (CPPC). Purchased 34% equity ownership in STEAG State Power, Inc. (SPI) (now: SPI Power Incorporated) from Evonik Steag GmbH in August 2007. Purchased Team Philippines Industrial Power II Corporation Industrial Power II Corp.'s 20% equity in Subic Enerzone.
2008	SN Aboitiz Power-Benguet submitted the highest bid for the Ambuklao-Binga Hydroelectric Power Complex. Acquired Tsuneishi Holdings (Cebu), Inc. (THC)'s 40% equity ownership in Balamban Enerzone, bringing AboitizPower's total equity in Balamban Enerzone to 100%.
2009	AP Renewables, Inc. (APRI) acquired the 234-MW Tiwi geothermal power facility in Albay and the 449.8 MW Makiling-Banahaw geothermal power facility in Laguna (collectively referred to as the "Tiwi-MakBan Geothermal Facilities"). Therma Luzon, Inc. (TLI) became the Independent Power Producer Administrator (IPPA) for the 700-MW contracted capacity of the Pagbilao Coal-Fired Power Plant (the "Pagbilao Plant"), becoming the first IPPA of the country.
2010	Therma Marine, Inc. (TMI), acquired ownership over Mobile 1 ("Power Barge 118") and Mobile 2 ("Power Barge 117") from PSALM.
2011	Meralco PowerGen Corporation (MGen), TCIC, and TPI entered into a Shareholders' Agreement to formalize their participation in RP Energy. MGen took the controlling interest in RP Energy, while TCIC and TPI maintained the remaining stake equally. Therma Mobile, Inc. (TMO) acquired four barge-mounted floating power plants and their operating facilities from Duracom Mobile Power Corporation and EAUC. In the same year, the barges underwent rehabilitation and started commercial operations in 2013.
2013	Aboitiz Energy Solutions, Inc. (AESI) (now: Adventpower, Inc.) won 40 strips of energy corresponding to 40 MW capacity of Unified Leyte Geothermal Power Plant (ULGPP). The contract between AESI and PSALM with respect to the ULGPP capacity was terminated on October 26, 2019.
2014	TPI entered into a joint venture agreement with TPEC Holdings Corporation to form Pagbilao Energy Corporation (PEC) to develop, construct, and operate the 400 MW coal-fired Pagbilao Unit 3. Therma Power-Visayas, Inc. (TPVI) was declared the highest bidder for the privatization of the Naga Power Plant Complex (NPPC). SPC Power Corporation (SPC), the other bidder, exercised its right-to-top under the Naga Power Plant Land-Based Gas Turbine Land Lease Agreement, and PSALM declared SPC as the winning bidder. After protracted legal proceedings, TPVI accepted the turn-over for the NPPC plant on July 16, 2018. Acquired 100% of Lima Enerzone Corporation (Lima Enerzone) from Lima Land, Inc. (Lima Land), then a wholly-owned Subsidiary of Aboitiz Land, Inc. (AboitizLand). TPI entered into a Shareholders' Agreement with Vivant Group, for the latter's acquisition of 20% issued and outstanding shares in Therma Visayas, Inc. (TVI).
2015	ARI formed San Carlos Sun Power, Inc. (SacaSun) as a Joint Venture with SunEdison Philippines Helios BV (SunEdison Philippines) to explore solar energy projects. In 2017, AboitizPower International completed the acquisition of SacaSun from SunEdison Philippines, and ownership of SacaSun was consolidated in AboitizPower. TSI commenced full commercial operations of its Unit 1.
2016	TSI commenced full commercial operations of its Unit 2. TPI acquired an 82.8% beneficial ownership interest in GNPowder Mariveles Coal Plant Ltd. Co. (now: GNPowder Mariveles Energy Center Ltd. Co. or GMEC) and a 50% beneficial ownership interest in GNPowder Dingin Ltd. Co. (GNPD). Through TPI, acquired the remaining 50% interest in EAUC from El Paso Philippines.
2017	AboitizPower International completed its acquisition of SunEdison Philippines, and consolidated ownership of SacaSun.
2018	Aseagas permanently ceased operations of its 8.8-MW biomass plant in Lian, Batangas. TPVI accepted the turnover of the Naga Power Plant Complex from PSALM.

Year	Milestones
	<i>Pag 3 began commercial operations.</i>
	<i>TVI commenced commercial operations of its Unit 1.</i>
2019	<i>TMO signed a Power Supply Agreement (PSA) with Manila Electric Company (Meralco), after the facility went into preservation mode on February 5, 2019. TMO re-registered again with the Independent Electricity Market Operator of the Philippines (IEMOP) on April 26, 2019.</i>
	<i>AboitizPower acquired a 49% voting stake and a 60% economic stake in AA Thermal.</i>
	<i>TVI commenced commercial operations of its Unit 2.</i>
2020	<i>TPVI started commercial operations.</i>
	<i>Announced two battery projects – the TMI Hybrid Battery Energy Storage System (“TMI BESS”) and SN AboitizPower-Magat Battery Energy Storage System (“Magat BESS”). TMI BESS is located in Maco, Compostela Valley, has a storage capacity of 49 MWh, and is intended to be used for ancillary services. The facility commenced partial commercial operation last November 2022. The Magat BESS Project is for the construction of a 24 MW battery energy storage unit located in Ramon, Isabela.</i>
2021	<i>PV Sinag Power, Inc. (PV Sinag), a wholly-owned of ARI, awarded the Engineering, Procurement, and Construction (EPC) contract for the construction of its 94-megawatt peak (MWp) solar power project in Cayanga, Bugallon, Pangasinan to JGC Philippines, Inc. This is the Company’s second solar facility.</i>
2022	<i>The SN Aboitiz Power Group signed construction and financing agreements for the Magat BESS project.</i>
	<i>PV Sinag awarded the EPC contract for the construction of its 159-MWp Laoag and Laoag 2 solar project in Barangay Laoag, Aguilar, Pangasinan to SUMEC Complete Equipment and Engineering Co. Ltd., and Hansei Corporation.</i>
	<i>Acquired an additional 35.4% equity stake in SPI.</i>
	<i>ARI entered into a JVA with Mainstream Renewable Power Philippines Holdings, B.V. (Mainstream) for a 90-MW onshore wind project in Libmanan, Camarines Sur. In January 2025, ARI and Mainstream reached an agreement for the transfer of shares in Cornerstone Energy Development Corporation (CEDI) to ARI. The closing of the agreement effectively terminates the agreements previously entered into by the parties for the development of an onshore wind project in Libmanan, Camarines Sur.</i>
2023	<i>ARI entered into a JVA with Vena Energy (Vena) for a 102-MW wind power project in Rizal and Laguna.</i>
	<i>ARI entered into a JVA with Vena and Vivant Energy Corporation (VEC) for a 206-MW wind power project in San Isidro, Northern Samar.</i>
2024	<i>Signed a Share Purchase Agreement with STEAG GmbH (STEAG) for the acquisition of an additional 15.6% equity stake in SPI.</i>
	<i>Through its subsidiary, Therma NatGas Power Inc. (TNGP), entered into an Investment Agreement with MGen and acquired a 40% equity interest in Chromite Gas Holdings, Inc. (CGHI)</i>
	<i>Through AboitizPower International, invested in Abaqa International Pte. Ltd. (Abaqa), effectively owning 40%. Abaqa is a private limited company established in Singapore and engaged in commodity trading activities. The remaining 60% is owned by Aboitiz Food Pte. Ltd.</i>
2025	<i>On January 27, 2025, TNGP and MGen, through CGHI, completed (i) its investment in South Premiere Power Corp. (SPPC), Excellent Energy Resources Inc. (EERI), and Ilijan Primeline Industrial Estate Corp. (IPEIC), and (ii) its co-investment with San Miguel Global Power Corporation (SMGP) in Linseed Field Corporation.</i>

AboitizPower is currently involved in the distributed generation business through APX1 and APX2, and is expanding its renewable energy portfolio under its Cleanergy brand. AboitizPower's Cleanergy portfolio includes its geothermal, run-of-river hydro, large hydropower, and solar facilities.

As of February 28, 2025, AboitizPower had 1,150 MW of attributable net sellable capacity, through its partners, under its Cleanergy brand. The Company is pushing for a balanced mix strategy – maximizing Cleanergy while taking advantage of the reliability and cost efficiency of thermal power plants.

Neither AboitizPower nor any of its Subsidiaries has been the subject of any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets not in the ordinary course of business.

(2) Business of Registrant

With investments in power generation, retail electricity supply, and power distribution throughout the Philippines, AboitizPower is considered one of the leading Filipino-owned companies in the power industry. Based on SEC’s parameters of what constitutes a significant Subsidiary under Item XX of Annex B (SRC Rule 12), the following are AboitizPower’s significant Subsidiaries at present: ARI and its Subsidiaries, and Therma Power and its Subsidiaries. (Please see **Annex “A”** hereof for AboitizPower’s corporate structure.)

(a) Description of Registrant

(i) Principal Products

GENERATION OF ELECTRICITY

AboitizPower's portfolio includes interests in both coal and non-coal generation plants. As of December 31, 2024, the earnings contribution of the coal and non-coal operating business segments accounted for 61% and 21%, respectively. AboitizPower conducts its power generation activities through the Subsidiaries and Affiliates listed in the table below.

The table below summarizes the Generation Companies' operating results as of December 31, 2024, compared to the same period in 2023 and 2022:

Generation Companies	Energy Sold			Revenue		
	2024	2023	2022	2024	2023	2022
	(in GWh)			(in mn Pesos)		
APRI	2,706	3,206	3,316	12,683	16,754	18,797

*PV Sinag's Cayanaa-Bugallon Solar Power Plant and Laoag Solar Plant have started commercial operations in July and December 2024, respectively.

**Plants are operated as stand-by plants and are revenue neutral, with costs for operating each plant recovered by Davao Light and Cotabato Light, as the case may be, as approved by ERC. The Davao Light plant has been decommissioned since November 2018.

Renewables

Aboitiz Renewables, Inc. (ARI)

As of December 31, 2024, AboitizPower's renewable energy portfolio in operation consisted of net sellable

capacity of approximately 1,486 MW, divided into 252 MW of solar, 920 MW of hydro, 290 MW of geothermal, and 24 MW of battery energy storage.

AboitizPower's investments and interests in various renewable energy projects, including geothermal, large hydro, run-of-river hydro, and solar projects, are held primarily through its wholly-owned Subsidiary, ARI and its Subsidiary Generation Companies. ARI was incorporated on January 19, 1995.

As of February 28, 2025, ARI has successfully energized 500 MW of its initial expansion phase, which includes developing solar and wind plants with a cumulative net attributable capacity of up to 1,200 MW. The growth of ARI's portfolio plays an important role in achieving AboitizPower's energy transition strategy which aims to assist in the decarbonization of the Philippine energy market while supporting the country's economic growth.

Significant Milestones and Outlook

- Established a pipeline of over 3 gigawatts (GW) of renewable energy projects in development;
- SN Aboitiz Power Group's first energy storage project, the 24-MW Magat battery energy system (BESS), completed construction in July 2023 and concluded testing and commissioning with the grid operator in December 2023. It started commercial operations in January 2024;
- The 94-MWp Cayanga Solar project in Bugallon, Pangasinan synchronized last October 23, 2023 and is already providing power to the grid;
- Energized the 159-MWp Laoag Solar project in Aguilar, Pangasinan in April 2024;
- Completed construction of the 17-MW Tiwi binary power plant in June 2024;
- Started construction for a 52-MWp onshore wind project in Libmanan, Camarines Sur, which won the second Green Energy Auction of the Department of Energy (DOE) in July 2023;
- Completed make-up well drilling campaign for APRI Makban and Tiwi geothermal facilities, with 12 make-up wells completed, delivering a total incremental steam contribution of 94 MW;
- Energized the 44 MWp solar plant in Armenia, Tarlac in November 2024;
- Energized the 173 MWp solar plant in Calatrava, Negros Occidental in December 2024; and
- Started construction of the 212 MWp Solar Plant in Olongapo, Zambales, the 89-MWp solar plant in San Manuel, Pangasinan, and the 20 MW hybrid Battery Energy Storage Facility in Bay, Laguna.

AboitizPower, through and/or with ARI, owns equity interests in the following Generation Companies, among others:

Generation Company	Percentage of Ownership	Plant Name (Location)	Type of Plant	Net Sellable Capacity (MW)	Attributable Net Sellable Capacity (MW)	Offtakers
APRI	100%	Tiwi – Makban (Luzon)	Geothermal	290	290	WESM/ Bilateral
Hedcor	100%	Benguet 1-11 (Luzon) La Trinidad, Bineng 3, Ampohaw, FLS, Labay, Lon-oy, Irisan 1 and 3, and Sal-angan	Run-of-river hydro	52.7	52.7	FIT/Bilateral/ WESM

Notes:

* Sum figures will differ due to rounding effect.

**The 60% equity is owned by MORE.

Run-of-River Hydros

In 2024, the Hedcor Group, composed of Hedcor, Hedcor Sibulan, Inc. (Hedcor Sibulan), Hedcor Tudaya, Inc. (Hedcor Tudaya), Hedcor Sabangan, Inc. (Hedcor Sabangan), Hedcor Bukidnon, Inc. (Hedcor Bukidnon), and Luzon Hydro Corporation (LHC), had a total net generation of 1,077 GWh of Cleanergy across the Philippines. This is higher than the 2023 net generation at 1,064 GWh, or an increase of 1%, with breakdown as shown in the table below:

Generation Company	Generated Net Generation (in MWh)		% Change
	2024	2023	
Hedcor	164,463	155,031	6%
Hedcor Sabangan	51,214	44,486	15%
LHC	253,910	233,780	9%
Hedcor Bukidnon	353,189	354,284	0%
Hedcor Sibulan	224,902	238,494	-6%
Hedcor Tudaya	30,059	38,713	-22%
TOTAL	1,077,737	1,064,788	1%

The 1% increase in KWh generation of 2024 in comparison to 2023 is attributed to high water inflow across hydropower plants of the Hedcor group starting August to December 2024. This change is also attributed to a reduction in outages in 2024, in contrast to 2023, when higher outages were experienced. Specifically, the Ferdinand L. Singuit (FLS) and Bakun AC Hydroelectric Power Plants (HEPPs) were impacted by Typhoon Egay, while FLS HEPP also faced recovery challenges from the 2022 earthquake.

The Hedcor Group controls and monitors its 22 Run-of-River plants via the National Operations Control Center, which was inaugurated in 2022. The Hedcor Group is also ISO-certified with Quality, Environmental, Asset Management, Information Security and Business Continuity Management System Certification, aligning its process and systems with international standards.

Luzon Hydro Corporation (LHC)

LHC, a wholly-owned Subsidiary of ARI, owns, operates, and manages the run-of-river Bakun AC hydropower plant with a total installed capacity of 74.80 MW located in Amilongan, Alilem, Ilocos Sur (the “Bakun AC Hydro Plant”). LHC was incorporated on September 14, 1994.

LHC was previously ARI’s Joint Venture with Pacific Hydro of Australia, a privately-owned Australian company. ARI assumed 100% ownership and control of LHC on May 10, 2011.

The Bakun AC Hydro Plant was constructed and operated under the government’s BOT scheme. Energy produced by the Bakun AC Hydro Plant, approximately 254 GWh annually, is delivered and taken up by NPC pursuant to a Power Purchase Agreement (“PPA”) and dispatched to the Luzon grid through the 230-kilovolt (kV) Bauang-Bakun transmission line of the National Grid Corporation of the Philippines (NGCP). Under the terms of its PPA, all of the electricity generated by the Bakun AC Hydro Plant will be purchased by NPC for a period of 25 years from February 2001. The PPA also requires LHC to transfer the Bakun AC Hydro Plant to NPC in February 2026, free from liens and without the payment of any compensation by NPC.

Hedcor, Inc. (Hedcor)

Hedcor was incorporated on October 10, 1986 by ACO as Baguio-Benguet Power Development Corporation. ARI acquired ACO’s 100% ownership interest in Hedcor in 1998.

In 2005, ARI consolidated all its mini-hydroelectric generation assets, including those developed by HEDC and Cleanergy, into Hedcor. Cleanergy is Hedcor’s brand for clean and renewable energy. Hedcor owns, operates, and manages run-of-river hydroelectric power plants in Northern Luzon and Davao City, with an increased combined net sellable capacity of 57.25 MW, attributed to the addition of the La Trinidad Hydro which started operations in July 2019.

The electricity generated from Hedcor’s hydropower plants are sold to the WESM and to Hedcor Sibulan pursuant to PPAs with the off-takers. Irisan 1 Hydro and La Trinidad Hydro sell energy under the Feed-in-Tariff (“FIT”) mechanism through a Renewable Energy Payment Agreement (“REPA”) with the National Transmission Corporation (“Transco”).

Hedcor Sibulan, Inc. (Hedcor Sibulan)

Hedcor Sibulan, a wholly-owned Subsidiary of ARI, owns, operates, and manages the hydropower plants composed of three cascading plants with a total installed capacity of 49.234 MW, located in Santa Cruz, Davao del Sur. Hedcor Sibulan consists of Sibulan A Hydro, Tudaya 1 Hydro, and Sibulan B Hydro. The energy produced by the Sibulan grid is sold to Davao Light through a PSA signed in 2022. The company was incorporated on December 2, 2005.

Hedcor Tudaya, Inc. (Hedcor Tudaya)

Hedcor Tudaya, a wholly-owned Subsidiary of ARI, owns, operates, and manages the Tudaya 2 Hydro run-of-river hydropower plant with an installed capacity of 8.137 MW, located in Santa Cruz, Davao del Sur. The company was incorporated on January 17, 2011.

The Tudaya 2 Hydro plant has been commercially operating since March 2014. At present, Tudaya 2 Hydro sells energy under the FIT mechanism through a REPA with Transco, following the commencement of the commercial operations of the WESM in Mindanao last January 2023.

Hedcor Sabangan, Inc. (Hedcor Sabangan)

Hedcor Sabangan, a wholly-owned Subsidiary of ARI, owns, operates, and manages the Sabangan run-of-river hydroelectric power plant (HEPP) with a net sellable capacity of 14.139 MW. The company was incorporated on January 17, 2011.

The Sabangan plant has been commercially operating since June 2015, and is selling under the FIT mechanism through a REPA with Transco. The plant is a pioneer hydropower plant in the Mountain Province region, harnessing the power of the Chico River.

Hedcor Bukidnon, Inc. (Hedcor Bukidnon)

Hedcor Bukidnon, a wholly-owned Subsidiary of ARI, owns, operates, and manages mini hydropower plants with a combined net sellable capacity of 73.322 MW located in Manolo Fortich, Bukidnon (the “Manolo Fortich Plant”). The company was incorporated on January 17, 2011.

The Manolo Fortich Plant is composed of the 45.936 MW Manolo Fortich 1 Hydro and the 27.387 MW Manolo Fortich 2 Hydro. Both plants harness the power of the Tanaon, Amusig, and Guihean rivers.

The Manolo Fortich Plant sells under the FIT mechanism through a REPA with TRANSCO, following the commercial operations of WESM in Mindanao last January 2023.

Large Hydros

SN Aboitiz Power-Magat, Inc. (SN Aboitiz Power-Magat)

SN Aboitiz Power-Magat is ARI’s Joint Venture with SN Power Philippines Inc. (SN Power), a leading Norwegian hydropower company with projects and operations in Asia, Africa, and Latin America. In October 2020, Norway-based Scatec ASA (Scatec) signed a binding agreement to acquire 100% of the shares in SN Power from the Norwegian Investment Fund for Developing Countries (Norfund) for a total equity value of US\$ 1,166 mn. As of February 28, 2025, SN Aboitiz Power-Magat is 60% owned by MORE, while Scatec, through SN Power Philippines, owned the remaining 40% equity interest.

Incorporated on November 29, 2005, SN Aboitiz Power-Magat owns and operates the Magat HEPP with a nameplate capacity of 360 MW located at the border of Ramon, Province of Isabela and Alfonso Lista, Ifugao Province (the “Magat Plant”), the 8.5-MW run-of-river Maris Main Canal 1 HEPP (the “Maris Plant”), and the 24-MW Magat Battery Energy Storage System (the “Magat BESS”) facility located in Ramon, Isabela. The Maris Plant, which is composed of two generator units with a nameplate capacity of 4.25 MW each, was completed in November 2017. The plant was granted entitlement to the FIT system in its operations pursuant to the COC issued by ERC in November 2017.

The Magat BESS is an energy storage system designed to provide ancillary services to the grid. Construction started in August 2022 and was completed within the first half of 2023. The Magat BESS received a Provisional Authority to Operate from the ERC and began commercial operation in the Reserve Market for ancillary services in January 2024. The addition of BESS supports the influx of variable renewable energy sources by helping to regulate the increasing frequency variability in the grid.

The Magat Plant was completed in 1983 and was turned over to SN Aboitiz Power-Magat in April 2007 after it won the bidding process conducted by PSALM. As a hydroelectric facility that can be started up in a short period of time, the Magat Plant is suited to act as a peaking plant with the capability to capture the significant upside potential that can arise during periods of high demand. This flexibility allows for the generation and sale of electricity at the peak demand hours of the day. This hydroelectric asset has minimal marginal costs, which Aboitiz Power believes gives it a competitive advantage in terms of economic dispatch order versus other fossil fuel-fired power plants that have significant marginal costs.

On April 25, 2019, the ERC certified the Magat Plant’s new Maximum Stable Load (Pmax) at 388 MW. The Magat Plant’s Units 1-4 were uprated by 2 MW each, or from 95 MW to 97 MW per unit. This means that the Magat Plant is capable of producing, under normal to best conditions, up to 388 MW as compared to

its nameplate capacity of 360 MW. The new Pmax of the four units was based on the capability test conducted by the NGCP sometime in 2018.

SN Aboitiz Power-Magat is an accredited provider of ancillary services to the Luzon grid. It sells a significant portion of its available capacity to NGCP, the system operator of the Luzon grid. SN Aboitiz Power-Magat's remaining capacity is sold as electric energy to the spot market through WESM and to load customers through bilateral contracts.

The Magat Plant's total sold quantities from spot energy generation and ancillary services (AS) during 2024 was at 2.8 TWh, an increase from 2023's sold capacity of 1.3 TWh. This is equivalent to a sold capacity factor of 82%, compared to 37% in 2023. Spot and AS revenue for the year 2024 was ₱6.38 bn, 33% higher than 2023's ₱4.78 bn. SN Aboitiz Power-Magat's Bilateral Contract Quantity (BCQ) margin for 2024 was a ₱1.38 bn gain, a substantial increase compared to the ₱0.38 bn BCQ in 2023. This improvement was primarily due to higher generation and reduced purchases from the spot market in 2024 compared to 2023.

In June 2019, SN Aboitiz Power-Magat switched on its first 200kW floating photovoltaic project over the Magat reservoir in Isabela. This was the first non-hydro renewable energy project of the SN Aboitiz Power Group. The facility holds a Self-Generating Facility Certificate of Compliance (SGF-COC) No. 23-S-04926L, valid from January 31, 2023 to January 30, 2028.

Following the impact of Typhoon Nika (Toraji) on November 11, 2024, SN AboitizPower-Magat, together with its technology partner, Ocean Sun AS, conducted a thorough assessment of the floating photovoltaic (FPV) facility. While the facility has performed successfully since its inauguration, the assessment confirmed that key structural components, including photovoltaic panels, dewatering pumps, and high-density polyethylene (HDPE) floating rings, sustained significant damage, making continued operation unfeasible.

With this in mind, SN AboitizPower-Magat began the decommissioning process on February 7, 2025. ERC was formally notified on January 30, 2025, and SN AboitizPower-Magat is now awaiting confirmation of the revocation of the facility's Certificate of Compliance (COC).

On October 22, 2020, the DOE issued a Green Energy Option Program (GEOP) Operating Permit to SN Aboitiz Power-Magat, which authorizes the company to enter into electricity supply contracts with qualified end-users according to the GEOP or RA No. 9513 or the Renewable Energy Act of 2008 (the "RE Law"). This permit is valid for five years. SN Aboitiz Power-Magat also has a RES license valid until December 17, 2025.

SN Aboitiz Power-Magat retained its Integrated Management System certifications for ISO 14001 for Environmental Management System, ISO 9001 for Quality Management System, ISO 45001 for Occupational Health and Safety Management Systems, and ISO 55001 Asset Management System, as verified and audited by DQS Philippines in 2025. The company recorded 3.7 mn manhours without lost time incident as of February 28, 2025.

SN Aboitiz Power-Benguet, Inc. (SN Aboitiz Power-Benguet)

SN Aboitiz Power-Benguet is the owner and operator of the Ambuklao-Binga Hydroelectric Power Complex, which consists of the 112.5-MW Ambuklao HEPP ("Ambuklao Plant") and the 140-MW Binga HEPP ("Binga Plant"), located in Brgy. Tinongdan, Itogon, Benguet Province. The company was incorporated on March 12, 2007. As of February 28, 2025, MORE owned 60% equity interest, while SN Power owned the remaining 40%.

The Ambuklao-Binga hydroelectric power complex was turned over to SN Aboitiz Power-Benguet in July 2008. The Ambuklao Plant underwent rehabilitation to increase its capacity from 75 MW to 105 MW, and the plant re-commenced operations in 2011. In 2022, the plant was further uprated to 112.5 MW. The Binga Plant also underwent refurbishment from 2010 to 2013, which increased capacity to 125 MW. In March 2017, SN Aboitiz Power-Benguet received its amended COC from ERC for all four units of the Binga Plant. The COC reflects the Binga Plant's latest uprating, raising its capacity to 140 MW. The Ambuklao and

Binga Plants sell capacity from spot energy generation and ancillary services to the national transmission system and related facilities that convey power.

The Ambuklao Plant's total sold capacity from spot energy generation and ancillary services in 2024 was 741 GWh, an improvement from 2023's sold capacity of 472 GWh. This was equivalent to a sold capacity factor of 75% during 2024, as compared to the 48% during 2023. The Binga Plant's total sold capacity from spot energy generation and AS in 2024 was 1.1 TWh, or 144% of the 771 GWh sold capacity in 2023. This is equivalent to a sold capacity factor of 90% for 2024, compared to 63% in 2023.

The resulting combined spot and AS revenue of the Ambuklao and Binga Plants for 2024 was ₱5.27 bn, compared to ₱5.87 bn in 2023. SN Aboitiz Power-Benguet's BCQ margin for 2024 was a ₱0.20 bn gain, marking a significant decline compared to the ₱1.22 bn BCQ margin in 2023. This was mainly driven by higher generation and lower purchases from the spot market during 2024 compared to 2023.

Both the Ambuklao and Binga Plants have retained their Integrated Management System certifications (ISO 14001 Environmental Management System, ISO 9001 Quality Management System, and ISO 55001 for Asset Management). The company also successfully migrated and was certified as ISO 45001 Occupational Health & Safety Management System from OHSAS 18001. The Ambuklao and Binga Plants jointly have just over 6.1 mn man hours of no lost time incident as of February 28, 2025.

Geothermal

AP Renewables, Inc. (APRI)

APRI, a wholly-owned Subsidiary of ARI, is one of the leading renewable power companies in the country. It owns the 234 MW Tiwi geothermal power facility in Albay and the 394.8 MW Makiling-Banahaw geothermal power facility in Laguna (the "Tiwi-MakBan Geothermal Facilities") located in Albay, Laguna, and Batangas. These geothermal facilities were acquired by APRI from PSALM in July 2008 and were formally turned over to APRI on May 25, 2009.

The Tiwi-MakBan Geothermal Facilities produce clean energy that is reasonable in cost, efficient in operation, and environment-friendly. As a demonstration of APRI's commitment to providing world-class services, adhering to environmental management principles to reduce pollution, complying with regulations, and ensuring a safe and healthy workplace, the company has been issued Integrated Management System (IMS) certifications by TÜV Rheinland Philippines that include the International Organization for Standardization (ISO) 9001:2015 (Quality), ISO 14001:2015 (Environment), and OSHAS (Occupational Health and Safety Series) 18001:2007 (Health and Safety).

On August 24, 2018, APRI and Philippine Geothermal Production Company, Inc. (PGPC) signed a Geothermal Resources Supply and Services Agreement (GRSSA) for the supply of steam and drilling of new production wells for the Tiwi-MakBan Geothermal Facilities until the expiration of APRI's initial DOE operating contract term on October 22, 2034. This ensures the long-term operations of the facilities. Under the GRSSA, PGPC has committed to drill at least 12 new production wells, with a minimum of 50 MW aggregated individual well capacity. The drilling campaign was completed in 2023. The GRSSA also provides for more equitable and competitive fuel pricing for APRI.

On May 20, 2022, the DOE issued the Certificate of Confirmation of Commerciality and Certificate of Additional Investment confirming the commercial viability of APRI's 17-MW Tiwi Binary Geothermal Power Plant Project, and authorizing the company to undertake construction and operation. The groundbreaking ceremony was held on January 17, 2023. In June 2024, the project commenced its testing and commissioning phase and is currently ongoing.

In December 2024, APRI commenced the pre-development stages of the 20-MW Bay Battery Energy Storage System (Bay BESS) Project. The Bay BESS project aims to provide an additional generating capacity to the existing Makban Plant A. Battery Energy Storage Systems play a crucial role in supporting the country's energy transition. This project emphasizes APRI's commitment for advanced energy storage solutions to enhance the integration of renewable energy sources into the national grid.

Solar

Maaraw San Carlos Holdings, Inc. (Maaraw San Carlos) and San Carlos Sun Power Inc. (SacaSun)

SacaSun owns and operates the 59-megawatt peak (MWp) solar photovoltaic (PV) power generation plant located in the San Carlos Ecozone, Barangay Punao, San Carlos City, Negros Occidental (the "SacaSun Plant").

SacaSun was incorporated on July 25, 2014, initially as a Joint Venture between ARI and SunEdison Philippines. The SacaSun Plant was inaugurated on April 19, 2016. On December 4, 2017, AboitizPower acquired 100% effective equity ownership in SacaSun.

Maaraw San Carlos is the holding company of SacaSun. It was incorporated on April 24, 2015, and is effectively owned by AboitizPower, through its wholly-owned Subsidiaries, ARI and AboitizPower International.

Aboitiz Solar Power, Inc. (ASPI)

ASPI owns and operates the 168.953-MWp solar PV power generation plant located in Barangay San Isidro, Calatrava, Negros Occidental (the "Calatrava Solar Power Plant").

The Calatrava Solar Power Plant was energized in December 2024.

ASPI was incorporated on May 29, 2012, and is wholly-owned by ARI.

RE Resources, Inc. (RERI)

RERI owns and operates the 46.658-MWp solar PV power generation plant located in Tarlac City, Tarlac (the "Armenia Solar Power Plant"), which was energized in November 2024.

RERI is also the project company for the construction of the 89.336-MWp solar PV power generation plant located in San Manuel, Pangasinan (the "San Manuel Solar Power Plant"). The San Manuel Solar Power Plant started construction in the third quarter of 2024.

RERI was incorporated on April 23, 2014, and is wholly-owned by ARI.

AP Renewable Energy Corporation (APREC)

APREC is the project company for the construction of the 221.082-MWp solar PV power generation plant located in Olongapo City, Zambales (the "Olongapo Solar Power Plant").

Construction of the Olongapo Solar Power Plant began in the first quarter of 2024.

APREC was incorporated on May 19, 2015, and is wholly-owned by ARI.

PV Sinag Power, Inc. (PV Sinag)

PV Sinag owns and operates the 94.717-megawatt peak (MWp) solar PV power generation plant located in Barangay Cayanga, Bugallon, Pangasinan (the "Cayanga-Bugallon Solar Power Plant"), as well as the 159.032-megawatt peak (MWp) solar PV power generation plant located in Barangay Laoag, Aguilar, Pangasinan (the "Laoag Solar Power Plant").

The Cayanga-Bugallon Solar Power Plant was completed in October 2023, and the plant began commercial operations in July 2024. Meanwhile, the Laoag Solar Power Plant was completed in April 2024, and began commercial operations in December 2024.

PV Sinag was incorporated on October 1, 2013, and is wholly-owned by ARI.

Aboitiz Power Distributed Energy, Inc. (APX1) and Aboitiz Power Distributed Renewables Inc. (APX2)

APX1 and APX2 (collectively, “APX”) are the project companies engaged in the business of operating rooftop PV solar systems in the distributed energy space. APX1 and APX2 are wholly-owned Subsidiaries of AboitizPower through ARI. APX1 and APX2 were incorporated in November 2016 and May 2002, respectively.

APX1 is a registered Philippine Economic Zone Authority (PEZA) company intended to serve customers operating within PEZA zones.

As of February 28, 2025, APX has approximately 5.581 MWp of rooftop solar projects, either operating under Power Purchase Agreements, turnkey solutions for customers, or about to start construction/installation.

Aboitiz Upgrade Solar, Inc. (AUSI)

AUSI was incorporated on February 8, 2024 as a joint venture between APX2 and Upgrade Energy Philippines, Inc. (UGEP). It is the company for the development and operations of rooftop or ground-mounted solar systems. APX2 and UGEP each own 50% of AUSI.

Energy Storage Systems

CELL Power Energy Corporation (CPEC)

CPEC is the project company engaged in the development of several energy storage systems (ESS) projects to provide ancillary services to grids across the country.

CPEC was incorporated on February 9, 2010 as Olongapo Energy Corporation, and is a wholly-owned Subsidiary of AboitizPower.

Wind

Cornerstone Energy Development, Inc. (CEDI)

On October 13, 2022, AboitizPower, through ARI, signed a JVA with global renewable energy company, Mainstream Renewable Power Philippines Holdings B.V. (Mainstream) to build a 90-MW onshore wind project in Libmanan, Camarines Sur (the “Camarines Sur Wind Power Project”).

On January 10, 2025 ARI reached an agreement with Mainstream for the transfer of the latter’s shares in CEDI through a Share Purchase Agreement, in favor of ARI. The closing of the agreement effectively allows ARI to own 100% of the total issued and outstanding stock of CEDI, and terminates previous agreements between ARI and Mainstream for the joint development of the Camarines Sur Wind Power Project.

CEDI was incorporated on January 19, 2011. As of February 28, 2025, ARI owns 100% of CEDI.

4 Barracuda Energy Corporation (4 Barracuda)

4 Barracuda was incorporated on January 24, 2017 and is a joint venture company between ARI and 7 Balboa Energy Holdings Inc. (7 Balboa). AboitizPower, through ARI, owns 41% interest in 4 Barracuda while 7 Balboa owns the remaining 59%.

Aura Energy Holdings, Inc.

Aura Energy was incorporated on August 12, 2022 and is a joint venture company between ARI and 7 Balboa Energy Holdings Inc. (7 Balboa). AboitizPower, through ARI, and 7 Balboa each own 50% interest in Aura Energy.

Others

Solviva Energy OPC (Solviva Energy)

Solviva Energy was incorporated in September 2023 as a residential solar provider, with the mission to make solar energy more accessible while providing a seamless customer experience. By focusing on high-quality equipment, solar expertise, and after-sales customer support, Solviva Energy enables homeowners to lower electricity bills and gain energy independence. The company aims to scale residential solar adoption across the Philippines, empowering households with reliable and affordable clean energy.

1882 Energy Ventures Incorporated (1882 Energy Ventures)

1882 Energy Ventures was incorporated on October 11, 2023 as a wholly-owned Subsidiary of AboitizPower and is committed to transforming energy for a better world by decentralizing energy. The company builds and scales start-ups that drive sustainable solutions in homes, businesses, mobility, and networks. The company has established Solviva Energy, a residential solar provider that was launched in 2023.

Renewables Pipeline

SN Aboitiz Power-Ifugao, Inc. (SN Aboitiz Power- Ifugao)

SN Aboitiz Power-Ifugao develops and executes pertinent activities for the proposed 120-MW Alimit HEPP and the 20-MW Olilicon HEPP.

In 2024, SN Aboitiz Power-Ifugao continued to develop and execute pertinent activities for the proposed 120-MW Alimit HEPP, and the 20-MW Olilicon HEPP. As per the Memorandum of Understanding with the National Irrigation Administration (NIA) in September 2023, the SN AboitizPower Group and NIA have continued to study the feasibility study of Alimit as a multipurpose facility, introducing an irrigation component to the already completed power component feasibility study. The potential multipurpose facility intends to contribute to energy security, food security, and provide flood control benefits. SN Aboitiz Power-Ifugao continues to evaluate its development strategy for these projects under a multipurpose scheme.

SN Aboitiz Power-Ifugao was incorporated on January 14, 2009. As of February 28, 2025, 60% equity interest in the company was owned by MORE, with the remaining 40% owned by SN Power.

Thermal Energy

Therma Power, Inc. (TPI)

AboitizPower's investments and interests in thermal energy projects are held primarily through its wholly-owned Subsidiary, TPI. TPI was incorporated on October 26, 2007. As of February 28, 2025, AboitizPower, by itself, through and/or with TPI, owned equity interests in the following thermal plants:

Generation Company	Percentage Ownership	Plant Name (Location)	Project Type	Net Sellable Capacity (MW)	Attributable Net Sellable Capacity (MW)	Off-takers
Coal Group						
TLI	100%	Pagbilao (Luzon)	Coal-fired	700	700	Bilaterals/WESM/ ASPA/RM

Notes:

* Sum figures will differ due to rounding effect

** Directly owned by AboitizPower

Oil Group

Therma Marine, Inc. (TMI)

TMI, a wholly-owned Subsidiary of TPI, owns and operates Power Barges Mobile 1 (previously known as PB 118) and Power Barges Mobile 2 (previously known as PB 117), which have a total installed capacity of 200 MW. Mobile 1 is currently moored at Barangay San Roque, Maco, Davao De Oro, while Mobile 2 is moored at Barangay Sta. Ana, Nasipit, Agusan del Norte. The company was incorporated on November 12, 2008.

On November 28, 2022, TMI commissioned its BESS as an auxiliary to Mobile 1. This is the first Hybrid Diesel-BESS in Southeast Asia and one of the BESS projects of AboitizPower. Located in Barangay San Roque, Maco, Davao De Oro, Mobile 1's BESS has a storage capacity of 49 MW and provides Ancillary Services to the Mindanao Grid.

Therma Mobile, Inc. (TMO)

TMO operates four barge-mounted power plants located at the Navotas Fish Port, Manila, which it acquired on May 27, 2011. As of February 28, 2025, the barge-mounted power plants have a net sellable capacity of 102 MW.

Effective February 14, 2025, two of TMO's Bunker C-Fired Power Barges – Mobile 4 and Mobile 6 – are undergoing mothballing, with a target return to service on February 1, 2027. This mothballing is covered by the appropriate Letter of Confirmation issued by the DOE, which followed TMO's filing of a letter of intent to mothball the said barges due to technical and commercial challenges that prevent or hamper their full utilization and continued safe and efficient operation. Meanwhile, TMO's generation activities will continue through its two other Bunker C-Fired power barges, TMO Mobile 3 and Mobile 5, whose operations will not be affected by said mothballing.

TMO was incorporated on October 20, 2008 and is a wholly-owned subsidiary of TPI.

East Asia Utilities Corporation (EAUC)

EAUC, a wholly-owned Subsidiary of TPI, was incorporated on February 18, 1993 and began full commercial operations on May 25, 1998.

EAUC owns, operates, and maintains a Bunker-C fired power plant with a rated capacity of 49.600 MW located in Mactan Economic Processing Zone (MEPZ 1), Lapu-Lapu City, Cebu. EAUC serves its capacity to MEPZ 1 and the WESM.

Therma Power Visayas, Inc. (TPVI)

TPVI, a wholly-owned Subsidiary of TPI, was awarded the winning bid for the privatization of the 25.3-hectare Naga Power Plant Complex (NPPC) located at Naga City, Cebu. The company was incorporated on October 8, 2007.

On July 16, 2018, TPVI embarked on the rehabilitation of the 44.580-MW (rated capacity) diesel plant. On August 7, 2020, TPVI commenced commercial operations and was first dispatched based on an offer into the WESM on August 26, 2020.

On February 17, 2025, the DOE approved the decommissioning of TPVI's 44.640 MW Naga Oil-Fired Power Plant (OFPP) and 0.440 MW Black Start Diesel Engine Generating Unit (BSDEGU) located at the Naga Power Plant Complex in Barangay Colon, Naga City, Cebu, effective March 31, 2025. The decommissioning was pursued in view of the technical and operational issues of the plant caused mainly by the advanced age of the diesel engines.

Cebu Private Power Corporation (CPPC)

CPPC is a joint venture between AboitizPower and the Vivant Group. The company was incorporated on July 13, 1994. As of February 28, 2025, AboitizPower beneficially owns 60% of CPPC.

CPPC owned and operated a 70.590-MW (rated capacity) Bunker C-fired power plant located in Ermita, Cebu City, under a build-operate-transfer (BOT) scheme. In 2023, CPPC's BOT contract was concluded with the transfer of assets upon the expiration of the contract term.

Southern Philippines Power Corporation (Southern Philippines)

Southern Philippines owns a Bunker C-fired power plant with net capacity of 55 MW located in Barangay Baluntay, Alabel, Sarangani, a municipality outside General Santos City in Southern Mindanao. Southern Philippines's 18-year Build-Operate-Own (BOO) arrangement with NPC expired on April 28, 2016. The company was incorporated on March 15, 1996.

After the expiration of its PSAs with Davao Light and Cotabato Light on April 18, 2018, Southern Philippines

operated briefly until July 2018 as a replacement power for a generation facility undergoing preventive maintenance. The company has since been on asset preservation status.

As of February 28, 2025, AboitizPower had a 20% equity interest in Southern Philippines, a Joint Venture among AboitizPower, Alsing Power Holdings, Inc., and Tomen Power (Singapore) Pte. Ltd.

Western Mindanao Power Corporation (WMPC)

WMPC owns and operates a Bunker C-fired power plant with net capacity of 100 MW located in Barangay Sangali, Zamboanga City, Zamboanga Peninsula in Western Mindanao. It was operated as a merchant plant after WMPC's 18-year BOO arrangement with the NPC expired in December 2015. The company was incorporated on March 15, 1996.

WMPC has an existing 50-MW PSA with Zamboanga City Electric Cooperative, Inc. and has been registered with the WESM as a direct member starting April 23, 2020. WMPC has been issued an Ancillary Services (AS) Certificate by the NGCP effective from September 20, 2023 to September 19, 2025. WMPC has a five-year ASPA with NGCP beginning April 26, 2019, for 50-MW non-firm Dispatchable Reserve, and Reactive Power Support and Blackstart Support Services.

WMPC participated in NGCP's competitive selection process. The invitation to bid was published on January 31, 2023, for the supply of ancillary services to the NGCP. NGCP subsequently awarded the ASPA to WMPC on April 18, 2023, on a firm basis. The awarded ancillary services contracted capacity to WMPC consist of 30-MW for dispatchable reserve, 15-MVAR/20-MW for reactive power support, and for black start service for the plant's certified capacity of 100-MW, pending ERC approval.

WMPC is also a participant in the Reserve Market since its commercial operations began on January 26, 2024. Currently, the plant continues to provide ancillary services to the Mindanao Grid.

As of February 28, 2025, AboitizPower had a 20% equity interest in WMPC, a Joint Venture among AboitizPower, Alsing Power Holdings, Inc., and Tomen Power (Singapore) Pte. Ltd.

Coal Group

Therma Luzon, Inc. (TLI)

TLI, a wholly-owned Subsidiary of TPI, was the first IPPA in the country, and assumed the role of the registered trader of the contracted capacity of the 700-MW net (2x350 MW net contracted capacity) coal-fired power plant located in Pagbilao, Quezon (the "Pagbilao Plant"). TLI was incorporated on October 20, 2008.

As the IPPA, TLI is responsible for procuring the fuel requirements of, and selling the electricity generated by the Pagbilao Plant. The Pagbilao Plant is currently owned and operated by TeaM Energy Corporation (TeaM Energy). Under the IPPA agreement, TLI has the right to receive the transfer of Pagbilao Unit 1 and Unit 2 at the end of the Energy Conversion Agreement. Over the years, TLI's capacity was contracted to various cooperatives, private distribution utilities, directly connected customers, and to affiliate RES. TLI was granted a RES license on August 12, 2020, which is valid until August 11, 2025.

Pagbilao Energy Corporation (PEC)

PEC owns and operates the 400-MW Unit 3 coal-fired power plant (Pagbilao Unit 3) within the Pagbilao Power Station, located in Pagbilao, Quezon. PEC is a Joint Venture between AboitizPower and TeaM Energy, through their respective Subsidiaries, TPI and TPEC Holdings Corporation. Pagbilao Unit 3 is not covered by either TLI's IPPA agreement with PSALM or TeaM Energy's BOT contract with NPC, and commenced operations in March 2018.

Through TPI, AboitizPower had 50% equity interest in PEC, while TPEC Holdings Corporation owned the remaining 50% as of February 28, 2025.

The output of Pagbilao Unit 3 is sold to TLI and TPEC.

Therma South, Inc. (TSI)

TSI, a wholly-owned Subsidiary of TPI, owns and operates the 300-MW net (2x150MW) circulating fluidized bed (CFB) coal-fired power plant located in Davao City and Sta. Cruz, Davao del Sur. TSI was incorporated on November 18, 2008. Commercial operations for Unit 1 and Unit 2 began in September 2015 and February 2016, respectively.

TSI contributes to the continuing growing power requirements of Mindanao by providing stable and cost-effective base load power. TSI supplies power to various private distribution utilities and energy cooperatives. TSI seeks to sustain the positive impact it has brought to its host communities through various educational, livelihood, and enterprise development programs, benefitting children, students, small and medium enterprise owners, and its employees.

Therma Visayas, Inc. (TVI)

TVI owns and operates the 300-MW net (2x150 MW net) CFB coal-fired power plant located in Toledo City, Cebu. Commercial operations for Unit 1 and Unit 2 began in April and August 2019, respectively. TVI supplies power to distribution utilities and also provides ancillary services.

As of February 28, 2025, AboitizPower, through TPI, effectively owns an 80% equity interest in TVI, with the remaining 20% being held by the Vivant Group.

Abovant Holdings, Inc. (Abovant) and Cebu Energy Development Corporation (Cebu Energy)

Abovant is a Joint Venture between AboitizPower and the Vivant Group, and serves as the holding company for shares in Cebu Energy. The company was incorporated on November 28, 2007.

Cebu Energy was incorporated on December 5, 2008 by Abovant and Global Formosa Power Holdings, Inc. (Global Formosa), a Joint Venture between Global Business Power Corporation and Flat World Limited. The company owns the 3x82-MW CFB coal-fired power plant situated within the Toledo Power Complex in Barangay Daanlungsod, Toledo City, Cebu. Cebu Energy declared commercial operations on February 26, 2011, and is the first commercial clean-coal facility in the country.

Cebu Energy consistently ensures delivery of the highest level of service, and actively undertakes accreditations on Quality Management System (ISO 9001:2015), Environmental Management System (ISO 14001:2015), and Occupational Health and Safety Management System (ISO 45001:2018). The company provides power to the province of Cebu and its neighboring province, Bohol.

As of February 28, 2025, Abovant had a 44% equity interest in Cebu Energy, while Global Formosa owned the remaining 56%. Consequently, AboitizPower, through TPI, held a 26.4% effective ownership interest in Cebu Energy.

Redondo Peninsula Energy, Inc. (RP Energy)

RP Energy was incorporated on May 30, 2007 to construct, own, and operate the 2x300-MW (net) coal-fired power plant located in the Redondo Peninsula of Subic Bay within the Subic Bay Freeport Zone (SBFZ), Subic, Zambales.

RP Energy was originally a Joint Venture between AboitizPower and TCIC. MGen acquired a majority interest in RP Energy by virtue of a share purchase agreement with TPI on July 22, 2011. As of February 28, 2025, AboitizPower, through TPI, and TCIC each retained a 25% stake in RP Energy.

SPI Power Incorporated (Formerly STEAG State Power Inc.) (SPI)

Incorporated in December 19, 1995, SPI is the owner and operator of a 210 MW (net) coal-fired power plant located in PHIVIDEC Industrial Estate in Misamis Oriental, Northern Mindanao (the “SPI Power Plant”). The SPI Power Plant, consisting of two units, was built under a BOT arrangement and started commercial operations on November 15, 2006. It has a 25-year PPA with NPC backed by a Performance Undertaking issued by the Philippine government. PSALM acceded to the PPA under the Accession Undertaking.

SPI holds valid COCs from the ERC, including those for the following self-generation facilities: (i) 400kW diesel generator; and (ii) 1.25MW diesel generator. From time to time, SPI’s power plant units are required to be in economic shutdown by PSALM, in accordance with its PPA. For the years 2023 and 2024, the power plant units were not required to be in economic shutdown.

In September 2022, AboitizPower acquired a 35.4% interest in SPI from STEAG GmbH (STEAG). The transaction was completed in January 2024, resulting in AboitizPower’s 69.4% effective equity interest in SPI. On May 15, 2024, AboitizPower acquired from STEAG its remaining 15.6% interest in SPI.

On January 10, 2025, the SEC approved the change in SPI’s corporate name from STEAG State Power Inc. to SPI Power Incorporated.

As of February 28, 2025, AboitizPower is the legal and beneficial owner of an 85% equity interest in SPI and La Filipina Uy Gongco Corporation held the remaining 15%.

AA Thermal, Inc.

On May 2, 2019, AboitizPower completed its acquisition of 49% voting stake and 60% economic stake in AA Thermal, AC Energy Infrastructure Inc.’s (formerly: AC Energy, Inc.; ACEIC) thermal platform in the Philippines.

The AA Thermal platform holds indirect limited partnership interests in each of GMEC and GNPD, where AboitizPower, through TPI, already holds direct partnership interests.

GNPower Mariveles Energy Center Ltd. Co. (GMEC)

GMEC, formerly known as GNPower Mariveles Coal Plant Ltd. Co., is a private limited partnership organized and registered with the Securities and Exchange Commission (SEC) on May 13, 2007 engaged in the operation and ownership of approximately 2x345 MW (gross) coal-fired power plant (the “GMEC Facility”) in Mariveles, Bataan.

The GMEC Facility is in Bataan Province, at the north entrance to Manila Bay. It is one of the lowest-cost power generation facilities in the Philippines that fully complies with the most stringent local (DENR) and international (World Bank and Equator Principles) environmental and emission standards.

The equity owners of GMEC are:

- (i) TPI;
- (ii) ACEIC; and
- (iii) Power Partners Ltd. Co. (“Power Partners”).

As of February 28, 2025, AboitizPower had a 78.3% effective partnership interest in GMEC.

GNPower Dinginin Ltd. Co. (GNPD)

GNPD is a private limited partnership organized and registered with the SEC on May 21, 2014 engaged in the operation and ownership of a 2x725 MW (gross) supercritical coal-fired power plant and a private port facility located in Mariveles, Bataan.

The equity investor consortium which owns GNPD consists of a partnership among: (i) TPI; (ii) ACEIC; and (iii) Power Partners.

At present, GNPD is the largest coal-fired power plant in the country utilizing supercritical technology, which fully complies with the most stringent local (DENR) and international (World Bank and Equator Principles) environmental and emission standards.

As of February 28, 2025, AboitizPower owned a 70% effective partnership interest in GNPD.

Others

Therma Cebu Energy, Inc. (Therma Cebu)

Incorporated on August 3, 2022, Therma Cebu is AboitizPower's initial venture into the fuel storage terminal sector.

On August 18, 2023, TPI entered into a JVA with Sta. Cruz Storage Corporation to build and operate a fuel storage facility at the Naga Power Plant Complex in Naga City, Cebu. TPI and SCSC own 50% each of Therma Cebu.

This project is a strategic infrastructure development aimed at enhancing the country's energy security and economic growth, particularly in the Cebu region.

Therma NatGas Power, Inc. (TNGP)

TNGP was incorporated on March 10, 2023 and is a wholly-owned Subsidiary of TPI. On March 1, 2024, TNGP entered into an Investment Agreement with Meralco PowerGen Corporation (MGen) to acquire a 40% equity interest in Chromite Gas Holdings, Inc. (CGHI).

On January 27, 2025, TNGP and MGen, through CGHI, completed (i) its investment in South Premiere Power Corp. (SPPC), Excellent Energy Resources Inc. (EERI), and Ilijan Primeline Industrial Estate Corp. (IPEIC), and (ii) its co-investment with San Miguel Global Power Corporation in Linseed Field Corporation.

Other Generation Assets

As of February 28, 2025, Cotabato Light maintained a stand-by rated capacity of 9.641-MW Bunker C-fired power plant with a dependable capacity of 4.45 MW capable of supplying approximately 11.03% of its requirements.

Future Projects

AboitizPower continues to assess the feasibility of new power generation projects focusing to address the needs of its customers by providing reliable supply, at a reasonable cost, and with minimal impact on the environment and communities. Other factors taken into consideration include the proposed project's land use requirements, access to a power grid, energy yield analysis, fuel supply arrangements, availability of water, local requirements for permits and licenses, acceptability of the project to the communities and people it will affect, ability of the project to generate electricity at a competitive cost, and the existence of potential purchasers of the electricity generated. For the development of a new power project, the Company, its partners, and its suppliers are required to obtain all national and local permits and approvals before the commencement of construction and commercial operations, including those related to the project site, construction, environment, land use planning/zoning, operations licenses, and similar approvals.

DISTRIBUTION OF ELECTRICITY

The Aboitiz Group has more than 85 years of experience in the Philippine power distribution sector.

With ownership interests in nine Distribution Utilities, the Company believes that it is currently one of the largest electricity distributors in the Philippines. AboitizPower's Distribution Utilities collectively supply electricity to

franchise areas covering a total of 18 cities and municipalities and five economic zones across Luzon, Visayas, and Mindanao.

In 2020, the wholly-owned Distribution Utilities and Visayan Electric completed a rebranding initiative to modernize the look and feel of the brands and visually show their relation to AboitizPower.

The Distribution Utilities' earnings contribution to AboitizPower's business segments in 2024 was equivalent to 15%. The Distribution Utilities had a total customer base of 1,200,987 as of end-2024. This was 1,169,606 as of end-2023, and 1,137,402 as of end-2022.

The table below summarizes the key operating statistics of the Distribution Utilities for each of the past three years:

Company	Electricity Sold (MWh)			Peak Demand (MW)			No. of Customers		
	2024	2023	2022	2024	2023	2022	2024	2023	2022
Davao Light	3,009,086	2,842,932	2,699,306	537	510	472	494,710	482,427	470,868
Cotabato Light	228,387	203,930	189,763	44	38	35	52,380	50,499	49,055
Visayan Electric	3,933,149	3,548,720	3,175,656	678	615	588	513,491	501,080	486,414
SFELAPCO	871,159	810,311	786,935	219	198	151	134,691	130,148	126,313
Subic Enerzone	297,094	287,300	282,997	60	57	55	3,697	3,674	3,615
Mactan Enerzone	80,652	88,600	100,881	17	20	21	88	90	86

Total	8,886,926	8,203,148	7,650,434	1,653	1,528	1,407	1,200,987	1,169,606	1,137,402

Visayan Electric Company, Inc. (Visayan Electric)

Visayan Electric is the second largest privately-owned distribution utility in the Philippines in terms of customer size and annual MWh sales. The company supplies electricity to a region covering 674 square kilometers (sq. km.) in the island of Cebu with a population of approximately 1.7 million (mn). Visayan Electric has 19 power substations and one mobile substation that serve the electrical power needs of various cities, municipalities, and barangays in the island and province of Cebu.

Visayan Electric is the Aboitiz Group's first involvement in the power industry, with the acquisition by some family members of 20% ownership interest in the early 1900s. Directly and through its predecessors-in-interest, the company has been in the business of distributing electricity in Cebu since 1905. In 1928, Visayan Electric Company, S.A. was granted a 50-year distribution franchise by the Philippine Legislature. The franchise was renewed in September 2005 for a period of 25 years or until September 2030.

As of end-2024, Visayan Electric has energized 100% of the barangays, and electrified 99.37% of all households within its franchise area. It has also completed the extension of its distribution facilities, which will allow it to serve all the customers within its franchise area. Visayan Electric's goal of 100% total electrification, including household electrification, starting with two cities where 2,013 households are set to be electrified upon release of funding from the DOE.

Visayan Electric is true to its vision of becoming a world-class electric utility by implementing innovations such as the implementation of a full digital substation using IEC 61850 station and process bus for its Paknaan substation. The newest application for distribution automation, Fault Location, Isolation, and Service Restoration (FLISR), is an ongoing project to be applied to four feeders within the franchise.

Visayan Electric's Underground Distribution System (UDS) project, which began in 2013, aims to convert overhead conductors to underground cables along Cebu City's Sinulog Route with a total length of approximately five kilometers (km). As of February 28, 2025, approximately 3.60 kms. had been completed but has been deferred due to prioritization of other major projects for reinforcement and improvement of the capacity in the franchise area.

Visayan Electric has ongoing projects to reinforce and improve the existing capacity and reliability of its distribution system through the addition of a new substation in San Roque, Talisay, subtransmission substation upgrades in Naga and San Fernando, Cebu, and a new substation in Bajac, Liloan. This will enhance electricity service for the increasing demand of both commercial and densely residential customers within its franchise area.

Visayan Electric's total systems loss was 6.44% as of February 2025. This included a feeder loss of 4.94%, which is below the government-mandated feeder loss cap for 2024 of 5.50%.

As of February 28, 2025, AboitizPower directly held a 55.26% equity interest in Visayan Electric. 34.81% was owned by the Vivant Group.

Davao Light & Power Company, Inc. (Davao Light)

Davao Light is the third largest privately-owned electric distribution utility in the country in terms of customer size and annual kWh sales. Its franchise area covers two cities and three municipalities in the Davao region, with a population of approximately 2.23 mn and a total area of 3,561 sq. kms.

Davao Light was incorporated on October 11, 1929, and was acquired by the Aboitiz Group in 1946. The company's original 50-year franchise, covering Davao City, was granted by the Philippine Legislature in November 1930. A 1976 referendum expanded the franchise to include the municipalities of Carmen, Panabo, and Santo Tomas. In 1998, the municipality of Dujali was created from parts of Panabo and Carmen. Pursuant to RA No. 11515 which lapsed into law on December 26, 2020, Davao Light's franchise was extended for an additional 25 years from 2025, or until 2050.

Davao Light's renewable energy power supply comes from hydropower plants of NPC-PSALM hydro, Hedcor's Sibulan and Talomo plants, and a portion sourced from WESM. This makes up nearly 51% of its renewable energy portfolio which helped reduce Davao Light's overall electricity rate.

To meet increasing power demand across its service area, Davao Light completed three major substation projects in 2024. In April 2024, the second 150 megavolt-ampere (MVA) power transformer unit at the ERA Substation was inaugurated, boosting capacity at the subtransmission level to serve the increasing power requirement in Davao City downtown and nearby areas. This was followed in November 2024 by the launching of the 33 MVA substation in Gredu, Panabo City. Subsequently, another 50 MVA substation in Lanang, Davao City was completed in December 2024.

All three substations employ digital technology, with the Gredu and Lanang facilities also utilizing green technology as part of their sustainability initiatives.

To respond to its customers' different digital needs, Davao Light continues to provide diverse digital platforms and online facilities. Its mobile application, MobileAP, which allows online access to billing and accounts, is continuously upgraded to include additional features such as bills payment for enhanced user convenience. eBillTxt was launched as a supplemental service that allows customers to receive electronic bills via SMS.

Davao Light is certified under the International Standards Organization for: ISO 9001:2015 or the Quality Management System (QMS), ISO 45001:2018 - Occupational Health and Safety (OH&S) Management System, ISO 14001:2015 – Environmental Management (EM) System, and ISO 550001:2014 Asset Management System (ASM).

Davao Light has made significant strides in enhancing its digital services. As a result of the Company's intensified digital initiatives, 66% of its customer base, equivalent to 325,000 accounts, has transitioned from paper bill to electronic billing (e-Bill). The MobileAP mobile application has reached 497,000 users in 2024.

As of end-2024, Davao Light's total systems loss was at 9.33%. This included a feeder loss of 5.21%, which is below the government-mandated feeder loss cap for 2024 of 5.50%.

As of February 28, 2025, AboitizPower directly owned a 99.94% equity interest in Davao Light.

Cotabato Light and Power Company (Cotabato Light)

Cotabato Light supplies electricity to Cotabato City and portions of the municipalities of Sultan Kudarat, and Datu Odin Sinsuat, Maguindanao, with its franchise covering a land area of 191.20 sq. kms. Incorporated in April 1938, Cotabato Light's original 25-year franchise was granted by the Philippine Legislature through RA No. 3341 in June 1939. The most recent renewal of the franchise was in June 2014 for a period of 25 years, or until 2039.

Cotabato Light also maintains a standby 9.641-MW Bunker C-fired diesel power plant capable of supplying approximately 11.03% of its franchise area requirements. This plant can supply electricity in case of supply problems with its power suppliers or NGCP and can be used for voltage stability, when necessary, a benefit available to Cotabato Light's customers.

Cotabato Light's total systems loss as of February 2025 was at 6.48%. This included the distribution feeder loss of 4.84%, which is below the government-mandated feeder loss cap in 2024 of 5.50%. Cotabato Light is continuously innovating its strategies and processes to further reduce its distribution feeder loss to 5%.

As of February 28, 2025, AboitizPower directly owned a 99.94% equity interest in Cotabato Light.

San Fernando Electric Light & Power Co., Inc. (SFELAPCO)

SFELAPCO was incorporated on May 17, 1927 and was granted a municipal franchise in 1927. The most recent renewal of its franchise was in March 2010 for a period of 25 years.

SFELAPCO's franchise in the City of San Fernando, Pampanga covers an area of 78.514 sq. kms. and the municipality of Floridablanca and Brgys. Talang and Ligaya, Municipality of Guagua, Pampanga with an estimated area of 175.5 sq. kms. For 2024, SFELAPCO has a total of 286.20 MVA of substation capacity with a peak load of 177.26 MW including its 69kv customers.

SFELAPCO's total systems loss as of end-2024 was 5.11%. This included a feeder loss of 3.92% which is below the government-mandated feeder loss cap in 2024 of 5.50%.

As of February 28, 2025, AboitizPower had an equity interest of 43.727% in SFELAPCO.

Subic Enerzone Corporation (Subic Enerzone)

On June 3, 2003, Subic Enerzone was incorporated as a Joint Venture owned by a consortium including Davao Light, AEV, and SFELAPCO, among others, to undertake management and operation of the SBFZ power distribution utility.

Subic Enerzone serves a total of 3,696 customers, consisting of 91 industrial locators, 1,369 commercial locators, 2,114 residential customers, 99 streetlights and 23 industrial locators under RES.

Subic Enerzone's total systems loss as of end-2024 was 4.76%. This included a feeder loss of 2.25%, which is below the government-mandated feeder loss cap in 2024 of 5.50%.

As of February 28, 2025, AboitizPower owned, directly and indirectly through Davao Light, a 99.98% equity interest in Subic Enerzone.

Mactan Enerzone Corporation (Mactan Enerzone)

Mactan Enerzone was incorporated in February 2007 when AboitizLand spun off the power distribution system of its Mactan Export Processing Zone II (MEPZ II) project. The MEPZ II project, which was launched in 1995, was operated by AboitizLand under a BOT agreement with the Mactan-Cebu International Airport Authority (MCIAA).

Mactan Enerzone sources its power from Green Core Geothermal Incorporated pursuant to its Contract for the Supply of Electric Energy (CSEE).

Mactan Enerzone serves a total of 38 captive industrial locators, 35 captive commercial locators, and 11 industrial locators under RES, and four industrial locators under the Green Energy Option Program (GEOP).

Mactan Enerzone's total system loss as of end-2024 was 1.31%. This included a feeder loss of 0.66%, which is below the government-mandated feeder loss cap for 2024 of 5.50%.

As of February 28, 2025, AboitizPower owned a 100% equity interest in Mactan Enerzone.

Balamban Enerzone Corporation (Balamban Enerzone)

Balamban Enerzone was incorporated in February 2007 when CIPDI, a Joint Venture between AboitizLand and THC, spun off the power distribution system of the West Cebu Industrial Park – Special Economic Zone (WCIP-SEZ). WCIP-SEZ is a special economic zone for light and heavy industries located in Balamban, Cebu.

Balamban Enerzone serves a total of ten captive industrial customers, 15 captive commercial customers, and six contestable industrial customers.

Balamban Enerzone's total systems loss as of end-2024 was 0.53%. This included a feeder loss of 0.21%, which is below the government-mandated feeder loss cap for 2024 of 5.50%.

As of February 28, 2025, AboitizPower directly owned a 100% equity interest in Balamban Enerzone.

Lima Enerzone Corporation (Lima Enerzone)

Lima Enerzone was incorporated as Lima Utilities Corporation on June 5, 1997 to serve and provide locators within the Lima Technology Center (LTC) with a reliable and stable power supply.

Lima Enerzone serves a total of 132 captive industrial locators, 21 captive commercial locators, 1,523 captive residential customers, eight street lamps, and 28 industrial locators under RES.

As of end-2024, Lima Enerzone's total systems loss was 2.89%. This included a feeder loss of 1.10%, which is below the government-mandated feeder loss cap for 2024 of 5.50%.

As of February 28, 2025, AboitizPower directly owned a 100% equity interest in Lima Enerzone.

Malvar Enerzone Corporation (Malvar Enerzone)

Malvar Enerzone was incorporated on June 9, 2017 to serve and provide locators within the Light Industry & Science Park IV (LISP IV) in Malvar, Batangas. Malvar Enerzone will manage the operation and maintenance of the power distribution of LISP IV for 25 years. LISP IV has two 50-MVA transformers to provide reliable and quality power to locators, which are mostly from manufacturers and exporters.

Malvar Enerzone served a total of 12 captive commercial locators, 20 captive residential customers, 148 captive residential customers, five streetlights and two industrial locators under RES.

As of end-2024, Malvar Enerzone's total system loss was 2.63%. This included a feeder loss of 0.91%, which is below the government-mandated feeder loss cap for 2024 of 5.50%.

As of February 28, 2025, AboitizPower directly owned a 100% equity interest in Malvar Enerzone.

RETAIL ELECTRICITY AND OTHER RELATED SERVICES

One of the objectives of electricity reform in the Philippines is to ensure the competitive supply of electricity at the retail level. With the start of commercial operations of Open Access, large-scale customers are allowed to source electricity from Retail Electricity Suppliers (RES) licensed by ERC. The AboitizPower RES entities include Adventenergy, Adventpower, and Prism Energy which are also registered under the Renewable Energy Market and were granted operating permits by the DOE, valid for five years, allowing them to participate in the GEOP.

Adventpower, Inc. [Formerly: Aboitiz Energy Solutions, Inc. (AESI)]

Adventpower is engaged in the business of retail electricity supply and energy solutions and services. It was granted a license to act as a RES that is valid until October 28, 2028. The company was incorporated on August 11, 1998. The company name was changed to Adventpower, Inc. in 2024 to better align with Adventenergy, AboitizPower's brand for retail electricity services and innovative solutions.

In 2024, Adventpower supplied retail electricity to a total of 181 contestable customers, with an aggregate capacity of 465 MW and total energy consumption of 1,713 mn kWh. As of February 28, 2025, AboitizPower owned a 100% equity interest in Adventpower.

Adventenergy, Inc. (Adventenergy)

Adventenergy is engaged in the business of retail electricity supply and energy solutions and services. It was granted a license to act as a RES that is valid until December 17, 2028. The company was incorporated on August 14, 2008. Adventenergy was officially launched as AboitizPower's brand for retail electricity services and innovative solutions in March 2024.

Adventenergy differentiates itself from competition by sourcing a portion of its electricity requirements from renewable sources. As a result, an increasing number of companies are opting to source a part, if not the majority, of their electricity supply from Adventenergy as an environmental initiative. Currently, Adventenergy serves retail customers within and outside economic zones.

In 2024, Adventenergy supplied retail electricity to 313 customers with an aggregate capacity of 709 and total consumption of 4,346 mn kWh. With Adventenergy's participation in the GEOP, it has supplied seven qualified end-users with a total consumption of 13 mn kWh in 2024.

As of February 28, 2025, AboitizPower owned a 100% equity interest in Adventenergy.

Prism Energy, Inc. (Prism Energy)

Prism Energy was incorporated in March 2009 as a Joint Venture between AboitizPower and Vivant Corporation. It was granted a license to act as a RES valid until November 21, 2028.

Prism Energy is envisioned to serve Contestable Customers in the Visayas region. As a RES, Prism Energy provides its customers with contract options for electricity supply that is based on their operating requirements. In 2024, Prism Energy supplied retail electricity to seven customers with a total energy consumption of 171,000 kWh. Currently, Prism Energy does not serve any contestable customers.

As of February 28, 2025, AboitizPower directly owned a 60% equity interest in Prism Energy.

RES Business Segments

AboitizPower also serves the Retail market through the RES business segment of TLI and APRI.

TLI has a RES license valid until August 11, 2025. In 2024, it served four contestable customers with an aggregate

capacity of 3.5 MW and total energy delivered of 14 mn kWh.

APRI has a RES license valid until February 17, 2030. In 2024, it served one contestable customer with a capacity of 1.5 MW and total energy delivered of 3 mn kWh.

APRI and TLI are also registered members of the Renewable Energy Market since July 6, 2021. They were granted operating permits by the DOE, valid for five years to participate in GEOP as well.

SN Aboitiz Power – RES, Inc. (SN Aboitiz Power - RES)

SN Aboitiz Power-RES caters and offers energy supply and solutions tailored to the needs and preferences of customers under the Retail Competition and Open Access (RCOA) market. Starting February 2021, the RCOA market has lowered its threshold to Phase III, allowing electricity end-users with an average peak demand of at least 500kW to source their electricity requirements from their RES of choice.

SN Aboitiz Power-RES is the retail arm of the SN Aboitiz Power Group. It caters to Contestable Customers and electricity consumers using an average of at least 500 kW in the last twelve months across all industries under Open Access. It offers energy supply packages tailored to its customers' needs and preferences.

As of February 28, 2025, MORE owns a 60% equity interest in SN Aboitiz Power-RES, with the remaining 40% owned by SN Power Philippines.

Mazzaraty Energy Corporation (Mazzaraty)

Mazzaraty was incorporated on June 19, 2014 as a joint venture among Aboitiz Power, Pasudeco Corporation, L&R Development, Inc., and Alfecon Realty, Inc. It was granted a license to act as a RES until June 18, 2023 and subsequently renewed up to June 2028. Mazzaraty's RES contracts with its customers expired in 2021. The company was unable to supply electricity to customers in 2022 due to high coal prices.

As of February 28, 2025, AboitizPower owned 44.87% of Mazzaraty.

Others

AboitizPower International Pte. Ltd. (AboitizPower International)

Established on August 6, 2014 in Singapore, AboitizPower International is the holding company of the Company's investments abroad. AboitizPower International owns 100% of the following project companies: AP Lariang Pte. Ltd. and Cleanergy Asia Power Holdings Pte. Ltd.

Potentia Insurance Pte. Ltd. (Potentia)

Potentia is a captive insurance company wholly-owned by AboitizPower, established and operating in Singapore. Incorporated on July 4, 2024, Potentia was created to serve the insurance needs of its parent group by underwriting internal risks and driving risk management performance of its insured entities.

On September 1, 2024, Potentia issued its first insurance policy through AboitizPower's One Master Global Industrial All Risks Insurance Program. Potentia is currently focused on identifying additional opportunities to expand its involvement in other strategic insurance programs of the group.

(ii) Sales

The operations of AboitizPower and its Subsidiaries and Affiliates are based only in the Philippines.

Comparative amounts of revenue, profitability and identifiable assets are as follows:

	2024	2023	2022
Gross Income	₱197,492	₱207,100	₱193,994
Operating Income	41,195	31,785	29,803
Total Assets	₱517,616	₱487,203	₱477,594

Note: Values are in Million Pesos. Operating income is operating revenue net of operating expenses.

Comparative amounts of revenue contribution and corresponding percentages to total revenue by business group are as follows:

	2024		2023		2022	
Power Generation	₱120,666	53%	₱137,376	57%	₱137,480	59%
Power Distribution	58,895	26%	54,735	23%	58,951	25%
Retail Electricity Supply	46,154	20%	46,396	19%	19,875	9%
Services	1,606	1%	2,187	1%	17,042	7%
Total Revenue	227,320	100%	240,694	100%	233,348	100%
Less: Eliminations	29,828		-33,594		-39,355	
Net Revenue	₱197,492		₱207,100		₱193,994	

Note: Values are in Million Pesos.

(iii) Distribution Methods of the Products or Services

Power Generation Business

The AboitizPower's Generation Companies sell their capacities and energy through bilateral PSAs with private distribution utilities, electric cooperatives, RES, other large end-users, through ASPA with NGCP, and through the WESM, a co-optimized energy and reserves market. The majority of AboitizPower's Generation Companies have transmission service agreements with NGCP for transmission of electricity to the grid.

Distribution Utilities Business

Ancillary Services are necessary to help ensure a reliable and stable grid, which co-exist with the energy market or WESM. NGCP signs ASPAs with AS-certified generators to fulfill specific ancillary service requirements per grid. Currently, SN Aboitiz Power-Magat, SN Aboitiz Power-Benguet, TMI, TMO, TLI, APRI, Cebu Energy, and WMPC have ASPAs with NGCP. In the Luzon grid, the SN Aboitiz Power Group delivers regulating, contingency, and dispatchable reserves, blackstart service, and reactive power support through its Ambuklao, Binga, and Magat Plants. TMO, on the other hand, is located at the load center in Metro Manila and serves the necessary voltage support and dispatchable reserve. In addition, TLI's Pagbilao and APRI's Makban plants deliver contingency reserves and Reactive Power Support AS, respectively. In the Visayas, AboitizPower delivers Contingency Ancillary Service through Cebu Energy. TMI provides both contingency and dispatchable reserves requirements in Mindanao. As a development to the Ancillary Service Contracting Process, the DOE mandated that AS will now undergo Competitive Selection Process (CSP), similar to Energy CSP. DOE Department Circular No. DC 2021-10-0031 entitled "Prescribing the Policy for the Transparent and Efficient Procurement of Ancillary Services by the System Operator", details the provisions of the CSP which became effective on October 29, 2021. This is a welcome development for a more transparent and efficient process. AboitizPower actively participates in this process to fulfill the most-needed AS requirements across the nation.

In addition, the Hedcor Tudaya Hydro 2, Hedcor Irisan Hydro 1, Hedcor Sabangan, Hedcor Manolo Fortich 1 and 2, and Hedcor La Trinidad Hydro plants, all in commercial operations, have been approved for inclusion in the FIT system. Hedcor, Hedcor Tudaya, Hedcor Sabangan, and Hedcor Bukidnon, the companies that own and operate the foregoing plants, have entered into Renewable Energy Payment Agreement (REPA) with Transco, in its capacity as FIT-Allowance ("FIT-All") Administrator, for the collection and payment of the FIT.

In the absence of WESM in Mindanao, Tudaya Hydro 2, and Manolo Fortich Hydro 1 and 2 have entered into Renewable Energy Supply Agreements (RESAs) with their host distribution utilities or electric cooperatives.

AboitizPower's Distribution Utilities have exclusive distribution franchises in the areas where they operate. Each Distribution Utility has a distribution network consisting of a widespread network of predominantly overhead

lines and substations. Customers are classified according to voltage levels based on their electricity consumption and demand. Large industrial and commercial consumers receive electricity at distribution voltages of 13.8 kV, 23 kV, 34.5 kV, and 69 kV, while smaller industrial, commercial, and residential customers receive electricity at 240 volt (V) or 480 V.

With the exception of Malvar Enerzone, all of AboitizPower's Distribution Utilities have entered into transmission service contracts with NGCP for the use of NGCP's transmission facilities to receive power from PSALM to their respective independent power producers to their respective customers. All customers that connect to the Distribution Utilities' distribution lines are required to pay a tariff approved by ERC.

Retail Electricity Supply Business

AboitizPower's wholly-owned RES entities, Adventenergy and Adventpower, have existing electricity supply agreements with both affiliate generation entities and non-affiliate suppliers to ensure continuous supply of power to their customers. Adventenergy and Adventpower maintain a portfolio of supply contracts from renewable and non-renewable sources to secure reliable and affordable electricity for their customers. These electricity supply contracts involve a mix of fixed rates and indexed electricity fees that are updated year on year to ensure that supply is maintained at competitive rates.

(iv) New Products/Services

On March 1, 2024, AboitizPower, indirectly through its wholly-owned Subsidiary, Therma NatGas Power Inc. ("TNGP"), entered into an Investment Agreement with Meralco PowerGen Corporation (MGen) to acquire a 40% equity interest in Chromite Gas Holdings, Inc. (CGHI). With TNGP's investment, CGHI is 60% and 40% legally and beneficially owned by MGen and TNGP, respectively. On January 27, 2025, AboitizPower was informed that TNGP's co-investment with MGen and SMGP in SPPC, EERI, IPIEC has been completed. The transaction involved: a.) CGHI's acquisition of a 67% equity interest in SPPC, EERI and IPIEC, and b.) CGHI and SMGP joint acquisition of approximately 100% of Linseed Field Corporation, which operates the Liquefied Natural Gas (LNG) Terminal in Batangas City.

Other than the ongoing Greenfield and/or rehabilitation projects undertaken by AboitizPower's Generation Companies, AboitizPower and its Subsidiaries do not have any other publicly announced new products or services as of February 28, 2025.

(v) Competition

Power Generation Business

AboitizPower's power generation business is operating in an environment that is affected by competition, economic and seasonal changes that impacts demand, regulation, and global commodity price fluctuation.

Among the abovementioned influences, AboitizPower continues to face competition in both greenfield and brownfield opportunities. With the latest mandate on Renewable Portfolio Standards (RPS) and Green Energy Auction Program (GEAP), many competitors have started exploring and committing to increase their renewable energy sources.

Over the next three years, the majority of new supply is from variable renewable energy, with nearly 65% of it coming from the GEAP.

AboitizPower also believes that the Philippines' energy requirements will continue to grow as the country's economy develops, attracting new entrants both from demand and supply segments. With this opportunity, AboitizPower believes it is well-positioned to play a significant role in this growth, both in the renewable energy growth aspirations and baseload requirements of the country.

In particular, AboitizPower is expected to continue to face competition from leading multinationals such as TeM Corporation, Electricity Generating Public Company Limited (EGCO), and Korea Electric Power Corporation, as well as power generation facilities owned or controlled by Filipino-owned companies such as

AC Energy, Alsons Power Group, DMCI Holdings, Inc., FDC Utilities, Inc., First Gen Corporation, MGen, and SMGP.

Retail Electricity Supply Business

Based on ERC's Competitive Retail Electricity Market (CREM) Monthly Statistical Data as of December 2024, there are 55 RES companies and 29 Local RES companies participating in RCOA in Luzon, Visayas, and Mindanao. AboitizPower has the largest market share at 29.30%, with a contracted capacity of 1,181.98 MW. The Meralco Group, through its local RES and affiliate RES companies, has the second-largest market share at 25.31%, with contracted capacity of 1,140.38 MW as of December 2024. The San Miguel Group has the third largest market share at 13.79%, with a contracted capacity of 709.75 MW.

The increase in the number of variable renewable power plants, the number of RES companies, volatile WESM prices, and sustained high coal prices have also increased the level of competition in the RCOA market. RES companies have resorted to both aggressive pricing and providing contractual concessions to customers in order to acquire more customers.

AboitizPower believes that its portfolio of supply, consisting of different types of energy sources with a mix of renewable and thermal sources, allows it to be flexible in both pricing and reliability of supply, thus enhancing its competitiveness and allowing it to become the market leader in 2024.

Distribution Utilities Business

Each of AboitizPower's Distribution Utilities currently have franchises to distribute electricity in areas covered by its franchises.

(vi) Sources of Raw Materials and Supplies

Power Generation Business

The Generation Companies produce energy using the following fuel types based on attributable net selling capacity: 12.8% hydropower, 6.1% geothermal, 5.3% solar, 64.9% coal, and 10.9% oil. In 2024, renewable fuel sources comprised 24% of attributable net selling capacity, while thermal accounted for 76%.

AboitizPower currently manages and operates 22 hydropower plants that supply the country with over 607 MW of clean and renewable energy. As a leading hydropower operator in the Philippines, Hedcor helps communities and businesses sustainably reach a better and greener tomorrow through power generation that is least disruptive to the environment.

APRI's steam requirement for its geothermal power generation continues to be supplied by PGPC. The terms of the steam supply are governed by a Geothermal Resources Supply and Services Agreement. Under the agreement, the price of steam is based on 50% of the Marketing Clearing Prices starting September 26, 2021. Prior to this date, the price of steam was ultimately indexed to the Newcastle Coal Index and the Japanese Public Utilities coal price. APRI and PGPC signed a new agreement on August 24, 2018 under which PGPC will drill 12 new production wells with a minimum of 50 MW aggregated individual well capacity by 2023. This was completed in April 2023.

Oil-fired plants use heavy fuel oil and automotive diesel oil to generate electricity. WMPC sources heavy fuel oil from Northern Star Energy Corporation. Each of EAUC, CPPC, TMI, TMO, and TPVI secure its fuel oil requirements from Pilipinas Shell, Marine Fuels Philippines, Inc. and/or SL Harbor Bulk Terminal. The fuel prices under these agreements are pegged to the Mean of Platts Singapore index.

Both Coal-fired and Oil-fired power plants require automotive diesel oil during startup. These are all purchased from Chevron Philippines, Inc. under a term contract that are pegged to the Mean of Platts Singapore index.

TLI for Pagbilao Unit 3 and TVI have long-term coal supply contracts until 2025 for the majority of their annual requirements. Likewise, GNPD, GMEC, and Cebu Energy also have long-term coal supply agreements.

TLI for Pagbilao Units 1 and 2, and SPI are presently undergoing multiple testing of new coal supply sources with lower calorific value to improve fuel cost prices. Long-term contracts will be entered into within the year upon completion of said tests.

Power Distribution Business

The rates at which the Distribution Utilities purchase electricity from affiliated Generation Companies are established pursuant to bilateral agreements. These agreements are executed after the relevant Generation Company has successfully bid for the right to enter into a PSA with a distribution utility. These agreements are entered into on an arms'-length basis, on commercially reasonable terms, and must be approved by the ERC. ERC's regulations currently restrict AboitizPower's Distribution Utilities from purchasing more than 50% of their electricity requirements from affiliated Generation Companies.

To address long-term power supply requirements, Davao Light and Cotabato Light entered into 25-year Power Supply Contracts (PSCs) with TSI for 100 MW and 5 MW, respectively, and started drawing their contracted capacity in September 2015. In June 2016, Davao Light and TSI filed a Joint Manifestation with ERC stating that they agreed to supplement and modify their supply contract to 108 MW.

To meet the Renewable Portfolio Standards (RPS) requirement, Davao Light entered into a ten-year 55 MW PSA with Hedcor Sibulan from 2022 to 2032. Davao Light also renewed its CSEE with PSALM for a period of three years from 2023 to 2025 for 15 MW. To cover its peak demand requirement for 2023 to 2026, Davao Light entered into a three-year PSA with TMI for a 50 MW supply. Davao Light also entered into a five-year non-firm load following the PSA, on an as-available as-needed basis, with FDC Misamis Power Corporation to cater to replacement power requirements in times of outages from 2023 to 2028.

To address long-term power supply requirements, Visayan Electric entered into a 25-year Electric Power Purchase Agreement (EPPA) with Cebu Energy in October 2009 for the supply of 105 MW. In December 2010, Visayan Electric signed a five-year PSA with GCGI for the supply of 60 MW at 100% load factor which was extended for another ten years in October 2014. Visayan Electric also has a 15-year PSA with TVI for the supply of 150 MW beginning 2018.

In 2021, Subic Enerzone conducted a CSP to reduce its WESM exposure. Masinloc Power Partners Co. Ltd. (MPPCL) won the 10MW PSA starting December 26, 2021. Similarly, Lima Enerzone conducted its own CSP in 2021 as replacement to its expiring contract. TLI won the contract at 7 MW for five years starting in May 2021. Malvar Enerzone sources its power supply from WESM to meet the ecozone's power requirements until its electricity demand is stable.

The provisions of the Distribution Utilities' PPAs are governed by ERC regulations. The main provisions of each contract relate to the amount of electricity purchased, the price, including adjustments for various factors such as inflation indexes, and the duration of the contract. Distribution Utilities also enter into PSAs with various generation companies.

Transmission Charges

AboitizPower's Distribution Utilities have existing Transmission Service Agreements (TSAs) with the NGCP for the use of the latter's transmission facilities in the distribution of electric power from the Grid to its customers, which are valid until the dates specified below:

Distribution Utility	Valid until
Lima Enerzone	July 25, 2027
Cotabato Light	August 25, 2028
SFELAPCO	December 25, 2028
Davao Light	January 25, 2029
Visayan Electric	January 25, 2029

Distribution Utility	Valid until
Mactan Enerzone	March 25, 2025*
Balamban Enerzone	March 25, 2025*
Malvar Enerzone	December 25, 2025

*Prior to the expiry of their TSAs, Mactan Enerzone and Balamban Enerzone have already applied and submitted the requirements for renewal.

The Distribution Utilities have negotiated agreements with the NGCP in connection with the security deposit to secure their obligations to the NGCP under the TSAs.

(vii) Major Customers

Power Generation Business

As of December 31, 2024, out of the total electricity sold by AboitizPower's Generation Companies, approximately 77% was covered by bilateral contracts with, among others, private distribution utilities, electric cooperatives, and industrial and commercial companies. The remaining, approximately 23%, was sold by the Generation Companies through the WESM, a co-optimized energy and reserves market.

Retail Electricity Supply Business

As of February 28, 2025, AboitizPower's RES business has approximately 530 Contestable Customers under RCOA and seven end-users under GEOP with active contracts. These customers come from a wide number of industries, including property development, meat processing, semiconductors, steel, and cement. AboitizPower thus believes that this diversity will insulate its RES business from downturns in any one industry.

Power Distribution Utilities

AboitizPower's Distribution Utilities have wide and diverse customer bases. As such, AboitizPower believes that loss of any one customer is not expected to have a material adverse impact on the Company. The Distribution Utilities' customers are categorized into four principal categories:

- (a) *Industrial customers.* Industrial customers generally consist of large-scale consumers of electricity within a franchise area, such as factories, plantations, and shopping malls;
- (b) *Residential customers.* Residential customers are those who are supplied electricity for use in a structure utilized for residential purposes;
- (c) *Commercial customers.* Commercial customers include service-oriented businesses, universities, and hospitals; and
- (d) *Other customers.* Customers not falling under any of the above categories.

Government accounts for various government offices and facilities are categorized as either commercial or industrial depending on their load. Each Distribution Utility monitors government accounts separately and further classifies them to local government accounts, national government accounts, or special government accounts like military camps. Streetlights have a different rate category and are thus monitored independently.

(viii) Transactions with and/or Dependence on Related Parties

AboitizPower and its Subsidiaries (the "Group"), in their regular conduct of business, have entered into transactions with Associates and other related parties principally consisting of professional and technical services, power sales and purchases, advances, various guarantees, construction contracts, aviation services, and rental fees. These are made on an arm's-length basis as of the time of the transactions.

Details of the significant account balances of the foregoing related party transactions of the Group can be found in the accompanying consolidated financial statements of the Company.

(ix) Patents, Copyrights, Franchises

AboitizPower and its Subsidiaries have secured all material permits required to operate its businesses. These are further discussed below.

Power Generation Business

Power generation is not considered a public utility operation under RA No. 9136 or the Electric Power Industry Act of 2001 (EPIRA). Thus, a franchise is not needed to engage for generation companies in the business of power generation. Nonetheless, no person or entity may engage in the generation of electricity unless such person or entity has secured a COC from the ERC to operate a generation facility and has complied with the standards, requirements, and other terms and conditions set forth in the said COC.

In its operations, a Generation Company is required to comply with technical, financial and environmental standards. Further, a Generation Company shall ensure that facilities connected to the grid meet the technical design and operation criteria of the Philippine Grid Code, Philippine Distribution Code, and Philippine Electrical Code.

For IPPAs such as TLI, the COCs issued to the Independent Power Producers (IPPs) of the relevant generation facilities are deemed issued in favor of the IPPAs. As such, the IPPAs are also bound to comply with the provisions of the Philippine Grid Code, Philippine Distribution Code, WESM rules, and applicable rules and regulations of ERC.

AboitizPower's HEPPs are required to obtain a water permit from NWRB for the water flow used to run their respective hydroelectric facilities. The permit specifies the source of the water, the allowable water volume, and the terms and conditions of its use. The water permit continues to be valid as long as the water is beneficially used.

Cotabato Light has its own generation facilities and is required under the EPIRA to obtain a COC. Davao Light's generation facility was decommissioned last November 26, 2018.

The Generation Companies and Cotabato Light, a Distribution Utility, possess COCs for their power generation plants, details of which are enumerated in the attached **Annex "B"**.

AboitizPower, its Subsidiaries, and Affiliates are in various stages of development of several projects. Some of these projects have been awarded renewable energy service contracts by DOE.

Distribution Business

Under the EPIRA, the business of electricity distribution is a regulated public utility business that requires a franchise that can be granted only by Congress. In addition to the legislative franchise, a CPCN from ERC is also required to operate as a public utility. However, distribution utilities operating within economic zones are not required to obtain a franchise from Congress, but must be duly registered with PEZA in order to operate within the economic zone.

All distribution utilities are required to submit to ERC a statement of their compliance with the technical specifications prescribed in the Philippine Distribution Code, which provides the rules and regulations for the operation and maintenance of distribution systems, and the performance standards set out in the implementing rules of the EPIRA.

Shown below are the respective expiration periods of the Distribution Utilities' legislative franchises:

Distribution Utility	Franchise	Term	Expiry
Visayan Electric	RA No. 9339	25 years from effectivity of RA No. 9339. RA No. 9339 was approved on Sept. 1, 2005.	Valid until September 24, 2030

Distribution Utility	Franchise	Term	Expiry
	ERC Certificate No. CPCN-09-01 (ERC Decision dated January 26, 2009, ERC Case No. 2008-095 MC).	25 years, or from September 24, 2005 to September 24, 2030	
Davao Light	RA No. 8960	25 years from effectivity of RA No. 8960, or from September 7, 2000	September 7, 2025
	ERC CPCN Decision dated February 26, 2002, ERC Case No. 2001-792	25 years, or from September 7, 2000 to September 7, 2025	
	RA No. 11515	25 years from expiration of the term granted under RA No. 8960, or from September 7, 2025 to September 7, 2050 (Lapsed into law on December 26, 2020)	Valid until September 7, 2050
Cotabato Light	RA No. 10637	25 years from the effectivity of RA No. 10637, as amended. RA No. 10637 was approved on June 16, 2014.	Valid until June 16, 2039
	ERC Certificate No. CPCN-14-001 (ERC Decision dated December 9, 2019, ERC Case No. 2013-063 MC)	25 years, or from June 17, 2014 or until June 16, 2039	
SFELAPCO	RA No. 9967	25 years from effectivity of RA No. 9967 (Lapsed into law on February 6, 2010)	Valid until March 23, 2035
	ERC Certificate No. CPCN-10-01 (ERC Decision dated August 31, 2010, ERC Case No. 2010-029 MC)	25 years, or from March 24, 2010 to March 23, 2035	
Subic Enerzone	Distribution Management Service Agreement (DMSA) between Subic Enerzone and Joint Venture of AEV-Davao Light	Notarized on May 15, 2003. Term of the DMSA is 25 years.	Valid until May 15, 2028

Mactan Enerzone, Balamban Enerzone, Lima Enerzone, and Malvar Enerzone which operate the power distribution utilities in MEPZ II, WCIP, LTC, and LISP IV respectively, are duly registered with PEZA as Ecozone Utilities Enterprises.

Retail Electricity Supply Business

Like power generation, the retail electricity supply business is not considered a public utility operation under EPIRA. However, it is considered a business affected with public interest. As such, the EPIRA requires all suppliers of electricity to end-users in the contestable market, other than distribution utilities within their franchise areas, to obtain a license from ERC. With the implementation of RCOA in 2013, AboitizPower's RES Subsidiaries and Generation Companies with RES business segments, Adventpower, Adventenergy, APRI, SN Aboitiz Power – Magat, SN Aboitiz Power – RES, Prism Energy, and TLI, have all obtained separate licenses to act as RES.

Trademarks

AboitizPower and its Subsidiaries own, or have pending applications for the registration of, intellectual property rights for various trademarks associated with their corporate names and logos. The following table sets out information regarding the trademark applications the Company and its Subsidiaries have filed with the Philippine Intellectual Property Office (Philippine IPO), and their pending trademark applications abroad.

(x) Government Approvals

The discussion on the need for any government approval for any principal products or services of the Company and its Subsidiaries, including COCs obtained by the Generation Companies and franchises obtained by the Distribution Utilities, is included in item (ix) Patents, Copyrights and Franchises.

(xi) Effect of Existing or Probable Government Regulations on the Business

AboitizPower and its Subsidiaries are subject to the laws generally applicable to all Philippine corporations, such as corporation law, securities law, tax laws, and the Local Government Code. All Philippine corporations are also subject to labor laws and social legislation, including RA No. 11199 or the Social Security Act of 2018, RA No. 10606 or the National Health Insurance Act of 2013, RA No. 11223 or the Universal Health Care Act, RA No. 9679 or the Home Development Mutual Fund Law of 2009, The Philippine Labor Code and its implementing rules, and other labor-related laws, regulations, and Department of Labor and Employment (DOLE) mandated work-related programs.

The Aboitiz Group closely monitors its compliance with the laws and government regulations affecting its businesses.

1. Ease of Paying Taxes Act (EOPT Act)

RA No. 11976, otherwise known as the Ease of Paying Taxes (“EOPT”) Act, was signed into law by President Ferdinand Romualdez Marcos, Jr. on January 5, 2024 and took effect on January 22, 2024. The law introduced significant amendments to the National Internal Revenue Code of 1997 (the “Tax Code”) in order to modernize and increase the efficiency and effectiveness of Philippine tax administration and strengthen taxpayer rights.

The salient features of the EOPT Act include:

- (a) Classification of taxpayers into micro, small, medium, and large according to their gross sales;
- (b) Filing of returns and payment of internal revenue taxes through electronic or manual means such as authorized agent banks, Revenue District Office (through its Revenue Collection Officers), or authorized software providers;
- (c) Repeal of Section 34(K) of the Tax Code, which provided that expenses not subjected to the appropriate withholding taxes will be disallowed as deduction;
- (d) Section 58 of the Tax Code on taxes withheld at source now includes a provision that the obligation to deduct and withhold taxes arises at the time the income has been made “payable”. Previously, the

- obligation to withhold arises at the time when an expense has been paid, payable or accrued, whichever comes first, pursuant to Revenue Regulations No. 02-98, as amended;
- (e) Harmonizing the rules on the VAT treatment of sales of goods and services, thereby requiring sales invoice for both;
 - (f) Ensuring availability of registration facilities to taxpayers not residing in the country;
 - (g) Removal of “business style” in the invoice requirements;
 - (h) Increase in the threshold for the mandatory issuance of receipts for each sale and transfer of goods and services from ₱100 to ₱500;
 - (i) Fixing the period for preservation of books of accounts at five years; and
 - (j) Classification of Value Added Tax (VAT) refund claims into low-, medium-, and high-risk claims which are based on the amount of VAT refund claim, tax compliance history, and frequency of filing of VAT refund claims, among others.

Due to the standardization of VAT rules for sales of goods and services as mentioned in subparagraph (e) above, service providers are required to pay and remit VAT to the BIR at the time their invoice is issued to their customers. This creates a risk to said taxpayers since they might not be able to recover from non-paying customers. To mitigate the risk, the EOPT Act has introduced specific safeguards, i.e.:

- (a) A provision for clawback, which clearly states that output VAT on uncollected receivables may be deducted on the next quarter after the lapse of the agreed upon period to pay; and
- (b) A clear determination that gross sales, forming the VAT base, shall exclude pass-thru charges or those earmarked for payment to third parties, and reimbursements.

2. Real Property Valuation and Assessment Reform Act (RPVARA)

RA No. 12001, otherwise known as the Real Property Valuation and Assessment Reform Act (“RPVARA”), was enacted on June 13, 2024 and became effective on July 3, 2024. It aims to promote the development of a just, equitable, and efficient real property valuation system, and broaden the tax base used for property and property-related taxes of the national and local governments.

Among the salient features of RPVARA include:

- (a) Establishing and maintaining standards based on Philippine Valuation Standards (PVS) to govern the valuation of real properties in the country;
- (b) Adopting market value as the single property valuation base for the assessment of real property-related taxes, and for the valuation of real property for various transactions by all government agencies (i.e., elimination of different valuations being used by government offices); and
- (c) Providing a comprehensive and up-to-date electronic database of all real property transactions.

In addition, RPVARA provides to real property owners an option to avail of tax amnesty for the penalties, surcharges, and interests from all unpaid real property taxes. Such amnesty may be availed of by the delinquent property owner within two years from its effectivity, or until July 3, 2026.

On December 10, 2024, the Department of Finance approved the implementing rules and regulations of RPVARA.

3. Corporate Recovery and Tax Incentives for Enterprises to Maximize Opportunities for Reinvigorating the Economy (CREATE MORE) Act

RA No. 12066, otherwise known as the Corporate Recovery and Tax Incentives for Enterprises to Maximize Opportunities for Reinvigorating the Economy (“CREATE MORE”) Act, was signed into law on November 8, 2024 and took effect on November 28, 2024. The law introduced several key enhancements to the Philippines’ tax incentive framework with the objective of building on the earlier enacted CREATE Act, generate more jobs and spur economic growth, and attract both domestic and foreign investments by making the Philippines more globally competitive and investment-friendly.

The salient features of the CREATE MORE Act are as follows:

- (a) Reduces the corporate income tax rate of registered business enterprises (RBE) under the Enhanced Deduction Regime to 20%;
- (b) Introduces additional deductions for RBEs under the Enhanced Deduction Regime;
- (c) Extends the coverage of 5% Special Corporate Income Tax benefit to cover all national and local taxes, including local fees and charges;
- (d) Simplifies local taxation by giving an option to LGU to impose local taxes on RBEs up to maximum rate of 2% of gross income which shall be in lieu of all local taxes, fees, and charges;
- (e) Addresses ambiguities in the VAT provisions under the CREATE Act, specifying the goods and services eligible for VAT exemptions and zero-rating – i.e., relaxed the rule in order to be entitled from “directly and exclusively used” to “directly attributable” to the registered project or activity;
- (f) Extends the entitlement period to tax incentives granted to RBEs;
- (g) Introduces special provisions for high-value domestic market enterprises (HVDMEs), defined as those (i) with investment capital exceeding ₱15 bn and are engaged in sectors considered import-substituting, or (ii) with export sales in the immediately preceding year of at least USD100 Million or equivalent in acceptable foreign currency; and
- (h) Clarifies that RBEs granted incentives prior to CREATE Act (“Pre-CREATE RBEs”) may continue to avail of the same until December 31, 2034.

In view of the relaxation of the rule to qualify for VAT exemption on importation and VAT zero-rating on local purchases, as well as the express clarification of Pre-CREATE RBEs’ continuing entitlement to its non-income tax incentives during the transitory period, the subsidiaries which were registered both prior to and during the effectivity of the CREATE Act will benefit in the form of tax savings, since its expenses that are incidental to and reasonably necessary for the registered project/activity of the RBE shall be entitled to the aforementioned non-income tax incentives.

4. Revised Corporation Code

The Revised Corporation Code was signed into law on February 20, 2019 and took effect on February 23, 2019. Among the salient features of the Revised Corporation Code are: allowing the perpetual existence of corporations; requiring corporations vested with public interest to submit to its shareholders and to the SEC an annual report of the total compensation of each of its directors or trustees; and, allowing stockholders to vote in the election of directors or trustees, or in shareholders meetings, through remote communication or *in absentia*, among others.

5. The Philippine Competition Act

On March 1, 2024, the PCC announced the new thresholds for the notification requirement as follows:

Test	New Threshold (effective March 1, 2024)
Size of Party Test	₱7.8 bn
Size of Transaction Test	₱3.2 bn

This means that if the value of the assets or revenues of the Ultimate Parent Entity (UPE) of at least one of the parties exceeds ₱7.8 bn and the value of the assets or revenues of the acquired, target, or merged entity exceeds ₱3.2 bn, then the parties must notify the PCC of the transaction, provided that the other requirements under the Philippine Competition Act (PCA) are met.

6. Amended Foreign Investments Act of 1991 (Amended FIA)

On March 2, 2022, former President Duterte signed into law RA No 11647, “An Act Promoting Foreign Investments, Thereby Amending Republic Act 7042 Otherwise Known as the Foreign Investments Act of 1991, as Amended and For Other Purposes.” (the “Amended FIA”). The law aims to attract foreign investments in activities which contribute to sustainable economic growth, global competitiveness, employment creation, technical advancement, and countrywide development.

Under this law, foreign nationals are now allowed to engage in a domestic market enterprise with a minimum capital requirement of US\$100,000.00 provided that the enterprise: (a) utilizes advanced technology as determined by the Department of Science and Technology; (b) was endorsed as a start-up or start-up enabler under RA No. 11337 or the Innovating Startup Act; or (3) is composed of a majority of Filipino employees, which shall not be less than 15. Other salient features of the Amended FIA include: (a) a required understudy or skills development program by registered foreign enterprises to ensure skills and technology transfer to Filipinos; (b) allowing 100% foreign investment in a domestic enterprise unless participation of foreigners is limited to a smaller percentage; and (c) allowing 100% foreign investment in an export enterprise provided that the products or services do not fall under the Foreign Investments Negative List.

Pursuant to the FIA, as amended, the Twelfth Regular Foreign Investment Negative List was promulgated on June 27, 2022 (the “Negative List”). This Negative List enumerates industries and activities which have foreign ownership limitations under the FIA and other existing laws. Nationalized activities include, among others, exploration, development, and utilization of natural resources, operation of public utilities, and land ownership.

7. Data Privacy Act of 2012

Republic Act No. 10173 or the Data Privacy Act of 2012 is a comprehensive and strict privacy legislation aimed to protect the fundamental human right of privacy by: (i) protecting the privacy of individuals while ensuring free flow of information for a legitimate purpose; (ii) regulating the collection, recording, organization, storage, updating or modification, retrieval, consultation, use, consolidation, blocking, erasure, or destruction of personal data; and (iii) ensuring that the country complies with international standards set for data protection through the National Privacy Commission.

The law’s Implementing Rules and Regulations (“IRR”) took effect on September 9, 2016, requiring all organizations to comply with the following: (i) appointment of a Data Protection Officer (DPO); (ii) conduct of a Privacy Impact Assessment (PIA), particularly for high-risk data processing activities; (iii) adoption of a privacy management program and privacy policy; (iv) implement privacy and data protection measures; and (v) establish a breach reporting procedure. In addition, companies with at least 250 employees or those processing sensitive personal information of at least 1,000 individuals are required to register their data processing systems with the National Privacy Commission.

In 2017, AboitizPower launched its Data Privacy Compliance Program, aligning it with the Information Security Management System (ISMS) across the Aboitiz Group. This initiative included the development and implementation of data privacy policies, manuals, supporting guidelines, and procedures., ensuring a structure and standardized approach to data protection.

To strengthen privacy awareness and education, AboitizPower and its Business Units have established a strong foundation in data privacy principles through various learning initiatives. These include E-Learning modules, quizzes, Quarterly PDBlitz campaigns, upskilling sessions, and data breach management exercises, all designed to assess and enhance the company’s readiness to respond to actual incidents.

In 2020, AboitizPower introduced the 1AP Incident Management process, providing a standardized governance framework across its Business Units. This process ensures a consistent approach to incident notification, assessment, resolution, verification, evidence handling, post-event investigation, business recovery, and incident wrap-up. Among the various incident types covered, information security and data privacy breaches remain a key focus.

In 2023, AboitizPower and certain affiliates and subsidiaries of AEV executed an Omnibus Data Sharing Agreement (ODSA) to facilitate the free flow of information across different business units following the regulatory framework. This agreement establishes adequate safeguards for data privacy and security, ensuring that data sharing activities uphold the rights of data subjects while serving legitimate business purposes.

To enhance regulatory compliance, efficiency, and privacy risk management, AboitizPower developed a semi-automated Privacy Impact Assessment (PIA) template in 2024, replacing the manual process used for the past five years. This innovation fosters a more transparent and accountable data privacy culture within the organization by streamlining privacy assessments and improving usability.

AboitizPower continues to strengthen business continuity resilience, particularly in personal data protection and data breach management. Notably, the Company has improved its compliance score on the NPC's 32-Point Data Privacy Compliance Checklist, increasing from 94% in 2023 to 96% in 2024.

AboitizPower's commitment to data privacy governance has been recognized globally. In the 2024 S&P Global Corporate Sustainability Assessment (CSA), the Company advanced to seventh place worldwide due to significant improvements in data protection governance. Additionally, AboitizPower's privacy protection was ranked fifth among rated companies in Asia Pacific, underscoring its leadership in data privacy and security.

8. Labor Laws

The Philippine Labor Code and other statutory enactments provide the minimum benefits that employers must grant to their employees, which include certain social security benefits, such as benefits mandated by the Social Security Act of 1997 (RA No. 8282), the National Health Insurance Act of 1995 (RA No. 7875), as amended, and the Home Development Fund Law of 2009 (RA No. 9679). On the other hand, the Occupational Safety and Health Law (RA No. 11058) reinforces the existing Occupational Safety and Health Standards, which sets out, among others, the guidelines applicable to different establishments intended for the protection of every working man against the dangers of injury, sickness or death through safe and healthful working conditions.

The Department of Labor and Employment (DOLE) is the Philippine government agency mandated to implement policies, programs and services, and serves as the policy-coordinating arm of the executive branch in the field of labor and employment. The DOLE has exclusive authority in the administration and enforcement of labor and employment laws, such as the Labor Code of the Philippines and the Occupational Safety and Health Law and Standards, and such other laws as specifically assigned to it or to the Secretary of the DOLE.

(a) Social Security System, PhilHealth and the Pag-IBIG Fund

An employer or any person who uses the services of another person in business, trade, industry, or any undertaking is required under the Social Security Act of 2018 (RA No. 11199) to ensure coverage of employees following procedures set out by the law and the Social Security System ("SSS"). Under the said law, an employer must deduct from its employees their monthly contributions in an amount corresponding to his salary, wage, compensation or earnings during the month in accordance with the monthly salary credits, the schedule and the rate of contributions as may be determined and fixed by the Social Security Commission, pay its share of contribution and remit these to the SSS within a period set by law and/or SSS regulations. This enables the employees or their dependents to claim their pension, death benefits, permanent disability benefits, funeral benefits, sickness benefits and maternity-leave benefits. On December 19, 2024, the SSS issued Circular No. 2024-006 which increased the mandatory contribution rate from 14% in 2024 to 15% in 2025. The minimum Monthly Salary Credit ("MSC") has likewise been increased to Five Thousand Pesos (₱5,000.00) and the maximum MSC has been increased to Thirty-Five Thousand Pesos (₱35,000.00).

Employers are likewise required to ensure enrolment of its employees in a National Health Insurance Program administered by the Philippine Health Insurance Corporation, a government corporation attached to the Department of Health tasked with ensuring sustainable, affordable, and progressive social health insurance pursuant to the provisions of RA No. 10606, the National Health Insurance Act of 2013.

On February 20, 2019, the Universal Health Care Act (RA No. 11223), was enacted, which amended certain provisions of the National Health Insurance Act of 2013. Under the said law, all Filipino citizens are now automatically enrolled into the National Health Program. However, membership is classified into two types, direct contributors and indirect contributors. Direct contributors refer to those who have the capacity to pay premiums, are gainfully employed and are bound by an employer-employee relationship, or are self-earning, professional practitioners, migrant workers, including their qualified dependents, and lifetime members. On the other hand, indirect contributors refer to all others not included as direct contributors, as well as their qualified dependents, whose premium shall be subsidized by the national government including those who are subsidized as a result of special laws. Every member is also granted immediate eligibility for health benefit package under the program.

Under the Home Development Mutual Fund Law of 2009 (RA No. 9679), all employees who are covered by SSS must also be registered with and covered by the Home Development Mutual Fund (HDMF, more commonly referred to as the “Pag-IBIG Fund”). It is a national savings program as well as a fund to provide for affordable shelter financing to Filipino workers. Except for foreign expatriates, coverage under the HDMF is compulsory for all SSS members and their employers. Under the law, an employer must deduct and withhold 2% of the employee’s monthly compensation, up to a maximum of ₱5,000.00, and likewise make a counterpart contribution of 2% of the employee’s monthly compensation, and remit the contributions to the HDMF.

(b) The Labor Code

The Philippine Labor Code provides that, in the absence of a retirement plan provided by their employers, private-sector employees who have reached 60 years of age or more, but not beyond 65 years of age, the compulsory retirement age for private-sector employees without a retirement plan, and who have rendered at least five years of service in an establishment, may retire and receive a minimum retirement pay equivalent to one-half month’s salary for every year of service, with a fraction of at least six months being considered as one whole year. For the purpose of computing the retirement pay, “one-half month’s salary” shall include all of the following: fifteen days’ salary based on the latest salary rate; in addition, one-twelfth of the thirteenth month pay and the cash equivalent of five days of service incentive leave pay. Other benefits may be included in the computation of the retirement pay upon agreement of the employer and the employee or if provided in a collective bargaining agreement.

(c) Occupational Safety and Health Law

The Occupational Safety and Health Law (RA No. 11058) was signed into law on August 17, 2018. It applies to all private establishments alike, requiring them, among others, to furnish workers with a place of employment free from hazardous conditions causing or are likely to cause death, illness, or physical harm, and to comply with the Occupational Safety and Health standards, including training, medical examination and the necessary protective and safety devices, such as personal protective equipment.

Other Labor-Related Laws and Regulations

(d) Contracting and Subcontracting

The Labor Code recognizes subcontracting arrangements, whereby a principal puts out or farms out with a contractor the performance or completion of a specific job, work or service within a definite or predetermined period, regardless of whether such job, work or service is to be performed or completed within or outside the premises of the principal. Such arrangements involve a “trilateral relationship” among: (i) the principal who decides to farm out a job, work or service to a contractor; (ii) the contractor who has the capacity to independently undertake the performance of the job, work, or service; and (iii) the contractual workers engaged by the contractor to accomplish the job, work, or service.

The DOLE, through its Department Order No. 174, Series of 2017, regulates subcontracting arrangements by requiring, among others, the registration of contractors with the Regional Office of the DOLE where it principally operates.

(e) DOLE Mandated Work-Related Programs

Under the Comprehensive Dangerous Drugs Act (RA No. 9165), a national drug abuse prevention program implemented by the DOLE must be adopted by private companies with ten or more employees. For this purpose, employers must adopt and establish company policies and programs against drug use in the workplace in close consultation and coordination with the DOLE, labor and employer organizations, human resource development managers and other such private sector organizations. DOLE Department Order No. 53-03 sets out the guidelines for the implementation of Drug-Free Workplace policies and programs for the private sector.

The employer or the head of the work-related, educational or training environment or institution, also has the duty to prevent or deter the commission of acts of sexual harassment and to provide the procedures for the resolution, settlement or prosecution of such cases in accordance with the Anti-Sexual Harassment Act (RA No. 7877), which was signed into law on February 14, 1995, and the Safe Spaces Act (RA No. 9165), which was signed into law on April 17, 2019. Included among the duties of an employer is the creation of an internal Committee on Decorum and Investigation to increase understanding and prevent incidents of sexual harassment.

Moreover, DOLE Department Order No. 102-10 requires all private workplaces to have a policy on HIV and AIDS and to implement a workplace program in accordance with the Philippines AIDS Prevention and Control Act (RA No. 8504). The workplace policies aim to manage sensitive issues, such as confidentiality of medical information and continuation of employment for HIV-positive staff, and to avoid the discrimination of any employee due to HIV/AIDS. Any HIV/AIDS-related information of workers should be kept strictly confidential and kept only on medical files, whereby access to it is strictly limited to medical personnel.

All private workplaces are also required to establish policies and programs on solo parenting, Hepatitis B, and tuberculosis prevention and control. In line with the Mental Health Act (RA No. 11036), employers are further required to develop policies and programs on mental health in the workplace designed to: raise awareness on mental health issues, correct the stigma and discrimination associated with mental health conditions, identify and provide support for individuals at risk, and facilitate access to treatment and psychosocial support.

All private workplaces are also required to update their respective Telecommuting Guidelines and Consent Form, whenever applicable, in accordance with the revised implementing rules and regulations of Telecommuting Act (DOLE D.O. 237-22).

Moreover, Labor Advisory No. 20-2023 requires private companies and their employees to implement a Cancer Prevention and Control in the Workplace Policy and Program. This program encompasses various elements, including prevention measures, access to screening, diagnosis, and treatment, support for employees; return to work, compensation and social policies, and the promotion of a safe and healthy lifestyle, which includes considerations for mental and social well-being.

Policies and Regulations Relating to the Power Industry

1. WESM in Mindanao

On January 26, 2023, the DOE posted an Advisory confirming that the Commercial Operation Date of WESM in the Mindanao grid commenced on January 26, 2023. This was also the date planned under Department Circular No. DC2022-12-039.

2. Independent Market Operator

On October 22, 2020, the DOE promulgated Department Circular No. DC2020-10-0021, which adopted amendments to the WESM Rules for the implementation of an Independent Market Operator.

3. Implementation of the Performance-based Rating-setting Regulation (PBR)

In June 2019, the ERC posted for comments its draft Rules for Setting Distribution Wheeling Rates and Issues Paper for the Regulatory Reset of the First Entry Group - Meralco, Cagayan Electric Power & Light Co. Inc. (Cagayan Electric), and Dagupan Electric Corporation (Dagupan Electric). Various public consultations were held in July 2019. The ERC issued its Decision dated September 24, 2020 denying consumer group *Matuwid na Singil sa Kuryente* Consumer Alliance, Inc. (MSK)'s petition to revert to Return-on-Rate-Base (RORB), without prejudice to its right to submit its comments in the revision of the rules during the next rate reset process of the distribution utilities.

Due to the rules change on PBR, none of the AboitizPower Distribution Utilities have undergone a regulatory reset starting from the third regulatory period. In January 2020, the ERC requested private distribution utilities to submit actual or historical expenditure covering the lapsed period. Due to the lockdown and quarantine restrictions, as well as unresolved clarifications as to what has to be provided to the ERC raised by the distribution utilities to the ERC through clarificatory meetings, private distribution utilities were not able to provide the data within the timeframe given by ERC.

In relation to this, the ERC issued show cause orders, all dated October 29, 2020, against Cotabato Light (docketed as ERC Case No. 2020-097 SC), Visayan Electric (docketed as ERC Case No. 2020-098 SC), Davao Light (docketed as ERC Case No. 2020-104 SC), and Subic Enerzone (docketed as ERC Case No. 2020-107 SC), requesting the foregoing distribution utilities to explain why they should not be penalized for the incomplete submission of the data requested by the ERC for its actual expenditure review. On January 7, 2021, the foregoing distribution utilities submitted their respective explanations, including a manifestation that all required data had been submitted as of December 29, 2020. The ERC has yet to resolve these cases. If found liable, the penalty for violation is ₱50,000.00 per distribution utility, pursuant to ERC Resolution No. 03, series of 2009.

On December 2, 2021, the ERC issued Resolution No. 10, series of 2021, modifying the Rules for Setting the Distribution Wheeling Rates (RDWR) for private distribution utilities, and Resolution No. 11, series of 2021, adopting a Regulatory Asset Base (RAB) Roll Forward Handbook. The RDWR and the RAB Handbook as adopted in these resolutions shall be applied in the next regulatory reset of AboitizPower Distribution Utilities.

The ERC directed the AboitizPower Distribution Utilities, through letters dated April 25, 2022, to file their respective Actual Weighted Average Tariff (AWAT) applications, guided by the 2021 RDWR mentioned above. Second entry group distribution utilities are required to file by August 25, 2022, third entry group distribution utilities by September 25, 2022 and fourth entry group distribution utilities by October 25, 2022. Cotabato Light has submitted its application, while Visayan Electric, Davao Light, and Subic Enerzone requested clarification from the ERC prior to filing.

In 2022, the First Entry Group (Meralco, Cagayan Electric, and Dagupan Electric) commenced their application for a regulatory reset, which should have started in July of 2022. Due to the delays in the resolution of the application, the regulatory period began without the ERC's approval. This prompted Meralco to withdraw its application. Through ERC Resolution No. 17, series of 2024, the ERC decided to push back the next regulatory period of Meralco to commence from July 2025 up to 2029. Distribution utilities from the other entry groups, including the AboitizPower Distribution Utilities, are expected to commence their regulatory period thereafter after the regulatory resets of the First Entry Group are settled.

4. ERC Regulation on Systems Loss Cap Reduction

In December 16, 2021, ERC issued Resolution No. 12, Series of 2021 entitled "A Resolution Clarifying the Applicable Distribution Feeder Loss Cap for Private Distribution Utilities by 2022 Onwards". The said Resolution amended the Distribution Feeder Loss Cap stated in ERC Resolution No. 10, series of 2018, maintaining the 2021 Distribution Feeder Loss Cap of 5.50% for the year 2022 onwards until such time that a new feeder loss cap is promulgated by the ERC.

5. Competitive Selection Process

In 2015, the DOE issued Department Circular No. DC2015-06-0008, mandating all distribution utilities to conduct CSP for Power Supply Agreements (PSAs). The circular took effect on June 30, 2015. Subsequently, the ERC issued Resolution No. 13, Series of 2015, or the ERC CSP Rules, which outlined the process for awarding PSAs and required compliance with CSP for PSAs executed or negotiated during its effectivity. ERC Resolution No. 1, Series of 2016, later extended the start date of the effectivity of the CSP requirement to April 30, 2016, mandating CSP compliance for all PSAs executed on or after that date.

On February 1, 2018, DOE promulgated DC No. DC2018-02-0003 (the "2018 DOE Circular") entitled "Adopting and Prescribing the Policy for the Competitive Selection Process in the Procurement by the Distribution Utilities of Power Supply Agreements for the Captive Market." Through this Circular, DOE issued its own set of guidelines (the "DOE CSP Rules") for the procurement by distribution utilities of PSAs for the Captive Market.

The validity of ERC CSP Rules and ERC Resolution No. 1, Series of 2016, which delayed the CSP policy of the DOE in 2015, was challenged before the Supreme Court of the Philippines (“SC” or the “Supreme Court”) on the ground that the ERC, in issuing the said resolutions, amended the 2015 DOE Circular and effectively postponed the date of effectivity of the CSP requirement. Consequently, on May 3, 2019, the SC in the case of *Alyansa Para sa Bagong Pilipinas, Inc. v. ERC* (G.R. No. 227670), declared the first paragraph of Section 4 of the ERC CSP Rules and ERC Resolution No. 1, Series of 2016, as void *ab initio*. The SC further ruled that all PSAs submitted to the ERC on or after June 30, 2015 shall comply with the CSP and that upon compliance with the CSP, the power purchase cost resulting from such compliance shall retroact to the date of the effectivity of the complying PSA, but in no case earlier than June 30, 2015, for purposes of passing on the power purchase cost to the consumers.

On September 24, 2021, the DOE promulgated Department Circular No. DC-2021-09-0030, amending the 2018 DOE Circular on the Competitive Selection Process in the Procurement by the Distribution Utilities of Power Supply Agreement for the Captive Market. The new circular included a new exemption from the CSP process and introduced a mechanism of subjecting unsolicited proposals to competitive bidding. The Circular was published on October 14, 2021 and was effective on October 29, 2021.

On June 30, 2023, the DOE promulgated Department Circular No. DC2023-06-0021, repealing previous issuances on the distribution utilities’ conduct of CSP, including the 2018 and 2021 DOE Circulars. This DOE Circular likewise directed the ERC to issue implementing guidelines in the conduct of CSP and evaluation of PSAs resulting from the CSP of distribution utilities. Relative thereto, the ERC promulgated ERC Resolution No. 16, Series of 2023 entitled “Implementing Guidelines for the Procurement, Execution, and Evaluation of Power Supply Agreements Entered into by Distribution Utilities for the Supply of Electricity to their Captive Market”, which took effect on October 18, 2023.

Under the DOE Department Circular No. DC2023-06-0021, all PSAs shall be procured through CSP, except for the following instances: (1) provision for power supply by the National Power Corporation in off-grid areas prior to, and until the entry of New Power Providers (NPP), or in emergency situations; (2) provision of power supply by the PSALM through bilateral contracts; (3) power supply procured by distribution utilities exercising the Opt-in Mechanism under the Green Energy Auction Program; (4) supply to any distribution utility from an embedded generation facility within its franchise utilizing renewable energy (RE) resources, with contracted capacity of up to 10MW per distribution utility; (5) and negotiated procurement of emergency power supply; and (6) provision of supply in off-grid areas served or to be served by NPPs with less than 1MW demand with 24-hour electricity service. A PSA may also be entered into by direct negotiation if the CSP fails twice.

ERC Resolution No. 16, Series of 2023 also further classified PSAs into either Financial or Physical PSAs, and provided certain parameters to be observed depending on its classification. Both DOE Department Circular No. DC2023-06-0021 and ERC Resolution No. 16, Series of 2023 are the prevailing policy pronouncement and regulation applying to the CSP.

6. Adopting a General Framework Governing the Provision and Utilization of Ancillary Services in the Grid

On December 4, 2019, DOE issued Department Circular No. DC2019-12-0018 entitled “*Adopting a General Framework governing the utilization of Ancillary Services (AS) in the Grid*” (“AS Circular”).

Upon the commercial operation of the Reserve Market, the following rules shall govern the procurement of AS:

- (a) SO shall procure Regulating, Contingency, and Dispatchable Reserves through firm contracts and the Reserve Market provided that the contracted levels per reserve region shall be as follows:
 - (i) Regulating Reserve - Equivalent to 50% of the Regulating Reserve requirement;
 - (ii) Contingency Reserve - Equivalent to 50% of the dependable capacity of the largest generating unit;
 - (iii) Dispatchable Reserve - Equivalent to 50% of the dependable capacity of the second largest generating unit.

On June 21, 2021, the DOE issued an “Advisory on the Implementation of DOE Circular No. DC2019-12-0018”. The advisory directed the NGCP to expedite the procurement of the required AS in accordance with Department Circular No. DC2019-12-0018, and to convert NGCP’s non-firm ASPAs into firm ASPAs.

On October 4, 2021, the DOE issued Department Circular No. DC2021-10-0031 entitled: “Prescribing the Policy for the Transparent and Efficient Procurement of Ancillary Services (AS CSP) by the System Operator (SO)” that pushed a process similar to the CSP, but this time for AS to be procured, for all non-firm ASPA be converted to ASPA, and that the Market Operator (MO) can step in to help SO to avoid delays. In a Decision dated October 24, 2022, the ERC penalized NGCP for its failure to submit to the DOE its Terms of Reference (TOR) and Invitation to Bid (ITB) for the ASP CSP as one violation, and its failure to publish and maintain on its website the ITB without the prior DOE approval as another violation.

In November 2022, NGCP conducted its AS CSP, resulting in several ASPAs with AboitizPower Generation Companies for the provision of Contingency Reserve, Dispatchable Reserve, Regulating Reserve, and/or Black Start Service. Consequently, several ASPA applications were filed with the ERC. Hearings for these applications were concluded in 2023 and the ASPAs are being operated under Provisional Authority/Interim Relief, with final approvals pending issuance by the ERC.

7. Ancillary Services Pricing and Cost Recovery Mechanism

Reserves are forms of ancillary services that are essential to the management of power system security. The provision of reserves facilitates orderly trading and ensures the quality of electricity.

On December 2, 2014, the DOE issued Circular No. 2014-12-0022, otherwise known as the Central Scheduling and Dispatch of Energy and Contracted Reserves. The circular aims to prepare the market participants in the integration of ancillary reserves into the WESM. The ancillary service providers will be paid based on their respective ASPAs with NGCP, while the scheduling of capacity and energy will be based on market results.

On September 14, 2018, NGCP filed a Petition seeking the Commission’s approval of its proposed amendments to the Ancillary Services – Cost Recovery Mechanism, docketed as ERC Case No. 2018-005 RM. Currently, the existing cost-recovery mechanism for Ancillary Services shall continue to be implemented until a new mechanism is recommended by the AS-TWG and adopted by ERC.

On February 8, 2022, the ERC posted its call for comments on the Draft Ancillary Services Rules (AS Rules) under ERC Case Nos. 2017-005 RM and 2018-005 RM with submission deadline of February 22, 2022. It has forwarded again the transition to its new types and definitions of Ancillary Services, with its own specifications and technical requirements, a percentage of procurement of AS, for testing be done only by the SO, and a cost recovery mechanism.

On June 24, 2024, the DOE issued Department Circular No. DC2024-06-0019, *Adopting Further Amendments to the Wholesale Electricity Spot Market (WESM) Rules and WESM Manual on Dispatch Protocol, and Creation of WESM Manual on Ancillary Services Monitoring Regarding Reserve Market Compliance and Related Enforcement and Actions*.

8. Price Determination Methodology for the Co-optimized Energy and Reserve Market

On January 10, 2023, the Philippine Electricity Market Corporation (PEMC) and Independent Electricity Market Operator of the Philippines (IEMOP) filed an application before the ERC for the reissuance of rules on the price determination methodology for the implementation of the co-optimized energy and reserve market in WESM, docketed as ERC No. 2023-002 RC. The application contains the proposed rules for determining the prices and schedules for dispatch, based on the offers of generation companies and demand of customers, taking into consideration power system conditions or constraints.

Through an Order in ERC Case No. 2023-002 RC dated August 24, 2023, the ERC promulgated granting interim relief in favor of PEMC and IEMOP, authorizing them to adopt and implement the proposed Price Determination Methodology for the co-optimized energy and reserve market in the WESM, subject to conditions.

The commencement of the full commercial operations of the reserve market occurred on January 26, 2024, pursuant to DOE Department Circular No. DC2023-09-0026, to optimize market and system operations, and to automate real-time dispatch of reserves. The ERC subsequently suspended the billing and settlement for the

Price Determination Methodology (PDM) of the reserve market in March 2024 due to a significant increase in reserve costs, leading to the subsequent suspension of the reserves market. The ERC lifted the suspension of the Price Determination Methodology (PDM) of the reserve market in August 2024, enabling the full commercial operations of the reserve market to proceed.

On December 17, 2024, ERC issued A Resolution Setting the Interim Offer Price Cap and Floor Price as Mitigating Measures for the Trading Reserves in the Wholesale Electricity Spot Market (ERC Resolution No. 16, series of 2024), which set the Interim Offer Price Cap and Floor Price equivalent of ₱25,000/MWh and ₱/MWh, respectively, for the trading of Reserves in the WESM.

9. Energy Efficiency and Conservation Act

Apart from prescribing efficient use of energy standards and labeling requirements for energy-consuming products, RA No. 11285 or the Energy Efficiency and Conservation Act (“EEC”) establishes certain obligations on the part of energy consumers who reach a certain annual energy consumption threshold (“Designated Establishments”). These obligations include, among others, reporting to the DOE of annual energy consumption, and energy consumption record keeping.

Other Department Circulars promulgated by the DOE in relation to the Energy Efficiency and Conservation Act are as follows:

- (a) Department Circular No. DC2020-06-0015 *“Prescribing the Guidelines of the Philippine Energy Labeling Program (PELP) for Compliance of Importers, Manufacturers, Distributors and Dealers of Electrical Appliances and other Energy-Consuming Products (ECP)”*, which aims to empower consumers in choosing energy efficient products at the point of sale, help realize energy savings and reduction of energy consumption/bills through the use of energy efficient products; and reduce greenhouse gas emissions;
- (b) Department Circular No. DC2020-06-0016 *“Prescribing the Minimum Energy Performance for Products (MEPP) covered by the Philippine Energy Labeling Program (PELP) for Compliance of Importers, Manufacturers, Distributors, Dealers and Retailers of Energy-Consuming Products)”*, which aims to eliminate the entry and sale of inefficient and substandard products in the local market; and reduce greenhouse gas emissions;
- (c) Department Order No. 2020-01-0001 *“Organizing the Inter-Agency Energy Efficiency and Conservation Committee (IAEECC)”*, which created the IAEECC to evaluate and approve government energy efficiency projects and provide strategic direction in the implementation of the Government Energy Management Program (GEMP);
- (d) Department Circular No. DC2020-12-0026 *“Adoption of the Guidelines for Energy Conserving Design of Buildings”*, aims to encourage and promote the energy conserving design of buildings and their services to reduce the use of energy with due regard to the cost effectiveness, building function, and comfort, health, safety, and productivity of the occupants; and
- (e) Department Circular No. DC2021-05-0011 *“Guidelines for the Endorsement of Energy Efficient Projects to the Board of Investments for Fiscal Incentives”*, establishes the rules and procedures in the endorsement of energy efficiency projects to avail fiscal incentives from the BOI.

On January 27, 2023, the DOE posted the drafts of the National Energy Efficiency and Conservation Plan (NEECP) and EEC Roadmap. The NEECP is a national comprehensive framework and plan that institutionalizes energy efficiency and conservation (EE&C) in the country across key sectors. On the other hand, the EEC Roadmap 2023-2050 provides an updated outline of the strategic plans and actions for EE&C in the Philippines across all sectors, including implementing key provisions of the EE&C Act, and its accompanying Implementing Rules and Regulations. The Roadmap aligns with the NEECP as it provides for the key programs of energy efficiency and conservation by sector, for which emissions reduction targets and costings have been developed.

Additional Department Circulars promulgated by the DOE applicable to identified “Designated Establishments in the specific sectors of Commercial, Industrial and Transport” are the following:

- (a) Department Circular No. DC2023-12-0036 *“Reclassifying Designated Establishment in the Commercial Sector, Adjusting their Threshold, and Providing Compliance Guidelines Therefor Pursuant to the Energy*

- Efficiency and Conservation Act*” establishes guidelines to comply with energy efficiency for the establishments identified for this sector;
- (b) Department Circular No. DC2023-12-0037 *“Reclassifying Designated Establishment in the Industrial Sector, Adjusting their Threshold, and Providing Compliance Guidelines Therefor Pursuant to the Energy Efficiency and Conservation Act”* establishes guidelines to comply with energy efficiency for the establishments identified for this sector; and
 - (c) Department Circular No. DC2023-12-0038 *“Reclassifying Designated Establishment in the Transport Sector, Adjusting their Threshold, and Providing Compliance Guidelines Therefor Pursuant to the Energy Efficiency and Conservation Act”* establishes guidelines to comply with energy efficiency for the establishments identified for this sector.

10. Energy Virtual One-Stop Act

The DOE already began the implementation of the EVOSS Online Platform, pursuant to RA No. 11234 or the Energy Virtual One-Stop Shop Act (“EVOSS Act”).

On June 5, 2020, the Department of Interior and Local Government (DILG)-DOE Joint Memorandum Circular 2020-01 or the Guidelines for LGUs to Facilitate the Implementation of Energy Projects was published. The Guidelines direct the streamlining by LGUs of their processes in issuing the necessary permits for energy-related projects, in accordance with the energy regulatory reforms provided in the EVOSS Law.

On July 2, 2021, former President Duterte created the Energy Virtual One-Stop Shop Task Group through Executive Order No. 143, to ensure the increasing operationalization of the EVOSS.

On October 31, 2023 the DOE released an Advisory that they will resume issuing Certificate of Energy Project of National Significance (CEPNS) and will promulgate guidelines 60 days after the Advisory takes effect. As of February 29, 2024, the mentioned guidelines have yet to be promulgated. AboitizPower continues to monitor for any developments on the EVOSS Act.

Currently, the EVOSS integrates two application processes in the ERC, which are: (a) approval of the point-to-point projects of generation facilities, and (b) approval of capital expenditure projects of distribution utilities.

11. Net Metering

The DOE promulgated Department Circular No. DC 2020-10-0022 or the Net Metering Program for Renewable Energy System, which aims to encourage and further promote electricity End-Users’ participation in the Net Metering Program by enhancing the current policies and commercial arrangements while ensuring the economic and technical viability of the distribution utility.

Pertinent provisions include:

- (a) Banking of Net-Metering Credits - All Net Metering Credits shall be banked for a maximum of one calendar year. Any excess of balance Net-Metering credits at the end of each calendar year shall be forfeited.
- (b) Application to Off-Grids or Isolated Grid Systems - The Net Metering Program for End-User shall be allowed even in areas not connected to the country’s three major national electrical transmission grids.
- (c) Publication of Hosting Capacities for Net-Metering - The Distribution Utilities shall publish in their website the respective Net-Metering programs, processes, and procedures, including hosting capacities on a per feeder or sector basis.
- (d) Responsibility of the LGUs - All LGUs are enjoined to strictly comply with the provisions of EVOSS Law, RA No. 11032 (Ease of Doing Business and Efficient Government Service Delivery Act of 2018) in processing permits and licenses related to applications for Net-Metering arrangements.
- (e) Responsibility of the National Electrification Administration (NEA) - The NEA shall provide the necessary assistance in promoting the Net-Metering Program to all electric cooperatives nationwide.
- (f) Development of Net Metering Guidebook - A guidebook on procedures and standards shall be developed by the DOE to be used by all stakeholders. The Renewable Energy Management Bureau shall prepare the Net Metering Guidebook, within six months from the effectiveness of this circular.

The foregoing Net Metering Program became effective on December 18, 2020. The Net Metering Guidebook was published on April 22, 2022.

On September 9, 2024, the DOE published and submitted to the Office of the National Administrative Register (ONAR) Department Circular No. DC2024-08-0025, *Prescribing Further Policies to Enhance the Net-Metering Program For Renewable Energy Systems Amending, for this Purpose, Department Circular (DC) No. DC2020-10-0022*. In line with this, on January 12, 2025, the ERC invited the public to provide feedback on the draft resolution amending ERC Resolution No. 6, Series of 2019 or the *Resolution Adopting the Amendments to the Rules Enabling the Net-Metering Program for Renewable Energy*. We are currently monitoring the finalization of the ERC rules.

12. Reliability Performance Indices

On December 16, 2020, the ERC published on its website Resolution No. 10, Series of 2020, entitled "*A Resolution Adopting the Interim Reliability Performance Indices and Equivalent Outage Days Per Year of Generating Units*".

This resolution aims to monitor the reliability performance of all Generating Units at operations and maintenance level; regularly determine and specify the reliability performance of the Grid; aid the power industry in evaluating reliability and availability of Generating Plants; and promote accountability of Generation Companies in order to achieve greater operation and economic efficiency. It applies to all Generation Companies with Conventional and Non-Variable Renewable Energy Generating Plants connected to the Grid, including Embedded Generating Plants, which have an aggregated capacity of 5MW and above. It includes the requirement for the System Operator and Transmission Network Provider to utilize the allowable planned outage days in Table 1 of the Resolution as a guide in preparing the Grid Operating and Maintenance Program. If the System Operator and Transmission Network Provider shall utilize unplanned outages beyond what is allowed in Table 1, the same shall provide a report as to the reason for such consideration as well as arrange the replacement.

ERC Resolution No. 10, Series of 2020 became effective on January 3, 2021.

On December 31, 2023, the ERC published in its website ERC Resolution No. 13, Series of 2021, entitled "*A Resolution Adopting the Rules for the Monitoring of Variable Renewable Energy (VRE) Generating Facilities Performance*" wherein the ERC sets reliability factors particular to wind plant and photovoltaic generation systems.

ERC has been actively issuing show cause orders to generation companies in the industry and AboitizPower anticipates the possibility of additional show cause orders for its Generation Companies. Efforts have been made to revise the reliability performance indices through a rule-making petition in the ERC entitled "*In the Matter of the Petition to Initiate Rule-Making for the Amendment of the Rules for the Interim Reliability Performance Indices and Equivalent Outage Days Per Year of Generating Units*" docketed as ERC Case No. 2022-003 RM. The Public Consultation for the rule-making petition was conducted in April 2022, and is currently pending before the ERC.

Another rule-making petition was filed entitled "Proposed Rules for Reliability Performance and Equivalent Forced Outage Days per Year of Generating Units" docketed as ERC Case No. 2023-001RM. Public consultations were scheduled on January 26, February 2, and February 9, 2024, but the industry is still awaiting the issuance of the rules.

13. Prescribing Revised Guidelines for Qualified Third Party

In view of the Qualified Third Party (QTP) Guideline Policy, as of March 23, 2021, the ERC is working on its amendments to the 2006 Rules on the Regulation of Qualified Third Parties Performing Missionary Electrification in Areas Declared Unviable by the DOE.

Under RA No. 11646, or the Microgrid Systems Act, which became law on January 21, 2022, all QTPs providing alternative electric service pursuant to Section 59 of Republic Act No. 9136 are now known as microgrid system

providers. On May 24, 2022, the DOE issued the Rules and Regulations to Implement Republic Act No. 11646, docketed as Department Circular No. DC2022-05-0017.

In 2023, the DOE conducted the 1st Micro Grid Service Provider Competitive Selection Process (MGSP-CSP) for eight unserved areas in the Provinces of Cebu, Quezon, and Palawan.

14. Promulgating the Renewable Energy Market (REM) Rules

On June 10, 2022, the DOE issued DOE Department Circular No. DC2022-06-0019, *Declaring the Interim Commercial Operations of the Renewable Energy Market*. The Circular provides a significant framework and mechanism for the commencement of the Renewable Energy Market (REM) Interim Commercial Operation (I-COP). The REM I-COP shall not yet involve any financial transactions, until such time that the Commercial Operation of the REM has been declared by the DOE. The DOE launched the I-COP REM on July 28, 2022 to begin validations of Renewable Energy Certificates (RECs) but no trading has commenced yet. Pending is the third component of the readiness criteria, specifically, the ERC Guidance on (a) REC Price Cap and Methodology, (b) Rules on Recovery Mechanism for the Cost of RPS Compliance, and (c) Structure and Level of Market Transaction Fees for REM.

On September 6, 2022, DOE DC2022-06-0026 entitled “Adopting Amendments to the REM Rules (Provisions for the Submission of Data by the National Transmission Corporation to the Renewable Energy (RE) Registrar, Obligations of the REM Governance Committee (RGC) and Renewable Energy Certificate (REC) Issuance, and Additional Seats in the RGC for the Retail Electricity Suppliers and for Small REM Generators).” took effect.

The DOE announced the full operation of the REM to commence on December 26, 2024.

On October 28, 2022, the DOE promulgated DC2022-09-0030, entitled “Prescribing the Adjusted Annual Percentage Increment to be Imposed on all Mandated Participants of the Renewable Portfolio Standards for On-Grid Areas.” This adjusted the Minimum Annual Incremental RE percentage (Km) from 1% to 2.52% as the increased requirement that Mandated Participants need to source or produce from RE resources.

On May 23, 2023, the DOE promulgated DC2023-05-0014, entitled “Promulgating the Revised Rules and Guidelines Governing the Operationalization of the Renewable Portfolio Standards (RPS) for Off-Grid Areas Pursuant to Section 12 of the Renewable Energy Act of 2008”.

On January 15, 2024, the PEMC posted an Advisory informing that RECs have been released until December 2022 and reminding REM Market Renewable Portfolio Standards (RPS) Mandated Participants to start surrendering RECs for compliance to 2020 RPS obligations pursuant to REM Rules 4.1.3 and to follow the Work Instructions that PEMC provided.

15. Feed-in-Tariff System

The ERC issued Resolution No. 16, Series of 2010, otherwise known as “Resolution Adopting the Feed-In Tariff Rules” (the “FIT Rules”) which establishes the FIT system and regulates the method of establishing and approving the FITs and the FIT-All.

In ERC Resolution No. 12, series of 2022, in order to mitigate the rising levels of inflation and cost of living, the ERC adopted a temporary suspension in the collection of FIT-All for a period starting December 2022 until the February 2023 billing months. Subsequently, on February 22, 2023, the ERC issued ERC Resolution No. 2, Series of 2023, extending the suspension of the collection of FIT-All for another six months, from March 2023 to August 2023 billing months, unless lifted earlier by the ERC through a separate resolution.

In ERC Resolution No. 14, Series of 2023, the ERC approved the FIT for Run-of-River Hydropower at the rate of ₱6.1110/kWh for eligible plants which qualified from January 1, 2020 to January 31, 2021, and thereafter an annual depression of 0.5% until the 250MW installation target is fully subscribed.

On January 16, 2024, ERC promulgated ERC Resolution No. 1, Series of 2024, lifting the suspension of the collection of FIT-All, and resuming the collection of FIT-All beginning February 2024 customer billing.

On February 19, 2025, the ERC approved a new rate of ₱0.1189 kWh for the feed-in tariff allowance (FIT-All), which will take effect starting in March 2025.

16. Revisions to the Guidelines for the Financial Standards of Generation Companies

On February 16, 2021, the ERC issued Resolution No. 03, Series of 2021, entitled "*A Resolution Adopting the Revised Guidelines for the Financial Capability Standards of Generation Companies*".

The Revised Financial Guidelines aim to set out the minimum financial standards of 1.25x Debt Service Capability Ratio ("DSCR") to ensure that generation companies meet these standards to protect the public interest as required under Section 43, b(ii) of the EPIRA and provided by Appendix 1, FS.A 1.3 of the Philippine Grid Code. A generation company failing to comply with the set financial standards shall submit to ERC a program to comply within 60 days of receipt of an ERC directive.

17. Green Energy Auction Policy

On July 14, 2020, the DOE issued guidelines on the Green Energy Auction Policy (Department Circular No. DC 2020-07-0017) which set the framework for which the DOE shall facilitate the procurement of supply from RE projects by the mandated participants under the RPS on-grid rules through a competitive process for compliance with the RPS program and as applicable for their long-term power supply requirements. The process involves a regular auction process (notice every 15th of June) to be implemented by the Green Energy Auction Committee (GEAC). The Contracting Customers and the Winning Bidders will execute a Green Energy Implementation Agreement (GEIA), which involves the Market Operator (MO) as the entity to allocate energy and calculate corresponding payments. The ERC will approve the GEIA template and the Green Energy Auction Reserve (GEAR) Price. Each Winning Bidder will have its own Green Energy Tariff (pay-as-bid), which shall not be higher than the GEAR Price. On the other hand, the Contracted Customers will pay the average price, subject to the allocation/calculation of MO, per trading interval.

On November 3, 2021, the DOE issued DC2021-11-0036 providing the Revised GEAP Guidelines listing out the Green Energy Auction steps for the competitive selection process, adopting the FIT framework as the mechanism for RE compensation and introducing an Opt-In mechanism for the Mandated Participants.

The first round of GEAP was completed in June 2022. On January 11, 2023, the DOE posted a call for comments for the Opt-in Mechanism for GEAP.

On September 26, 2023, The DOE issued DC2023-09-0027 to clarify that the Green Energy Tariff of the Winning Bidder is considered as its FIT, and is not a separate and distinct charge against the FIT-All Fund.

On December 12, 2023, the DOE issued DC 2023-10-0029, providing specific auction policy and guidelines for Non-FIT-Eligible RE technologies in the GEAP.

The second round of GEA (GEA-2) was completed in 2023. As of February 28, 2025, the results of the third round of GEA (GEA-3) were being evaluated.

18. Green Energy Option Program

On August 16, 2021, the ERC promulgated Resolution No. 08 on the Green Energy Option Program ("GEOP"). The regulatory framework for GEOP sets the technical and interconnection standards and wheeling fees of Renewable Energy (RE) Generating Facilities. The GEOP is a mechanism that will provide end-users the option to choose RE resources as their sources of energy. The GEOP Rules seek to guide the key stakeholders on who may qualify to avail, how to be licensed to provide the connection and set the fundamental agreements on the details for switching services, special power provision, related rates, and settlement of fees.

The DOE posts an updated list of RE Suppliers under GEOP at its website to help inform consumers so they can exercise their options. Latest update was in February 2023.

On March 1, 2024, the DOE issued Department Circular No. DC2024-03-0009109, declaring March 26, 2024 as the commercial operations date of RCOA and GEOP in the Mindanao region.

On August 14, 2024, the Regional Trial Court (RTC) issued *A Resolution Adopting the Omnibus Rules for Customer Choice Programs in the Retail Market*, which consolidated the rules on RCOA and GEOP.

19. Retail Competition and Open Access

Through a Decision dated March 2, 2021, the SC acted on several petitions regarding the implementation of Retail Competition and Open Access. These petitions were brought by Philippine Chamber of Commerce and Industry, Siliman University, and Batangas II Electric Cooperative (docketed as G.R. No. 228588, 229143, and 229453), among other petitioners and intervenors, against the DOE and the ERC. The Supreme Court struck down DOE Circular No. DC2015-06-0010, series of 2015, and ERC Resolutions No. 5, 10, 11, and 28, all series of 2016, primarily for mandating contestability and prohibiting distribution utilities from participating in the contestable market. It likewise directed the ERC to promulgate guidelines on the DOE's Department Circular Nos. DC2017-12-0013 and DC2017-12-0014 for being more aligned with the objective of the EPIRA to promote robust competition among retail electricity suppliers.

On March 1, 2024, the DOE issued Department Circular No. DC2024-03-0009109, declaring March 26, 2024 as the commercial operations date of RCOA and GEOP in the Mindanao region.

On August 14, 2024, the ERC issued *A Resolution Adopting the Omnibus Rules for Customer Choice Programs in the Retail Market*, which consolidated the rules on RCOA and GEOP.

20. The Open Access Transmission Service (OATS) Rules

The Open Access Transmission Service (OATS) Rules describe the requirements and services provided by the Transmission Network Provider (TNP) that operates the high voltage backbone transmission system. The OATS Rules outline the responsibilities of the TNP and the functions of the System Operator (SO) as specified in the Philippine Grid Code (PGC) and the Wholesale Electricity Spot Market (WESM) Rules. It also sets out the responsibilities accepted by transmission customers as a condition of receiving the services. The OATS Rules aims to ensure the development of an appropriate, equitable and transparent electricity market, along with the safe, reliable, and efficient operation of the power system.

On June 9, 2022, the ERC published the 2022 Edition of the OATS, which was approved and adopted through ERC Resolution No. 03, series of 2022. AboitizPower continues to monitor for any developments on the OATS Rules.

21. Amendments to the Public Service Act

Commonwealth Act No. 146, otherwise known as the Public Service Act, is a law governing the regulation of public services, which originally included "electric light, heat and power". On March 21, 2022, former President Duterte approved the amendments to the Public Service Act. The new law, Republic Act No. 11659, included amendments to the classification of certain public services as public utilities, which included both the distribution and transmission of electricity. The amendments also provided for revisions in the regulatory authorities of administrative agencies, but also provided that nothing in the Public Service Act shall be construed as amending or repealing laws and administrative regulations deregulating or delisting services, industries and/or rates.

22. Retail Aggregation

On June 24, 2022, the ERC published on its website ERC Resolution No. 04, Series of 2022, entitled "A Resolution Adopting the Rules for the Electric Retail Aggregation Program". The Retail Aggregation Rules establish standardized rules and procedures governing the aggregation of electricity requirements of End-users in the Competitive Retail Electricity Market (CREM) and prescribing and clarifying the requirements, conditions,

eligibility, qualifications, and disqualifications of participants and the Aggregator in the Retail Aggregation Program.

The rules on aggregation were consolidated in ERC Resolution No. 13, series of 2024, entitled *A Resolution Adopting the Omnibus Rules for Customer Choice Programs in the Retail Market*.

23. Distributed Energy Resource

On November 29, 2022, the ERC published ERC Resolution No. 11, Series of 2022, entitled “A Resolution Adopting the Rules Governing Distributed Energy Resources (DER)”. The DER Rules establish the procedure for securing the appropriate license prior to operations, commercial arrangements that DERs may enter into for the energy it produces, pricing methodologies, reduction of contracted energy volumes, payment of subsidies, interconnection standards, reportorial requirements, and imposition of penalties for failure to comply with the terms and conditions of the DENR’s Certificate of Compliance (COC).

24. Pass Through Charges

On December 19, 2022, the ERC published on its website ERC Resolution No. 14, Series of 2022, entitled “A Resolution Adopting the Revised Rules Governing the Automatic Cost Adjustment and True-up Mechanisms and Corresponding Confirmation Process for Distribution Utilities”, which aims to push for a more transparent collection of pass-through costs or charges by DUs. Among the revisions is the creation of a Restricted Fund by the DUs where over-collections are maintained and earmarked for repayment to customers in subsequent billing months, effectively providing more timely refunds to end-users.

(xii) Amount Spent on Research and Development Activities

AboitizPower and its Subsidiaries do not allot specific amounts or fixed percentages for research and development. All research and development activities are done by AboitizPower’s Subsidiaries and Affiliates on a per project basis. The allocation for such activities may vary depending on the nature of the project.

(xiii) Costs and Effects of Compliance with Environmental Laws

AboitizPower’s generation and distribution operations are subject to extensive, evolving, and increasingly stringent safety, health, and environmental laws and regulations. These laws and regulations address concerns relating to: (a) air quality and greenhouse gas (GHG) emissions; (b) wastewater discharges; (c) the generation, handling, storage, transportation, treatment, and disposal of toxic or hazardous chemicals, materials, and wastes; (d) workplace conditions; and (e) employee’s exposure to hazardous substances.

Standard laws and regulations that govern business operations include the Clean Air Act (RA No. 8749), Ecological Solid Waste Management Act (RA No. 9003), Clean Water Act (RA No. 9275), Toxic Substances and Hazardous and Nuclear Wastes Control Act (RA No. 6969), Philippine Environmental Impact Statement System (PD No. 1586), and Occupational Safety and Health Standards (RA No. 11058). The RE Law also added new and evolving measures that must be complied with. These laws usher in new opportunities for the Company and set competitive challenges for the businesses covered. Additional regulations such as DOE’s Energy Regulation No. 1-94 require generation companies to allocate Reforestation, Watershed Management, Health and/or Environment Enhancement Fund (RWMHEEF) for the benefit of host communities and protection of the natural environment. Funds are also set for the management of carbon sinks and watershed areas through a nationwide reforestation program required by the facilities’ Environmental Compliance Certificate and/or related commitments such as approved Environmental Management Plans.

The Safety, Health, Environment and Security (SHES) group of AboitizPower oversees the SHES programs and activities, including the accounting of all environmental impacts, within its operational control from the corporate center, Business Units, to facility teams. For the Generation Group, the facilities include: (1) APRI’s Tiwi-MakBan plants, (2) SacaSun’s San Carlos plant, (3) PV Sinag’s Cayanga-Bugallon plant, (4) the Benguet, Bakun, Sabangan, Sibulan A, B, and Tudaya A, Tudaya B, Manolo Fortich, and Talomo HEPPs of the Hedcor Group, (5) SN AboitizPower Group’s Ambuklao, Magat, and Maris plants, (6) the Cebu, Mactan, Mobile 1, Mobile 2, Mobile 3-6, and Naga oil plants, and (7) the Davao and Toledo coal plants. For the Distribution Utilities, the

facilities include Cotabato Light, Davao Light, Visayan Electric, Balamban Enerzone, Mactan Enerzone, Lima Enerzone, Malvar Enerzone, and Subic EnerZone.

AboitizPower and its Subsidiaries have allocated budgets for environmental expenditures covering costs for waste disposal, remediation, pollution control, and environmental initiatives and programs that support climate strategies along with this impact. All facilities are in compliance with regulatory requirements, thus noting zero spending for remediation costs.

AboitizPower and its Subsidiaries commit to following international best practices in all power plants and distribution utilities, in line with its Safety, Health, and Environment Policy. This is evidenced by obtaining ISO certification for the management systems pertaining to Quality, Environment, and Occupational Health and Safety, with an 88% coverage for the Distribution Group and a 97% coverage for the Generation Group. The AboitizPower Distribution Utilities, except for Malvar Enerzone, have maintained their certifications on ISO 9001:2015 Quality Management System, ISO 45001:2018 and ISO 14001:2015 Environmental Management System. For the Generation Group, only PV Sinag remains uncertified to the three aforementioned standards.

In 2024, AboitizPower's commitment to continuous improvement in managing environmental impacts is evident in its total environmental management operating expense (OpEx) at ₱83.9 mn and environment-related capital expenditure (CapEx) of ₱9.9 mn. This consists of ₱36.6 mn for the Renewables Group, ₱47.3 mn for the Thermal Business Group, and ₱9.8 mn for the Distribution Utilities. The distribution of the total expenses for OpEx and CapEx are as follows: (i) 50% for Internal Initiatives and Programs including compliance monitoring; (ii) 27% for External Initiatives; (iii) 12% for Waste Disposal; and (iv) the remaining 10% are CapEx. The Company prioritizes adherence to Hazardous Waste Management rules. The Geothermal Group has invested in enhancements to its Continuous Ambient Air Monitoring Stations, while the Hedcor Group upgraded its primary nursery and updated water level sensors.

AboitizPower exceeds basic adherence to environmental standards by proactively endorsing various environmental activities. The Company engages in initiatives such as Adopt an *Estero*/Waterbody and maintains its support to the Continuous Ambient Air Monitoring System to the Environmental Management Bureau (EMB) of the DENR. In 2024, AboitizPower participated in 99 environmental initiatives, facilitating the planting of 307,643 trees across about 278 hectares with the support of nearly 3,206 volunteers. The Company facilitated and supported 104 coastal and river clean-up initiatives, leading to the collection of approximately 29,691 kilograms of waste and the engagement of 3,362 volunteers.

AboitizPower and its Subsidiaries received a total of 57 awards, certifications, and citations in 2024 concerning Safety, Health, and Environmental Services (SHES). SN AboitizPower - Benguet received the prestigious ASEAN Occupational Safety and Health Network (OSHNET) Award for its innovative safety practices, setting high standards for the region. Makban Geothermal Plant and Tiwi Geothermal Plant were honored with the DOE Safety and Health Association of the Philippine Energy Sector (SHAPES) Award for their leadership in promoting safety, health, and productivity in the energy sector, while TMI's Nasipit Plant earned the DOE *Gawad Kaligtasan at Kalusugan* Award for its continuous improvement in workplace safety. SN AboitizPower- Magat also received the DOE *Gawad Kaligtasan at Kalusugan* Award, alongside the *Gawad Kalasag* for its proactive disaster risk management efforts. At the regional level, the Thermal Business Group and Davao Light were recognized by the DENR for their strong commitment to environmental sustainability and corporate social responsibility. These accolades reflect the outstanding efforts of these organizations in creating safer and healthier workplaces, advancing sustainability, and demonstrating leadership in their respective industries, setting an inspiring example for others to follow.

In 2024, AboitizPower and its Subsidiaries did not incur any major sanctions for violation of environmental standards and laws. AboitizPower continues to be cognizant of new opportunities to comply with regulatory requirements and improvement of systems to promote safety and prevent adverse impacts to the environment or affected ecosystems.

(xiv) Employees

At the parent company level, AboitizPower had a total of 610 employees as of February 28, 2025. This figure includes executives, managers, supervisory, and rank-and-file staff employees. There is no Collective Bargaining Agreement (CBA) covering AboitizPower employees.

The following table provides a breakdown of total employee headcount on a per business group basis, according to employees' function, as of February 28, 2025:

Business Group	Number of Employees					Unionized Employees	Expiry of CBA
	Total	Executives	Managers	Supervisors	Rank & File		
Aboitiz Power	610	115	145	121	229	0	N/A
Generation Companies							
Run-of-River Hydros	446	14	31	58	343	78	September 19, 2028 (Hedcor)
Large Hydros	214	23	61	69	61	0	N/A
Geothermal	281	11	34	64	172	0	N/A
Solar	7	0	1	2	4	0	N/A
Oil	407	8	45	96	258	0	N/A
Coal	1,800	57	145	515	1,083	0	N/A
RES	5	0	0	1	4	0	N/A
Distribution Utilities	908	15	70	143	680	340	December 31, 2026 (Visayan Electric) June 30, 2029 (Cotabato Light) June 16, 2026 (Davao Light) May 8, 2025 (SFELAPCO)
Total No. of Employees	4,678	243	532	1,069	2,834	418	N/A

The Company does not anticipate any significant increase in manpower within the next 12 months unless new development projects and acquisitions would materially require an increase.

(xv) Major Risk/s Involved in the Business

An integral part of AboitizPower's Enterprise Risk Management (ERM) efforts is to anticipate, understand, and address the risks that the Company may encounter in its businesses.

Risk management is integrated in the Company's strategic and operational planning and decision-making processes to support intelligent and informed risk-taking. Through a robust framework, AboitizPower employs a top-down and bottom-up approach to comprehensively identify, assess, and manage risks. AboitizPower's Management Committee sets direction by identifying business critical risks while operating teams also identify and assess the risk areas that may impact the Company's strategic objectives and day-to-day business operations. In addition, the Company develops comprehensive key risk treatment plans to address the drivers of its top risks, as well as emerging risks that may also significantly impact its business and stakeholders. AboitizPower's ERM framework ensures sustainable growth by proactively managing risks through three key pillars: (1) **Business Risk & Planning (BRP)** for risk identification and mitigation; (2) **Business Continuity Management (BCM)** for operational resilience; and (3) **Risk Finance (RF)** for managing insurable risks. Integrated into organizational planning, the framework incorporates Environmental, Social, and Governance (ESG) considerations, business continuity, and risk transfer strategies, continuously strengthening the Company's risk resilience.

Risk management planning in Aboitiz Power is an iterative process that is conducted at least semi-annually for strategic risks. Most of the top or strategic risks that are captured at the corporate or AboitizPower level

originated from those identified by the Management Committee and reported by the Corporate Support and Business Units. Business Units review operational risks and implement mitigation measures as part of day-to-day operations. At the end of every review period, strategic and emerging risks are reported to the highest management committee and the Board Risk and Reputation Management Committee.

Following the completion of the end-2024 strategic risk consolidation at AboitizPower, the following top or strategic risks have been identified and reported to the senior management executives:

1. Energy Transition

Investments are at risk if these are not able to sustain a viable economic return due to a combination of technology, regulatory, and/or market changes. Among these changes, ESG strategies continue to be the trend in the global community where investors are seeking to mitigate exposure to fossil-based fuel and diversifying portfolios to expand renewable energy capacity. In the event that future laws or contracts are enacted imposing restrictions on operations and refinancing, particularly in relation to power plants utilizing fossil fuels, certain capital expenditures or operating expenses or financing costs may not be fully recoverable.

The growing multi-sectoral negative action against coal has led many financial institutions to restrict investments in coal businesses and projects. The following are important considerations to the Company's existing portfolio and strategic project pipeline, where coal concentration will significantly be reduced by the year 2030:

- a. Compliance challenges arise from evolving policies such as the Natural Gas Industry Bill, Low Carbon Economy Bill, the Climate Accountability Act (CLIMA Act), and the Energy Transition Act, which could impose restrictions on fossil fuel operations, financing, and future contracts.
- b. Stricter Mass Emission Rate Standards (MERS) introduce additional regulatory requirements, impacting coal plant operations and compliance costs.
- c. Insurers continue to align their coal underwriting and investment policies with global sustainability and ESG trends, resulting in higher premiums and limited capacity for coal coverage. Some insurers are reducing or withdrawing from coal-related risks, prompting AboitizPower to explore alternative risk transfer strategies. The global insurance market is facing a decline in capacity for natural catastrophe (Nat Cat) risks, driven by insurers' recovery strategies from catastrophic loss claims and worsening global loss ratios. This further impacts coal asset coverage.
- d. Financing and refinancing risks in terms of the Company's inability to borrow money to fund future projects due to current investments in coal. While banks are still willing to lend, the cost of project financing will be less competitive;
- e. Withdrawal of technical support by critical contractors and suppliers from construction and/or maintenance thermal power plants in line with global trends on sustainability; and
- f. Sourcing of fuel (coal and oil) due to global price volatility because of supply and demand fundamentally affected by pressure on the continued operation of mines.

The Philippines is a party to the 2015 Paris Agreement signed by almost 200 nations. The Paris Agreement aims to keep the increase in global average temperature to well below 2°C above pre-industrial levels and to limit the increase to 1.5°C, since this would substantially reduce the risks and effects of climate change. As a party to the agreement, the Philippines may impose more stringent regulations, particularly on coal-fired power plant emissions, requiring expensive pollution controls on coal-fired power plants, among other measures. These measures may significantly increase costs of coal-fired power plants and, at the same time, increase the cost competitiveness of renewable energy.

Recently promulgated implementing rules and regulations by the DOE on "Renewable Portfolio Standards" also mandate electric power industry participants (such as generation companies, distribution utilities and electric cooperatives) to source or produce a portion of their electricity requirements from eligible renewable energy resources and undertake CSPs in sourcing renewable energy. Although unlikely, a significant portion of the captive market may shift away from coal and other hydrocarbon fuels, which may expose the coal-fired power plants of the Company to stranded-asset risk (i.e., hazard of an asset suffering from an unanticipated write-down, devaluation, or conversion to liability).

AboitizPower is cognizant of the regulatory and market drivers in the shift towards green and sustainable business transformations. AboitizPower and its Subsidiaries are guided by its sustainability framework that looks into environmental, social and governance risks including climate-related risks of its value chains. Its strategy has long considered environmental sustainability as one of its key pillars and, to date, together with its partners, the Company is the largest private renewable energy operator in the country with around 1,150 MW in net sellable installed capacity as of end-2024.

AboitizPower's growth strategy remains aligned with the energy trilemma – balancing the three pillars of energy security, energy equity, and environmental sustainability. Over the last decade, the growth in energy demand has necessitated a focus on energy security and energy equity – the provision of reliable, and affordable energy for a growing economy. Having addressed energy security and energy equity via the presence of sufficient baseload capacity, AboitizPower has begun to shift focus back to environmental sustainability, and rebalancing its energy portfolio. This transition is included in the Company's sustainability agenda, with the Company targeting a material shift in its energy mix away from coal towards renewables and other lower emissions sources of energy, such as natural gas.

Further, to properly assess the potential and extent of the above-mentioned risks, AEV and AboitizPower signed up to become the first Philippine supporters of the international Task Force on Climate-Related Financial Disclosures ("TCFD") in early 2020. This is a voluntary commitment to adopt a defined governance structure on identifying and addressing physical and transition risks associated with climate change, as well uncovering opportunities, and improving disclosures to provide clear and reliable information to stakeholders. Under SEC Memorandum Circular No. 4, series of 2019 on the Sustainability Reporting Guidelines for Publicly-Listed Companies ("PLCs"), there is a three-year period under which PLCs can comply, which includes the adoption of the TCFD reporting template.

As a validation to AboitizPower's ESG commitment to risk and crisis management, in the 2024 S&P Global Corporate Sustainability Assessment, AboitizPower was ranked eleventh in the global ranking for risk and crisis management performance among 261 rated global companies, ranked fourth in Asia-Pacific and highest ranked among rated Philippine companies within the same industry. Good risk management is one of the ways AboitizPower is supporting its ESG performance in particular in the area of governance.

2. Regulatory

The electric power industry is characterized by a constantly evolving regulatory environment. Any shortcoming in regulatory compliance poses negative consequences in both the net income and reputation of each Business Unit and the Group. Further, the Company's results of operations and cash flow could be adversely affected by the inability to predict, influence, or respond appropriately to changes in law or regulations, including any inability or delay in obtaining expected or contracted increases in electricity tariff rates or tariff adjustments for increased expenses, or any inability or delay in obtaining or renewing permits for any facilities, could adversely impact results of operations and cash flow. The Company's business could also be adversely affected by any changes in laws or regulations, or changes in the application or interpretation of laws or regulations in jurisdictions where power projects are located, could adversely affect the Company's business, including, but not limited to:

- a. Adverse changes in tax laws, including misinterpretation of statutory incentives granted to developers;
- b. Changes in the timing of tariff increases or in the calculation of tariff incentives;
- c. Change in existing subsidies and other changes in the regulatory determinations under the relevant concessions or grants;
- d. Other changes related to licensing or permitting which increase capital or operating costs or otherwise affect the ability to conduct business, affecting both the generation and distribution utility business;
- e. Other changes that have retroactive effect and/or take account of revenues previously received and expose power projects to additional compliance costs or interfere with our existing financial and business planning; or
- f. Other changes in the performance based regulations affecting the return of capital investments in the future.

Any of the above events may result in lower margins for the affected businesses, which could adversely affect AboitizPower's business competitiveness.

For renewable assets, pricing is fixed by regulatory arrangements which operate instead of, or in addition to, contractual arrangements. To the extent that operating costs rise above the level approved in the tariff, the Business Units that are subject to regulated tariffs would bear the risk. During the life of a project, the relevant government authority may unilaterally impose additional restrictions on the project's tariff rates, subject to the regulatory frameworks applicable in each jurisdiction. Future tariffs may not permit the project to maintain current operating margins, which could have a material adverse effect on the Business Unit or the Group, financial condition, results of operations and prospects. Withholding of adjustment in feed-in-tariff rates and other fiscal incentives for qualified plants under the portfolio of AboitizPower are risks that are being monitored and addressed through active Stakeholder engagement with similarly situated developers and the ERC.

To anticipate and proactively respond to changes in regulations, the Regulatory Affairs and External Relations teams of AboitizPower constantly collaborate with the DOE and the ERC to work towards a sound and sustainable regulatory and policy environment. Similarly, AboitizPower's Safety, Health, Environment, and Safety (SHES) team keeps abreast with environmental laws and coordinates with the DENR on matters pertaining to environmental compliance.

These teams, among others, actively participate in consultative processes and public consultations to provide feedback and positions on proposed laws and regulations. The Company's participation likewise ensures that its interpretation of such laws and regulations is aligned with the regulators. This is done in cooperation with organized power industry groups such as the Philippine Independent Power Producers Association (PIPPA) and Philippine Electric Plant Owners Association (PEPOA). Regular dialogues are conducted with host communities, media, non-government organizations, and the academe, to educate and update various groups about the power industry.

3. Operations

The loss of, and/or damage to, facilities caused by natural calamities such as earthquakes, typhoons, and floods may result in significant business interruptions within AboitizPower. Interruptions may also be caused by other factors such as critical equipment breakdown, Information Technology (IT) and OT security breaches, fires and explosions, hazardous waste spills, workplace injuries and fatalities, terrorism, and other serious risks.

Planned maintenance and overall outage management of AboitizPower's generation facilities and its critical equipment and OT infrastructure and systems are governed by asset management standards based on global best practices. Threats to generation and machinery breakdown risk management plans are continually monitored and updated by operations and maintenance teams to effectively mitigate the impact of unplanned or forced outages. Distribution network availability and reliability targets have consistently been aligned with the performance-based standards set by the ERC.

All Business Units have also achieved OSHAS 18001 certification, an international standard which is focused on controlling occupational health and safety hazards. AboitizPower Business Units are also transitioning to the ISO 45001 standard to drive a risk-based culture with more proactive approaches toward mitigating risks before they happen. To further reinforce industrial fire safety, an annual in-house training program on Fixed Fire Fighting Systems of the U.S. National Fire Protection Association is conducted for operations, maintenance, and safety personnel.

The Business Units at AboitizPower regularly undertake a comprehensive development, review, updating, implementation, testing, and improvement of their BCPs. This dynamic approach ensures that the plans remain relevant to current business conditions and effectively address the uncertainties and challenges faced by the Company. Some of these key enhancements include: (a) site-specific threat assessment; (b) typhoon preparedness; (c) regular emergency drills and simulation exercises on various scenarios related to other natural and man-made calamities; and (d) post-event evaluations to ensure that employees are able to respond effectively and safely as planned.

As part of its continuous improvement efforts, AboitizPower is exploring the expansion of business continuity strategies on a geographic regional scale. This approach seeks to enhance coordination among several plants, fostering a more synchronized and efficient response to potential disruptions as aligned to the DOE Energy Resilience Plan.

Furthermore, to elevate the existing Business Continuity Management (BCM) framework and practices, AboitizPower has transitioned from a scenario-based approach to an impact-based approach. This shift aims to achieve organizational resilience by prioritizing the understanding and management of potential impacts on the business, ensuring a more comprehensive, adaptive and robust response to a variety of disruptive events.

AboitizPower has established group insurance programs that leverage the Company's portfolio of generation and distribution assets, supported by robust risk modeling and quantification techniques, which are subjected to regular periodic reviews. The Company is committed to ensuring that its Business Units have the most suitable insurance solutions in place, striking the optimal balance between retaining and transferring risks while effectively managing the Total Cost of Insurable Risk. As such, the Company procures business interruption insurance to safeguard against potential losses in gross profits resulting from significant damage to critical plant assets. The Company is undertaking a major initiative to explore alternative risk transfer strategies. This includes efforts to optimize loss indemnity and risk retention, aligning with the Company's goal to enhance the efficiency and effectiveness of its risk management practices. By proactively managing risk through insurance solutions and exploring innovative risk transfer strategies, AboitizPower aims to strengthen its resilience against potential financial losses and disruptions, thereby ensuring the continuity and sustainability of its operation while preserving business competitiveness.

4. Transmission

AboitizPower recognizes the importance of a reliable and efficient transmission infrastructure in ensuring the uninterrupted delivery of electricity to its customers. Delays in transmission projects, grid congestion, and reliance on System Integrity Protection Schemes (SIPS) pose potential challenges, which the Company proactively addresses through strategic planning and industry collaboration.

To mitigate curtailment risks, AboitizPower aligns its project development timelines with the DOE-approved Transmission Development Plan (TDP), ensuring that new generation projects are strategically positioned in areas where grid capacity is planned for expansion. The company actively advocates for the implementation of third-party transmission development, supporting government initiatives to accelerate critical infrastructure projects. Further, AboitizPower works closely with NGCP to enhance SIPS protocols, strengthening grid reliability. By fostering strong collaboration with regulators and grid operators, AboitizPower is committed to ensuring grid stability, minimizing generation curtailment, and optimizing the efficiency of its power assets.

5. Cyber and Information Security

AboitizPower acknowledges the risks associated with global information security breaches, the rising frequency of industry driven cyberattacks, and the growing complexities posed by digital transformations. Management also recognizes the imperative to address information security threats to both prevent targeted and non-targeted attacks which can adversely disrupt business operations, impact customer services, and affect the Company's financial stability and reputation.

In 2024, AboitizPower took significant steps to enhance its protection measures, aiming to secure both its Operational Technology (OT) and Information Technology (IT) environments from potential cyber threats. Specifically, within the realm of Operational Technology, the Power Generation and Distribution Utilities Business Groups of the Company have finalized the implementation of a standardized, Company-wide Operational Technology (OT) Security Minimum Standard. These initiatives reflect a dedicated commitment to establish consistent and robust security measures across the organization's operational technology infrastructure.

AboitizPower aligns with the Aboitiz Group-wide Cyber Security Program - covering governance frameworks, standards, training and culture-building - to guide its enterprise-wide security posture. Its Information Security Management System (ISMS) remains central to its Cybersecurity strategy for IT systems and is embedded in all three fundamental pillars of security, namely, People, Process, and Technology. By integrating cybersecurity principles within these pillars, AboitizPower aims to fortify its defenses and maintain a holistic and resilient cybersecurity framework.

AboitizPower has likewise reinforced its defenses through the implementation of various security measures such as Continuous Threat Detection (CTD) to proactively identify and mitigate cyber threats, network segmentation and next-generation, firewalls to contain and block unauthorized access, endpoint protection for critical systems, and Secure Remote Access (SRA) for controlled connectivity. These proactive steps underscore the organization's dedication to maintaining a resilient cybersecurity posture and safeguarding its systems and data against emerging threats in the digital landscape.

Further efforts to strengthen resilience include Cyber Incident Response Playbook that enables a structured and swift response, plus a security awareness program aimed at improving staff readiness. A Third-Party Risk Assessment Platform is also in use to assess vendor and partner security vulnerabilities. Initiatives for improved Asset Discovery and Visibility continue to expand oversight of IT and OT assets. Cloud infrastructure and operating systems undergo regular hardening to limit exposure, while Managed Detection and Response (MDR) services provide advanced threat monitoring and remediation. Periodic security audits and penetration tests proactively help the organization uncover and address security gaps.

Cyber and Information Security risks remains a critical item in the agenda of the Board Risk Committee, reflecting AboitizPower's proactive approach to safeguarding its operations and stakeholders in an ever-evolving digital landscape.

6. Supply Chain

AboitizPower recognizes that a resilient supply chain is essential to ensuring the reliability and efficiency of its power generation and distribution assets. The increasing complexity of global supply networks, coupled with geopolitical uncertainties, economic volatility, and climate-related disruptions, underscores the need for a proactive approach to supply chain risk management. Without effective mitigation strategies, disruptions could lead to forced outages, financial losses, and operational instability.

To safeguard against potential supply disruptions, AboitizPower actively engages in continuous stakeholder planning and collaboration with critical vendors. Strengthening supplier relationships and ensuring business continuity remain key priorities. The company has also established a reverse engineering policy to enhance self-reliance in maintaining critical equipment and reducing dependency on external suppliers. An organized category management team within TBG optimizes procurement strategies, while benchmarking, co-competition, and alternative sourcing initiatives enhance supply chain flexibility. Contracting alternative vendors further secures critical supply availability, while the implementation of the China Plus Strategy for its thermal assets diversifies sourcing beyond a single market. Additionally, to strengthen project execution capabilities, the Company is prequalifying EPC contractors across Asia, including Malaysia and Vietnam, under ARI.

Ensuring a stable fuel supply remains a key priority, particularly in the face of potential disruptions that could impact power generation reliability and cost efficiency. AboitizPower is committed to diversifying fuel sources to enhance operational flexibility and reduce reliance on a single energy supply. The company is also expanding its pricing mechanisms by increasing exposure to multiple price indices to better manage fuel cost fluctuations. Insurance coverage has been secured for fuel stock to safeguard against unexpected supply chain disruptions. Additionally, a Playbook for Alternative Coal Sourcing has been developed to ensure structured approaches in securing alternative coal supplies when needed.

AboitizPower continuously enhances its strategic sourcing and contract management capabilities through a structured category-based procurement plan, long-term and enabling contracting, and strengthened stakeholder engagement. Addressing contract ambiguity remains a priority to prevent disputes and delays

in supply agreements. Supply chain resilience planning is also reinforced through the development of a forced outage playbook, utilization of market intelligence, improved outage planning and logistics support, and enhanced annual replenishment planning. Ensuring the availability of critical spare parts and optimizing category management further strengthen operational continuity.

In line with its long-term vision, AboitizPower integrates sustainability and compliance into its supply chain practices. The creation of an ESG roadmap ensures that procurement strategies align with ESG principles, while ongoing safety initiatives reinforce responsible sourcing and risk mitigation.

By implementing these comprehensive strategies, AboitizPower continues to strengthen its supply chain resilience, ensuring the uninterrupted availability of critical resources and maintaining operational excellence amid evolving global challenges.

7. Reputation

AboitizPower recognizes that its reputation is one of its most valuable assets, a competitive advantage that allows the Company to earn, maintain, and strengthen the trust of its stakeholders. The Company knows that its reputation today took generations to build and sustain; hence, the need to protect and enhance it progressively is imperative.

In today's operating environment, characterized by increasing corporate governance standards, heightened public consciousness due to social media, and greater scrutiny from key stakeholders, reputation risks remain a significant concern. This risk can arise from negative publicity, ethical breaches, regulatory penalties, or operational failures, impacting the Company's standing and stakeholder trust.

AboitizPower continues to strengthen stakeholder engagement activities with all its stakeholders, including its customers, employees, shareholders, lenders and insurers, regulators, host communities, and LGUs.

The Company's recent Corporate Sustainability Assessment by the highly regarded S&P Global has shown a slight improvement in AboitizPower's ESG performance. The Company's score decreased from 51 in 2023 to 50 in the 2024 assessment, which brings the Company to the 75th percentile ranking in its global peer group.

AboitizPower's Corporate Affairs team remains dedicated to communicating and amplifying AboitizPower's pivotal role in contributing to a sustainable energy transition in the country. The effectiveness of these communication efforts is assessed through the 'Strategy' pillar of the Reputation ID research. This evaluation focuses on how AboitizPower, in comparison to its competitors, demonstrates robust leadership, outlines a clear future direction, showcases innovation, and asserts authority within the energy sector.

Looking ahead, AboitizPower is committed to addressing gaps in various risk areas associated with ESG factors. The Company's growth strategy remains aligned with the energy trilemma of energy security, energy equity, and environmental sustainability, but will be characterized by a strategic shift from ensuring low-cost energy to also providing energy from more sustainable sources in the next decade.

8. Talent Risk

AboitizPower gears for further growth by shifting towards renewable energy sources and increasing its presence in the international market, while ensuring the availability and reliability of existing power plants. Both growth and operational excellence thrusts demand for organic subject matter experts of critical assets.

The risk on availability, readiness, and retention of talents for critical posts is inevitably increasing. Thus, talent attraction, optimization, and retention strategies are of utmost importance. In 2024, AboitizPower continued to heighten efforts in ensuring talent supply meets talent demand by utilizing strategic workforce planning process, in particular:

- a. Optimize talent attraction channels/approaches such as establishing a compelling employer brand, building targeted talent communities and employee referral programs;

- b. Retain critical talent by improving overall factors for employee retention;
- c. Build talent capability building to ensure a thriving workforce by deepening the bench for the critical talent/position and institutionalizing knowledge transfer;
- d. Promote a culture-centric engagement and benchmarked employee experience to retain critical talents;
- e. Create as robust labor relations and business continuity plans, labor regulatory compliance checks & manager education; and
- f. Improve Human Resources (HR) internal capability building and transformation through leveraging analytics and digital tools/system, re-skilling and resourcing, structure redesign and process simplification/standardization.

AboitizPower integrated the Strategic and Operational Workforce Planning into the Organizational Planning processes to enable the identification of current and future talent needs. This helped shape the people strategy of AboitizPower to be able to increase workers engagement and remain competitive in the job market reshaped by the COVID-19 pandemic.

9. Emerging Risks

Embedded in the risk management process is the continuous identification and monitoring of emerging risks which encompass both threats and opportunities. During environmental scans, potential risks are thoroughly examined, and subject matter experts conduct further studies to understand the nuances and potential impacts. These emerging risks are reported and discussed as part of the Group Risk Management Council and Board Risk and Reputation Management Committee regular agenda.

Emerging risks are newly developing risks that cannot yet be fully assessed due to high uncertainty but could have a major impact on the organization in the future. These potential risks could be triggered by the fast-changing landscapes in the political, economic, social, technological, environmental, and legal facets surrounding the Company's operations.

For AboitizPower, one such major risk is that of extreme weather events. As the Company expands its renewables portfolio in the Philippines, extreme weather events - typhoons, heavy rainfall, and droughts - pose risks to infrastructure, project timelines, and energy generation. Typhoons may damage assets and increase maintenance costs, while droughts can impact hydropower generation. To mitigate these risks, AboitizPower integrates climate resilience into site selection, engineering, and asset management. This includes structural reinforcements, geophysical and location evaluations and a diversified energy mix. By prioritizing resilience, AboitizPower safeguards investments and ensures reliable, sustainable energy for the Philippines.

While the Company has recognized that the availability of insurance and long-term financing for coal plants has become more and more challenging, these are being addressed by an overall sustainability strategy that is manifested by its portfolio mix moving towards sustainable energy sources over the long term. Active engagements with stakeholders to clarify AboitizPower's ESG strategy are undertaken to clarify the Company's positions and plans to achieve its sustainability goals in the context of the Philippine energy and growth plans. The market for fuel, particularly coal, is also being actively monitored as currently there are a lot of risk drivers that are starting to emerge that are coming from sustainability policies and dynamic domestic and international trade policies.

Disruptive and new technology are likewise emerging risks the Company continues to monitor. Among others, the battery storage and the digitization or internet of things are potential transformers of the power business. Energy storage could play a wider role in the global energy markets moving from limited uses to displacing power generation due to its potential for reliability, quality, and its capability for renewables integration. The internet of things has the potential to significantly transform the power sector by optimizing operations, managing asset performance. Other technologies are expected to impact power generation and transmission segments. The Company sees these technologies both as threats and opportunities.

Another emerging risk in the Company's risk radar is geoeconomic confrontations and geopolitical tensions in the Southeast and East Asian region and key supply chain hubs which pose risks to equipment procurement, project timelines, and cost stability. Disruptions in the global trade of critical components—

such as solar panels, wind turbines, and battery storage—may lead to delays and increased costs for AboitizPower. To mitigate these risks, AboitizPower diversifies its suppliers, strengthens local partnerships, and explore alternative sourcing strategies. By enhancing supply chain resilience, AboitizPower safeguards project continuity and ensures the steady growth of its renewable energy capacity.

AboitizPower remains committed to proactively identifying and managing emerging risks to ensure long-term resilience. By continuously monitoring these risks and integrating strategic responses, AboitizPower strengthens its ability to adapt and thrive in an evolving energy landscape.

(b) Requirements as to Certain Issues or Issuers

(i) Debt Issues

(a) Shelf Registration of Thirty Billion Peso Fixed-Rate Bonds issued in 2017 and 2018

On June 19, 2017, SEC issued an Order of Registration and a Certificate of Permit to Offer Securities for AboitizPower's fixed-rate corporate retail bonds in the aggregate amount of up to ₱30 bn ("2017 Bonds"). The 2017 Bonds were registered under the shelf registration program of the SEC and were issued in tranches.

Series "A" Three Billion Peso Fixed Rate Bonds issued in July 2017

Series "A" bonds were issued on July 3, 2017 with an aggregate amount of ₱3 bn, a tenor of ten years, and fixed interest rate of 5.3367% per annum. Interest is payable quarterly in arrears on January 3, April 3, July 3, and October 3 of each year, or the subsequent banking day without adjustment if such interest payment date is not a banking day. AboitizPower engaged BPI Capital Corporation (BPI Capital) as Issue Manager and Underwriter, BPI Asset Management and Trust Group (BPI-AMTG) as Trustee, and the Philippine Depository & Trust Corporation (PDTC) as the Registrar and Paying Agent. The Series "A" bonds received a credit rating of "PRS Aaa" with Stable Outlook from the Philippine Rating Services Corporation (PhilRatings), and is listed with the Philippine Dealing & Exchange Corporation (PDEX).

AboitizPower received the aggregate amount of ₱2.97 bn as proceeds from the offer and sale of the Series "A" bonds. AboitizPower has been paying interest to its bond holders since October 2017.

Use of Proceeds

As of December 31, 2017, the proceeds of the Series "A" bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus) (in '000)	Actual Usage (in '000)
Equity infusions into GNPD in 2017	₱2,206,373	₱1,255,745
Equity infusions into GNPD in 2018	764,395	1,711,317
Bond issuance costs	29,232	32,938
TOTAL	₱3,000,000	₱3,000,000

Series "C" 2.5 Billion Peso Fixed Rate Bonds issued in October 2018

The Series "C" bonds, with an amount of ₱2.51 bn were issued on October 12, 2018. The Series "C" bonds have an interest rate of 8.5091% per annum, and will mature in 2028. Interest is payable quarterly in arrears on January 25, April 25, July 25, and October 25 of each year, or the subsequent banking day without adjustment if such interest payment date is not a banking day.

AboitizPower appointed BDO Capital & Investment Corporation (BDO Capital) as Issue Manager, BDO Capital, BPI Capital, and United Coconut Planters Bank as Joint Lead Underwriters, BDO Unibank, Inc. Trust & Investments Group (BDO Trust) as Trustee, and PDTC as the Registry and Paying Agent for the

transaction. The Series “C” bonds received the highest possible rating of PRS “Aaa” from PhilRatings and is listed with PDEX.

AboitizPower received the amount of ₱2.5 bn as proceeds from the offer and sale of the Series “C” bonds. AboitizPower has been paying interest to its bond holders since January 2019 for the Series “C” bonds.

Use of Proceeds

As of September 30, 2019, the proceeds of the Series “C” bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus) (in ‘000)	Actual Usage (in ‘000)
Refinancing of the Medium-Term Loan of Therma Power, Inc.	₱2,470,866	₱2,500,000
Bond issuance costs	29,234	
TOTAL	₱2,500,000	₱2,500,000

Series “D” 7.25 Billion Peso Fixed Rate Retail Bonds issued in October 2019

Series “D” bonds, with an aggregate amount of ₱7 bn and an oversubscription of ₱5 bn, were issued on October 14, 2019. The Series “D” bonds have an interest rate of 5.2757% per annum, and will mature in 2026. Interest is payable quarterly in arrears on January 14, April 14, July 14, and October 14 of each year, or the subsequent banking day without adjustment if such interest payment day is not a banking day.

AboitizPower appointed BDO Capital and First Metro Investment Corporation (FMIC) as Joint Issue Managers, Joint Bookrunners and Joint Lead Underwriters, and BDO Trust as Trustee, and PDTC as the Registry and Paying Agent of the transaction. The Series “D” bonds received the highest possible rating of PRS “Aaa” from PhilRatings and is listed with PDEX.

The Company received the aggregate amount of ₱7.25 bn as proceeds from the offer and sale of the Series “D” bonds. AboitizPower has been paying interest to its bond holders since January 2020 for the Series “D” bonds.

Use of Proceeds

As of December 31, 2019, the proceeds of the Series “D” bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus) (in ‘000)	Actual Usage (in ‘000)
Repayment of short-term loan	₱7,161,972	₱7,250,000
Bonds issuance cost	88,028	-
TOTAL	₱7,250,000	₱7,250,000

Series “E” and “F” 9.55 Billion Peso Fixed Rate Retail Bonds issued in July 2020

Series “E” and Series “F” bonds, with an aggregate amount of ₱6 bn and an oversubscription option of ₱3.55 bn, were issued on July 6, 2020. The Series “E” bonds have an interest rate of 3.125% per annum, and matured and we repaid in full in 2022, while the Series “F” bonds have an interest rate of 3.935% per annum, and will mature in July 2025. Interest is payable quarterly in arrears on January 6, April 6, July 6, and October 6 of each year, or the subsequent banking day without adjustment if such interest payment date is not a banking day.

AboitizPower appointed BDO Capital, China Bank Capital Corporation (China Bank Capital), and FMIC as the Joint Issue Managers and Joint Lead Underwriters, BDO Trust as Trustee, and PDTC as the Registry and Paying Agent for the transaction. The Series “E” and Series “F” bonds have been rated PRS “Aaa” with a stable outlook from PhilRatings on April 8, 2020, and are listed with PDEX.

AboitizPower received the aggregate amount of ₱9.55 bn as proceeds from the offer and sale of the Series “E” and Series “F” bonds. AboitizPower has been paying interest to its bond holders since October 2020 for the Series “E” and Series “F” bonds.

Use of Proceeds

As of December 31, 2021, the proceeds of the Series “E” and Series “F” bonds were utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus) (in '000)	Actual Usage (in '000)
Reimburse Previous Equity Contributions to GNPD through AA Thermal and TPI	₱6,736,749	₱6,736,749
Fund Succeeding Equity Infusions in AA Thermal and TPI	2,082,873	2,522,627
General corporate purposes	614,889	177,077
Bond issuance costs	115,489	113,547
TOTAL	₱9,550,000	₱9,550,000

	Per Final Prospectus (in '000)	Actual Usage (in '000)
Gross Proceeds	₱9,550,000	₱9,550,000
Net Proceeds	9,434,511	9,436,453

(b) Shelf Registration of Thirty Billion Peso Fixed-Rate Bonds issued in 2021

On March 1, 2021, SEC issued an Order of Registration and a Certificate of Permit to Offer Securities for AboitizPower’s fixed-rate corporate retail bonds in the aggregate principal amount of ₱30 bn (the “2021 Bonds”). The 2021 Bonds were registered under the shelf registration program of the SEC and were issued in tranches.

Series “A” Eight Billion Peso Fixed Rate Bonds issued in March 2021

The first tranche of the 2021 Bonds, with a base issue size of up to ₱4 bn and an oversubscription of up to ₱4 bn (the Series “A” Bonds) was issued on March 16, 2021. The Series “A” Bonds have an interest rate of 3.8224% per annum, and will mature in 2026. Interest is payable in arrears on March 16, June 16, September 16, and December 16 of each year, or the subsequent banking day without adjustment if such interest payment date is not a banking day.

AboitizPower appointed BDO Capital, BPI Capital, China Bank Capital, and FMIC as Joint Lead Underwriters. BDO Trust was appointed as Trustee. The Series “A” Bonds received the credit rating of “PRS Aaa” with Stable Outlook. AboitizPower listed the First Tranche Bonds with PDEX on March 15, 2021.

AboitizPower received the aggregate amount of ₱8 bn as proceeds from the offer and sale of the First Tranche Bonds.

Use of Proceeds

As of December 31, 2022, the proceeds of the Series “A” Bonds were fully utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus) (in '000)	Actual Usage (in '000)
Redemption of the 2014 Series A Bonds Maturing in 2021	₱6,600,000	₱6,600,000
Partial Funding for the Early Redemption of the 2014 Series B Bonds Originally Maturing in 2026	1,295,303	1,303,093
Bond issuance costs	104,697	96,907
TOTAL	₱8,000,000	₱8,000,000

	Per Final Prospectus (in '000)	Actual Usage (in '000)
Gross proceeds	₱8,000,000	₱8,000,000
Net proceeds	7,895,303	7,903,093

Series “B” and “C” Twelve Billion Peso Fixed Rate Bonds issued in November 2021

Series “B” and Series “C” bonds (collectively, the “Second Tranche Bonds”), with an aggregate amount of ₱6 bn and an oversubscription option of ₱6 bn, were issued on December 2, 2021. The Series “B” bonds have an interest rate of 3.9992% per annum, and will mature in December 2025, while the Series “C” bonds have an interest rate of 5.0283% per annum, and will mature in 2028. Interest is payable quarterly in arrears on March 2, June 2, September 2, and December 2 of each year, or the subsequent banking day without adjustment if such interest payment date is not a banking day.

AboitizPower appointed BDO Capital and ChinaBank Capital as Joint Issue Managers; and BDO Capital and ChinaBank Capital as Joint Lead Underwriters and Joint Bookrunners. BDO Trust was appointed as Trustee. The Second Tranche Bonds received the credit rating of “PRS Aaa” with Stable Outlook. AboitizPower listed the Second Tranche Bonds with PDEX on December 2, 2021.

AboitizPower received the aggregate amount of ₱12 bn as proceeds from the offer and sale of the Second Tranche Bonds.

Use of Proceeds

As of December 31, 2023, the proceeds of the Second Tranche Bonds were utilized for the following projects:

Name of Project	Projected Usage (Per Prospectus) (in '000)	Actual Usage (in '000)
Partially fund the equity contributions for the construction of the 74 MW Solar power plant in Pangasinan province	₱1,000,000	₱1,000,000
Refinancing of the 2020 Series “E” Bonds maturing in 2022	9,000,000	9,000,000
Fund future renewable projects	1,839,849	1,849,805
Bond issuance costs	160,151	150,195
TOTAL	₱12,000,000	₱12,000,000

	Per Final Prospectus (in '000)	Actual Usage (in '000)

Gross proceeds	₱12,000,000	₱12,000,000
Net proceeds	11,839,849	11,849,805

Series “D” and “E” Ten Billion Peso Fixed Rate Bonds issued in March 2022

Series “D” and Series “E” bonds (collectively, the “Third Tranche Bonds”), with an aggregate amount of up to ₱7 bn and an oversubscription option of up to ₱3 bn was issued on March 17, 2022. Series “D” of the Third Tranche Bonds have a fixed interest rate of 5.3066% per annum maturing in 2027, and the Series “E” bonds have a fixed interest rate of 5.7388% per annum maturing in 2029. Interest is payable in arrears on March 17, June 17, September 17, and December 17 of each year, or the subsequent banking day without adjustment if such interest payment date is not a banking day.

AboitizPower appointed BDO Capital, China Bank Capital, and FMIC as Joint Issue Managers; and BDO Capital, China Bank Capital, FMIC, and SB Capital Investment Corporation as Joint Lead Underwriters and Joint Bookrunners. The Third Tranche Bonds received a credit rating of “PRS Aaa” with Stable Outlook from PhilRatings. AboitizPower listed the Third Tranche Bonds with PDEX on March 17, 2021.

AboitizPower received the aggregate amount of ₱10 bn as proceeds from the offer and sale of the Third Tranche Bonds.

Use of Proceeds

As of December 31, 2023, the proceeds of the Third Tranche Bonds were utilized for the following projects:

Name of Project	Projected Usage Per Prospectus (in ‘000)	Actual Usage (in ‘000)
Early Redemption of the 2018 Series “B” Bonds	₱7,700,000	₱7,700,000
Partially fund future renewable energy projects	2,165,427	2,170,125
Bond issuance costs	134,573	129,875
TOTAL	₱10,000,000	₱10,000,000

	Per Final Prospectus (in ‘000)	Actual Usage (in ‘000)
Gross proceeds	₱10,000,000	₱10,000,000
Net proceeds	9,865,427	9,870,125

(c) Shelf Registration of Thirty Billion Peso Fixed-Rate Bonds issued in 2021

On February 25, 2025, the Board of Directors of the Company approved the filing of a Registration Statement under the shelf registration program of the SEC for peso-denominated fixed-rate retail bonds in the aggregate principal amount of ₱100 bn (the “2025 Bonds”). The first tranche will consist of up to ₱20 bn, with an oversubscription option of up to ₱10 bn.

Item 2. Properties

The Company’s head office is located at 32nd Street, Bonifacio Global City, Taguig City, Metro Manila, Philippines. The office space occupied by the Company is leased from a third party. As a holding company, the Company does not utilize a significant amount of office space. The Company intends to transfer its head office to Ayala Triangle Gardens Tower 2, Paseo de Roxas corner Makati Avenue, Makati City 1226 Metro Manila, subject to the approval by the stockholders in the 2025 ASM. The office space that will be occupied will also be leased from a third party. As of February 28, 2025, there were no definite plans of acquiring properties in the next twelve months. Nonetheless, the Company plans to continually participate in future

projects that become available to it and will disclose the same in accordance with the applicable disclosure rules under the Securities Regulation Code (SRC).

On a consolidated basis, AboitizPower's Property, Plant and Equipment were valued at around ₱220.16 bn as of end-2024, as compared to ₱209.73 bn as of end-2023. The breakdown of the Company's Property, Plant and Equipment as of December 31, 2024 and December 31, 2023 is as follows:

Property, Plant and Equipment as of December 31	2024	2023
Land	3,943,663	2,438,196
Buildings, Warehouses and Improvements	59,267,297	58,488,612
Powerplant, Equipment, and Streamfield Assets	137,812,104	136,798,617
Transmission, Distribution and Substation Equipment	33,654,868	30,965,981
Transportation Equipment	2,101,214	1,942,736
Office Furniture, Fixtures and Equipment	1,806,095	1,807,882
Leasehold Improvements	3,206,075	3,267,309
Electrical Equipment	22,252,587	10,694,375
Meter and Laboratory Equipment	4,406,741	4,216,626
Tools and Others	1,917,663	1,649,182
Construction in Progress	24,995,539	21,132,222
Right-of-use Assets	37,015,682	35,424,123
Less: Accumulated Depreciation and Amortization	108,050,687	94,550,993
Less: Accumulated Impairment	4,170,548	4,537,975
TOTAL	220,158,293	209,726,892

Note: Values for the above table are in thousand Philippine Pesos.

Locations of Principal Properties and Equipment of the Company's Subsidiaries are as follows:

Subsidiary	Description	Location/Address	Condition
APRI	Geothermal power plants	Tiwi, Albay, Caluan, Laguna; Bay, Laguna; and Sto. Tomas, Batangas	In use for operations, used to secure long-term debt
Aseagas	Raw land and improvements	Lian, Batangas	Ceased operations
Hedcor	Hydropower plants	Kivas, Banengneng, Benguet; Beckel, La Trinidad, Benguet; Bineng, La Trinidad, Benguet; Sal-angan, Ampucao, Itogon, Benguet; and Bakun, Benguet	In use for operations
Hedcor Sibulan	Hydropower plant	Santa Cruz, Sibulan, Davao del Sur	In use for operations
Hedcor Tudaya	Hydropower plant	Santa Cruz, Sibulan, Davao del Sur	In use for operations
Hedcor Sabangan	Hydropower plant	Namatec, Sabangan, Mountain Province	In use for operations
Hedcor Bukidnon	Hydropower plant	Maluko, Manolo Fortich, Bukidnon	In use for operations
San Carlos Sun Power	Solar power plant	Eco Zone Boulevard, San Carlos Ecozone, Barangay Punao, San Carlos City, Negros Occidental	In use for operations
PV Sinag Power	Solar power plant	Cayanga, 2416 Bugallon, Pangasinan; Laoag, Aguilar, Pangasinan	In use for operations
EAUC	Bunker-C thermal power plant	Lapu-Lapu City, Cebu	In use for operations

Subsidiary	Description	Location/Address	Condition
TMI	Barge-mounted diesel power plants	Nasipit, Agusan del Norte and Barangay San Roque, Maco, Compostela Valley	In use for operations
TMO	Barge-mounted diesel power plants	Navotas Fishport, Manila	In use for operations
TSI	Coal-fired thermal power plants	Davao City and Davao del Sur	In use for operations, used to secure long-term debt
TVI	Coal-fired thermal power plants	Bato, Toledo, Cebu	In use for operations, used to secure long-term debt
TCVI	Industrial land	Colon, Naga City, Cebu	In use for operations
GMEC	Coal-fired thermal power plants	Mariveles, Bataan	In use for operations
Cotabato Light	Industrial land, buildings/plants, equipment, and machinery	Sinsuat Avenue, Cotabato City	In use for operations
Davao Light	Industrial land, buildings/plants, equipment, and machinery	P. Reyes Street, Davao City and Bajada, Davao City	In use for operations
	Substation equipment	Talomo, Matina Crossing Villa Abrille Estate, Indanga, Buhangin Davao City, Bobongon, Sto. Tomas, Davao	Ongoing development
Visayan Electric	Industrial land, buildings/plants, equipment, and machinery	Jakosalem Street, Cebu City and J. Panis Street, Cebu City	In use for operations
	Substation equipment	San Roque, Talisay City, Cebu	Ongoing development
Lima Enerzone	Industrial land, buildings/plants, equipment, and machinery	Lipa City and Malvar, Batangas	In use for operations
Balamban Enerzone	Industrial land, buildings/plants, equipment, and machinery	Balamban, Cebu	In use for operations

Item 3. Legal Proceedings

Material Pending Legal Proceedings

AboitizPower and its Subsidiaries are involved in various legal proceedings in the ordinary conduct of their businesses. The Company believes that none of these legal proceedings will have a material effect on the Company's financial position and results of operations.

Visayan Electric, for example, received several assessments of real property taxes on its electric posts, transformers, wires, machineries, air-conditioning units, and water pumps. Visayan Electric consistently maintains that the electric posts, transformers, wires, machineries, air-conditioning units, water pumps and their appurtenances are not considered real properties under the Civil Code of the Philippines, and therefore are not lawful objects of real property tax. Further, Section 270 of the Local Government Code of 1991 provides that the collection of real property tax is mandatory within five years from the date they become due, and that failure to collect the real property tax within the said period will bar collection thereof.

Visayan Electric has availed of Cebu City's tax amnesty ordinance in settlement of its real property tax assessment case amounting to ₱183 mn covering the period from 1989 to 2019 pending before the Cebu City Assessor's Office. Visayan Electric was issued a tax certificate on January 5, 2021, clearing the company of any and all real property tax liabilities for all its electric poles and their attachments located in Cebu City.

The other material pending legal proceedings involving the Company and its Subsidiaries as of February 28, 2025 are as follows:

Luzon Hydro Corporation vs. The Provincial Government of Benguet, represented by Governor Melchor D. Diclas; Orlando T. Oidi, in his official capacity as the Provincial Assessor of Benguet Province; Imelda I. Macanes, in her official capacity as the Provincial Treasurer of Benguet Province; Bado K. Pasule, in his official capacity as the Municipal Assessor of Bakun, Benguet; and Merlita Tolito, in her official capacity as the OIC-Municipal Treasurer of Bakun, Benguet
Civil Case No. 20I-CV-3558

In view of the finality of the SC's Decision in the case entitled: "*National Power Corporation vs. Luzon Hydro Corporation (LHC), Banggay T. Alwis, Municipal Assessor, Manuel C. Bagayao, Municipal Treasurer of Bakun, Benguet, Erlinda Estepa, Provincial Assessor and Mauricio B. Ambanloc, Provincial Treasurer of the Province of Benguet*" docketed as GR No. 244450 and GR No. 244659, the Municipal Treasurer of Bakun issued real property tax Bills for the period covering 2002 to 2019 amounting to ₱284,448,073.24 on January 16, 2020.

On February 3, 2020, LHC wrote to the Provincial Governor requesting for the amendment of the real property tax Bills to align with the MOA dated December 20, 2012 by and between LHC and the Province of Benguet. In the same letter, LHC also cited Executive Order (EO) No. 88, Series of 2019, which reduced the liability for real property tax of IPPs such as LHC with BOT Agreements with Government Owned and Controlled Corporations to an amount equivalent to the tax due if computed at 15% assessment level and condoned all interest and penalties for all years up to 2018.

On September 14, 2020, LHC filed a Petition with the RTC of La Trinidad, Benguet, praying for the issuance of a writ of *mandamus* to compel the Province of Benguet to comply with the provisions of the EO and recompute the real property tax liabilities of LHC. The Province of Benguet filed its Comment with Motion to Dismiss, which was denied by the RTC. The RTC also directed the parties to immediately manifest their conformity to the statement of undisputed facts, admitted documentary exhibits, and the statement of legal issues. LHC filed its Comment on January 21, 2021 while the Province filed its Compliance with Manifestation on February 5, 2021.

On March 23, 2021, a hearing was held through videoconference to discuss the factual issues raised by the Province. The judge advised that an Amended Order will be issued containing the summary of admitted facts, list of admitted facts, list of admitted documents, and statement of legal issues based on the respective Comments or Manifestations filed by the parties. LHC filed its Memorandum on April 28, 2021.

On December 17, 2021, LHC received the RTC's Decision dated November 18, 2021 denying the Petition. On December 28, 2021, LHC filed with the Supreme Court a motion for extension of time, requesting a 30-day extension from January 1, 2022, or until January 31, 2022, within which to file its Petition for Review on *Certiorari*.

On February 2, 2022⁷, LHC filed its Petition for Review on *Certiorari* with the Supreme Court. As of February 28, 2025, the Petition is pending before the Supreme Court.

G.R. No. 210245 entitled "*Bayan Muna Representative Neri Javier Colmenares, et al. vs. Energy Regulatory Commission, et al.*", Supreme Court; December 19, 2013

G.R. No. 210255 entitled "*National Association of Electricity Consumers for Reforms, et al. vs. Manila Electric Company, et al.*", Supreme Court; December 20, 2013

G.R. No. 210502 entitled "*Manila Electric Company, et al. v Philippine Electricity Market Corporation, et al.*", Supreme Court; January 8, 2014

⁷ On January 12, 2022, the Supreme Court issued Memorandum Order No. 10-2022 which, among others, extended until February 1, 2022 the filing periods of any and all pleadings and other court submissions that will fall due in the month of January 2022 in view of the rising cases of COVID-19 due to the Omicron variant. Further, through Proclamation No. 1236 dated October 29, 2021, February 1, 2022 has been declared a Special (Non-Working) Day in view of the celebration of Chinese New Year. Hence, all pleadings that will fall due on said date may be filed on the next business day.

On December 19, 2013, Bayan Muna representatives filed a Petition for *Certiorari* against ERC and Meralco with the SC, questioning the alleged substantial increase in Meralco's power rates for the billing period of November 2013. These cases raised, among others, the: (i) legality of Sections 6, 29 and 45 of the EPIRA, (ii) failure of ERC to protect consumers from high prices of electricity, and (iii) alleged market collusion by the generation companies. These cases were consolidated by the SC, which issued a TRO preventing Meralco from collecting the increase in power rates for the billing period of November 2013. The TRO was subsequently extended by the SC for another 60 days, or until April 22, 2014. On April 22, 2014, the SC extended the TRO indefinitely.

Meralco filed a counter-petition impleading all generation companies supplying power to the WESM to prevent the generation companies from collecting payments on power purchased by Meralco from the WESM during the contested billing period. The SC ordered other power industry participants (DOE, ERC, PEMC, PSALM, and the generation companies) to respond to Meralco's counter-petition.

The SC set the consolidated cases for oral arguments on January 21, 2014, February 4 and 11, 2014. After oral arguments, all parties were ordered to file their comments and/or memoranda. Meralco has been prevented from collecting the differential increase of the price hike. Because of Meralco's counter-petition against the generation companies, PEMC withheld settlement of the power purchases during the covered period.

On February 7, 2019, petitioners in G.R. No. 210245 filed their Motion for Directions, Status Updates and Immediate Resolution. In its Decision dated August 3, 2021, the SC declared the ERC's March 3, 2014 Order null and void. The Petition in G.R. No. 210502 was granted insofar as it prayed for the dismissal of the Petitions in G.R. Nos. 210245 and 210255 as these two cases were dismissed. The December 9, 2013 Order of the ERC, on the other hand, was affirmed.

On July 18, 2022, the National Association of Electricity Consumers for Reforms, Inc. (NASECORE) filed its Motion for Reconsideration. On July 19, 2022, the ERC filed its Motion for Partial Reconsideration. On July 20, 2022, Bayan Muna filed its Motion for Reconsideration.

In a Resolution dated October 11, 2022, the SC resolved to deny with finality the Motions for Reconsideration filed by NASECORE and Bayan Muna and the Motion for Partial Reconsideration filed by the ERC.

SC GR No. 224341 entitled "*Philippine Electricity Market Corporation vs. Therma Mobile, Inc.*", Supreme Court

[CA G.R. SP No. 140177 entitled "*PEMC v. Therma Mobile Inc.*", Court of Appeals, Manila, SP Proc. No. 12790 entitled "*Therma Mobile Inc. vs. PEMC*", Regional Trial Court Branch 157-Pasig City;

PEMC ECO-2014-0009 entitled "*Therma Mobile, Inc. (TMO Power Plants Units 1-4) Possible Non-Compliance with Must-Offer-Rule, Investigation Summary Report, dated August 4, 2014*"]

The Enforcement and Compliance Office of the Philippines Electricity Market Corporation (PEMC-ECO) conducted an investigation on TMO for possible non-compliance with the Must-Offer-Rule for the period October 26, 2013 to December 25, 2013. PEMC-ECO concluded that TMO was non-compliant with the Must-Offer-Rule for 3,578 intervals and recommended a penalty of ₱234.9 mn.

TMO filed its letter request for reconsideration on September 5, 2014, contending that it did not violate the Must-Offer Rule because its maximum available capacity was limited to 100 MW due to: (a) the thermal limitations of the old TMO 115-kV transmission line, and (b) the technical and mechanical constraints of the old generating units and the component engines of the TMO power plants which were under various stages of rehabilitation after having been non-operational for five years. Although TMO's rated capacity is 234 MW (net), it could only safely and reliably deliver 100 MW during the November and December 2013 supply period because of limitations of its engines and the 115-kV transmission line. This temporary limitation of TMO's plant was confirmed during a dependable capacity testing conducted on November 21, 2013.

In its letter dated January 30, 2015, the PEMC Board of Directors denied TMO's request for reconsideration and confirmed its earlier findings. On February 13, 2015, TMO filed a Notice of Dispute with PEMC to refer the matter to dispute resolution under the WESM Rules, WESM Dispute Resolution Market Manual and the ERC-PEMC Protocol.

On February 16, 2015, TMO filed a petition for TRO before the Pasig City RTC. In its Order dated February 24, 2015, the RTC granted TMO a 20-day temporary order of protection and directed PEMC to: (i) refrain from demanding or collecting the amount of ₱234.9 mn as financial penalty; (ii) refrain from charging interest on the financial penalty and having the same accrue; and (iii) refrain from transmitting PEMC-ECO's investigation report to the ERC. TMO posted a bond in the amount of ₱234.9 mn to answer for any damage that PEMC may suffer as a result of the Order. On April 1, 2015, the RTC rendered a Decision in favor of TMO. PEMC appealed the RTC decision before the Court of Appeals (CA) and sought to reverse and set aside the decision of the RTC.

On December 14, 2015, the CA rendered a Decision denying PEMC's Petition for Review and affirming the April 1, 2015 Decision of RTC in favor of TMO. On June 6, 2016, PEMC filed a Petition for Review on *Certiorari* with the SC to assail the December 14, 2015 CA Decision. TMO filed its Comment to PEMC's Petition for Review and PEMC filed a Reply. In its March 29, 2017 Resolution, the SC noted TMO's Comment and PEMC's Reply.

As of February 28, 2025, PEMC's Petition was still pending before the SC.

SC G.R. Nos. 244449 and 244455-56 entitled "*Energy Regulatory Commission vs. Therma Mobile, Inc., Manila Electric Company and AP Renewables, Inc.*", Supreme Court;

[CA G.R. SP. No. 152588 entitled "*Therma Mobile, Inc. vs. Energy Regulatory Commission, Atty. Alfredo P. Vergara, Jr. and Engr. Nelson D. Canlas, in their capacity as Investigating Officers (IOs) of the Investigatory Unit constituted by the Honorable Commission pursuant to its Office Order No. 38, Series of 2013 dated December 26, 2013, as amended by Office Order No. 82, Series of 2017*", Court of Appeals, Manila;

ERC Case No. 2015-025 MC entitled "*Atty. Isabelo Joseph P. Tomas II, in his capacity as the Investigating Officer of the Investigatory Unit constituted by the Honorable Commission pursuant to its Office Order No. 38, Series of 2013 dated December 26, 2013 vs Meralco and Therma Mobile, Inc. [For Violation of Section 45 of RA 9136, otherwise known as EPIRA, Rule 11, Section 1 of IRR of the EPIRA (Commission of an Anti-Competitive Behavior, particularly Economic Withholding)]*", ERC Pasig City, June 4, 2015;

ERC Case No. 2015-027 MC entitled "*Atty. Isabelo Joseph P. Tomas II, in his capacity as the Investigating Officer of the Investigatory Unit constituted by the Honorable Commission pursuant to its Office Order No. 38, Series of 2013 dated December 26, 2013 vs Therma Mobile, Inc. [For Violation of Section 45 of RA 9136, otherwise known as EPIRA, Rule 11, Section 1 and 8(e) of IRR of the EPIRA (Commission of an Anti-Competitive Behavior, particularly Physical Withholding)]*", ERC, Pasig City, June 4, 2015;

Pursuant to the allegations in the Bayan Muna SC case, the Investigation Unit of ERC ("ERC-IU") conducted investigations on the alleged anti-competitive behavior and market abuse committed by some participants of the WESM, including TMO.

On January 24, 2014, ERC issued a *Subpoena Ad Testificandum and Duces Tecum* directing TMO's representative to give clarification on matters pertaining to offers per trading interval involving the November to December 2013 supply months and provisions on the PSA between Meralco and TMO. The representative was likewise directed to bring relevant documents.

On January 29, 2014, TMO filed its Compliance and Submission to the *Subpoena Duces Tecum*. Further, on March 11, 2014, TMO filed its Memorandum, arguing that it did not commit any act constituting anti-competitive behavior and/ or misuse of market power. TMO then requested ERC-IU to terminate and close the investigation.

On May 20, 2015, ERC-IU issued its report and found that in bidding the way they did for the November and December 2013 supply months, TMO and Meralco allegedly committed Economic Withholding, and TMO committed Physical Withholding, and thus recommended the filing of cases for Anti-Competitive Behavior against TMO and Meralco.

On June 23, 2015, ERC ordered Meralco and TMO to file their respective Answers to the Complaint. On August 24, 2015, TMO filed its Answers praying for the dismissal of the Complaints.

In its Manifestation dated October 7, 2016, ERC-IU manifested the resignation of Atty. Isabelo Tomas as Investigating Officer (IO) and the appointment of Director Alfredo Vergara, Jr. and Engr. Nelson Canlas as new IOs. In a separate pleading, the new IOs filed their Reply to various motions filed by TMO.

On July 27, 2016, Meralco filed in ERC Case No. 2015-025MC an Urgent Motion to Dismiss with Motion to Suspend Proceedings on the ground that ERC has no jurisdiction over anti-competitive behavior cases, and that jurisdiction is with PCC. On July 28, 2016, TMO filed in the same case a Manifestation and Motion adopting Meralco's Urgent Motion to Dismiss. On August 1, 2016, TMO also filed its Manifestation and Motion, which sought the dismissal of ERC Case No. 2015-027MC for lack of jurisdiction.

In an Order dated February 2, 2017, ERC denied Meralco's and TMO's motions to dismiss for lack of jurisdiction. TMO filed its Motion for Reconsideration, which the ERC subsequently denied in its Order dated June 20, 2017.

On September 18, 2017, TMO filed a Petition for *Certiorari* with the CA, praying that the CA: (i) issue a TRO commanding the ERC to desist from conducting further proceedings in ERC Case No. 2015-025MC and ERC Case No. 2015-027MC; (ii) after proceedings, issue a Writ of Preliminary Injunction; and (iii) annul and set aside the February 2, 2017 and June 20, 2017 ERC Orders.

In a Resolution dated October 2, 2017, the CA directed the respondents to file their comment on TMO's Petition for *Certiorari* and denied TMO's prayer for a TRO. TMO filed a Motion for Partial Reconsideration of the CA's October 2, 2017 Resolution, which the CA denied. Thereafter, the CA issued its Notice of Judgment and Decision dated May 23, 2018, which denied TMO's Petition. On June 20, 2018, TMO filed its Motion for Reconsideration of CA's Decision dated May 23, 2018. In a Resolution dated January 28, 2019, the CA denied the motions for reconsideration filed by TMO, Meralco and APRI and the motion for partial reconsideration filed by the ERC.

Subsequently, ERC filed a Petition dated February 21, 2019 with the SC via Rule 45 of the Rules of Court. In the Petition, ERC challenged the CA Decision and Resolution insofar as the CA ruled that the Philippine Competition Act (PCA) repealed the parts of the EPIRA that granted jurisdiction to ERC over anti-competition matters in the energy sector, and that PCC has original and exclusive jurisdiction over anti-competition matters, including those affecting the energy sector after the effectivity of the PCA.

In a Resolution dated July 30, 2019, the SC directed the respondents to file their Comments on ERC's Petition. On November 25, 2019, TMO filed its Manifestation with the SC.

In a Resolution dated September 29, 2021, the SC partly granted the ERC's Petition for Review on *Certiorari* and ruled that the ERC has jurisdiction over anti-competitive cases filed prior to the enactment of the PCA pursuant to the principle of adherence of jurisdiction. The Supreme Court did not rule on the delineation of jurisdiction between the Philippine Competition Commission and the ERC after the effectivity of the PCA.

SC G.R. Nos. 244449 and 244455-56 entitled "*Energy Regulatory Commission vs. Therma Mobile, Inc., Manila Electric Company and AP Renewables, Inc.*", Supreme Court;

CA G.R. SP. No. 152613 entitled, "*AP Renewables, Inc. vs. Energy Regulatory Commission and Directors Alfredo P. Vergara, Jr. and Engr. Nelson Canlas, in their capacity as the Investigating Officers of the Investigatory Unit of the Energy Regulations Commission*", Court of Appeals, Manila

ERC Case No. 2015-038 MC entitled “Energy Regulatory Commission vs. AP Renewables, Inc. ([Violation of Section 45 of EPIRA, Rule 11, Sec. 1 and 8 (E) of the Implementing Rules and Regulations (Commission of an Anti-Competitive Behavior, particularly, Physical Withholding)]”, ERC, Pasig City, June 9, 2015

The ERC-IU conducted investigations on the alleged anti-competitive behavior and market abuse committed by some participants of the WESM, including APRI. On May 20, 2015, ERC-IU released its report holding that APRI’s non-compliance with the Must-Offer Rule for four intervals is tantamount to Physical Withholding which, it alleged, is a form of anti-competitive behavior.

On June 9, 2015, complainant Atty. Isabelo Joseph Tomas III, Investigating Officer of the IU, filed the complaint for Anti-Competitive Behavior against APRI. On June 23, 2015, ERC issued an Order directing APRI to file its answer within 15 days from notice.

On July 1, 2015, APRI received the summons and complaint. Subsequently, on July 7, 2015, APRI filed a Motion praying that: (a) the Complainant serve upon APRI the complete copy of the complaint and its annexes; (b) the Complainant clarify and put on record the answer to the following issues: (i) which of Makban Plants’ generating units is the subject of the complaint; and (ii) the dates and times of the four intervals mentioned in the complaint during which APRI allegedly offered “less than its total registered capacity.” Meanwhile, on July 29, 2015, APRI filed its Answer *ad cautelam*.

In its Manifestation dated October 7, 2016, ERC-IU manifested the resignation of Atty. Isabelo Tomas as IO and the appointment of new IOs. The new IOs filed their Reply to various motions filed by APRI.

Subsequently, APRI filed a Motion to Dismiss dated July 29, 2016, arguing that jurisdiction over the case is vested in the PCC. APRI also filed its *Ad Cautelam* Pre-Trial Brief and Judicial Affidavits. ERC denied APRI’s Motion to Dismiss, and APRI’s subsequent Motion for Reconsideration.

On September 19, 2017, APRI filed a Petition for *Certiorari* (with application for TRO and Writ of Preliminary Injunction) with the CA (CA G.R. SP. No. 152613), praying for the CA to: (i) issue a TRO commanding ERC to desist from conducting further proceedings in ERC Case. No. 2015-038MC; (ii) after proceedings, issue a Writ of Preliminary Injunction; and (iii) annul and set aside the February 2, 2017 and June 20, 2017 ERC Orders, and dismiss the complaint and ERC proceedings with prejudice.

On November 6, 2017, the IOs filed a Motion for Consolidation seeking to consolidate CA G.R. SP. No. 152613 with TMO’s Petition in CA GR. No. 152588. Thereafter, the CA issued its Notice of Judgment and Decision dated May 23, 2018, which denied APRI’s Petition. On June 18, 2018, APRI filed its Motion for Reconsideration of the CA’s Decision dated May 23, 2018.

In a Resolution dated January 28, 2019, the CA denied the motions for reconsideration filed by APRI, Meralco, and TMO and the motion for partial reconsideration filed by ERC.

Subsequently, ERC filed a Petition dated February 21, 2019 with the SC via Rule 45 of the Rules of Court. In the Petition, ERC challenged the CA Decision and Resolution insofar as the CA ruled that the PCA repealed the parts of the EPIRA that granted to ERC jurisdiction over anti-competition matters in the energy sector, and that the PCC has original and exclusive jurisdiction over anti-competition matters including those affecting the energy sector after the effectivity of the PCA.

In a Resolution dated July 30, 2019, the SC directed the respondents to file their Comments on ERC’s Petition. On November 4, 2019, APRI filed its Comment with the SC. As of February 28, 2022, ERC’s Petition is still pending with the SC.

In a Resolution dated September 29, 2021, the SC partly granted the ERC’s Petition for Review on *Certiorari* and ruled that the ERC has jurisdiction over anti-competitive cases filed prior to the enactment of the PCA pursuant to the principle of adherence of jurisdiction. The Supreme Court did not rule on the delineation of jurisdiction between the Philippine Competition Commission and the ERC after the effectivity of the PCA.

Consolidated Regulated Price Case (ERC vs. Various Generation Companies and PEMC) G.R. Nos. 246621-30, and G.R. Nos. 247352-61, Petitions for Review on *Certiorari*, Supreme Court;

[Consolidated Regulated Price Case against the Energy Regulatory Commission, Petition for Review on *Certiorari*, Court of Appeals, Manila;

ERC Case No. 2014-021 MC entitled “*In the Matter of the Prices in the WESM for the Supply Months of November and December 2013 and the Exercise by the Commission of its Regulatory Powers to Intervene and Direct the Imposition of Regulated Prices therein without Prejudice to the On-going Investigation on the Allegation of Anti- Competitive Behavior and Possible Abuse of Market Power Committed by Some WESM Participants*”, March 28, 2014]

The ERC conducted an investigation on the alleged collusion by the generation companies to raise the WESM prices. Subsequently, the ERC issued an Order in ERC Case No. 2014-021 MC dated March 3, 2014 (the “ERC Order”), declaring as void the Luzon WESM prices during the November and December 2013 supply months. ERC also declared the imposition of regulated prices for such billing periods and directed PEMC to calculate the regulated prices and implement the same in the revised November and December 2013 WESM bills of the concerned distribution utilities in Luzon, except for Meralco whose November 2013 WESM bill was maintained in compliance with the TRO issued by the SC.

Pursuant to the ERC Order, on March 18, 2014, PEMC issued adjusted billing statements for all generators trading in the WESM, including Cebu-based EAUC and CPPC, recalculating the WESM prices.

The Company’s Affiliates and Subsidiaries, APRI, TLI, TMO, Adventpower, Adventenergy, SN Aboitiz Power-Magat, SN Aboitiz Power-Benguet, CPPC, and EAUC filed their respective Motions for Reconsideration, questioning the validity of the ERC Order on the ground of lack of due process, among others.

The ERC, in its Order dated October 15, 2014, denied said Motions for Reconsideration. SN Aboitiz Power-Benguet, SN Aboitiz Power-Magat, APRI, TLI, and TMO filed their Petitions for Review (the “Petitions”) before the CA on November 19, 24, December 1, and 4, 2014, respectively. The CA ordered the consolidation of the Petitions on October 9, 2015.

On November 7, 2017, the CA granted the Petitions. ERC’s March 3, 2014 Order, among other orders, were declared null and void, and the Luzon WESM market prices in November and December 2013 were declared valid and therefore reinstated.

Thereafter, ERC and Meralco filed their respective motions for reconsideration. Several entities also filed motions to intervene in the case. APRI, TLI, and TMO filed their respective oppositions to the motions for reconsideration and motions to intervene. The CA denied the motions to intervene filed by several entities, which thereafter filed their motions for reconsideration. In an Omnibus Resolution dated March 29, 2019, the CA denied the motions for reconsideration by ERC and Meralco, as well as the motions for reconsideration filed by several entities that wanted to intervene in the case.

In June 2019, ERC, Meralco, and several entities filed their Petitions for Review on *Certiorari* with the SC, asking the latter to reverse and set aside the CA Decision dated November 7, 2017 and the CA Omnibus Resolution dated March 29, 2019. They also prayed that the SC reinstate the ERC Orders.

In September to October 2019, the SC issued Resolutions denying the Petitions for Review on *Certiorari* filed by several entities, including Calco Industries Inc., Paperland, *Alyansa ng mga Grupong Haligi at Teknolohiya Para sa Mamamayan* (AGHAM), Ateneo de Manila University, Citizenwatch, Riverbanks Dev’t. Corp., Steel Angles Shapes & Sections Manufacturers, for failure to show any reversible error on the part of the CA in promulgating the Decision dated November 7, 2017 and Omnibus Resolution dated March 29, 2019.

In a Resolution dated September 11, 2019, the SC required respondents to file their Comments to ERC’s Petition for Review on *Certiorari*. On January 28, 2020, TMO and TLI filed their Consolidated Comment (to the Petition for Review on *Certiorari* dated June 13, 2019); whereas APRI filed its Comment (on the Petition for Review on *Certiorari* dated June 13, 2019) on February 11, 2020.

In a Resolution dated February 10, 2020, the SC required respondents to file their Comments on Meralco's Petition for Review on *Certiorari* dated June 13, 2019. On July 9, 2020, APRI filed its Comment, and TLI and TMO filed their Consolidated Comment to Meralco's Petition for Review on *Certiorari*.

Subsequently, the SC issued a Resolution dated March 11, 2020 requiring the respondents to comment on San Beda University's Motion for Leave to Intervene and to Admit Petition-In-Intervention. On October 2, 2020, APRI filed its Opposition to San Beda University's Motion; while TLI and TMO filed their Opposition on October 21, 2020.

In a Resolution dated November 4, 2020, the SC resolved to consolidate and transfer the case with G.R. Nos. 247352-61 to the case with G.R. Nos. 246621-30. In a Resolution dated June 23, 2021, the SC required Meralco to file its Consolidated Reply to respondents' Comments, which Meralco filed on October 19, 2021.

As of February 28, 2025, ERC's and Meralco's petitions were pending resolution by the SC.

ERC Case No. 2013-077 MC entitled "*In Re: Petition for Dispute Resolution: Manila Electric Company (Meralco) vs. South Premier Power Corporation (SPPC), Masinloc Power Partners Company, Ltd. (MPPCL), AP Renewables, Inc. (APRI), Therma Luzon, Inc. (TLI), San Miguel Energy Corporation (SMEC) and SEM-Calaca Power Corporation (SCPC)*", August 29, 2013

On August 29, 2013, Meralco filed a petition before ERC against TLI and APRI, among other Successor Generating Companies (SGCs), docketed as ERC Case No. 2013-077 MC, where Meralco prayed that it be refunded by the respondent-SGCs of the transmission line losses. The petition arose from a claim of refund on account of the alleged over-recoveries of transmission line losses.

The petition was filed by Meralco pursuant to ERC Order dated March 4, 2013 and July 1, 2013 in ERC Case No. 2008-083 MC where the SGCs were not parties to.

On September 20, 2013, APRI and TLI, together with the other SGCs, filed a Joint Motion to Dismiss arguing that Meralco's petition should be dismissed for failure to state a cause of action and ERC's lack of jurisdiction over the subject matter of the case. The motion argued that: (i) Meralco cannot base its cause of action against the SGCs on a decision issued by ERC in another case where none of the SGCs were made parties to the case; and (ii) Meralco's claim is in a nature of a claim for sum of money which is properly within the jurisdiction of regular courts. The Joint Motion to Dismiss has since then been submitted for resolution with ERC.

As of February 28, 2025, ERC has yet to render its decision on the Joint Motion to Dismiss.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

PART II - OPERATIONAL AND FINANCIAL INFORMATION

Item 5. Market for Issuer's Common Equity and Related Stockholder Matters

(1) Market Information

AboitizPower's common shares are traded on the PSE.

The high and low stock prices of AboitizPower's common shares for each quarter of the past two years were as follows:

	2024		2023		2022	
	High	Low	High	Low	High	Low
First Quarter	₱39.30	₱35.00	₱39.80	₱33.90	₱36.70	₱29.30
Second Quarter	37.30	33.80	38.45	36.50	37.00	28.50
Third Quarter	38.50	32.40	37.30	30.00	32.85	29.45
Fourth Quarter	39.75	36.50	38.00	34.35	35.60	30.30

The closing price of AboitizPower common shares as of March 24, 2025 was ₱38.50 per share.

(2) Holders

As of March 24, 2025, AboitizPower has 575 stockholders of record, including PCD Nominee Corporation (Filipino) and PCD Nominee Corporation (Foreign). Common shares outstanding as of the same date were 7,205,854,307 shares.

The top 20 stockholders of AboitizPower as of March 24, 2025 were as follows:

Name	Number of Shares	Percentage
1) Aboitiz Equity Ventures Inc.	3,825,794,642	51.99%
2) JERA Asia Private Limited	1,986,823,063	27.00%
3) PCD Nominee Corporation (Filipino)	1,078,447,375	14.66%
4) Aboitiz Power Corporation	152,750,000	2.08%
5) PCD Nominee Corporation (Foreign)	79,813,460	1.08%
6) Bauhinia Management Inc.	20,948,380	0.28%
7) Danel C. Aboitiz	8,000,000	0.11%
8) San Fernando Electric Light and Power Co. Inc.	7,931,034	0.11%
9) Parraz Development Corporation	7,827,522	0.11%
10) Arrayanes Corporation	6,936,943	0.09%
11) Sabin M. Aboitiz	5,667,406	0.08%
12) Iker M. Aboitiz	5,465,100	0.07%
13) Ramon Aboitiz Foundation Inc.	3,900,000	0.05%
14) Salt Grass Management Inc.	3,411,295	0.05%
15) Abocosa Management Inc.	3,411,295	0.05%
16) Ganando Management Inc.	3,411,295	0.05%
17) Tawakoni Management Inc.	3,411,295	0.05%
18) Tris Management Inc.	3,130,359	0.04%
19) Tinkerbelle Management Corporation	3,042,454	0.04%
20) CAL Management Corporation	3,036,798	0.04%
SUBTOTAL	7,213,159,716	98.02%
Other Stockholders	145,444,591	1.98%
TOTAL ISSUED SHARES	7,358,604,307	100.00%

(3) Dividends

Since 2013, the Company's dividend policy has been to declare an annual cash dividend payment ratio of 50% of its consolidated net income from the previous fiscal year based on the audited financial statements of the Company, in all cases subject to the approval of the Company's Board of Directors. The policy changed the previous cash dividend payment ratio of 33% of previous year's net profits.

The cash dividends declared by AboitizPower to common stockholders from 2023 to the first quarter of 2025 are shown in the table below:

Year	Cash Dividend Per Share	Total Declared	Declaration Date	Record Date	Payment Date
2025 (regular)	₱2.35	₱16.94 bn	03/06/2025	03/21/2025	03/28/2025
2024 (regular)	₱2.30	₱16.57 bn	03/05/2024	03/19/2024	03/26/2024
2023 (regular)	₱1.87	₱13.76 bn	03/03/2024	03/17/2023	03/30/2023

There are no restrictions that limit the payment of dividends on common shares to stockholders of record as of March 21, 2025.

(4) Recent Sales of Unregistered or Exempt Securities including Recent Issuance of Securities Constituting an Exempt Transaction

AboitizPower does not have any recent sales of unregistered or exempt securities including recent issuances of securities constituting an exempt transaction.

Item 6. Management's Discussion and Analysis or Plan of Action

MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of AboitizPower Corporation's ("AboitizPower", "Parent", or the "Company") consolidated financial condition and results of operations should be read in conjunction with the consolidated financial statements and accompanying schedules and disclosures set forth elsewhere in this report.

Top Five Key Performance Indicators

Management uses the following indicators to evaluate the performance of the Company and its subsidiaries (the Company and its subsidiaries are hereinafter collectively referred to as the "Group"):

1. **Share in Net Earnings of Associates and Joint Ventures.** This represents the Group's share in the undistributed earnings or losses of its investees for each reporting period subsequent to the acquisition of said investment, net of goodwill impairment cost, if any. It also indicates the profitability of the investment and investees' contribution to the Group's net income.

Goodwill is the difference between the purchase price of an investment and the investor's share in the value of the net identifiable assets of the investee at the date of acquisition.

Manner of Computation:

Investee's Net Income (Loss) x Investor's % ownership - Goodwill Impairment Cost

2. **Earnings before Interest, Taxes, Depreciation, and Amortization (EBITDA).** The Company computes EBITDA as earnings before extraordinary items, net finance expense, income tax provision, depreciation, and amortization. It provides management and investors with a tool for determining the ability of the Group to generate cash from operations to cover financial charges and income taxes. It is also a measure to evaluate the Group's ability to service its debts.

3. **Cash Flow Generated.** Using the Consolidated Statement of Cash Flows, management determines the sources and usage of funds for the period and analyzes how the Group manages its profit and uses its internal and external sources of capital. This aids management in identifying the impact on cash flow when the Group's activities are in a state of growth or decline, and in evaluating management's efforts to control the impact.
4. **Current Ratio.** Current Ratio is a measurement of liquidity, calculated by dividing total current assets by total current liabilities. It is an indicator of the Group's short-term debt-paying ability. The higher the ratio, the more liquid the Group.
5. **Debt-to-Equity Ratio.** Debt-to-Equity Ratio indicates how leveraged the Group is. It compares assets provided by creditors to assets provided by shareholders. It is determined by dividing total liabilities by stockholders' equity.

Year Ended December 31, 2024 versus Year Ended December 31, 2023

The table below shows the comparative figures of the key performance indicators for the ended December 31, 2024 and December 31, 2023:

Key Performance Indicators	December 31, 2024 Audited	December 31, 2023 Audited
<i>Amounts in thousands of ₱s, except for financial ratios</i>		
SHARE IN NET EARNINGS OF ASSOCIATES AND JOINT VENTURES	15,693,423	19,817,774
EBITDA	71,734,307	67,913,578
CASH FLOW GENERATED:		
Net cash flows from operating activities	46,128,685	50,268,979
Net cash flows used in investing activities	(12,702,189)	(15,086,375)
Net cash flows used in financing activities	(31,380,181)	(45,434,740)
Net (Decrease)/Increase in Cash & Cash Equivalents	2,046,315	(10,252,136)
Cash & Cash Equivalents, Beginning	54,538,784	64,763,642
Cash & Cash Equivalents, End	56,759,297	54,538,784
CURRENT RATIO	1.56	1.79
DEBT-TO-EQUITY RATIO	1.40	1.51

- Share in net earnings in associates and joint ventures for 2024 decreased by 21% compared to 2023. The decrease was mainly due to the recognition of depreciation and interest for GNPowr Dinginin Ltd. Co.'s (GNPD) Units 1 and 2, and lower availability due to planned outages.
- EBITDA for 2024 increased by 6%. This was primarily due to higher generation portfolio margins and additional capacities from the 159 MW Laoag and 94 MW Cayanga Solar Plants.
- Cash and cash equivalents increased by ₱2.22 bn. This was mainly due to dividends received from associates and joint ventures, and the availment of new loans for the Company's renewable energy (RE) projects partly offset by the payment of dividends in the first quarter of 2024.
- Current Ratio as of December 31, 2024 was at 1.56x compared to 1.79x as of December 31, 2023. The decrease was primarily due to the reclassification of long-term debt from non-current to current which will mature in 2025 that resulted in higher current liabilities.
- Debt-to-Equity Ratio as of December 31, 2024 was at 1.40x, lower than the 1.51x recorded as of December 31, 2023.

Results of Operations

Net income attributable to equity holders of the parent in 2024 was ₱33.90 bn, which was 2% higher than the ₱33.10 bn reported in 2023. The increase was primarily due to higher generation portfolio margins and additional capacities from the 159 MWp Laoag and 94 MWp Cayanga Solar Plants. This translated to earnings per share of ₱4.70 for the period.

These comprise the significant elements of income or loss from continuing operations.

Power Generation and Retail Electricity Supply (RES)

AboitizPower's Generation and Retail Supply business' beneficial EBITDA in 2024 was ₱66.7 bn, 11% higher than the ₱59.9 bn in 2023. This was driven by higher portfolio margins, the energization of the Laoag solar plants, and the full-year contribution of the Company's Cayanga solar plant. Energy sold reached 36,004 gigawatt-hours (GWh), which is flat compared to 2023.

Power Distribution

For the full year of 2024, the beneficial EBITDA of AboitizPower's Distribution business was 13% higher than in 2023, driven by higher energy sales. Energy sales rose due to the higher demand driven by the effect of the El Niño phenomenon. Energy sales from Residential and Commercial, and Industrial customers increased by 13% and 5% year-on-year, respectively.

Material Changes in Line Items of Registrant's Statements of Income and Comprehensive Income

Consolidated Statements of Income

Net income attributable to equity holders of the Parent increased by ₱798.00 mn, or 2% year-on-year. The various movements in line items are shown below to account for the increase:

(Amounts in thousands of ₱s)

Net Income Attributable to Equity Holders of the Parent (January - December 2023)	₱33,101,720
Decrease in operating revenues	(9,607,640)
Decrease in operating expenses	19,017,473
Increase in interest income	306,966
Increase in interest expense	(439,077)
Decrease in share in net earnings of associates and joint ventures	(4,124,351)
Decrease in other income	(2,952,724)
Increase in provision for taxes	(936,071)
Increase in income attributable to non-controlling interests	(466,112)
Total	<u>798,464</u>
Net Income Attributable to Equity Holders of the Parent (January - December 2024)	<u>₱33,900,184</u>

Operating Revenues

(5% decrease from ₱207.10 bn to ₱197.49 bn)

The decrease in operating revenues was primarily due to lower spot prices.

Operating Expenses

(11% decrease from ₱175.31 bn to ₱156.30 bn)

The decrease in operating expenses was mainly due to lower fuel costs.

Interest Income

(18% increase from ₱1.67 bn to ₱1.97 bn)

The increase in interest income during the year of 2024 as compared to 2023 was primarily due to higher money market placements.

Interest Expense and other financing costs

(3% increase from ₱14.16 bn to ₱14.60 bn)

The increase in interest expense in 2024 as compared to 2023 was primarily due to the recognition of interest for Cayanga Solar Plants.

Share in Net Earnings of Associates and Joint Ventures

(21% decrease from ₱19.82 bn to ₱15.69 bn)

Share in net earnings in associates and joint ventures for 2024 decreased by 21%, as compared to 2023. The decrease was mainly due to the recognition of depreciation and interest for GNPD Units 1 and 2, and lower availability due to planned outage in 2024.

Other Income (Expenses) – net

(64% decrease from ₱4.63 bn to ₱1.68 bn)

Other income decreased due to non-recurring gains on insurance claims recognized in 2023.

Provision for Taxes

(13% increase from ₱7.28 bn to ₱8.21 bn)

The increase in provision for taxes during 2024 was due to higher taxable income subject to income tax during the year of 2024.

Changes in Registrant's Resources, Liabilities and Shareholders' Equity**Assets**

Total assets as of December 31, 2024 compared to December 31, 2023 increased by ₱30.59 bn, or 6%. The major movements of the accounts leading to the increase were as follows:

- a. Cash and cash equivalents increased by ₱2.22 bn, or 4% (from ₱54.54 bn to ₱56.76 bn). This was mainly due to dividends received from associates and joint ventures and new loans availed for the Company's RE projects, partly offset by dividend payments in the first quarter of 2024.
- b. Trade and other receivables increased by ₱2.35 bn, or 7% (from ₱34.25 bn to ₱36.59 bn), primarily due to the accrual of the balance 70% revenue on the March 2024 reserve market billing.
- c. Inventories increased by ₱576.00 mn or 4% (from ₱13.68 bn to ₱14.25 bn). This was mainly driven by the increase in the plant spare parts and supplies.
- d. Other current assets increased by ₱2.12 bn, or 16% (from ₱12.99 bn to ₱15.11 bn). This was primarily due to the first-time consolidation of Potentia Insurance Pte. Ltd. (Potentia), bulk of which pertains to insurance assets.
- e. Investments and advances increased by ₱4.29 bn, or 5% (from ₱91.64 bn to ₱95.93 bn). This was mainly driven by the take up of share in earnings from associates in 2024.
- f. Property, plant and equipment slightly increased by ₱10.43 bn, or 5% (from ₱209.73 bn to ₱220.16 bn). This was primarily due to the growth and planned capital expenditures for the renewable power projects.
- g. Intangible assets increased by ₱2.10 bn, or 4% (from ₱49.76 bn to ₱51.86 bn). This was primarily due to the forex revaluation of GMEC's goodwill.

- h. Net pension assets increased by ₱38.00 mn, or 94% (from ₱40.00 mn to ₱78.00 mn). This was mainly due to higher contributions made during the year 2024.
- i. Other noncurrent assets increased by ₱6.51 bn, or 35% (from ₱18.72 bn to ₱25.23 bn). This was primarily due to the increase in advances to contractors driven by the growth in renewable power projects and TLI's prepayment for PSALM Pagbilao land lease agreement in December 2024.

Liabilities

Compared to December 31, 2023, total liabilities as of December 31, 2024 slightly increased by ₱8.67 bn, or 3%. The major movements of accounts leading to the increase were as follows:

- a. Short-term loans increased by ₱5.08 bn, or 25% (from ₱19.96 bn to ₱25.04 bn). This was mainly due to the loan availments by the Group in 2024, which were used for working capital requirements.
- b. Trade and other payables increased by ₱2.84 bn, or 9% (from ₱32.87 bn to ₱35.71 bn). This was primarily due to the first time consolidation of Potentia which pertains to insurance liabilities.
- c. Income tax payable increased by ₱865.00 mn, or 183% (from ₱473.00 mn to ₱1.34 bn). This was mainly due to higher taxable income.
- d. Customers' deposits increased by ₱654.00 mn, or 7% (from ₱8.86 bn to ₱9.52 bn). This was mainly due to the receipt of bill deposits from new customers of the Retail Energy Supply.
- e. Decommissioning liability decreased by ₱2.10 bn, or 29% (from ₱7.36 bn to ₱5.26 bn). This was mainly due to adjustments in the decommissioning provisions on power plant assets of APRI.
- f. Long-term debt (current and non-current portions) decreased by ₱552.00 mn (from ₱214.27 bn to ₱213.72 bn). This was mainly due to regular debt servicing across the Group partly offset by new loans to support renewable power projects.
- g. Lease liabilities (current and noncurrent portions) increased by ₱1.53 bn (from ₱2.91 bn to ₱4.45 bn). This was mainly due to the land lease agreement between ASPI and Calatrava Sugar Alliance, Inc.
- h. Long-term obligation on power distribution system (current and noncurrent portions) decreased by ₱25.00 mn (from ₱123.00 mn to ₱97.00 mn) due to Subic Enerzone's regular payment.
- i. Net derivative asset and liability changed by ₱207.00 mn (from ₱126.00 mn liability to ₱81.00 mn asset) during 2024 due to net hedging gains.
- j. Net deferred income tax assets and liabilities changed by ₱653.00 mn (from ₱1.34 bn to ₱1.42 bn asset and from ₱4.83 bn to ₱5.48 bn liability). This was mainly due to the reversal of TLI's deferred tax asset on prepayment of lease liability and transfer value made to PSALM.

Equity

Equity attributable to equity shareholders of the Parent increased by 13% (from ₱180.14 bn as of December 31, 2023 to ₱203.23 bn as of December 31, 2024) mainly due to the higher generation portfolio margins and additional capacities from the 159 MW Laoag and 94 MW Cayanga Solar Plants in 2024. Cumulative translation adjustments increased by ₱3.16 bn, due to the upward net adjustment in the net assets translation effect of GMEC and LHC during the period. Cash flow hedge reserve increased by ₱335.00 mn, due to the upward net adjustment in the fair value of the Group's foreign currency forward, interest swap and commodity swap contracts.

Material Changes in Liquidity and Cash Reserves of Registrant

As of December 31, 2024, the Group's cash and cash equivalents increased by 4% to ₱56.76 bn, from ₱54.54 bn as of December 31, 2023.

Net cash flows from operating activities decreased from ₱50.27 bn during 2023 to ₱46.13 bn during the year 2024, primarily due to increased cash outflows related to accounts payable.

Net cash flows used in investing activities decreased from ₱15.09 bn during 2023 to ₱12.70 bn during 2024, mainly due to higher cash dividends received from associates and joint ventures, partially offset by higher scheduled capital expenditures for the renewable power projects.

The net cash flows used in financing activities decreased from ₱45.43 bn during 2023 to ₱31.38 bn during 2024 mainly due to higher payments of cash dividends and lower availment of long-term debt during the year.

There are no events that will trigger direct or contingent financial obligations that are material to the Company, including any default or acceleration of an obligation, except those discussed under Item 3 – Legal Proceedings of this Sec Form 17-A (Annual Report).

There are no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the Company with unsolicited entities or other persons created in 2024.

Financial Ratios

As of December 31, 2024, current assets increased by 6% and current liabilities increased by 22%. The current ratio as of December 31, 2024 was at 1.56x compared to 1.79x as of December 31, 2023.

Consolidated debt-to-equity ratio as of December 31, 2024 was at 1.40x, lower than the 1.51x recorded at the end-2023. This was due to a 3% increase in total liabilities compared to a higher 11% increase in equity during 2024.

Outlook for the Upcoming Year/ Known Trends, Events, and Uncertainties which may have Material Impact on the Registrant

AboitizPower (or the "Company") is focused on providing reliable energy supply to its customers at a reasonable cost and with minimal impact on the environment and on the communities. The Company believes that to effectively and sustainably address the country's power requirements, a mix of power generation technologies is necessary. For this reason, AboitizPower pursues both renewable energy projects and thermal technologies where and when it makes sense.

In spite of the increased competition in the domestic power generation sector, AboitizPower believes it has the foundation to sustain its long-term growth through expanding its portfolio of baseload and RE generation assets.

Given the current trajectory of power demand in the Philippines and the expected build progression of new plants over the next decade, AboitizPower believes its existing coal assets continue to play an integral role and constantly seeks improvements to ensure it operates these assets responsibly and in compliance with all relevant regulations. The Company is closely and proactively monitoring the developments in climate-related regulations and initiatives, including the coal moratorium of the DOE and ongoing discussions on the early retirement of coal plants in the Philippines and Indonesia. Through its parent company, AEV, AboitizPower is the first Philippine company to sign up and commit to the Task Force on Climate-Related Financial Disclosure framework. The Company has taken steps to proactively quantify the potential impacts of various climate regulations on its assets and continues to invest in efforts to manage risks that are above certain thresholds.

As of February 28, 2025, AboitizPower has successfully energized 500 MW of its initial expansion phase, which includes developing solar and wind plants with a cumulative net attributable capacity of up to 1,200 MW. The Company is constructing two additional solar power plants, three BESS, and one wind power plant. The second phase of its expansion could add up to 2 GW of solar and wind power. AboitizPower's growing RE portfolio should enable the Company to maximize opportunities arising from the DOE's implementation of the RPS, which mandates power

distribution utilities, electric cooperatives, and retail electricity suppliers to source 35% of their energy supply from RE facilities by 2030 and 50% by 2040.

Further, AboitizPower remains open to other relevant opportunities that will help meet the Philippines' critical energy needs. On March 1, 2024, the Company, through its subsidiary TNGP, entered into an investment agreement with MGen and acquired 40% of CGHI. CGHI, in turn, acquired a 67% interest in two gas-fired power plants and an LNG import and regasification terminal, marking AboitizPower's foray into the LNG space. On December 23, 2024, the relevant parties received approval from the PCC to proceed with this transaction and on January 27, 2025, the transaction was completed.

The Company believes that its balance sheet gives it the capability to create or acquire additional generating capacity over the next few years. AboitizPower, together with its partners, has allotted ₱78 bn for capital expenditures in 2025, of which, about 66% is earmarked for AboitizPower's RE portfolio, while the remainder is for the maintenance of its baseload plants, as well as further investments in land, new substations, and new meters for its distribution business.

Other known trends, events, uncertainties which may have a material impact on AboitizPower have been discussed extensively in sections of the Company's Information Statement (e.g. for an extensive discussion on regulatory issues, see *Effect of Existing or Probable Government Regulations on the Business* on page 37 of this SEC Form 17-A (Annual Report)).

Year Ended December 31, 2023 versus Year Ended December 31, 2022

The table below shows the comparative figures of the key performance indicators for the year ended December 31, 2023 and December 31, 2022:

Key Performance Indicators	December 31, 2023 Audited	December 31, 2022 (As restated)
<i>Amounts in thousands of ₱s, except for financial ratios</i>		
SHARE IN NET EARNINGS OF ASSOCIATES AND JOINT VENTURES	19,817,774	15,134,970
EBITDA	67,913,578	57,596,836
CASH FLOW GENERATED:		
Net cash flows from operating activities	50,267,419	34,213,337
Net cash flows used in investing activities	(15,086,374)	(11,442,216)
Net cash flows used in financing activities	(45,433,181)	(14,475,876)
Net (Decrease)/Increase in Cash & Cash Equivalents	(10,252,136)	8,295,246
Cash & Cash Equivalents, Beginning	64,763,642	57,130,243
Cash & Cash Equivalents, End	54,538,784	64,763,642
CURRENT RATIO	1.79	1.78
DEBT-TO-EQUITY RATIO	1.51	1.68

- Share in net earnings in associates and joint ventures for the year 2023 increased by 31% compared to 2022. The increase was mainly due to fresh contributions from GNPowr Dinginin Ltd. Co. (GNPD).
- EBITDA for the year 2023 increased by 18%. This was primarily due to fresh contributions from GNPD Units 1 and 2 and higher availability across the Company's generation portfolio.
- Cash and cash equivalents as of end-2023 decreased by ₱10.2 billion (bn) compared to end-2022. This was mainly due to the prepayment by Therma Luzon, Inc. (TLI) of its remaining lease obligations to PSALM and the acquisition of treasury shares by AboitizPower.
- Current Ratio as of December 31, 2023 was at 1.79x as compared to 1.78x as of December 31, 2022.

- Debt-to-Equity Ratio as of December 31, 2023 was at 1.51x, lower than the 1.68x recorded as of December 31, 2022.

Results of Operations

Core net income for the full year 2023 was ₱32.0 bn, 29% higher than the ₱24.8 bn recorded in 2022. The increase was primarily due to fresh contributions from GNPD and higher availability across the Company's generation portfolio. The Company's reported net income for the full year 2023 was ₱33.1 bn, 27% higher than the reported net income of ₱26.0 bn for 2022.

These comprise the significant elements of income or loss from continuing operations.

Power Generation and Retail Electricity Supply (RES)

AboitizPower's generation and retail supply business recorded EBITDA of ₱61.3 bn in 2023, 20% higher than the ₱51.2 bn recorded in 2022. This was primarily due to fresh contributions from GNPD and higher availability across the Company's portfolio. Energy volume sold in 2023 increased by 17% to 35,372 gigawatt-hours (GWh) compared to 30,251 GWh in 2022.

Power Distribution

During 2023, AboitizPower's distribution business recorded EBITDA of ₱8.7 bn, 8% higher than the ₱8.0 bn recorded in 2022. Energy sales increased by 6% to 6,157 GWh in 2023, compared to 5,785 GWh in 2022. Energy sales from the Residential customer segment was higher by 8% and Commercial and Industrial energy sales were higher by 6%, due to recoveries in demand in the areas affected by Typhoon Odette and resurgence of energy sold back to pre-pandemic level.

Material Changes in Line Items of Registrant's Statements of Income and Comprehensive Income

Consolidated Statements of Income

Net income attributable to equity holders of the Parent increased by ₱7.10 bn, or 27% YoY. The various movements in line items are shown below to account for the increase:

(Amounts in thousands of ₱s)

Net Income Attributable to Equity Holders of the Parent (January - December 2022)	₱25,998,668
Increase in operating revenues	13,106,309
Increase in operating expenses	(11,124,204)
Increase in interest income	998,582
Increase in interest expense	(741,298)
Increase in share in net earnings of associates and joint ventures	4,682,804
Increase in other income	4,118,484
Increase in provision for taxes	(2,575,860)
Increase in income attributable to non-controlling interests	(1,351,766)
Total	7,103,051
Net Income Attributable to Equity Holders of the Parent (January - December 2023)	₱33,101,719

Operating Revenues

(7% increase from ₱193.99 bn to ₱207.10 bn)

The increase in operating revenues was primarily due to higher availability across the Company's generation portfolio.

Operating Expenses

(7% increase from ₱164.19 bn to ₱175.31 bn)

The increase in operating expenses was mainly due to the higher cost of purchased power and of generated power. This is consistent with the higher operating revenues discussed above.

Interest Income

(146% increase from ₱679.00 mn to ₱1.67 bn)

The increase in interest income was primarily due to higher interest rates on money market placements.

Interest Expense and other financing costs

(6% increase from ₱13.42 bn to ₱14.16 bn)

Interest expense increased due to higher levels of long-term debt as of December 31, 2023 as compared to December 31, 2022.

Share in Net Earnings of Associates and Joint Ventures

(31% increase from ₱15.13 bn to ₱19.82 bn)

Share in net earnings in associates and joint ventures for the year of 2023 increased by 31%, as compared to 2022. The increase was mainly due to the fresh contributions from GNPD.

Other Income (Expenses) – net

(reversal from expenses of ₱515.00 mn to income of ₱4.63 bn)

The reversal from expenses to income during year 2023 as compared to year 2022 was mainly due to the additional investment in STEAG State Power, Inc. (SPI). The increase in the Company's stake from 34% to 69.4% resulted in recording a bargain purchase gain. Additional increase in other income was also due to the recognition of the business interruptions (BI) claims for the GNPowder Mariveles Energy Center Ltd. Co. (GMEC), Hedcor Bukidnon Inc. (HBI), Hedcor Inc. (HI), and AP Renewables Inc. (APRI) plant outages.

Provision for Taxes

(55% increase from ₱4.70 bn to ₱7.28 bn)

The increase in provision for taxes during 2023 was due to higher taxable income and the reversal of TLI's deferred tax asset on PSALM lease obligations due to the prepayment by TLI to PSALM on November 2023 of the remaining lease payments.

Changes in Registrant's Resources, Liabilities and Shareholders' Equity**Assets**

Total assets as of December 31, 2023 compared to December 31, 2022 increased by ₱9.65 bn, or 2%. The major movements of the accounts leading to the increase were as follows:

- a. Cash and cash equivalents decreased by ₱10.22 bn, or 16% (from ₱64.76 bn to ₱54.54 bn). This was mainly due to prepayment of TLI PSALM lease and acquisition of treasury shares.
- b. Trade and other receivables decreased by ₱1.10 bn, or 3% (from ₱35.34 bn to ₱34.25 bn). This was primarily due to higher collection efficiency.
- c. Inventories decreased by ₱2.45 bn or 15% (from ₱16.12 bn to ₱13.68 bn). This was mainly driven by the decrease in fuel inventory due to lower indices.
- d. Derivative assets (current and non-current portions) decreased by ₱2.56 bn or 88% (from ₱2.91 bn to ₱0.36 bn). This was mainly due to the maturity of derivatives and prepayment of TLI PSALM lease.

- e. Other current assets decreased by ₱1.09 bn, or 8% (from ₱14.08 bn to ₱12.99 bn). This was mainly due to the lower debt service reserve account and utilization of prepaid taxes.
- f. Investments and advances increased by ₱13.71 bn, or 18% (from ₱77.93 bn to ₱91.64 bn). This was mainly due to fresh contributions from GNPD.
- g. Property, plant and equipment slightly increased by ₱2.87 bn, or 1% (from ₱206.86 bn to ₱209.73 bn). This was primarily due to the planned capital expenditures for the renewable power projects, partly offset by the depreciation of existing assets.
- h. Other noncurrent assets increased by ₱10.33 bn, or 123% (from ₱8.39 bn to ₱18.72 bn). This was primarily due to the first-time consolidation of SPI, bulk of which pertains to service concession agreement.

Liabilities

Compared to December 31, 2022, total liabilities as of December 31, 2023 decreased by ₱6.19 bn, or 2%. The major movements of accounts leading to the decrease were as follows:

- a. Short-term loans decreased by ₱1.44 bn, or 7% (from ₱21.40 bn to ₱19.96 bn). This was mainly due to loan payments by the Group.
- b. Derivative liabilities (current and non-current portions) increased by ₱34 mn, or 8% (from ₱447 mn to ₱482 mn). This was primarily due to net hedging losses.
- c. Income tax payable decreased by ₱20.00 mn, or 4% (from ₱493.00 mn to ₱473.00 mn). This was mainly due to lower taxable income.
- d. Customers' deposits increased by ₱718.00 mn, or 9% (from ₱8.14 bn to ₱8.86 bn). This was mainly due to the receipt of bill deposits from new customers of the Retail Energy Supply and Distribution Utilities segments.
- e. Long-term debt (current and non-current portions) increased by ₱14.82 bn, or 7% (from ₱199.45 bn to ₱214.27 bn). This was mainly due to new loans to support renewable energy projects and to prepay TLI's lease obligations to PSALM, which were partly offset by regular debt servicing across the Group.
- f. Lease liabilities (current and noncurrent portions) decreased by ₱24.63 bn, or 89% (from ₱27.54 bn to ₱2.91 bn). This is mainly due to the prepayment by TLI of its lease obligations to PSALM.
- g. Long-term obligation on power distribution system (current and noncurrent portions) decreased by ₱23.00 mn, or 16% (from ₱145.00 mn to ₱123.00 mn), due to Subic Enerzone's regular payment.
- h. Decommissioning liability increased by ₱1.71 bn, or 30% (from ₱5.65 bn to ₱7.36 bn). This was mainly due to adjustments in the decommissioning provisions on power plant assets of APRI.
- i. Net pension liabilities (net of pension assets) increased by ₱346.00 mn, or 67% (from ₱516.00 mn to ₱863.00 mn), mainly due to higher current service cost based on the new actuarial studies across the Group.
- j. Deferred income tax liabilities (net of deferred income tax assets) increased by ₱2.20 bn, or 171% (from ₱1.29 bn to ₱3.49 bn). This was mainly due to the IAS 12 adoption of recognizing deferred income tax liabilities on TLI's right-of-use (ROU) assets and to the first-time consolidation of SPI.

Equity

Equity attributable to equity shareholders of the Parent increased by 7% (from ₱169.06 bn as of December 31, 2022 to ₱180.14 bn as of December 31, 2023) mainly due to fresh contributions from GNPD and higher availability across the Company's generation portfolio. Cash flow hedge reserve decreased by ₱2.92 bn primarily due to the maturity of TLI's commodity swap contracts. Cumulative translation adjustments and share in other comprehensive income of

associates and joint ventures decreased by ₱0.5 bn, due to the downward net adjustment in the net assets translation effect of GMEC and GNPD during the year.

Material Changes in Liquidity and Cash Reserves of Registrant

As of December 31, 2023, the Group's cash and cash equivalents decreased by 16% to ₱54.54 bn, from ₱64.76 bn as of December 31, 2022.

Higher EBITDA and lower working capital requirements resulted in higher cash generated from operations during the year of 2023 by ₱16.05 bn, which was a 47% increase compared to the year of 2022.

Net cash flows used in investing activities increased from ₱11.44 bn in 2022 to ₱15.09 bn in 2023, mainly due to the higher scheduled capital expenditures for the renewable power projects.

The net cash flows used in financing activities increased from ₱14.48 bn in 2022 to ₱45.43 bn in 2023, mainly due to TLI prepayment of lease obligations and acquisition of treasury shares.

There are no events that will trigger direct or contingent financial obligations that are material to the Company, including any default or acceleration of an obligation, except those discussed under Item 3 – *Legal Proceedings* of this Information Statement.

There are no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the Company with unconsolidated entities or other persons created in 2023.

Financial Ratios

As of December 31, 2023, current assets decreased by 13% and current liabilities decreased by 13% YoY compared to the end of 2022. The current ratio as of December 31, 2023 was at 1.79x compared to 1.78x as of December 31, 2022.

Consolidated debt-to-equity ratio as of December 31, 2023 was at 1.51x, lower than the 1.65x recorded at the end of 2022. This was due to a 2% decrease in total liabilities compared to a higher 9% increase in equity in 2023.

There are no material commitments for capital expenditures except those disclosed in the Audited Financial Statements and discussed in *Outlook for the Upcoming Year/Known Trends, Events, and Uncertainties which may have Material Impact in the Registrant*.

Year Ended December 31, 2022 versus Year Ended December 31, 2021

Key Performance Indicators	December 31, 2022 (INTERIM)	December 31, 2021
<i>Amounts in thousands of ₱s, except for financial ratios</i>		
SHARE IN NET EARNINGS OF ASSOCIATES AND JOINT VENTURES	15,134,970	9,479,696
EBITDA	57,596,836	50,661,619
CASH FLOW GENERATED:		
Net cash flows from operating activities	34,213,337	36,327,039
Net cash flows used in investing activities	(11,442,216)	1,018,172
Net cash flows used in financing activities	(14,475,876)	(19,103,664)
Net (Decrease)/Increase in Cash & Cash Equivalents	8,295,246	18,241,547
Cash & Cash Equivalents, Beginning	57,130,243	38,699,545
Cash & Cash Equivalents, End	64,763,642	57,130,243
CURRENT RATIO	1.78	1.53
DEBT-TO-EQUITY RATIO	1.65	1.75

- Share in net earnings in associates and joint ventures for the year 2022 increased by 60% compared to 2021. The increase was mainly due to the fresh contributions from GNPDP.
- EBITDA for 2022 increased by 14%. This was primarily due to fresh contributions from GNPDP Units 1 and 2, higher availability across the Company's generation portfolio, gains from commodity hedges, and higher water inflows.
- Cash and cash equivalents as of end-2022 increased by ₱7.63 billion (bn) compared to end-2021. This is mainly due to the availment of new loans for renewable projects.
- Current Ratio as of December 31, 2022 was at 1.78x as compared to 1.53x as of December 31, 2021. The increase was primarily due to lower long-term debt portion that is due to be repaid within the next 12 months and the increase in cash and cash equivalents.
- Debt-to-Equity Ratio as of December 31, 2022 was at 1.68x, lower than the 1.75x recorded as of December 31, 2021.

Results of Operations

Net income for 2022 was ₱26.00 bn, which was 25% higher than the ₱19.09 bn reported in 2021. This translated to earnings per share of ₱3.53 for 2022. The Company also recognized non-recurring gains of ₱1.0 bn during 2022, as compared to ₱57 million (mn) in non-recurring gains recorded in 2021. This is due to the portion of commodity hedge gains which were not recognized in fuel costs. Without these one-off gains, the Company's core net income for the full year 2022 was ₱24.8 bn, 30% higher than the ₱19.0 bn recorded in 2021. If the Company excluded the impact of Typhoon Odette, liquidated damages, and business interruption claims that the Company collected in 2022 and 2021, this would have resulted in a 47% gain in the Company's core net income and a 52% gain in its net income in 2022 versus 2021. The increase in net income during 2022 was primarily due to fresh contributions from GNPDP and higher availability across the Company's generation portfolio, gains from commodity hedges, and higher water inflows.

Power Generation and Retail Electricity Supply (RES)

AboitizPower's generation and retail supply business recorded EBITDA of ₱51.2 bn in 2022, 18% higher than the ₱43.4 bn recorded in 2021. This was primarily due to fresh contributions from GNPDP and higher availability across the Company's portfolio, gains from commodity hedges, and higher water inflows. Capacity sold in 2022 increased by 7%

to 4,034 megawatts (MW), compared to 3,753 MW in 2021. Energy sold increased by 16% to 30,251 gigawatt-hours (GWh) for the full year 2022, compared to 26,031 GWh in 2021.

Power Distribution

In 2022, AboitizPower's distribution business recorded EBITDA was ₱8.0 bn, which is 6% higher than the ₱7.5 bn recorded in 2021. Energy sales increased by 4% to 5,785 GWh in 2022, compared to 5,583 GWh in 2021. Energy sales from the Residential customer segment were flat year-on-year (YoY). Commercial and Industrial energy sales were higher by 5% due to recovering demand in 2022.

Material Changes in Line Items of Registrant's Statements of Income and Comprehensive Income

Consolidated Statements of Income

Net income attributable to equity holders of the Parent increased by ₱5.16 bn, or 25% YoY. The various movements in line items are shown below to account for the increase:

(Amounts in thousands of ₱s)

Net Income Attributable to Equity Holders of the Parent (January - December 2021)	₱20,837,182
Increase in operating revenues	59,634,367
Increase in operating expenses	(58,041,189)
Increase in interest income	335,463
Decrease in interest expense	170,017
Increase in share in net earnings of associates and joint ventures	5,655,274
Increase in other income	301,766
Increase in provision for taxes	(2,589,960)
Increase in income attributable to non-controlling interests	(304,251)
Total	<u>5,161,487</u>
Net Income Attributable to Equity Holders of the Parent (January - December 2022)	<u>₱25,998,668</u>

Operating Revenues

(44% increase from ₱134.36 bn to ₱193.99 bn)

The increase in operating revenues during 2022 as compared to 2021 was primarily due to higher availability across the Company's generation portfolio.

Operating Expenses

(55% increase from ₱106.15 bn to ₱164.19 bn)

The increase in operating expenses during 2022 as compared to 2021 was mainly due to the higher cost of purchased power and of generated power. This is consistent with the higher operating revenues discussed above.

Interest Income

(98% increase from ₱343.00 mn to ₱679.00 mn)

The increase in interest income during 2022 as compared to year 2021 was primarily due to higher interest rates on money market placements.

Interest Expense and other financing costs

(1% decrease from ₱13.59 bn to ₱13.42 bn)

Interest expense decreased during 2022 as compared to 2021 due to lower interest accretion on lease liabilities as timely payments were made during 2022 on TLI's obligation to PSALM.

Share in Net Earnings of Associates and Joint Ventures

(60% increase from ₱9.48 bn to ₱15.13 bn)

Share in net earnings in associates and joint ventures for 2022 increased by 60% YoY. The increase was mainly due to fresh contributions from GNPD.

Other Income (Expenses) – net

(141% increase from ₱214.00 mn to ₱515.00 mn)

The increase in net other income (expenses) during 2022 as compared to 2021 was mainly due to higher realized commodity hedging gains.

Provision for Taxes

(123% increase from ₱2.11 bn to ₱4.70 bn)

The increase in provision for taxes during 2022 was due to higher taxable income, IAS 12 adoption of recognition of deferred income tax liabilities on right-of-use (ROU) assets, and the timing of the adjustments relating to the provisions of CREATE Act during the first half of 2021.

Changes in Registrant's Resources, Liabilities and Shareholders' Equity**Assets**

Total assets as of December 31, 2022 compared to December 31, 2021 increased by ₱50.18 bn, or 12%. The major movements of the accounts leading to the increase were as follows:

- a. Cash and cash equivalents increased by ₱7.63 bn, or 13% (from ₱57.13 bn to ₱64.76 bn). This is mainly due to ARI's new loans to support its renewable power projects.
- b. Trade and other receivables increased by ₱8.52 bn, or 32% (from ₱26.82 bn to ₱35.34 bn), primarily due to higher revenues.
- c. Inventories increased by ₱6.55 bn or 68% (from ₱9.57 bn to ₱16.12 bn). This was mainly driven by the increase in spare parts, supplies and fuel inventory.
- d. Other current assets increased by ₱4.57 bn, or 48% (from ₱9.51 bn to ₱14.08 bn). This was mainly driven by TLI's VAT input build-up as well as TVI and TSI's build-up of restricted cash in its reserve account in accordance with its loan agreement.
- e. Investments and advances increased by ₱12.98 bn, or 20% (from ₱64.95 bn to ₱77.93 bn). This was mainly driven by the take up of share in earnings from associates during the year 2022 which was higher than the receipt of dividends.
- f. Property, plant and equipment slightly increased by ₱3.62 bn, or 2% (from ₱203.24 bn to ₱206.86 bn). This was primarily due to the construction-in-progress of new solar power plant projects and the catch up on capital expenditures that were previously deferred due to the pandemic., partly offset by the depreciation of existing assets.
- g. Intangible assets increased by ₱3.76 bn, or 8% (from ₱46.02 bn to ₱49.77 bn). This was primarily due to the forex revaluation of GMEC goodwill partly offset by amortization of existing assets.

- h. Other noncurrent assets increased by ₱1.20 bn, or 17% (from ₱7.18 bn to ₱8.39 bn). This was mainly due to the reclassification of prepaid taxes which are expected to be utilized for more than one year.

Liabilities

Compared to December 31, 2021, total liabilities as of December 31, 2022 increased by ₱25.58 bn, or 9%. The major movements of accounts leading to the increase were as follows:

- a. Short-term loans increased by ₱2.78 bn, or 15% (from ₱18.63 bn to ₱21.40 bn). This was mainly due to loan availments by the Group during the year of 2022 which were used for working capital purposes and PV Sinag's availment of bridge short-term loan for project financing.
- b. Trade and other payables increased by ₱10.20 bn, or 45% (from ₱22.74 bn to ₱32.95 bn). This was primarily due to the increase in trade and fuel purchases.
- c. Income tax payable increased by ₱228.00 mn, or 86% (from ₱265.00 mn to ₱493.00 mn). This was mainly due to higher taxable income.
- d. Customers' deposits increased by ₱944.00 mn, or 13% (from ₱7.20 bn to ₱8.14 bn). This was mainly due to the receipt of bill deposits from new customers of the Retail Energy Supply and Distribution Utilities segments.
- e. Long-term debt (current and non-current portions) increased by ₱17.41 bn (from ₱182.04 bn to ₱199.45 bn). This was mainly due to ARI's new loans to support renewable power projects.
- f. Lease liabilities (current and noncurrent portions) decreased by ₱6.23 bn (from ₱33.77 bn to ₱27.54 bn), as TLI made regular payments during 2022 of its obligation to PSALM.
- g. Long-term obligation on power distribution system (current and noncurrent portions) decreased by ₱20.00 mn, or 12% (from ₱166.00 mn to ₱145.00 mn), due to Subic Enerzone's regular payment.
- h. Net derivative asset and liability changed by ₱1.40 bn (from ₱1.07 bn asset to ₱2.46 bn asset) during the year 2022 due to net hedging gains.
- i. Net pension liabilities increased by ₱297.00 mn, or 98% (from ₱303.00 mn to ₱599.00 mn), mainly due to higher current service cost based on the new actuarial studies across the Group.
- j. Deferred income tax liabilities (net of deferred income tax assets) increased by ₱2.15 bn, or 251% (from net deferred tax assets of ₱856 mn to net deferred tax liabilities of ₱2.42 bn). This was mainly due to the IAS 12 adoption of recognizing deferred income tax liabilities on TLI's ROU assets.
- k. Other noncurrent liabilities decreased by ₱55.00 mn, or 100% (from ₱55.00 mn to ₱0.00 mn), mainly due to the reclassification of the PSALM deferred adjustments to current.

Equity

Equity attributable to equity shareholders of the Parent Company increased by 14% (from ₱147.95 bn as of December 31, 2021 to ₱169.06 bn as of December 31, 2022) mainly due to the retained earnings build-up, cumulative translation adjustments and cash flow hedge reserve recognized in 2022. Cumulative translation adjustments increased by ₱3.55 bn, due to the upward net adjustment in the net assets translation effect of GMEC and LHC during the period. Cash flow hedge reserve increased by ₱1.73 bn, due to the upward net adjustment in the fair value of the Group's foreign currency forward and commodity swap contracts.

Material Changes in Liquidity and Cash Reserves of Registrant

As of December 31, 2022, the Group's cash and cash equivalents increased by 13% to ₱64.76 bn, from ₱57.13 bn as of December 31, 2021.

Higher working capital requirements for fuel purchases resulted in lower cash generated from operations during the year 2022 by ₱2.11 bn which was a 6% decrease compared to 2021.

Net cash flows from (used in) investing activities reversed from ₱1.02 bn in 2021 to -₱11.44 bn in 2022, mainly due to lower dividends received from associates and higher capital expenditures.

The net cash flows used in financing activities decreased from ₱19.10 bn in 2021 to ₱14.48 bn in 2022 mainly due to reduced debt repayments and the impact of new loans.

Financial Ratios

As of December 31, 2022, current assets increased by 27% and current liabilities increased by 9% YoY compared to the end of 2021. The current ratio as of December 31, 2022 was at 1.78x compared to 1.53x as of December 31, 2021.

Consolidated debt-to-equity ratio as of December 31, 2022 was at 1.68x, lower than the 1.75x recorded at the end of 2021. This was due to a 9% increase in total liabilities compared to a higher 14% increase in equity in 2022.

Item 7. Financial Statements

The consolidated financial statements of AboitizPower are incorporated herein by reference. The schedules listed in the accompanying Index to Supplementary schedules are filed as part of this SEC Form 17-A.

Seasonal aspects that have material effect on the Financial Statements have been discussed under *Major Risk/s Involved in the Business* in Part I Item 1 (xv) of this SEC Form 17-A.

Item 8. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

The Company has engaged the services of SyCip Gorres Velayo & Co. (SGV) during the two most recent fiscal years. There were no disagreements with SGV on accounting and financial disclosure.

Information on Independent Public Accountant

As a matter of policy, the Board Audit Committee (the "Audit Committee") selects, monitors, and reviews the independence, performance and effectiveness, scope of work, fees, and remuneration of external auditors, in consultation with the Chief Executive Officer, the Chief Financial Officer, and the Group Internal Audit Head. Where appropriate, the Audit Committee may recommend to the Board of Directors the re-appointment or replacement of the current external auditor.

During the March 6, 2025 Board Meeting, the Chairman of the Audit Committee, Mr. Antonio A. Canova, reported to the Board that the Audit Committee evaluated and assessed the previous year's performance of the Company's external auditor, SyCip Gorres Velayo & Co. (SGV). Based on the results of its evaluation, the Audit Committee advised the Board of Directors that it is satisfied with SGV's performance for the previous year and recommended SGV's re-appointment as the Company's external auditor for 2025.

The Board of Directors discussed the Audit Committee's recommendation, and after discussion, approved the re-appointment of SGV. The Board of Directors will endorse to the shareholders the re-appointment of SGV as the Company's external auditor for 2025.

The accounting firm of SGV has been AboitizPower's Independent Public Accountant for the last 26 years. Ms. Jhoanna Feliza C. Go is AboitizPower's audit partner from SGV since 2022. AboitizPower complies with the requirements of Section 3(b)(ix) of SRC Rule 68 on the rotation of external auditors or signing partners and the two-year cooling-off period. There was no event in the past 26 years wherein AboitizPower and SGV or its handling partner had any disagreement with regard to any matter relating to accounting principles or practices, financial statement disclosure or auditing scope or procedure.

Representatives of SGV will be present during the 2025 ASM and will be given the opportunity to make a statement if they so desire. They are also expected to respond to appropriate questions, if needed.

The Chairman of the Audit Committee is Mr. Antonio A. Canova. The other members are Messrs. Eric Ramon O. Recto and Cesar G. Romero, Independent Directors, and Messrs. Izumi Kai and Erramon I. Aboitiz, who are directors of AboitizPower.

External Audit Fees and Services

The following table sets out the aggregate fees billed to the Company for each of the last two years for professional services rendered by SGV.

Fee Type	Year ended December 31, 2024	Year ended December 31, 2023
Audit Fees		
Audit Fees	₱1,193,500	₱698,600
Audit Related Fees – Bond issuance	6,000,000	6,000,000
Total	7,193,500	6,698,000
Non-Audit Fees		
Financial and Tax Due Diligence Fees	--	1,352,567
BIR Form 1709 Preparation	57,000	-
Transfer Pricing Documentation	45,000	-
Total	102,000	1,352,567
Total Audit and Non-Audit Fees	₱7,295,500	₱8,051,167

AboitizPower engaged SGV to audit its 2024 and 2023 annual financial statements. SGV was also engaged to conduct quarterly financial results for bond issuance readiness. The Company also engaged SGV to provide financial and tax due diligence in relation to the Company's preparation of BIR Form 1709 and transfer pricing documentation.

As a policy, the Board Audit Committee makes recommendations to the Board of Directors concerning the choice of external auditor and pre-approves audit plans, scope, and frequency before the audit is conducted.

Audit services of SGV for 2024 and 2023 were pre-approved by the Board Audit Committee. The Board Audit Committee also reviewed the extent and nature of these services to ensure that the independence of the external auditors was preserved. SGV does not have any direct or indirect interest in the Company.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

The Company has engaged the services of SGV during the two most recent fiscal years. There are no disagreements with SGV on accounting and financial disclosure.

PART III – CONTROL AND COMPENSATION INFORMATION

Item 9. Directors and Executive Officers

(a) Directors and Officers for 2024-2025

(1) Directors for 2024-2025

As of March 26, 2025, the Company’s Board of Directors (the “Board”) is composed of eight directors, two of whom are Independent Directors, five are Non-Executive Directors, and one Executive Director. Below are the profiles of each director for 2024-2025 with their corresponding positions, offices, and business experience held for the past five years, as of March 26, 2025. Except for Mr. Antonio A. Canova, who assumed his directorship on July 1, 2024, all other directors were elected during AboitizPower’s 2024 ASM to serve for a term of one year, and until their successors are duly elected and qualified. On March 26, 2025, Mr. Edwin R. Bautista resigned as a director of AboitizPower.

He is not connected with any Philippine government agency or instrumentality. He is not a director of any other publicly-listed company in the Philippines.

Performance Assessment and Attendance Reports of the Board

In accordance with AboitizPower's Revised Manual on Corporate Governance (as amended on February 23, 2022) (the "Revised Manual"), the members of the Board and Board Committees conduct an annual self-assessment of their collective and individual performance. In addition, the directors assess the performance of the Company's corporate officers such as the Chairman of the Board, the Chief Executive Officer, the Chief Risk Officer, and Compliance Officer, and the Group Internal Audit Head.

The assessment forms are prepared and regularly reviewed by the Compliance Officer to elicit relevant and valuable insights on the following assessment criteria: (1) compliance with best governance practices and principles; (2) participation and contribution to the Board and committee meetings; and (3) performance of their duties and responsibilities as provided in the Company's Revised Manuals, Charters, Amended Articles of Incorporation, and Amended By-Laws.

In addition, AboitizPower directors are evaluated by its key officers based on the following criteria: (1) business acumen, (2) independent judgment, (3) familiarity with the business, (4) active participation and effective challenge, (5) professional expertise and network, (6) value contribution, (7) embodiment of Aboitiz core values, and (8) reputation. Assessment results are presented to the Board Environmental, Social, and Corporate Governance (ESCG) Committee as part of the nomination and selection process of incumbent Board members.

The Corporate Governance Code and the Revised Manual requires that at least once in every three years, the conduct of the Board performance assessment must be supported by an independent third-party facilitator. AboitizPower complied with this requirement in 2023 with the engagement of the Institute of Corporate Directors (ICD), a non-stock, not-for-profit national association of corporate directors and other stakeholders engaged in corporate governance, to support its Board performance assessment exercise.

For more discussion on the Board's (i) performance assessment, and (ii) attendance record at Board, Board Committee, and stockholders' meetings for the year 2024, please refer to the Board Matters portion of Part III – Corporate Governance on page 119 of the Company's 2024 Annual Report.

Nominations for Independent Directors and Procedure for Nomination

The procedure for the nomination and election of the Independent Directors is in accordance with Rule 38 of the Securities Regulation Code ("SRC Rule 38"), AboitizPower's Amended By-Laws, and AboitizPower's Amended Guidelines for the Nomination and Election of Independent Directors, approved by the Board of Directors on March 23, 2017 (the "Amended Guidelines").

Nominations for Independent Directors were opened beginning January 1, 2025 and the table for nominations was closed on February 15, 2025, in accordance with Section C (1) of the Guidelines. The period may be extended by unanimous vote of the Board ESCG Committee for meritorious reasons.

SRC Rule 38 further requires the Board ESCG Committee (in its capacity as the Board Nominations and Compensation Committee) to meet and pre-screen all nominees and submit a Final List of Nominees to the Corporate Secretary, so that such list will be included in the Company's Preliminary and Definitive Information Statements. Only nominees whose names appear on the Final List shall be eligible for election as Independent Directors. No other nominations shall be entertained after the Final List of nominees has been prepared. The name of the person or group of persons who nominates an Independent Director shall be identified in such report including any relationship with the nominee.

On February 19, 2025, the Chairman of the Board of the ESCG Committee submitted the Final List of Nominees to the Corporate Secretary. In approving the nominations for Independent Directors, the Board ESCG Committee considered the guidelines on the nominations of Independent Directors prescribed in SRC Rule 38, the Amended Guidelines, and AboitizPower's Revised Manual. In 2024, Mr. Cesar G. Romero, Independent Director, was the Chairman of the Board ESCG Committee. The other voting members are Messrs. Eric Ramon O. Recto, Sabin M. Aboitiz, Danel C. Aboitiz, and Izumi Kai, while the *ex-officio* non-voting members are Messrs. Carlos Ramon C. Aboitiz and Manuel Alberto R. Colayco.

Independent Directors shall be elected at the stockholders' meeting during which other members of the Board are to be elected. However, no nominations for Independent Director shall be accepted at the floor during the 2025 ASM.

Messrs. Eric Ramon O. Recto and Cesar G. Romero and Hon. Estela M. Perlas-Bernabe (Ret.) are the nominees for Independent Directors of AboitizPower for the 2025 ASM. They are neither officers nor employees of AboitizPower or any of its Affiliates, and do not have any relationship with AboitizPower which would interfere with the exercise of independent judgment in carrying out the responsibilities of an Independent Director.

AboitizPower stockholders, Mesdames Esmeralda C. Dano, Catherine Alvarez, and Josephine Pabriga, have respectively nominated Messrs. Recto and Romero, and Hon. Perlas-Bernabe as AboitizPower's Independent Directors. None of the nominating stockholders have any relation to the respective independent director they are nominating.

Other Nominees for Election as Members of the Board of Directors

As the Board ESCG Committee conveyed to the Corporate Secretary on February 19, 2025, the following were also nominated and qualified as candidates to the AboitizPower Board of Directors for the ensuing year 2025-2026:

Sabin M. Aboitiz
Antonio A. Canova
Danel C. Aboitiz
Erramon I. Aboitiz
Izumi Kai
Toshiro Kudama

Pursuant to Section 7, Article I of the Amended By-Laws of AboitizPower, nominations for members of the Board, other than Independent Directors, for the ensuing year must be submitted in writing to the Corporate Secretary at least 15 working days prior to the ASM on April 28, 2025 or not later than April 2, 2025.

All other information regarding the positions and offices held by nominees are integrated in Item 9(a)(1) above. Hon. Estela M. Perlas-Bernabe (Ret.) is being nominated to the Board of Directors for the first time.

Below is the profile of Hon. Estela M. Perlas-Bernabe (Ret.) including the positions and offices she held for the past five years.

Internal Auditor	Security Bank Corporation

Educational Background:

College	Bachelor of Science in Accountancy (With Honors) University of Batangas

On February 25, 2025, Mr. Dinglasan was appointed as Chief Audit Executive replacing Mr. Juan Pascual C. Cosare. Mr. Dinglasan is a Certified Public Accountant, a Certified Internal Auditor, and a Lead Auditor for ISO/IEC 27001:2013 (Information Security Management Systems), ISO 22301:2012 (Business Continuity Management Systems), and ISO 9001:2008 (Quality Management Systems). Additionally, he is a Certified Asset Management Assessor by the Institute of Asset Management. He is not connected with any government agency or instrumentality. He is not a director of any publicly-listed company in the Philippines.

Period in which the Directors and Executive Officers Should Serve

The directors shall serve for a period of one year.

Term of Office of a Director

Pursuant to the Company's Amended By-Laws, the directors are elected at each ASM by stockholders entitled to vote. Each director holds office until the next annual election, or for a term of one year and until his successor is duly elected, unless he resigns, dies, or is removed prior to such election.

Any vacancy in the Board, other than by removal or expiration of term, may be filled by a majority vote of the remaining members thereof at a meeting called for that purpose, if they still constitute a quorum. Otherwise, said vacancy must be filled by the stockholders or members in a regular or special meeting called for that purpose. The director so chosen shall serve for the unexpired term of their predecessor in office.

When the vacancy arises as a result of removal by the stockholders or members, the election may be held on the same day of the meeting authorizing the removal and this fact must be so stated in the agenda and notice of said meeting. In all other cases, the election must be held no later than 45 days from the time the vacancy arose. The director so chosen to fill a vacancy shall serve for the unexpired term of his/her predecessor in office.

When the vacancy prevents the remaining directors from constituting a quorum and emergency action is required to prevent grave, substantial, and irreparable loss or damage to the corporation, the vacancy may be temporarily filled from among the officers of the corporation by unanimous vote of the remaining directors. The action by the designated director shall be limited to the emergency action necessary, and the term shall cease within a reasonable time from the termination of the emergency or upon the election of the replacement director, whichever comes earlier.

(3) Significant Employees

AboitizPower considers the contribution of every employee important to the fulfillment of its goals.

(4) Family Relationships

Mr. Danel C. Aboitiz is the nephew of Messrs. Sabin M. Aboitiz and Erramon I. Aboitiz. Messrs. Erramon I. Aboitiz and Sabin M. Aboitiz are brothers.

Other than this, no other officers or directors are related within the fourth degree of consanguinity.

(5) Involvement in Certain Legal Proceedings as of February 28, 2025

To the knowledge and/or information of AboitizPower, none of its nominees for election as directors, its present members of the Board, or its executive officers have been involved in any of the following during the past five years up to February 28, 2025:

- (a) Any bankruptcy petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time;
- (b) Any conviction by final judgment, including the nature of the offense, in a criminal proceeding, domestic or foreign, or being subject to a pending criminal proceeding, domestic or foreign, excluding traffic violations and other minor offenses;
- (c) Being subject to any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, domestic or foreign, permanently or temporarily enjoining, barring, suspending or otherwise limiting his/her involvement in any type of business, securities, commodities or banking activities; and
- (d) Being found by a domestic or foreign court of competent jurisdiction (in a civil action), the Commission or comparable foreign body, or a domestic or foreign Exchange or other organized trading market or self-regulatory organization, to have violated a securities or commodities law or regulation and the judgment has not been reversed, suspended, or vacated.

(6) Parent Company

AboitizPower's parent company is AEV. As of March 24, 2025, AEV owns 53.09% of the voting shares of AboitizPower. In turn, ACO owns, as of March 24, 2025, 48.04% of the voting shares of AEV.

(b) Resignation or Refusal to Stand for Re-election by Members of the Board of Directors

No director has resigned or declined to stand for re-election to the Board since the date of AboitizPower's last ASM because of a disagreement with AboitizPower on matters relating to its operations, policies, and practices.

Item 10. Compensation of Directors and Executive Officers

(a) Summary of Compensation of Executive Officers

Information as to the aggregate compensation paid or accrued to AboitizPower's Chief Executive Officer and four most highly compensated executive officers, as well as other directors and officers during the last two completed fiscal years and the ensuing fiscal year, are as follows:

Name of Officer and Principal Position*	Year	Salary	Bonus	Other Compensation
Chief Executive Officer and the Four Most Highly Compensated Executive Officers: 1. DANEL C. ABOITIZ* <i>- President and Chief Executive Officer</i> 2. EMMANUEL V. RUBIO* <i>- Former President and Chief Executive Officer</i> 3. JUAN ALEJANDRO A. ABOITIZ <i>- Senior Vice President/ Chief Financial</i>				

Officer/Corporate Information Officer 4. MANUEL ALBERTO R. COLAYCO <i>- Senior Vice President – Chief Legal and Compliance Officer</i> 5. MA. RACQUEL J. BUSTAMANTE <i>- Treasurer/Senior Vice President – Deputy Chief Financial Officer</i> 6. MARK LOUIE M. GOMEZ <i>- Data Protection Officer and Vice President for Risk and Operational Performance Management</i>				
	Actual 2024	₱160,068,196	₱14,314,182	₱8,693,470
	Actual 2023	₱117,580,000	₱6,080,000	₱22,330,000
All above named officers as a group	Projected 2025	₱100,884,120	₱20,680,871	₱7,696,164
	Actual 2024	₱9,230,818	₱1,284,420	₱579,103
	Actual 2023	₱3,090,000	₱280,000	₱34,600,000
All other officers and directors as a group	Projected 2025	₱3,725,165	₱531,300	₱258,385

*Mr. Danel C. Aboitiz was appointed as President and Chief Executive Officer, replacing Mr. Emmanuel V. Rubio, effective July 1, 2024.

The 2020 Amended By-Laws of the Company, as approved by the SEC on October 1, 2020, defined corporate officers as follows: the Chairman of the Board, the Vice Chairman, the Chief Executive Officer, the Chief Operating Officer, the Treasurer, the Corporate Secretary, the Assistant Corporate Secretary, and such other officers as may be appointed by the Board of Directors. For the year 2024, the Company's Summary of Compensation of Executive Officers covers the compensation of officers as reported under Item 10(a) of the Annual Report.

Except for the regular company retirement plan, which by its very nature will be received by the officers concerned only upon retirement from the Company, the above-mentioned officers do not receive any other compensation in the form of warrants, options, and/or profit-sharing.

There is no compensatory plan or arrangement between the Company and any executive in case of resignation or any other termination of employment or from a change-in-control of the Company.

(b) Compensation of Directors

(1) Standard Arrangements

AboitizPower directors receive a monthly allowance of ₱150,000.00, while the Chairman of the Board receives a monthly allowance of ₱200,000.00. In addition, each director/member and the Chairmen of the Board and the Board Committees receive a per diem for every Board or Board Committee meeting attended as follows:

Type of Meeting	Directors	Chairman of the Board
Board Meeting	₱150,000.00	₱225,000.00

Type of Meeting	Members	Chairman of the Committee
Board Committee Meeting (except Audit Committee)	₱100,000.00	₱150,000.00
Audit Committee Meeting	₱100,000.00	₱200,000.00

In compliance with Section 29 of the Revised Corporation Code, the total compensation of each of the Company's directors as of December 31, 2024 is as follows:

Name of Director	Total Compensation Received as a Director⁸
SABIN M. ABOITIZ* <i>Chairman of the Board of Directors</i>	₱3,975,000.00
ERIC RAMON O. RECTO <i>Lead Independent Director/ Vice Chairman of the Board of Directors</i>	₱7,400,000.00
CESAR G. ROMERO <i>Independent Director</i>	₱6,450,000.00
LUIS MIGUEL O. ABOITIZ** <i>Former Director</i>	₱1,950,000.00
ERRAMON I. ABOITIZ** <i>Director</i>	₱2,850,000.00
EMMANUEL V. RUBIO*** <i>Former Director and President and Chief Executive Officer</i>	₱1,150,000.00
ANTONIO A. CANOVA*** <i>Director</i>	₱2,300,000.00
EDWIN R. BAUTISTA**** <i>Director</i>	₱4,350,000.00
DANEL C. ABOITIZ* <i>Director/President and Chief Executive Director</i>	₱2,800,000.00
TOSHIRO KUDAMA <i>Director</i>	₱4,550,000.00
IZUMI KAI <i>Director</i>	₱3,975,000.00

* A portion of the director's compensation was paid to ACO.

** Mr. Erramon I. Aboitiz replaced Mr. Luis Miguel O. Aboitiz as director on April 22, 2024.

*** Mr. Emmanuel V. Rubio retired as Director, and was replaced by Mr. Antonio A. Canova on July 1, 2024.

**** Resigned as director effective March 26, 2025.

(2) Other Arrangements

Other than payment of the directors' per diem and monthly allowance as stated, there are no standard arrangements pursuant to which directors of the Company are compensated, or are to be compensated, directly or indirectly, for any services provided as a director.

(c) Employment Contracts and Termination of Employment and Change-in-Control Arrangements

There is no compensatory plan or arrangement between AboitizPower and any executive officer in case of resignation or any other termination of employment or from a change in the management or control of AboitizPower.

(d) Warrants and Options Outstanding

To date, AboitizPower has not granted any stock option to its directors or officers.

⁸ Consisting of the monthly allowance and per diem. Per diem is based on the directors' attendance in the Board and Board Committee meetings, and their Committee memberships for the period January 1 to December 31, 2024.

Item 11. Security Ownership of Certain Record and Beneficial Owners and Management

(1) Security Ownership of Certain Record and Beneficial Owners (more than 5% of the voting shares) as of March 24, 2025

Title of Class of Shares	Name and Address of Record Owner, and Relationship with Issuer	Name of Beneficial Owner and Relationship with Record Owner	Citizenship	No. of Shares Held and Nature of Ownership (Record and/or Beneficial)	Percentage of Ownership

On December 16, 2021, JERA Asia acquired a 27% stake in AboitizPower, which consisted of a 25.01% stake from AEV and a 1.99% stake from the Aboitiz family privately held company, Aboitiz & Company, Inc. (ACO). JERA Asia is an affiliate of JERA Co., Inc. (JERA), a joint venture company organized under the laws of Japan and established in 2015 by two major Japanese electric companies (TEPCO Fuel & Power Incorporated and Chubu Electric Power Company Incorporated). JERA is Japan's largest power generation company and has a global footprint through its subsidiaries operating in various countries around the world.

AEV is the public holding and management company of the Aboitiz Group, one of the largest conglomerates in the Philippines. As of March 24, 2025, the following entities own at least five per centum (5%) or more of AEV:

Title of Class of Shares	Name and Address of Stockholder and Relationship with Issuer	Name of Beneficial Owner and Relationship with Record Owner	Citizenship	No. of Shares and Nature of Ownership (Record and/or Beneficial)	Percentage of Ownership

(3) Voting Trust Holders of Five Per Centum (5%) or More of Common Equity

No person holds under a voting trust or similar agreement more than five per centum (5%) of AboitizPower's common equity.

(4) Changes in Control

There are no arrangements that may result in a change in control of AboitizPower during the period covered by this report.

Item 12. Certain Relationships and Related Transactions

AboitizPower and its Subsidiaries (the "Group"), in their regular conduct of business, have entered into related party transactions consisting of professional fees, advances, various guarantees, construction contracts, and rental fees. These are made on an arm's length basis as of the time of the transactions.

AboitizPower ("Parent") has provided support services to its Business Units, such as marketing, trading, billing and other technical services, necessary for the effective and efficient management and operations among and between the Subsidiaries and Associates.

The Group has existing Service Level Agreements (SLAs) with its parent company, AEV, for management fees and corporate center services such as tax compliance and information technology. These services are obtained from AEV to enable the Group to realize cost synergies and optimize expertise at the corporate center. AEV maintains a pool of highly qualified professionals with business expertise specific to the businesses of the Group. Transaction costs are always benchmarked on third party rates to ensure competitive pricing and consistency with prevailing industry standards. SLAs are in place to ensure quality of service.

Material and significant related party transactions are reviewed and approved by the Board Related Party Transactions Committee, composed of two independent directors and one non-Executive director.

No other transactions, without proper disclosure, were undertaken by the Company in which any director or executive officer, any nominee for election as director, any beneficial owner (direct or indirect) or any member of his immediate family was involved or had a direct or indirect material interest. Other than what has been discussed in this Annual Report and the Company's 2024 Annual Financial Statements, there are no other related party transactions entered into by the Company with related parties, including transactions with directors or self-dealings by the Company's directors.

AboitizPower employees are required to promptly disclose any business and family-related transactions with the Company to ensure that potential conflicts of interest are brought to the attention of the management.

In 2021, AboitizPower updated the Related Parties Certification for Directors and Officers in compliance with the Bureau of Internal Revenue (BIR) Regulation No. 19-2020 on the reporting guidelines for the transactions of individuals and juridical entities with related parties. The RPT Committee continued to ensure that related party transactions are taken on an arm's-length basis, within market rates, and with sufficient documentation. Lastly, the RPT Committee ensured that RPTs falling below the SEC-defined materiality threshold are coursed through the appropriate levels of review, reporting, and/or approval process.

For detailed discussion on related party transactions, please refer to the Consolidated Financial Statements.

PART IV – CORPORATE GOVERNANCE

Item 13. Corporate Governance

In 2024, the Aboitiz Group propelled itself into a new era navigating the unfolding chapters of its rich history with an unwavering commitment to *drive change for a better world by advancing business and communities*. As the organization embraced the *Great Transformation*, it strategically steered towards shaping a future where innovation stands as the cornerstone of its growth trajectory, aspiring to emerge as the Philippines' first *techglomerate*. Guiding this transformative journey is the board of directors of AboitizPower, united in their firm belief that a robust corporate governance framework serves as the cornerstone for achieving the Group's strategic objectives and ambitious growth aspirations.

Notable accomplishments of the AboitizPower Board for 2024 are as follows:

- Reviewed and affirmed the appropriateness of the Group's purpose and brand promise in support of the country's gradual economic recovery.
- Reviewed and ensured the sufficiency of the internal controls system and enterprise risk management framework of AboitizPower.
- Authorized and held AboitizPower's Virtual Annual Stockholders' Meeting for the fifth consecutive year.
- Approved amendments to the various Board Committee charters.
- Reviewed and approved the amendments to the Board Charter and Protocol to align internal processes with best practices.
- Reviewed and approved the key amendments to the Articles of Incorporation and By-Laws of AboitizPower.
- In addition to the Annual Corporate Governance Seminar, conducted regular virtual learning sessions to strengthen the continuous learning program for the Company's directors and officers.

Shareholders Rights and Equitable Treatment

Safeguarding the rights of its stockholders stands as a cornerstone principle for the Company's governance practices. The primary objective is to guarantee the unfettered exercise of stockholder rights, fostering an environment where every shareholder, irrespective of the quantity of shares they own, can actively and freely participate in corporate decision-making processes. This dedication underscores not only a commitment to regulatory compliance but also a proactive approach in cultivating transparency, equity, and shareholder inclusivity within the Company's governance principles.

Among the rights of the Company's shareholders are: (i) to receive notices of and to attend shareholders' meetings; (ii) call for a special board meeting and propose a meeting agenda; (iii) to participate and vote on the basis of the one-share, one-vote policy; (iv) to vote in person, *in absentia*, or through proxy; (v) to ratify corporate actions; (vi) nominate, elect, remove, and replace Board members (including via cumulative voting); (vii) to inspect corporate books and records; (viii) to receive dividends; and (ix) to be timely and regularly informed of the state of the Company's businesses.

Right to Actively Participate at Shareholders' Meetings

The Company strives to maintain a transparent, easily accessible, and fair conduct of its shareholders' meetings. The goal is to ensure that the shareholders are given accurate and timely information to enable them to make a sound judgment on all matters brought to their attention for consideration or approval.

The highlights and summary of the financial, non-financial, and operating performance of the Company and its Subsidiaries are contained in the Definitive Information Statement and the Annual Report, which are distributed prior to the ASM and made available in the Company's website. Shareholders are likewise provided with individual profiles of new and returning directors, as well as a summary of the Board and Board Committee's performance assessments, attendance record, compensation, and notable accomplishments for the year.

To enhance accessibility, the notice for the Company's ASM, complete with a quick response (QR) code to the Definitive Information Statement, is published in two widely circulated newspapers no less than 21 days before the meeting.

The commitment to shareholder engagement is evident in the conduct of stockholder meetings, with notices provided not less than 28 days from the date of the meeting, containing all agenda items for discussion. The rationale of agenda items which are submitted to the shareholders for their approval are included in the notices to shareholders' meetings.

AboitizPower is committed to provide an accessible and convenient venue for its shareholders to exercise their basic and inviolable right to attend and participate at any shareholder meeting, including the opportunity to elect their representatives to the Boards of Directors and ratify corporate actions. In 2024, AboitizPower conducted a fully digital stockholders' meeting for the fifth consecutive year. Shareholders were given the opportunity to cast their votes through non-traditional means such as remote communication or *in absentia*. Shareholders may access AboitizPower's online voting portal in order to register and vote on the matters submitted for shareholders' approval at any stockholder meetings.

All shareholders are encouraged to actively participate during meetings. They are allowed to raise their concerns, ask questions, and comment on the state of the Company's business during meetings through the ASM online portal or live if time permits. There are no barriers or impediments preventing shareholders from consulting or communicating with one another, with the Directors, and with the Corporate Secretary.

The questions, answers, issues and motions raised, the agreements and resolutions arrived at, the corporate acts approved or disapproved, and the voting results are reported in the minutes and are made publicly available by the next working day through the Company's website under the Investors' page. The Company also discloses to PSE, PDEx, and the SEC all the items approved at the shareholders' meeting no later than the next business day.

The Company continues to exert efforts to extend the communication channels between the Company and the institutional and individual stockholders through its Investor Relations Office and Shareholder Relations Office, respectively.

Right to Receive Dividends

The right to receive dividends is a basic shareholder right. The Company promotes this basic shareholder right by adopting a clear and transparent dividend policy.

Every year, the Company pays dividends in an equitable and timely manner. All shareholders are treated equally, receiving an amount of dividends per share that is proportionate to their shareholdings. The period for payment of dividends is based on trading requirements or constraints of the SEC and PSE. In 2024, AboitizPower paid the cash dividends within 22 days from the declaration date.

In the last three (3) years, the Company has paid the following dividends:

		Declaration Date	Record Date	Payment Date	Dividends per Share	Total Dividends Declared
AboitizPower	2025	March 6, 2025	March 21, 2025	March 28, 2025	₱2.35 (regular)	₱16.94 bn
	2024	March 5, 2024	March 19, 2024	March 26, 2024	₱2.30 (regular)	₱16.57 bn
	2023	March 3, 2023	March 17, 2023	March 30, 2023	₱1.87 (regular)	₱13.76 bn

Lastly, AboitizPower's Board Secretariat has adopted certified Board protocols and procedures under the ISO 9001:2015 Management Board and System to ensure the effectiveness of Board and shareholders' commitments. This includes coordination with stock transfer agents to ensure appropriate responses to and timely resolution of shareholders' queries and requests.

For a more detailed discussion on the rights of the shareholders of the Company, please refer to the 2024 Consolidated Annual and Sustainability Report, the 2024 Integrated Annual Corporate Governance Report (IACGR), and the Governance page of the AboitizPower website, which will be available at www.aboitizpower.com on or before May 30, 2025.

BOARD MATTERS

Board of Directors

The Board leads the Group's corporate governance framework. Independent from management, its members are committed to serve and promote long-term success, and to secure the Group's sustained growth, competitiveness and sustainability. The Directors perform the crucial role of articulating and assessing the Group's purpose, vision and mission, and strategies to carry out its objectives. They ensure that the strategic business direction of the Group's businesses is soundly established and are in line with the overall Group's goals and strategy. In line with best practices, the members of the Board are responsible for establishing and monitoring the Group's commitment to the principles embodied in ESG. In performing these functions, the members of the AboitizPower Board, individually and collectively, are expected to act consistently with the Aboitiz core values.

The AboitizPower Board is composed of nine members, all of whom come from diverse professional backgrounds. They are composed of legal and finance professionals, engineers, former or current Chief Executive Officers/Chief Operating Officers, auditors, and accountants. Many of them have management experience in the private and Government sectors, as well as in multilateral agencies.

In 2024, the AboitizPower Board had two Independent Directors, six Non-Executive Directors, and one Executive Director. The Chairman of the AboitizPower Board, Mr. Sabin M. Aboitiz, is a highly experienced Non-Executive Director. As a Non-Executive Director, he is not involved in the Company's day-to-day operations, which enables him to focus on ensuring that the AboitizPower Board properly discharges its duties and responsibilities.

The AboitizPower Board appointed Mr. Cesar G. Romero as Independent Director, and Mr. Eric Ramon O. Recto as the Company's Lead Independent Director and Vice Chairman of the Board. Mr. Romero was also the Chairman of the ESCG Committee (also functions as the Nomination and Selection Committee) to ensure an independent and transparent nomination, selection, election, and performance assessment process of the Board.

As of December 31, 2024, the members of the AboitizPower Board are the following:

ABOITIZ POWER CORPORATION'S BOARD OF DIRECTORS					
Director (Age, Nationality)	Designation/ Directorship	Year First Elected	Number of Years Served as Director	Board and Committee Memberships and % of Attendance for 2024	Directorships in Other Listed Philippine Companies Outside the Aboitiz Group
SABIN M. ABOITIZ 60 years old Filipino	Chairman of the Board (NED)	April 26, 2021	3 years	(C) BOD (100%) (C) Risk (75%) (M) ESCG (100%) (M) ExCom (n.a) (M) Cyber (100%)	None
ANTONIO A. CANOVA 63 years old American	Non-Executive Director	July 1, 2024	8 months	(M) BOD (100%) (C) Audit (100%) (M) ExCom (n.a)	None
CESAR G. ROMERO 59 years old Filipino	Independent Director	October 1, 2022	2 years	(ID) BOD (100%) (C) ESCG (100%) (M) Audit (100%) (M) Risk (100%) (M) RPT (100%) (M) Cyber (100%)	Robinsons Retail Holdings, Inc.

DANEL C. ABOITIZ 43 years old Filipino	President and Chief Executive Officer (ED)	December 11, 2018	6 years	(M) BOD (100%) (C) ExCom (n.a.) (M) ESCG (100%) (M) Risk (100%) (O) RPT (100%)	None
EDWIN R. BAUTISTA ¹⁴ 64 years old Filipino	Non-Executive Director	April 26, 2021	3 years	(M) BOD (100%)	None
ERIC RAMON O. Legend: C - Chairman; VC – Vice Chairman; M – Member; O – Observer; ID - Independent Director; NED - Non-Executive Director; ED - Executive Director; BOD - Board of Directors; ESCG - Board Environmental, Social, and Corporate Governance Committee; ExCom - Board Executive Committee; AudCom - Board Audit Committee; Risk - Board Risk and Reputation Management Committee; RPT - Board Related Party Transactions Committee; Cyber - Board Cybersecurity and Information Security Committee.

Board Performance

In 2024, the members of the AboitizPower Board conducted the following performance review and assessment:

Type of Assessment	Respondents and Scope	Criteria
Director Assessment Completed: February 2024	Respondents: Members of the Board Scope: Individual and the collective performance of the members of the Board and Board Committees.	(1) compliance with best governance practices and principles; (2) participation and contribution to the Board and Board Committee meetings; and

¹⁴ Mr. Edwin R. Bautista resigned as a director of the Company effective March 26, 2025.

¹⁵ Since his re-appointment on April 22, 2024.

Type of Assessment	Respondents and Scope	Criteria
Key Officers Evaluation Completed: December 2024	Respondents: Non-Executive Directors Scope: Chairman, Chief Executive Officer, Internal Audit Head, Risk Officer, Corporate Secretary, and Compliance Officer	(3) performance of their duties and responsibilities as provided in the Company's Revised Manual, Charters, Amended Articles of Incorporation, and Amended By-Laws.
Board and Committee Charter Assessment Completed: November 2024	Respondents: Board and Committee Members	(1) membership and composition; (2) duties and responsibilities; (3) conduct of meetings; and (4) support and resources

In addition, the Corporate Governance Code requires that at least once in every three years, the conduct of the Board performance assessment must be supported by an independent third-party facilitator. AboitizPower complied with this requirement in 2023 with the engagement of the Institute of Corporate Directors (ICD), a non-stock, not-for-profit national association of corporate directors and other stakeholders engaged in corporate governance, to support its Board performance assessment exercise.

Board Committees

The different Board committees - Audit, Corporate Governance (now Environmental, Social, and Corporate Governance), Risk and Reputation Management, Related Party Transactions, Executive Committee, and the Cyber and Information Security Committee - report regularly to the Board and are crucial in maintaining Board oversight in key management areas.

The mandate of each Board committee, including key accomplishments in 2024, are described below:

- a. The **Board Environmental, Social, and Corporate Governance Committee** is responsible for ensuring the establishment of a governance mechanism that promotes sustainability practices through proper environmental stewardship, social development, and sound corporate governance. The ESCG Committee also performs the functions of the Nomination and Remuneration Committee. In carrying out their duties and responsibilities, the ESCG Committee is supported by the company's Compliance Officer, Chief External Relations Officer, as well as the Group Chief Human Resources Officer. These officers regularly attend committee meetings to act as resource persons. The chairmen of the ESCG Committees are the Independent Directors.

Key Areas of Focus in 2024	
Environmental and Social	- Approved the Company's ESG Roadmap and Sustainability Ambition. - Monitored the progress of the ongoing ESG Activities.
Compliance	- Reviewed and monitored AboitizPower's compliance with new laws and regulations. - Ensured that the nomination, selection, remuneration, and assessment of each company's directors and officers are aligned with the Manuals.
Corporate Governance	- Reviewed and endorsed for Board approval the proposed amendments to the ESCG Committee's Charter to clarify the committee's role as the primary advisory and exploratory body that endorses to the Board of the Directors general strategies with respect to material, current, and emerging ESG and other similar matters that affect the Company. - Reviewed and monitored the status of whistleblowing reports.
Nomination and Compensation	- Approved the final list of nominees for directors for election after reviewing all the qualifications and none of the disqualifications as provided in the By-Laws, Revised Manuals, and other relevant SEC rules. - Reviewed the qualifications of all persons nominated to appointed positions by the Board. - Reviewed the Group's merit increase guidelines.

- b. The **Board Audit Committee** represents the Board in discharging its responsibility related to audit matters for the Group. Independent and Non-Executive Directors comprise the majority of the members of the Board

Audit Committee, including its Chairman. At the end of every Audit Committee meeting, Committee Members meet without the presence of any executives.

Key Areas of Focus in 2024	
Governance	- Reviewed and endorsed for Board approval the proposed amendments to the Board Audit Committee Charter to reflect necessary changes to the composition of the committee and to align with the amended Board Protocol.
Financial Reports	- Reviewed, discussed, and approved for public disclosure the 2024 quarterly unaudited consolidated financial statements. - Endorsed for approval by the full Board the 2024 annual audited financial statements of AboitizPower, its subsidiaries, and affiliates.
External Auditors	- Reviewed the performance of SGV as AboitizPower's external auditor. - Endorsed to the Board the appointment of SGV as AboitizPower's External Auditor for 2024. - Reviewed and approved the overall scope and audit plan of SGV. - Reviewed and approved the audit plan, fees and terms of engagement which covers non-audit and audit-related services provided by SGV.
Internal Auditors	- Reviewed and approved the annual audit program for 2024 which also covers the adequacy of resources, qualifications and competency of the staff and independence of the internal auditor. - Reviewed the Internal Auditor's evaluation of internal controls. - Reviewed sample CAPEX transactions to help ensure process integrity and promote continuous improvement. - Confirmed that the internal audit function is executed effectively and internal auditors have conducted their responsibilities objectively and in an unbiased manner.

- c. The **Board Risk and Reputation Management Committee** represents the Board in discharging its responsibility relating to the risk and reputation management related matters for the Group. In 2024, the Board Risk and Reputation Committee updated its charter to continually identify, monitor, and manage the Group's top risks.

Key Areas of Focus in 2024	
Governance	- Continued alignment of the top-down approach through the key portfolio risks to strategic risk identification, where risks are identified at the 1AP Management Committee level, and the bottom-up approach of risks identified from the AboitizPower business and corporate service units. - Operationalized setting the risk appetite and risk tolerance (key risk indicators) for key portfolio risks through consultation with the Management Committee and Board Committee members. - Reviewed and endorsed for Board approval the proposed amendments to the Board Risk and Reputation Committee Charter to reflect necessary changes to the committee's composition and to align with the amended Board Protocol.
Risk Planning	- Regularized the "Risk in Focus" segment in the agenda to discuss strategically relevant key portfolio risks with inputs from the subject matter and industry experts. - Regularized Learning Sessions segment in the agenda to reinforce board learning of key and foundational risk management concepts and practices. - Invited a resource speaker to provide the Committee information on the latest currency risks from global key markets, and its possible effects and risks to AboitizPower from an outside perspective. - Reviewed and discussed AboitizPower Group's Mid-Year and Year-End Top Risks report where project risks and country concentration risks, respectively, took the top spot.
Risk Finance	- Shared best practices and key strategic initiatives with the other SBUs of the Aboitiz Group which were instrumental to the achievement of the annual insurance cost of AboitizPower. - Incorporated AboitizPower's own insurance captive to retain underwriting profit and drive risk management across the entire Group.
Reputation	- Discussed results of AboitizPower's Reputation ID Score and PR Value for the year 2024 including the key activities that led to the changes of both figures.

- d. The **Board Related Party Transactions Committee** represents the Board in discharging its responsibility to ensure that related party transactions are taken on an arms' length basis and within market rates, with sufficient documentation, and coursed through all appropriate levels of approval necessary.

Key Areas of Focus in 2024	
Governance	- Reviewed and endorsed for Board approval the proposed amendments to the Board RPT Committee Charter to align with the amended Board Protocols on the deadlines for submission of materials.
RPT Policy and Committee Charter	- Conducted the annual review of AboitizPower's RPT Policies to further strengthen the process of reviewing, reporting, and (if necessary) approving RPTs, particularly those falling below the SEC-defined materiality threshold.
Completion of RPT Certification	- Monitored the compliance of AboitizPower with the reportorial requirements of the BIR.
Fairness of RPTs	- Continued to ensure that RPTs are taken on an arm's-length basis and within market rates, with sufficient documentation, and coursed through the appropriate levels of approval.

- e. The **Executive Committee** assists the Board in overseeing the Company's day-to-day operations of the Company. The Committee ensures agility in the management of the Company and in strategic decision-making, as well as compliance with the Company's governance policies, during the intervening period between Board meetings. Due to the monthly Board meetings during 2024, no meetings of the Executive Committee were held.
- f. The **Board Information Security and Cybersecurity Committee** assists the Board in providing strategic direction and ensuring the establishment of a system of governance (processes, policies, controls, and management) for the Company and its strategic business units on matters relating to information security and cybersecurity. In 2024, the AboitizPower Cyber Committee was composed of two non-executive directors and one independent director who also served as the chairman of the committee.

Key Areas of Focus in 2024	
Governance	- Reviewed and endorsed for Board approval the proposed amendments to the Board CIS Committee Charter to align with the amended Board Protocols.
Organizational	- Completed AboitizPower's Cyber and Information Security Organization based on the approved functional structure.
Cybersecurity Strategy	- Released the revised OT minimum security standard aimed at establishing OT relevant baseline security controls. - Established foundational cybersecurity governance policies, guidelines and procedures. - Intensified security awareness activities through the use of digital platforms and systems. - Established channels to better communicate and improve collaboration on cybersecurity-related matters. - Engaged in an innovative and proactive way of discovering and resolving weaknesses/vulnerabilities in the digital environment. - Conducted comprehensive OT-specific tabletop exercises aimed at increasing the AboitizPower Business Units' preparedness to manage or handle OT cybersecurity incidents. - Engaged external parties to conduct OT security assessment to identify vulnerabilities, risks and areas of improvement, assess cybersecurity posture and ensure compliance against internal policies and industry standards. - Engaged a consolidated IT & OT Managed Detection & Response (MDR) service including incident Response Retainership.
Cybersecurity Risks	- Adopted the globally recognized MITRE Attack framework for ICS to systematically identify and quantify potential vulnerabilities in our OT environments, improving our threat detection and incident response capabilities, and overall OT risk management.

For a more detailed discussion on the AboitizPower Board and Board Committees matters, please refer to the 2024 Consolidated Annual and Sustainability Report, the 2024 IACGR, and the Governance page of the AboitizPower website, which will be available at www.aboitzpower.com on May 30, 2025.

GOVERNANCE PRACTICES

Compliance with Governance Policies

AboitizPower has a Revised Manual and a Code of Ethics and Business Conduct (“Code of Ethics”) to guide the attainment of its corporate goals and the implementation of its strategies. The Revised Manual is generally aligned to the principles and recommendations laid down by the SEC under the Corporate Governance Code for Publicly-Listed Companies to further strengthen the Company’s corporate governance practices. The Board regularly reviews the Revised Manual to ensure that the same remains relevant and responsive to the needs of the organization. Any amendments to the Revised Manual are promptly submitted to the SEC for confirmation and approval.

The Revised Manual is supported by various company policies that are regularly reviewed and issued by the Board including the Code of Ethics. AboitizPower ensures that its Code of Ethics is cascaded to new team members as part of their onboarding processes. Team members are also required to review the Code of Ethics and to sign an affirmation that they have read and understood the same. In order to support this annual exercise, an e-learning module on the Group’s Code of Ethics was developed and is rolled out every year. As part of the Group’s commitments in the Code of Ethics, all team members are expected to act professionally, fairly, and with integrity in all of their business dealings, and to comply with all applicable laws and regulations, including those against bribery and corruption.

The Chief Compliance Officer, together with the Human Resources Department, regularly monitors and evaluates compliance by the Board, management, and employees with the Revised Manual, the Code of Ethics, other company policies, and existing laws and regulations. The Chief Compliance Officer also ensures the implementation of AboitizPower’s policy against conflicts of interests and the misuse of confidential and proprietary information throughout the organization.

The Chief Compliance Officer regularly reports the Company’s compliance status with existing laws and regulations, as well as the Board’s, management’s and employees’ compliance with internal governance policies to the Board ESCG Committee.

In addition, the Company has a Whistleblowing Policy to support the implementation of the Revised Manual and the Code of Ethics. Through this policy, allegations of violations of the Revised Manual, the Code of Ethics, or of other illegal conduct can be reported through an independent whistleblowing portal. Matters reported through the whistleblowing platform are discussed by the Board ESCG Committee and, if necessary, escalated to the entire Board.

There are no major deviations from the Revised Manual as of the date of this report. There were no corruption-related incidents reported in 2024.

For a full discussion on the Company’s corporate governance initiatives, please refer to the 2024 Consolidated Annual and Sustainability Report, the 2024 IACGR, and the Governance page of the AboitizPower website which will be available at www.aboitzpower.com on or before May 30, 2025.

Disclosure and Transparency

Pursuant to its commitment to transparency and accountability, AboitizPower’s website, www.aboitzpower.com has its own dedicated corporate governance webpage which serves as a resource center and library for its stakeholders. AboitizPower also publishes a consolidated Annual and Sustainability Report and IACGR on its website at www.aboitzpower.com.

SUSTAINABILITY AND ENVIRONMENT, SOCIAL, AND GOVERNANCE (ESG) PRACTICES

The Aboitiz Group’s adherence to sustainable business practices and social responsibility are key to its success story for the past 100 years. Today, AboitizPower’s ESG thrust addresses balancing business growth with sustainability initiatives. It does so by accounting for the impact of its activities on people, planet, and prosperity, and with a view of its long-term implications. In replicating this success for future generations, AboitizPower intends to strengthen its ESG standards and practices by reinforcing its purpose of “Transforming Energy for a Better World” and taking

advantage of emerging technologies and innovations as the Aboitiz Group undertakes its “Great Transformation” into the Philippines’ first *techglomerate*.

Indices and Ratings

AboitizPower’s efforts “to drive change for a better world by advancing business and communities” continue to be recognized by various independent ESG assessors. S&P Global accorded the Company a score of 50 in its 2024 Corporate Sustainability Assessment (CSA), a one-point increase versus the previous year. The Company is positioned at the 75th percentile among its global peers in the Electric Utilities industry, showing strong performance in the areas of Labor Practices, Protection and Information Security/Cybersecurity & System Availability, Privacy Protection, and marked improvements in the areas of Market Opportunities, Materiality and overall Environmental Dimension.

In the Sustainalytics ESG Risk Ratings, the Company remains in the medium risk category at 27.3. According to the report, despite the Company’s high exposure to various ESG risks, its strong management kept its risk rating at a medium level, especially in Environmental Management, Health and Safety Management Systems, and improvements in the performance of Carbon Intensity.

Following the FTSE4Good Index Series Quarterly Review in September 2023, AboitizPower was delisted from the FTSE4Good Index Series as the Company was ineligible from the FTSE All-World Index. Despite this, FTSE Russell continues to assess the Company annually and gave an ESG score of 3.4 in 2024, 0.4 points higher than the previous year. The increase in score was due to improvement In Risk Management and Pollution & Resources.

For the third year in a row, the Company was awarded a Golden Arrow Award in September 2024, which marks its compliance with corporate governance standards and favorable standing with international best practices. The Company received a 3-arrow recognition garnering a score of 107.11 out of a possible 130 in the 2023 ASEAN Corporate Governance Scorecard (ACGS) assessment for publicly listed companies.

Focus Areas

AboitizPower’s Sustainability focus on “people, planet, and prosperity” is inspired by its core values of integrity, teamwork, innovation, responsibility, and service excellence. It promotes inclusive growth by integrating its stakeholders - communities, customers, team members, and shareholders – into its sustainable enterprise of creating long-term equitable value. Balanced with a vital social component and healthy environmental practices, prosperity is critical to building a sustainable business for future generations.

To support DOE’s goal of having a 35% share of renewables in the country’s energy mix by 2030, and 50% by 2050, AboitizPower aims to grow its portfolio of generation assets with renewables and select baseload builds. The Company seeks to increase its renewables group’s (collectively called Cleanergy) significantly by 2030 from indigenous energy sources - solar, hydro, geothermal, and wind. With its diversified fleet of Cleanergy assets, AboitizPower will contribute to addressing the energy trilemma of energy security, energy equity, and environmental sustainability in the country. AboitizPower strives to provide a reliable and ample power supply at reasonable and competitive prices while considering social development and environmental stewardship.

As part of the Aboitiz Group’s initiative to become the Philippines’ first *techglomerate* by 2025, AboitizPower utilizes technology, including data science and artificial intelligence, to improve production, services, and processes. This transition will also involve empowering team members by embedding a robust entrepreneurial mindset and spirit as they are exposed to the opportunities of a more modernized, inclusive, and technology-driven organization.

The Company has progressed in the following focus areas: team member engagement and development, corporate social responsibility (CSR), disaster resilience, carbon emissions reduction, resource efficiency, renewable energy, waste management, financial growth, and financial returns. Other focus areas on its ESG reports include Occupational Health and Safety (OHS), diversity and inclusion, corporate governance, biodiversity and conservation, risk management, and ISO certification.

AboitizPower conducts a report in compliance with the sustainability reporting initiatives of its parent company, AEV. Currently, AboitizPower is compliant with AEV’s sustainability reporting initiatives. Its report has been prepared

following the GRI Standards: Core Option and its key performance indicators are aligned with the United Nations Sustainable Development Goals (SDGs).

United Nations Sustainable Development Goals

The Aboitiz Group acknowledges the interconnectedness of the United Nations' (UN) 17 SDGs, recognizing it as a shared blueprint for peace and prosperity for people and the planet. The UN SDGs guide the organization's efforts towards poverty reduction, education, climate change, responsible consumption, disaster preparedness, technological innovation, and institutional partnership. In 2020, the Aboitiz Group became a member of the United Nations Global Compact (UNGC), and is currently a member of the Board of Trustees of UNGC's Global Compact Network Philippines (GCNP).

AboitizPower has made significant contributions to UN SDG 7 or Affordable and Clean Energy, through its offering and aggressive expansion of Cleanenergy and selective building of baseload capacities. As of the end of 2024, the Company has a total net sellable capacity of 1,486 MW of renewable energy. It intends to continue providing accessible, affordable, and environmentally sustainable energy that accommodates the country's growth aspirations.

AboitizPower is submitting its Sustainability Report through the consolidated report that its parent company, AEV, publishes annually. AEV began publishing its Sustainability Report in 2009.

Sustainable Investments

Supporting the Philippine government's ambition for the nation's energy mix, AboitizPower has indicated its goal to grow its RE capacity with projects in solar, wind, geothermal, hydro, and battery energy storage systems in the coming years.

In January 2024, the 24-MW Magat BESS operated by SN Aboitiz Power-Magat, a joint venture of Scatec and AboitizPower, commenced commercial operations in the country's reserve market. The Magat BESS, which utilizes liquid-cooled lithium-ion batteries, is co-located with SN AboitizPower-Magat's hydroelectric power plant in Ramon, Isabela.

In March 2024, the Company through its Subsidiary, TNGP, entered into an Investment Agreement with MGen and acquired a 40% equity interest in CGHI. On January 27, 2025, AboitizPower was informed that TNGP's co-investment with MGen and SMGP in SPPC, EERI, and IPIEC has been completed. The transaction involved: a.) CGHI's acquisition of a 67% equity interest in SPPC, EERI and IPIEC, and b.) CGHI and SMGP joint acquisition of approximately 100% of Linseed Field Corporation, which operates the LNG Terminal in Batangas City.

ARI, the Company's renewable energy arm, announced in May 2024 the full dispatch of the 159-megawatt peak (MWp) Laoag Solar Power Plant in Aguilar, Pangasinan, to provide additional capacity to the grid.

Moreover, ARI energized the 45-MWp Armenia Solar Project in Tarlac in late November, marking its first solar power plant in Central Luzon. The Company also activated the 173 MWp Calatrava Solar Project in Negros Occidental, making it the fifth energized solar facility of the Company and the largest capacity thus far in its growing solar generation portfolio.

Corporate Social Responsibility

In fulfilling the triple bottom line framework of "people, planet, and prosperity", AboitizPower and its Business Units realize their aspirations to "advance business and communities" through the Aboitiz Group's social development arm, Aboitiz Foundation, Inc. (Aboitiz Foundation). As a partner in nation building, AboitizPower extends educational scholarships, cooperative assistance programs, environmental campaigns, and CSR activities to its partner communities. Keeping with its framework and aspirations, the Company, via Aboitiz Foundation and its Business Units' direct funds, invested a total of ₱235 mn in CSR projects and initiatives to support its partner communities in 2024. Broken down, this consisted of ₱50.1 mn for future leaders' programs (e.g. educational scholarship), ₱78.2 mn for enterprise or livelihood programs, ₱12.4 mn for climate action, ₱71.5 mn for disaster resilience, and ₱23.1 mn for other initiatives.

AboitizPower continues to assist its partner communities by complying with Energy Regulations No. 1-94 (ER 1-94) Program. The aforementioned program is a policy under the DOE Act of 1992 and the EPIRA, which stipulates that host communities will get a share of one centavo for every kilowatt-hour (₱0.01/kWh) energy sold by power plants operating in its area. Host beneficiaries can use the funds generated for the electrification projects, development, and livelihood programs, reforestation, watershed management, health, and environmental enhancement initiatives. AboitizPower generated approximately ₱78 mn worth of ER 1-94 funds in 2024 to benefit about 150 host beneficiaries across the country.

Beyond Compliance

a. A-Park Program

The A-Park Program is the Aboitiz Group's partnership with the Ramon Aboitiz Foundation Inc., Philippine Business for Social Progress, and the carbon sink program of TSI and TVI as part of the Enhanced National Greening Program of the DENR. As the most prominent tree-growing initiative, it has resulted in the planting of as much as 12 mn trees, with about 300,000 trees planted by team member volunteers all over the archipelago in 2021. Of the 12 mn trees, AboitizPower contributed 5 mn from its tree-planting initiatives. Between 2016 to 2024, the Company has planted more than 2.6 mn trees in 6,225 hectares.

b. Aboitiz Cleanergy Park

The Aboitiz Cleanergy Park, located in Davao City, serves as a sanctuary and safe nesting ground for the critically endangered Hawksbill sea turtles (*Eretmochelys imbricata*), as well as to more than 100 species of endemic and migratory birds, and marine species. The eight-hectare park actively promotes decarbonization in an urban area via habitat conservation and biodiversity management, showcasing a mangrove reforestation site, nursery, and botanical garden for the propagation of 29 native tree species. Since 2014, the park has already released more than 11,508 hatchlings to the sea, planted 27,003 mangroves, and rescued 31 *pawikans*. It has been designated by the DENR as the Pawikan Rescue Center of Davao City.

c. Cleanergy Center and Energy Education Resource Center

Located at the Makiling-Banahaw Geothermal Complex of APRI, the Cleanergy Center is an educational facility that serves to uphold the Aboitiz Group's advocacy to renewable energy education - the first of its kind in the country. Launched in August 2013, the Center has audiovisual presentations, interactive displays, and a tour of a working geothermal power plant. It has since accommodated close to 65,531 local and foreign visitors.

Meanwhile, the Energy Education Center is a public facility at TSI's Davao baseload power plant that teaches electric power generation via interactive scale models and displays of the Philippine energy sector and various advanced technologies, as well as an overview of the power plant's 300 MW operations. Since its inauguration by TSI and the Aboitiz Foundation in May 2016, it has welcomed about 5,290 visitors.

d. Building Resilient Infrastructure and Communities through Kaibigans (B.R.I.C.K) Hub

The Building Resilient Infrastructure and Communities through Kaibigans (B.R.I.C.K) Hub is a project that produces eco-bricks incorporating ash by-products from AboitizPower's power generation plant and community plastic wastes to the Company's community partners in Barangay Binugao and Inawayan in Davao and Toledo City, Cebu. The ash and plastics are upcycled into high-value pavers and bricks that are nine times stronger than a typical hollow block brick. Aside from providing livelihood opportunities, it also promotes solid waste management, supports resilient infrastructure, and reduces the Company's collective environmental footprint. The project collaborates AboitizPower Business Units, TSI and TVI, with Green Antz Builders, Inc., United Kaibigan Multipurpose Cooperative (UKC), and Income Credit Cooperative (ICC). In 2024, the TVI Hub produced 14,000 bricks, utilizing 90,500 kgs. of fly ash from the power plant and 8,000 kgs. of plastics from the community.

e. #BetterTogether Talks

Launched in 2021, the #BetterTogether series was created to improve its team members' knowledge and appreciation of Sustainability and different ESG topics and issues that impact the Company and its stakeholders. External subject matter experts are invited as speakers to enrich the discussion on the various sustainability concerns, and a few team member experts also join the panel discussions. In 2024, the learning discussions focused on ESG trends and dynamics, land restoration, occupational health and safety, and the International Financial Reporting Standards (IFRS).

f. Diversity, Equity, Inclusion and Belongingness (DEIB)

AboitizPower's diversity and inclusion campaign has focused on communicating merit primacy above gender, sexual orientation, age, religion, nationality, or ethnic background. In 2023, the Company advances its advocacy in this area by releasing a DEIB Policy that recognizes its importance in the workplace and that the Company will ensure all of its employees are valued, protected, and celebrated. AboitizPower also partnered with organizations such as Philippine Financial & Inter-Industry Pride ("PFIP") and the Philippine Business Coalition for Women Empowerment ("PBCWE") to learn and improve practices for DEIB. In February 2024, the Company supported LGBTQ+ college leaders through the PFIP's 'Rainbow Youth Academy,' where the Company funded school fees, book, and digital tools for the student's education. The Company affirmed its support for diversity and inclusivity in the workplace by participating in the Pride March Festival at the Quezon Memorial Circle for the second year.

f. Sitio Electrification Program

The Philippine government's Sitio Electrification Program aims to electrify all barangays in the country. AboitizPower and its Subsidiaries have assisted the government with this program. In 2024, Visayan Electric delivered electricity to Barangay Bairan, a hilltop community located in the remote area of Naga City, Cebu. While in Davao City, Davao Light electrified Barangay Lumiad, a far-flung area. By supporting the government, the Company connects more isolated areas to the power grid and contributes to the country's economic development and poverty reduction.

g. Other Initiatives

As part of its efforts to reduce carbon emissions and improve climate change resilience, AboitizPower and its Subsidiaries took part in many other initiatives. These include tree planting, watershed projects, adoption of protected areas, such as rivers and *esteros*, coastal and river clean-ups, and Philippine Eagle Adoption.

PART V – EXHIBITS AND SCHEDULES

Item 14. Exhibits and Reports on SEC Form 17-C

- (a) Exhibits. None
(b) Reports on SEC Form 17-C

Reports filed by AboitizPower on SEC Form 17-C from April 2024 to March 2025 are as follows:

Date Reported	Disclosure Details
April 22, 2024	Results of the 2024 Annual Stockholders' Meeting
April 25, 2024	Results of the 2024 Organizational Meeting
April 25, 2024	First Quarter 2024 Financial and Operating Results
May 16, 2024	Acquisition of Additional 15% Equity in SPI
June 25, 2024	Retirement of Director/President and Chief Executive Officer, Mr. Emmanuel V. Rubio, and Appointment of Mr. Danel C. Aboitiz as his Replacement
July 5, 2024	Clarification to the July 5, 2024 PhilSTAR.com News Article entitled: "AboitizPower switches on venture studio for energy startups"
July 9, 2024	Amended Notice of Analysts' Briefing for the Second Quarter/First Half 2024 Financial and Operating Results
July 23, 2024	Second Quarter/First Half 2024 Financial and Operating Results
July 23, 2024	Changes in Officers: Appointment of Corporate and Assistant Corporate Secretaries
August 2, 2024	Clarification to the August 2, 2024 BusinessWorld (Online Edition) News Article entitled: "MGen eyes LNG deal financial close by September"
August 27, 2024	Matters Approved by the AboitizPower Board in its Regular Meeting dated August 27, 2024
October 10, 2024	Amended Notice of Analysts' Briefing for the Third Quarter 2024 Financial and Operating Results
October 14, 2024	Clarification to the October 12, 2024 Daily Tribune (Online Edition) Article entitled: "AboitizPower readies NORDECO takeover"
October 24, 2024	Third Quarter 2024 Financial and Operating Results
November 26, 2024	Matters Approved by the AboitizPower Board in its Regular Meeting dated November 26, 2024, including the Change in Officer (Treasurer)
December 5, 2024	Clarification to the December 5, 2024 Inquirer.net (Online Edition) Article entitled: "Aboitiz Group upbeat on '24 goals, raises stake in energy sector"
December 16, 2024	Clarification to the December 13, 2024 Philippine Star Article entitled: "AboitizPower activates Negros Occidental solar farm"
December 20, 2024	Clarification to the December 18, 2024 Manila Bulletin Article entitled: "Interconnection of gas pipelines for sharing of LNG imports proposed"
December 23, 2024	PCC's Approval of the Joint Acquisition of Power Facilities and LNG Terminal by MGen, TNGP, and SMGP
December 23, 2024	Full Payment of Fines Imposed by the DOE on AboitizPower's Subsidiaries, Hedcor, LHC, and Hedcor Sabangan
January 13, 2025	Transfer of Mainstream's Shares in CEDI to ARI
January 27, 2025	Matters Approved by the AboitizPower Board in its Regular Meeting dated January 27, 2025, including the Change in the Chairman of the Board Audit Committee
January 27, 2025	Completion of Co-Investment of TNGP with MGen and SMGP in SPPC, EERI, and IPIEC.
February 13, 2025	Mothballing of Two of TMO's Bunker C-Fired Diesel Power Plants
February 17, 2025	Press Release: "SNAP Secures Funding for Battery Energy Storage Projects"
February 19, 2025	Disclosure of the Final List of Nominees Qualified to be Members of AboitizPower's Board of Directors for 2025-2026
February 20, 2025	Decommissioning of TPVI's 44.640 MW Naga OFPP and 0.440 MW BSDGU
February 25, 2025	Change in Officer: Chief Audit Executive
February 25, 2025	Schedule of 2025 Earnings Briefing
February 25, 2025	Matters Approved by the AboitizPower Board of Directors during its February 25, 2025 Regular Board Meeting
March 6, 2025	Declaration of Cash Dividends
March 6, 2025	Matters Approved by the AboitizPower Board of Directors during its March 6, 2025 Special Board Meeting

Date Reported	Disclosure Details
March 6, 2025	Notice and Agenda of the 2025 Annual Stockholders' Meeting
March 6, 2025	Full Year 2024 Financial and Operating Results
March 24, 2025	Clarification to the March 21, 2025 Malaya (Online Edition) Article entitled: "Aboitiz Power sets 2025 capex at P78B"
March 25, 2025	Amendment to AboitizPower's By-Laws
March 26, 2025	Resignation of Mr. Edwin R. Bautista as a Director

(c) Sustainability Report

The 2024 Aboitiz Group Annual Report and Sustainability Report (the "2024 Consolidated Annual Report") is submitted together with the Company's SEC Form 17-A (2024 Annual Report) and is also available for download at Aboitiz's website at latest Annual Report page in the Investor Relations tab in: <https://abotiz.com/corporate-governance/abotiz-integrated-report>

SIGNATURES

Pursuant to the requirements of Section 17 of the Code and Section 177 of the Revised Corporation Code, AboitizPower has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Taguig on April 03, 2025.

Annex C. Reporting Template

We are pleased to present the 2024 Annual Integrated Report of our parent holding company, Aboitiz Equity Ventures, Inc. (AEV). The Report provides information on financial, operational, governance, social, and environmental performance for AEV's business subsidiaries, including Aboitiz Power Corporation (AboitizPower), represented as 'Power' in the report.

The Integrated Report contains data covering a full year—from January 1 to December 31, 2024—and focuses on AEV's strategic business units: Power, Banking and Financial Services, Food, Infrastructure, Land, and Data Science and Artificial Intelligence (DSAI). We gathered reports on their performance in the following focus areas: team member engagement and development, corporate social responsibility, customer focus, disaster resilience, carbon emissions reduction, resource efficiency, renewable energy, waste management, and financial growth and returns.

The results of AboitizPower's operations are discussed on pages 62-69 of the 2024 AEV Annual Integrated Report.

Monetary values in the Report are presented in Philippine Pesos (PHP), which is AEV's Reporting Standards and Guidance GRI Standards functional currency. All information is disclosed to uphold the principles of ethics and transparency and to communicate vital information to our stakeholders.

This report complies with the Securities and Exchange Commission Memorandum Circular No. 4 Series of 2020: "Sustainability Reporting Guidelines for Publicly Listed Companies."

Kindly refer to the 2024 AEV Annual Integrated Report: Techglomerate Builders, which is available for download at <https://aboitiz.com/corporate-governance/aboitiz-integrated-report>, and the Aboitiz Sustainability Microsite: <https://sustainability.aboitiz.com/report/>.

Other key sustainability performance data of AboitizPower can also be found at <https://aboitizpower.com/esg-sustainability>.

NOTE: The page numbers indicated as references are based on the actual page of the disclosure document's PDF file.

Contextual Information

Company Details	
Name of Organization	Aboitiz Power Corporation
Location of Headquarters	NAC Tower, 32nd Street, Bonifacio Global City, Taguig City, 1643 Philippines
Location of Operations	The locations of operations of the AboitizPower Group's businesses are found on pages 48-49 of the 2024 AEV Annual Integrated Report
Report Boundary: Legal entities (e.g. subsidiaries) included in this report*	The reporting scope is found in the About the Report section on pages 8-9 of the 2024 Annual Integrated Report.
Business Model, including Primary Activities, Brands, Products, and Services	Kindly refer to pages 12-13 of the 2025 AEV Annual Integrated Report.
Reporting Period	January 1, 2024 to December 31, 2024
Highest Ranking Person responsible for this report	Danel C. Aboitiz President and Chief Executive Officer

Materiality Process

Explain how you applied the materiality principle (or the materiality process) in identifying your material topics. ¹
The materiality assessment process is discussed on page 9 of the 2024 AEV Annual Integrated Report (About the Report). Materiality, as defined by the GRI reporting framework, includes topics and disclosures that reflect the Group's significant economic, environmental, and social impacts, or those that would substantially influence the assessments and decisions of our stakeholders. Our process involved an internal analysis of the importance of a broad list of sustainability issues related to our core businesses of power, banking, and financial services, food, infrastructure, land, DSAI, and our corporate foundation. At the parent company level, we integrated the common material issues that are within the medium-term horizon of our reporting parameters. We also used discussions from stakeholder dialogues and company-wide feedback channels to inform the selection of these material issues, which were

¹ See [GRI 102-46](#) (2016) for more guidance.

discussed and approved by the Aboitiz Group Management Committee as part of the focus areas of our Aboitiz Sustainability Synergy.

Our process of determining material topics and a list of material topics is reported using GRI 3-1 and 3-2 and can be found on pages 137-149 of the 2024 AEV Annual Integrated Report.

We used our stakeholder dialogues and company-wide feedback channels to inform the selection of these material issues, which were discussed and approved by the Aboitiz Group Management Committee as part of the focus areas of our Aboitiz Sustainability Framework.

Supporting references are found on Section "Dialogue and Value Creation For Stakeholder" of the Aboitiz Sustainability Microsite at <https://sustainability.aboitiz.com/sustainability-at-aboitiz/social/>

Similarly, AboitizPower also conducted its own Materiality Assessment in 2023 to identify the material ESG topics and issues that could impact the overall business (operationally, financially, or reputationally), or the Company's impact on its stakeholders. A third-party consultant was commissioned to conduct the exercise, including interviews with internal and external stakeholders. As a result, the Company has identified 21 material topics important to the organization and its stakeholders. Among the top priority topics – categorized as critical for the Company given their high importance to stakeholders and high potential impact on the business – are Sustainable Growth, Energy Security and Equity, Greenhouse Gas (GHG) Emissions & Climate Strategy, and Product and Service Stewardship. The Company will continue to monitor and manage all these material topics in 2024 and work on gaps necessary to mitigate possible risks and maximize business opportunities. This can be found in sections of "Materiality Assessment" and "List of Material Topics" at <https://aboitizpower.com/esg-sustainability>.

ECONOMIC

Economic Performance

Direct Economic Value Generated and Distributed

AboitizPower's financial performance is summarized on pages 36-37 for Financial Highlights and discussed on pages 40-43 for CFO Message of the 2024 AEV Annual Integrated Report. Economic and Governance practices of AboitizPower are also available on the company website at <https://abotizpower.com/sustainability/governance/>.

For our full financial data, refer to pages 2-3, 119, and section on the "Notes to consolidated financial statements" found on pages 214-318 of the 2024 20-IS Definitive Information Statement Report: <https://abotizpower.com/uploads/media/ap2024-definitive-information-statement.pdf>.

Disclosure	Amount	Units
Direct economic value generated (revenue)	197.49	PHP billions
Direct economic value distributed:		
a. Operating costs	156.29	PHP billions
b. Employee wages and benefits	7.34	PHP billions
c. Payments to suppliers, other operating costs	Not itemized, included in operating costs	
d. Dividends given to stockholders		
i. Cash dividend per share	2.35	PHP
ii. Total declared cash dividend	16.94	PHP billions
and interest payments to loan providers	no data	
e. Taxes given to the government	8.21	PHP billions
f. Investments to the community (e.g. donations, CSR)	235.36	PHP millions

Supply Chain Management

Our disclosures relevant to Supply Chain Management are on pages 152-153, and 245 of the 2024 AEV Annual Integrated Report.

AboitizPower ensures that it partners with suppliers that will not only be able to deliver their products or services accordingly but also give importance to sustainability and implement sustainable business practices. The company has a Supplier Code of Conduct which aims to align our company values with our suppliers and to strengthen our supplier's standard of doing business with the company. This also ensures that all of its suppliers will uphold and share the same values and sustainability principles when doing business with the Company, and adhere to our compliance, ethical, social, labor, environmental, and quality standards and requirements.

Do you consider the following sustainability topics when accrediting suppliers?

Topic	Y/N	If Yes, cite the reference in the supplier policy

ABOITIZ POWER CORPORATION

STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The management of **Aboitiz Power Corporation** is responsible for the preparation and fair presentation of the parent financial statements including the schedules attached therein, for the years ended **December 31, 2024, 2023 and 2022**, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders
Aboitiz Power Corporation
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines 1634

Report on the Audit of the Parent Company Financial Statements

Opinion

We have audited the parent company financial statements of Aboitiz Power Corporation (the Company), which comprise the parent company balance sheets as at December 31, 2024 and 2023, and the parent company statements of income, parent company statements of comprehensive income, parent company statements of changes in equity and parent company statements of cash flows for each of the three years in the period ended December 31, 2024, and notes to the parent company financial statements, including material accounting policy information.

In our opinion, the accompanying parent company financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024 and 2023, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2024 in accordance with Philippine Financial Reporting Standards (PFRSs) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Parent Company Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the parent company financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Parent Company Financial Statements

Management is responsible for the preparation and fair presentation of the parent company financial statements in accordance with PFRSs Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Parent Company Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the parent company financial statements, including the disclosures, and whether the parent company financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on the Supplementary Information Required Under Revenue Regulations 15-2010

Our audits were conducted for the purpose of forming an opinion on the parent company financial statements taken as a whole. The supplementary information required under Revenue Regulations 15-2010 in Note 22 to the parent company financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such information is the responsibility of the management of the Company. The information has been subjected to the auditing procedures applied in our audit of the parent company financial statements. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

The engagement partner on the audit resulting in this independent auditor's report is Jhoanna Feliza C. Go.

ABOITIZ POWER CORPORATION

NOTES TO PARENT COMPANY FINANCIAL STATEMENTS

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation and power distribution in the Aboitiz Group.

As of December 31, 2024, Aboitiz Equity Ventures, Inc. (AEV; also a publicly-listed entity incorporated in the Philippines) and JERA Asia Private Limited own the Company by 52.97% and 27.57%, respectively. The Company's ultimate parent is ACO.

The Company's registered office address is 32nd Street, Bonifacio Global City, 1635 Taguig City, NCR, Fourth District Philippines.

The parent company financial statements were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 6, 2025.

2. Basis of Preparation, Statement of Compliance and Material Accounting Policy Information

Basis of Financial Statement Preparation

The parent company financial statements have been prepared on a historical cost basis, except for derivative financial instruments which are measured at fair value. The parent company financial statements are presented in Philippine peso which is the Company's functional currency.

Statement of Compliance

The parent company financial statements are prepared in compliance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

New Standards, Interpretations and Amendments

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of new standards effective in 2024. The Company has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

The adoption of these new standards did not have an impact on the parent company financial statements of the Company.

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*

The amendments clarify:

- That only covenants with which an entity must comply on or before reporting date will affect a liability's classification as current or non-current.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

The amendments specify how a seller-lessee measures the lease liability arising in a sale and leaseback transaction in a way that it does not recognize any amount of the gain or loss that relates to the right of use retained.

- Amendments to PAS 7 and PFRS 7, *Disclosures: Supplier Finance Arrangements*

The amendments specify disclosure requirements to enhance the current requirements, which are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

Standards Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. The Company does not expect that the future adoption of the said pronouncements will have a significant impact on its parent company financial statements. The Company intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2025

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply. The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

On December 15, 2021, the Financial and Sustainability Reporting Standards Council (FSRSC) amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the IASB.

On February 14, 2025, the FSRSC approved the amendment to PFRS 17, *Insurance Contracts* that further defers the date of initial application by an additional two (2) years, to annual periods beginning on or after January 1, 2027. This will provide more time for the insurance industry to fully prepare and assess the impact of adopting the said standard.

On the same date, the FSRSC also adopted the amendments to PFRS 9 and PFRS 7, *Contracts Referencing Nature-dependent Electricity* that clarify the application of 'own-use' requirements for in-scope contracts that reference nature-dependent electricity and expose an entity to variability in an underlying amount of electricity. With respect to hedge accounting requirements, the amendments now allow an entity to designate a contract referencing nature-dependent electricity as the hedging instrument in a hedge of forecast electricity transactions. An entity shall apply the foregoing amendments for annual reporting periods beginning on or after January 1, 2026, with earlier application permitted.

- Amendments to PAS 21, *Lack of exchangeability*

The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

The amendments are effective for annual reporting periods beginning on or after January 1, 2025. Earlier adoption is permitted and that fact must be disclosed. When applying the amendments, an entity cannot restate comparative information.

Effective beginning on or after January 1, 2026

- Amendments to PFRS 9 and PFRS 7, *Classification and Measurement of Financial Instruments*

The amendments clarify that a financial liability is derecognized on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. They also introduce an accounting policy option to derecognize financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met.

The amendments also clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features. Furthermore, the amendments clarify the treatment of non-recourse assets and contractually linked instruments.

- Annual Improvements to PFRS Accounting Standards—Volume 11

The amendments are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversight or conflicts between the requirements in the Accounting Standards. The following is the summary of the Standards involved and their related amendments.

- Amendments to PFRS 1, *Hedge Accounting by a First-time Adopter*

The amendments included in paragraphs B5 and B6 of PFRS 1 cross references to the qualifying criteria for hedge accounting in paragraph 6.4.1(a), (b) and (c) of PFRS 9. These are intended to address potential confusion arising from an inconsistency between the wording in PFRS 1 and the requirements for hedge accounting in PFRS 9.

- Amendments to PFRS 7, *Gain or Loss on Derecognition*

The amendments updated the language of paragraph B38 of PFRS 7 on unobservable inputs and included a cross reference to paragraphs 72 and 73 of PFRS 13.

- Amendments to PFRS 9

- Lessee Derecognition of Lease Liabilities

The amendments to paragraph 2.1 of PFRS 9 clarified that when a lessee has determined that a lease liability has been extinguished in accordance with PFRS 9, the lessee is required to apply paragraph 3.3.3 and recognize any resulting gain or loss in profit or loss.

- Transaction Price

The amendments to paragraph 5.1.3 of PFRS 9 replaced the reference to 'transaction price as defined by PFRS 15 *Revenue from Contracts with Customers*' with 'the amount determined by applying PFRS 15'. The term 'transaction price' in relation to PFRS 15 was potentially confusing and so it has been removed. The term was also deleted from Appendix A of PFRS 9.

- Amendments to PFRS 10, *Determination of a 'De Facto Agent'*
The amendments to paragraph B74 of PFRS 10 clarified that the relationship described in B74 is just one example of various relationships that might exist between the investor and other parties acting as de facto agents of the investor.
- Amendments to PAS 7, *Cost Method*
The amendments to paragraph 37 of PAS 7 replaced the term 'cost method' with 'at cost', following the prior deletion of the definition of 'cost method'.

Effective beginning on or after January 1, 2027

- PFRS 18, *Presentation and Disclosure in Financial Statements*

The standard replaces PAS 1 Presentation of Financial Statements and responds to investors' demand for better information about companies' financial performance. The new requirements include:

- Required totals, subtotals and new categories in the parent company statement of profit or loss
- Disclosure of management-defined performance measures
- Guidance on aggregation and disaggregation

- PFRS 19, *Subsidiaries without Public Accountability*

The standard allows eligible entities to elect to apply PFRS 19's reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other PFRS Accounting Standards. The application of the standard is optional for eligible entities.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture. On January 13, 2016, the Financial and Sustainability Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the IASB completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Material Accounting Policy Information

Current versus Noncurrent Classification

The Company presents assets and liabilities in the parent company balance sheet based on current/noncurrent classification. An asset as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after reporting period

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period or
- There is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as noncurrent.

Deferred income tax assets and liabilities are classified as non-current assets and liabilities.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the parent company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the parent company financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Foreign Currency Translation

The Company's financial statements are presented in Philippine Peso, which is the Company's functional currency. Transactions in foreign currencies are recorded using the exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are restated using the rate of exchange at balance sheet date. Exchange gains and losses arising from foreign currency transactions and translations of foreign currency denominated monetary assets and liabilities are credited to or charged against current operations. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions

Cash and Cash Equivalents

Cash and cash equivalents in the parent company balance sheet consist of cash on hand and with banks, and short-term, highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value. They are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

For the purpose of the parent company statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Financial Instruments - Classification and Measurement

Classification of financial assets

Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Company's business model for managing the financial assets. The Company classifies its financial assets into the following measurement categories:

- financial assets measured at amortized cost
- financial assets measured at fair value through profit or loss (FVTPL)
- financial assets measured at fair value through other comprehensive income (FVOCI), where cumulative gains or losses previously recognized are reclassified to profit or loss
- financial assets measured at FVOCI, where cumulative gains or losses previously recognized are not reclassified to profit or loss

Contractual cash flows characteristics

If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Company assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Company determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e, interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to a contractual cash flows that are solely payments of principal and interest on the principal amount outstanding.

Business model

The Company's business model is determined at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Company's business model does not depend on management's intentions for an individual instrument.

The Company's business model refers to how it manages its financial assets in order to generate cash flows. The Company's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. Relevant factors considered by the Company in determining the business model for a group of financial assets include how the performance of the business model and the financial assets held within that business model are evaluated and reported to the Company's key management personnel, the risks that affect the performance of the business model (and the financial assets held within that business model) and how these risks are managed and how managers of the business are compensated.

Financial assets at amortized cost

A financial asset is measured at amortized cost if (i) it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the effective interest method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest method. The amortization is included in 'Interest income' in the parent company statement of income and is calculated by applying the effective interest method to the gross carrying amount of the financial asset, except for (i) purchased or originated credit-impaired financial assets and (ii) financial assets that have subsequently become credit-impaired, where, in both cases, the effective interest method is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in 'Provision for credit and impairment losses' in the parent company statement of income.

The Company's financial assets at amortized cost as of December 31, 2024 and 2023 consist of cash in banks, cash equivalents and trade and other receivables (see Note 17). The Company assessed that the contractual cash flows of these financial assets are SPPI and are expected to be held to collect all contractual cash flows until their maturity. As a result, the Company concluded these financial assets are to be measured at amortized cost.

Classification of financial liabilities

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities are measured subsequently at amortized cost, except for the following:

- financial liabilities measured at FVTPL;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Company retains continuing involvement;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or
- if a Company of financial liabilities or financial assets and liabilities is managed and its performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

Where a financial liability is designated at fair value through profit or loss, the movement in fair value attributable to changes in the Company's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Company's financial liabilities measured at amortized cost as of December 31, 2024 and 2023 which comprise of trade and other payables, long-term debts, lease liabilities and advances from related party (see Note 17).

Reclassifications of financial instruments

The Company reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Company and any previously recognized gains, losses or interest shall not be restated. The Company does not reclassify its financial liabilities.

The Company does not reclassify its financial assets when:

- A financial asset that was previously a designated and effective hedging instrument in a cash flow hedge or net investment hedge no longer qualifies as such;
- A financial asset becomes a designated and effective hedging instrument in a cash flow hedge or net investment hedge; and
- There is a change in measurement on credit exposures measured at fair value through profit or loss.

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVTPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the parent company statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Company assesses whether embedded derivatives are required to be separated from host contracts when the Company first becomes party to the contract. An embedded derivative is separated from the host financial or non-financial contract and accounted for as a separate derivative if all of the following conditions are met:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL. The Company uses derivative financial instruments, such as foreign currency forward and interest rate swaps (IRS) to hedge its foreign currency risks and interest rate risk, respectively.

For the purpose of hedge accounting, the Company's hedge are classified as cash flow hedges. Hedges are classified as cash flow hedge when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

The Company's hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognized in the cash flow hedge reserve, while any ineffective portion is recognized immediately in the parent company statement of income. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Company uses foreign currency forward contracts as hedges of its exposure to foreign currency risk in forecast transactions and IRS contracts to manage its floating interest rate exposure on its loans. The ineffective portion relating to these contracts are recognized in other operating income or expenses as realized gain or loss on derivative instruments.

The Company designated all of the foreign currency forward and IRS as hedging instrument. The amounts accumulated in other comprehensive income are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognized in other comprehensive income for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in other comprehensive income is reclassified to profit or loss as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive must remain in accumulated other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated other comprehensive must be accounted for depending on the nature of the underlying transaction as described above.

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a Company of similar financial assets) is derecognized when, and only when:

- the rights to receive cash flows from the asset expires;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay those cash flows to one or more entities, the Company treats the transaction as a transfer of a financial asset if the Company:

- has no obligation to pay amounts to the eventual recipients unless it collects equivalent amounts from the original asset;
- is prohibited by the terms of the transfer contract from selling or pledging the original asset other than as security to the eventual recipients for the obligation to pay them cash flows; and
- has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In transactions where the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and it retains control over the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. The extent of the Company's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset. When the Company's continuing involvement takes the form of guaranteeing the transferred asset, the extent of the Company's continuing involvement is the lower of (i) the amount of the asset and (ii) the maximum amount of the consideration received that the Company could be required to repay ('the guarantee amount'). When the Company's continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the extent of the Company's continuing involvement is the amount of the transferred asset that the Company may repurchase. However, in the case of a written put option on an asset that is measured at fair value, the extent of the Company's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price. When the Company's continuing involvement takes the form of a cash-settled option or similar provision on the transferred asset, the extent of the Company's continuing involvement is measured in the same way as that which results from non-cash settled options.

Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Company recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows discounted at the original effective interest method (or credit-adjusted effective interest method for purchased or originated credit-impaired financial assets) and recognizes a modification gain or loss in the parent company statement of income.

When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a 'new' financial asset. Accordingly, the date of the modification shall be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset.

Financial liabilities

A financial liability (or a part of a financial liability) is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability or a part of it are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability, and the difference in the respective carrying amounts is recognized in the parent company statement of income.

Impairment of Financial Assets

The Company recognizes ECL for the following financial assets that are not measured at FVTPL:

- debt instruments that are measured at amortized cost and FVOCI;
- loan commitments; and
- financial guarantee contracts.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the balance sheet date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

Stage 1: 12-month ECL

For credit exposures where there have not been significant increases in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of lifetime ECLs that represent the ECLs that result from default events that are possible within the 12-months after the balance sheet date are recognized.

Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there have been significant increases in credit risk since initial recognition on an individual or collective basis but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

A financial asset is considered to have low credit risk if:

- the financial instrument has a low risk of default
- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Company considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade', or when the exposure is less than 30 days past due.

Determining the stage for impairment

At each balance sheet date, the Company assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the balance sheet date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade receivables'. The Company has established a provision matrix for customer segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the parent company balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements whereby the related assets and liabilities are presented gross in the parent company balance sheet.

Classification of Financial Instruments between Liability and Equity

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Company does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as income or expense. Distributions to holders of financial instruments classified as equity are charged directly to equity net of any related income tax benefits.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

Investments in Subsidiaries and Associates

A subsidiary is an entity over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

An associate is an entity in which the Company has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decision of the investee, but is not control or joint control over those policies.

Investments in subsidiaries and associates are carried at cost, less impairment in value, in the parent company financial statements.

The Company recognizes income from the investments only to the extent that the Company receives distributions or establishes a right to receive distributions from accumulated profits of the subsidiaries and associates arising after the date of acquisition. Distributions received in excess of such profits are regarded as a recovery of investment and are recognized as a reduction of the cost of the investment.

Property and Equipment

Property and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value, if any. The initial cost of property and equipment comprises its purchase price, including import duties, if any, nonrefundable taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Such cost includes the cost of replacing parts of such property and equipment when that cost is incurred if the recognition criteria are met. Repairs and maintenance costs are recognized in the parent company statement of income as incurred.

Depreciation is computed using the straight-line method over the useful lives of the assets as follows:

Category	Number of years
Transportation equipment	5
Office equipment	3
Communication equipment	3
Leasehold improvements	10

Leasehold improvements are amortized over the shorter of the lease terms and the lives of the improvements.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the parent company statement of income in the year the asset is derecognized.

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable.

The assets' residual values, useful lives and depreciation method are reviewed, and adjusted if appropriate, at each financial year-end to ensure that the periods, residual values and method of depreciation are consistent with the expected pattern of economic benefit from the items of property and equipment.

When each major inspection is performed, its cost is recognized in the carrying amount of the property and equipment as a replacement if the recognition criteria are satisfied.

Fully depreciated assets are retained in the accounts until these are no longer in use. When assets are retired or otherwise disposed of, both the cost and related accumulated depreciation and amortization and any allowance for impairment losses, if any, are removed from the accounts, and any resulting gain or loss is credited or charged to current operations.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the parent company statement of income in the year in which the expenditure is incurred.

Computer software license

Computer software license is initially recognized at cost. Following initial recognition, the computer software license cost is carried at cost less accumulated amortization and any accumulated impairment in value, if any.

The computer software license is amortized on a straight-line basis over its estimated useful economic life of three to five years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization commences when the computer software license is available for use. The amortization period and the amortization method for the license are reviewed at each financial year end. Changes in the estimated useful life is accounted for by changing the amortization period or method, as appropriate, and treating them as changes in accounting estimates. The amortization expense is recognized in the parent company statement of income in the expense category consistent with the function of the computer software license.

Project Development Costs

Project development costs include power plant projects in the development phase which meet the “identifiability” requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to “Property and equipment” when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Research and Development Expenditure

The Company’s policy is to record research expenses in the parent company statement of income in the period when they are incurred.

Development costs are recognized as an intangible asset on the parent company balance sheet if the Company can identify them separately and show the technical viability of the asset, its intention and capacity to use or sell it, and how it will generate probable future economic benefits.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Impairment of Nonfinancial Assets

Prepayment and other current assets, project development costs, property and equipment, and other noncurrent assets

Except for the project development costs, which are tested for impairment annually, the Company assesses at each balance sheet date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating unit’s fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the

time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the parent company statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the parent company statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Investments and advances

The Company performs impairment review on its investments and advances whenever an impairment indicator exists. This requires an estimation of the value in use of the investees. Estimating the value in use requires the Company to make an estimate of the future cash flows of the investees and to use a suitable discount rate to calculate the present value of those future cash flows. Impairment losses, if any, are recognized in the parent company statement of income.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Additional paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against an equity reserve account.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the financial balance sheet date are dealt with as an event after the financial balance sheet date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company assesses its revenue arrangements against specific criteria in order to determine if it is acting as a principal or an agent.

The following specific recognition criteria must also be met before revenue is recognized:

Dividend income

Dividend income is recognized when the Company's right to receive payment is established.

Technical, management and service fees

Technical, management and service fees are recognized when the related services are rendered.

Interest income

Interest is recognized as it accrues taking into account the effective interest method.

Expenses

Expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Company's policy to classify right-of-use assets as part of property and equipment. The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets only pertain to office spaces and are depreciated on a straight-line basis over the shorter of the lease term of 16 years and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if

there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases

The Company applies the short-term lease recognition exemption to its short-term leases of conference rooms (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases and leases of low value assets are recognized as expense on a straight-line basis over the lease term.

Pension benefits

The Company has defined benefit pension plans which require contributions to be made to separately administered funds. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the parent company statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to parent company statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Company, nor can they be paid directly to the Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Company's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. To the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset shall be determined as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings. To the extent that funds are borrowed generally, the amount of borrowing costs eligible for capitalization shall be determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate shall be the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period shall not exceed the amount of borrowing costs incurred during that period.

Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Current income tax relating to items recognized directly in equity is recognized in the parent company statement of comprehensive income and not in the parent company statement of income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused net operating loss carryover (NOLCO) and excess minimum corporate income tax (MCIT), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused NOLCO and excess MCIT can be utilized in the future, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the account profit nor taxable profit or loss.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date.

Income tax relating to items recognized directly in other comprehensive income is also recognized in other comprehensive income and not in the parent company statement of income.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the parent company balance sheet. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the parent company balance sheet to the extent of the recoverable amount.

Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the parent company statement of income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingencies

Contingent liabilities are not recognized in the parent company financial statements but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized but are disclosed in the parent company financial statements when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Company's financial position at balance sheet date (adjusting events) are reflected in the parent company financial statements. Post year-end events that are not adjusting events are disclosed when material.

Earnings Per Common Share

Basic earnings per common share are computed by dividing net income for the year by the weighted average number of common shares issued and outstanding during the year, after retroactive adjustments for any stock dividends declared and stock rights exercised during the year.

Diluted earnings per share amounts are calculated by dividing the net income for the year by the weighted average number of common shares outstanding during the year plus the weighted average number of common shares that would be issued for outstanding common stock equivalents. The Company does not have dilutive common stock equivalents.

Operating Segments

For management purposes, the Company is the parent of the Aboitiz Power Corporation Group that is organized into two major operating segments (power generation and power distribution) according to the nature of the services provided, with each segment representing a significant business segment. The Group's identified operating segments are consistent with the segments reported to the BOD which is the Group's Chief Operating Decision Maker (CODM).

3. Significant Accounting Judgment, Estimates and Assumptions

The preparation of the Company's parent company financial statements requires management to make judgments, estimates and assumptions that affect the amounts reported in the Parent Company financial statements and related notes. The judgment, estimates and assumptions used in the parent company financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the Company's parent company financial statements. Actual results could differ from such estimates. Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The following items are those matters which the Company assess to have significant risk arising from judgement and estimation uncertainty:

Judgments

In the process of applying the Company's accounting policies, management has made judgments, apart from those involving estimations which have the most significant effect on the amounts recognized in the parent company financial statements.

Identifying performance obligations

The Company identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Company's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Company assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity's progress towards complete satisfaction of the performance obligation.

Revenue recognition

The Company recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Company determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Company does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Company will continue to recognize revenue from rendering of services over time, since customers simultaneously receives and consumes the benefits as the Company provides the services.

Identifying methods for measuring progress of revenue recognized over time

The Company determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Measurement of expected credit losses

ECLs are derived from unbiased and probability-weighted estimates of expected loss. Financial assets that are not credit-impaired at the balance sheet date are measured as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive.

The Company leverages existing risk management indicators (e.g., internal credit risk classification and restructuring triggers), credit risk rating changes and reasonable and supportable information which allows the Company to identify whether the credit risk of financial assets has significantly increased.

No allowance for expected credit losses was recognized in 2024 and 2023. Trade and other receivables amounted to ₱410.2 million and ₱495.9 million as of December 31, 2024 and 2023, respectively (see Note 5).

Inputs, assumptions and estimation techniques

The ECL is measured on either a 12-month or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), defined as follows:

- *PD*

The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining life of the obligation. PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures. The 12-months and lifetime PD represent the expected point-in-time probability of a default over the next 12 months and remaining lifetime of the financial instrument, respectively, based on conditions existing at the balance sheet date and future economic conditions that affect credit risk.

- *LGD*

Loss Given Default represents the Company's expectation of the extent of loss on a defaulted exposure, taking into account the mitigating effect of collateral, its expected value when realized and the time value of money. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD.

- *EAD*

EAD is based on the amounts the Company expects to be owed at the time of default, over the next 12 months or over the remaining lifetime.

The ECL is determined by projecting the PD, LGD, and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e., the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the balance sheet date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by counterparty.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies.

The assumptions underlying the ECL calculation such as how the maturity profile of the PDs change are monitored and reviewed on a quarterly basis.

Simplified approach for trade receivables

The Company uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the industrial segment, the historical default rates are adjusted. At every balance sheet date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

Incorporation of forward-looking information

The Company incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Company has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 5 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Company has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

Estimating allowance for impairment of losses on investment in and advances to subsidiaries and associates

Investments in and advances to subsidiaries and associates are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. No impairment loss recognized in 2024 and 2023. The aggregate carrying amount of the investments in and advances to subsidiaries and associates amounted to ₱109.44 billion and ₱107.97 billion as of December 31, 2024 and 2023, respectively (see Note 6).

Estimating impairment of project development costs

Impairment is determined for development costs by assessing the recoverable amount of each project. Where the recoverable amount of the project is less than the carrying amount, an impairment loss is recognized. When calculating recoverable amount, the future cash flow is discounted by a discount factor that takes into consideration risk free interest and the risk associated with the specific project.

The Company has written off project development costs amounting to ₱248.49 million, ₱185.81 million and ₱238.02 million in 2024, 2023 and 2022, respectively. The carrying amount of the Company's project development costs amounted to ₱403.01 million and ₱1.04 billion as of December 31, 2024 and 2023, respectively (see Note 9).

Estimating useful lives of property and equipment

The Company estimates the useful lives of property and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2024 and 2023, the net book values of property and equipment amounted to ₱1.11 billion and ₱358.44 million, respectively (see Note 7).

Assessing impairment of nonfinancial assets

The Company assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property and equipment, input VAT and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

Determining the recoverable amount of the assets, which require the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Company to make estimates and assumptions that can materially affect its financial statements. Future events could cause the Company to conclude that these assets are impaired. Any resulting impairment loss could have a material adverse impact on the financial condition and results of operations.

As of December 31, 2024, the carrying values of property and equipment, prepayment and other current assets and noncurrent assets amounted to ₱1.11 billion, nil, and ₱1.68 billion, respectively. As of December 31, 2023, the carrying values of property and equipment, prepayment and other current assets and noncurrent assets amounted to ₱358.44 million, ₱2.52 million, and ₱1.21 billion, respectively (see Notes 7 and 8).

Estimating the incremental borrowing rate

The Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure its lease liability. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates. As of December 31, 2024 and 2023, lease liability amounted to ₱925.4 million and ₱51.5 million, respectively (see Note 19).

Pension benefits

The cost of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension

increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each balance sheet date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 14.

Net benefit expense amounted to ₱126.5 million in 2024, ₱128.6 million in 2023 and ₱294.2 million in 2022. Net pension liability amounted to ₱216.7 million in 2024 and ₱398.2 million in 2023 (see Note 14).

Recognition of deferred income tax assets

The Company reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. Deferred income tax asset amounted to ₱247.4 million and ₱14.3 million as of December 31, 2024 and 2023, respectively (see Note 15).

No deferred income tax assets were recognized for deductible temporary difference and carryforward benefit from unused NOLCO and excess MCIT as disclosed in Note 15.

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsels handling the Company's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized in the Company's parent company financial statements for the years ended December 31, 2024 and 2023.

4. Cash and Cash Equivalents

	2024	2023
Cash on hand and in banks	₱21,442,276	₱366,645,624
Short-term deposits	9,957,274,704	1,824,370,000
	₱9,978,716,980	₱2,191,015,624

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Company and earn interest at the respective short-term deposits rates.

Interest income earned from cash in banks and short-term deposits amounted to ₱137.73 million, ₱121.5 million and ₱153.5 million in 2024, 2023 and 2022, respectively.

5. Trade and Other Receivables

	2024	2023
Trade receivables		
Related parties (Note 16)	₱159,362,664	₱18,296,142
Others	190,849,319	255,237,691
Dividends (Note 16)	2,099,702	194,734,442
Interest	54,805,606	10,911,581
Others	3,116,941	16,738,007
	₱410,234,232	₱495,917,863

Trade receivables are non-interest bearing and are generally on 30 days' term.

For terms and conditions relating to related party receivables, refer to Note 16.

6. Investments and Advances

The details of the Company's investments and advances follow:

	2024	2023
Investments in Subsidiaries		
Therma Power, Inc. (TPI)	₱30,116,058,873	₱30,116,058,873
Aboitiz Renewables, Inc. (ARI)	25,172,988,814	25,172,988,814
SPI Power Incorporated (SPI) (formerly STEAG State Power Inc.)	7,178,184,736	6,545,299,736

Investment in SPI

On September 15, 2022, STEAG GmbH entered into a Share Purchase Agreement with the Company for the purchase by the Company of an additional 35.4% stake in SPI. The total purchase price for the shares is US\$ 36.1 million (₱2.1 billion), plus locked box interest at a simple rate of 4% per annum (on the basis of a 365-day year) from January 1, 2021 to March 31, 2022.

In June 2023, all of the closing condition have been met allowing the Company to complete the acquisition of the 35.4% ownership interest in SPI from STEAG GmbH. As a result of the acquisition, SPI became a subsidiary of the Company at 69.4% ownership interest.

In May 2024, the Company purchased the remaining 15.6% interest of STEAG GmbH for US\$11.0 million (₱632.9 million), which resulted the Company to own 85% equity interest.

Investment in 1882EV

The Company made capital contributions to 1882EV amounting to ₱403.5 million and ₱75.0 million in 2024 and 2023, respectively.

Investment in PIPL

In 2024, the Company made capital contributions to PIPL amounting to ₱315.0 million.

Investment in APX2

In 2024, the Company made capital contributions to APX2 amounting to ₱131.0 million.

Investment in TEZ

In 2024, the Company made capital contributions to TEZ amounting to ₱25.0 million.

Investment in PPI

In 2024, the Company made capital contributions to PPI amounting to ₱1.0 million.

Investment in HLPC

In 2024, the Company made capital contributions to HLPC amounting to ₱0.2 million.

Investment in OLPC

In 2024, the Company made capital contributions to OLPC amounting to ₱0.2 million.

Investment in AAI

AAI redeemed shares attributable to the Company at 6,940 Redeemable Preferred Shares (RPS) at ₱1,000 per share for ₱6.9 million in 2024 and 2023, respectively.

Investment in Hedcor Bukidnon

Hedcor Bukidnon redeemed shares attributable to the Company at 1.9 billion RPS at ₱1 per share for ₱1.9 billion and 1.1 billion RPS at ₱1 per share for ₱1.1 billion in 2023 and 2022, respectively.

Investment in Hedcor Sabangan

Hedcor Sabangan redeemed shares attributable to the Company at 340.0 million RPS at ₱1 per share for ₱340.0 million and 1.2 billion RPS at ₱1 per share for ₱1.2 billion in 2023 and 2022, respectively.

Investment in HTI

HTI redeemed shares attributable to the Company at 95.0 million RPS at ₱1 per share for ₱95.0 million and 0.6 million RPS at ₱1 per share for ₱0.6 million in 2023 and 2022, respectively.

Investment in HI

In 2023, the Company sold 1.2 billion RPS of HI at ₱1 per share amounting to ₱1.2 billion to ARI.

Investment in PENEK

In 2023, the Company made capital contributions to PENEK amounting to ₱0.2 million.

Advances

These advances include advances to subsidiaries that will be applied against future subscriptions of the Company to the shares of stock of the subsidiaries.

In 2023, the Company received full settlement from TPI amounting to ₱5.2 billion.

In 2023, the Company granted APX2 interest-bearing advances amounting to ₱31.0 million. In 2024, the Company converted the advances to APX2 to equity in the form of redeemable preferred shares amounting to ₱31.0 million.

The Company's subsidiaries, all incorporated in the Philippines except for AP Int and PIPL which were incorporated in Singapore, and the corresponding percentage equity ownership are as follows:

Name of Company	Nature of Business	Percentage of Ownership	
		2024	2023
TPI	Holding company	100%	100%

Noncurrent portion		₱48,410,783,281	₱53,693,926,196

Retail Bonds - ₱10.0 billion

In March 2022, the Company issued ₱3.0 billion 5-year bond due 2027 and ₱7.0 billion 7-year bond due 2029 at an annual fixed rate equivalent to 5.31% and 5.74%, respectively.

Retail Bonds - ₱12.0 billion

In December 2021, the Company issued a total of ₱12.0 billion bonds, broken down into a ₱4.8 billion 4-year bond due 2025 at a fixed rate equivalent to 4% p.a. and a ₱7.2 billion 7-year bond due 2028 at a fixed rate equivalent to 5.03% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Long-term Loan - ₱6.0 billion

In July 2021, the Company availed ₱6.0 billion 7-year fixed-rate notes from the BDO Unibank, Inc. due 2028 at an annual fixed rate equivalent to 4%.

Retail Bonds - ₱8.0 billion

In March 2021, the Company issued another ₱8.0 billion 5-year bond due 2026 at an annual fixed rate equivalent to 3.82% as part of the first tranche of its ₱30.0 billion debt securities program. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱9.6 billion

In July 2020, the Company issued the fourth and last tranche of its ₱30.0 billion debt securities program, equivalent to ₱9.6 billion in July (the "Series E and F Bonds"). The Fixed Rate "Series E and F Bonds" has an interest rate of 3.125% and 3.935% per annum maturing in 2022 and 2025, respectively. The bonds have been rated PRS Aaa by PhilRatings.

In July 2022, the Company fully paid the 2-year bond availed in 2020 amounting to ₱9.00 billion.

Long-term Loan - ₱5.0 billion

In November 2019, the Company obtain a ₱5.0 billion 7-year long term loan from the BDO Unibank, Inc. at a fixed rate of 5.28% p.a.

In 2020, the Company amend the "Mode of Payment" for the Principal from bullet payment to partial payments equal to 1 percent (%) of total principal amount payable annually starting November 2020 and the remaining 94 percent (%) upon maturity.

On July 13, 2021, the Company reached a rate reduction agreement to amend the interest rates of the loan from fixed rate loan of 5.28% to the sum of a benchmark rate and a spread of 0.90%, divided by an applicable factor and 4.125% per annum, whichever is higher.

The Company is in compliance with the debt covenants as of December 31, 2024 and 2023.

Retail Bonds - ₱7.3 billion

In October 2019, the Company issued ₱7.3 billion 7-year bond due 2026 at a fixed rate of 5.28% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Retail Bonds - ₱10.2 billion

In October 2018, the Company issued a total of ₱10.2 billion bonds, broken down into a ₱7.7 billion 5.25-year bond due 2024 at a fixed rate equivalent to 7.51% p.a. and a ₱2.5 billion 10-year bond due 2028 at a fixed rate equivalent to 8.51% p.a. The bonds have been rated PRS Aaa by PhilRatings.

In October 2022, the Company prepaid the 5.25-year bond amounting to ₱7.7 billion. The recognized loss on extinguishment due to this prepayment amounted to ₱45.0 million. It was included as part of the "Interest expense and other financing costs" in the 2022 parent company statement of income.

Retail Bonds - ₱3.0 billion

In July 2017, the Company issued ₱3.0 billion 10-year bond due 2027 at an annual fixed rate of 5.34% p.a. The bonds have been rated PRS Aaa by PhilRatings.

Under the bond trust agreements, the Company shall not permit its debt-to-equity ratio to exceed 3:1 calculated based on the year-end debt and consolidated equity. The Company is in compliance with the debt covenants as of December 31, 2024 and 2023.

Total interest expense recognized amounted to ₱3.1 billion, ₱2.6 billion and ₱3.2 billion in 2024, 2023 and 2022, respectively (see Note 17).

12. Equity and Earnings per Common Share

a. Paid-in Capital

	2024	2023
Capital Stock:		
Authorized - ₱1 par value:		
Common shares - 16,000,000,000 shares		
Preferred shares - 1,000,000,000 shares		
Issued:		
Common shares - 7,358,604,307 shares	₱7,358,604,307	₱7,358,604,307
Additional Paid-in Capital	12,588,894,332	12,588,894,332
	₱19,947,498,639	₱19,947,498,639

On May 25, 2007, the Company listed with the Philippine Stocks Exchange its 7,187,664,000 common shares with a par value of ₱1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of ₱5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of ₱5.80 per share. The total proceeds from the issuance of new shares amounted to ₱10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to ₱412.4 million, which is charged against "Additional paid-in capital" in the parent company balance sheet.

As of December 31, 2024, 2023 and 2022, the Company has 582, 578 and 594 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred stock shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common stock.

There are no preferred shares issued and outstanding as of December 31, 2024 and 2023.

b. Retained Earnings

On November 22, 2023, the BOD also approved the reversal of ₱8.2 billion retained earnings appropriation set up in 2019 for the equity requirement of the 300MW Cebu Coal plant.

As of December 31, 2024 and 2023 total appropriated retained earnings amounted to ₱11.9 billion which was approved by the BOD for appropriation for project development and construction of power plants on March 7, 2019.

On March 4, 2022, the BOD approved the declaration of regular cash dividends of ₱1.45 per share (₱10.67 billion) will be paid to all stockholders of record as of March 18, 2022. The cash dividends are payable on March 30, 2022.

On March 3, 2023, the BOD approved the declaration of regular cash dividends of ₱1.87 per share (₱13.76 billion) will be paid to all stockholders of record as of March 17, 2023. The cash dividends are payable on March 30, 2023.

On March 5, 2024, the BOD approved the declaration of regular cash dividends of ₱2.30 per share (₱16.57 billion) will be paid to all stockholders of record as of March 19, 2024. The cash dividends are payable on March 26, 2024.

On March 6, 2025, the BOD approved the declaration of regular cash dividends of ₱2.35 per share (₱16.95 billion) will be paid to all stockholders of record as of March 21, 2025. The cash dividends are payable on March 28, 2025.

c. Earnings per Common Share

Earnings per common share amounts were computed as follows:

	2024	2023	2022
a. Net income	₱19,581,416,432	₱11,247,471,786	₱1,143,992,498
b. Weighted average number of common shares issued and outstanding	7,205,854,307	7,318,142,937	7,358,604,307
Earnings per common share (a/b)	₱2.72	₱1.54	₱0.16

d. Treasury Shares

The Company purchased a total of 152,750,000 shares of its own common shares for ₱4.89 billion in 2023. The acquisition is pursuant to the authority approved by the Company's BOD on August 29, 2023.

13. Personnel Costs

	2024	2023	2022
Salaries and wages	₱1,287,601,145	₱1,448,755,637	₱931,561,511
Employee benefits	337,137,428	764,949,845	439,191,058
Retirement benefit costs (Note 14)	126,503,833	128,597,805	294,239,227
	₱1,751,242,406	₱2,342,303,287	₱1,664,991,796

14. Retirement Costs

The Company has a funded, non-contributory, defined benefit pension plan (the "Plan") covering all regular and full-time employees and requiring contributions to be made to separately administered fund. This retirement benefit fund (the "Fund") is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also officers of AEV, is responsible for the investment of the Fund assets. Taking into account the Plan's objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the parent company statements of income and the funded status and amounts recognized in the parent company balance sheets for the plan.

Net benefit expense (recognized as part of personnel costs):

	2024	2023	2022
Retirement expense to be recognized in the parent company statements of income:			
Current service cost	₱102,131,951	₱94,583,235	₱293,292,092
Net interest cost	24,371,882	34,014,570	947,135
	₱126,503,833	₱128,597,805	₱294,239,227

Remeasurement effect to be recognized in other comprehensive income:

	2024	2023	2022
Actuarial gains (loss) due to:			
Experience adjustments	₱108,473,926	₱109,429,373	(₱200,594,117)
Changes in financial assumptions	(831,414)	(95,764,302)	88,519,794
Actual return excluding amount included in net interest cost	78,922,993	(5,666,193)	(8,163,363)
	₱186,565,505	₱7,998,878	(₱120,237,686)

Pension liability

	2024	2023
Present value of obligation	₱795,002,696	₱916,165,009
Fair value of plan assets	(578,264,031)	(517,931,644)
	₱216,738,665	₱398,233,365

Changes in the present value of the defined benefit obligation are as follows:

	2024	2023
At January 1	₱916,165,009	₱794,010,759
Net benefit expense:		
Current service cost	102,131,951	94,583,235
Interest cost	56,069,299	61,727,552
	158,201,250	156,310,787
Benefits paid	(127,238,230)	(16,370,997)
Employee transfers	(44,482,821)	(4,120,469)

(Forward)

	2024	2023
Remeasurements in other comprehensive income:		
Actuarial loss (gain) due to:		
Changes in financial assumptions	₱831,414	₱95,764,302
Experience adjustments	(108,473,926)	(109,429,373)
	(107,642,512)	(13,665,071)
At December 31	₱795,002,696	₱916,165,009

Changes in the fair value of plan assets are as follows:

	2024	2023
At January 1	₱517,931,644	₱360,704,138
Actual contributions	121,433,028	147,999,656
Interest income included in net interest cost	31,697,417	27,712,982
Benefits paid	(127,238,230)	(8,698,470)
Transfers	(44,482,821)	(4,120,469)
Actual return excluding amount included in net interest cost	78,922,993	(5,666,193)
At December 31	₱578,264,031	₱517,931,644

Changes in pension liability recognized in the parent company balance sheets are as follows:

	2024	2023
At January 1	₱398,233,365	₱433,306,621
Actual contributions	(121,433,028)	(147,999,656)
Actuarial loss recognized for the year	(186,565,505)	(7,998,878)
Benefits paid from Company's operating fund	—	(7,672,527)
Retirement expense for the year	126,503,833	128,597,805
At December 31	₱216,738,665	₱398,233,365

The fair value of plan assets by each class at the end of the reporting period are as follows:

	2024	2023
Assets:		
Financial assets at FVOCI	₱60,100,961	₱157,746,557
Equity instruments - financial institution:		
Financial assets at amortized cost	174,812,881	424,504,875
Holding	3,320	4,700
Power	52,739,610	52,739,610
Financial institution	20,558,716	9,353,640
Others	323,263,908	53,321,409
	631,479,396	697,670,791
Liability:		
Financial liability	(53,215,366)	(179,739,147)
Fair value of plan assets	₱578,264,030	₱517,931,644

The plan assets have diverse investments and do not have any concentration risk.

The Company's retirement benefit fund for its employees has investments in the equity of the Company. The carrying value of these investments as of December 31, 2024 and 2023 amounted to ₱55.8 million. The losses of Fund arising from such investments amounted to nil and ₱5.5 million in 2024 and 2023, respectively.

The principal assumptions used as of December 31, 2024 and 2023 in determining net pension liability for the Company's Plan is shown below:

	2024	2023
Discount rate	6.11%	6.12%
Salary increase rate	7.00%	7.00%

The sensitivity analysis below has been determined based on reasonable possible changes of each significant assumption on the defined benefit obligation as of December 31, 2024 and 2023, respectively, assuming all other assumptions were held constant:

	Increase (decrease) in basis points	Effect on defined benefit obligation	
		2024	2023
Discount rates	100	(P62,213,435)	(P58,048,346)
	(100)	71,408,526	66,657,808
Future salary increases	100	P74,291,561	P69,668,114
	(100)	(65,881,272)	(61,824,447)

The Company's defined benefit pension plan is funded by the Company.

The Company expected to contribute P81.8 million to the plan assets in 2025. The average duration years of the defined benefit obligation is 13 years as of December 31, 2024 and 2023.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Company also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Plan in the subsequent year.

15. Income Tax

Details of provision for income tax are as follows:

	2024	2023	2022
Current:			
Corporate income tax	P-	P9,818,440	P5,568,087
Final	23,766,505	21,861,238	18,071,393
	P23,766,505	P31,679,678	P23,639,480

No provision for current income tax was recognized in 2024. The provision for corporate income tax represents MCIT in 2023 and 2022.

Reconciliation between the statutory income tax rate and the Company's effective income tax rates follows:

	2024	2023	2022
At statutory rate of 25%	P4,901,295,734	P2,819,787,866	P291,907,995
Additions to (reductions in) income tax resulting from:			
Dividend income	(6,098,286,604)	(3,885,147,029)	(1,382,920,778)
(Forward)			

	2024	2023	2022
Movement on unrecognized deferred income tax asset on:			
NOLCO	₱1,125,312,836	₱938,219,233	₱986,108,819
Accrual of pension cost	31,625,958	32,149,451	73,559,807
Unamortized past service cost	(30,349,262)	(45,094,268)	(13,800,478)
MCIT	—	9,818,440	5,568,087
Nondeductible expenses:			
Write-off of project development cost	62,123,654	46,452,803	59,505,201
Interest expense	6,886,620	6,074,901	4,926,335
Others	35,824,164	117,931,547	5,344,773
Interest income already subjected to final tax at a lower rate	(10,666,595)	(8,513,266)	(6,560,281)
	₱23,766,505	₱31,679,678	₱23,639,480

The components of the Company's net deferred income tax asset (liability) are as follows:

	2024	2023
Deferred income tax assets on lease liabilities	₱231,351,654	₱12,870,171
Deferred income tax liability on ROU building	(221,154,349)	(14,282,534)
Deferred income tax asset on NOLCO	16,073,883	1,412,363
Deferred income tax liability on unrealized foreign exchange gains	(26,271,188)	—
	₱—	₱—

As of December 31, 2024, the Company has MCIT that can be claimed as deduction from regular income tax liability as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2021	2022-2024	₱8,573,595	₱—	₱8,573,595	₱—
2022	2023-2025	5,568,087	—	—	5,568,087
2023	2024-2026	9,818,440	—	—	9,818,440
		₱23,960,122	₱—	₱8,573,595	₱15,386,527

Bayanihan to Recover as One Act (Bayanihan 2)

On September 30, 2020, the BIR issued Revenue Regulations No. 25-2020 implementing Section 4 of Bayanihan 2 which states that the NOLCO incurred for taxable years 2020 and 2021 can be carried over as a deduction from gross income for the next five (5) consecutive taxable years immediately following the year of such loss.

As of December 31, 2024, the Company has NOLCO in 2024, 2023 and 2022, which are valid as deduction against the regular taxable income for the next three (3) consecutive taxable years, as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2022	2023-2025	₱3,884,025,155	₱—	₱—	₱3,884,025,155
2023	2024-2026	3,758,085,113	—	—	3,758,085,113
2024	2025-2027	4,559,897,426	—	—	4,559,897,426
		₱12,202,007,694	₱—	₱—	₱12,202,007,694

As of December 31, 2024, the Company has NOLCO in taxable years 2021 and 2020 which can be claimed as deduction against the regular taxable income for the next five (5) consecutive taxable years pursuant to the Bayanihan 2, as follows:

Period of Recognition	Availment Period	Amount	Applied	Expired	Balance
2020	2021-2025	₱3,130,564,280	₱—	₱—	₱3,130,564,280
2021	2022-2026	3,139,176,172	—	—	3,139,176,172
		₱6,269,740,452	₱—	₱—	₱6,269,740,452

No deferred income tax assets have been recognized as of December 31, 2024 and 2023 on the following temporary differences as it is not probable that sufficient taxable income will be available to allow the benefit of the net deferred income tax assets to be utilized:

	2024	2023
NOLCO	₱18,407,452,614	₱13,906,201,268
Pension Liability	216,738,665	398,233,365
Unamortized past service cost	248,377,748	248,341,767
MCIT	15,386,527	23,960,122

16. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The sales to and purchases from related parties are made on terms equivalent to those that prevail in arm's length transactions.

The Company, in its normal course of business, has transactions with its related parties, which principally consist of the following:

- The Company has management agreements with each of the following subsidiaries: CLPC, DLPC, and ARI for which it is entitled to management fees.
- The Company renders various services to related parties such as technical and legal assistance for various projects, trainings and other services, for which it bills technical and service fees.
- Interest-bearing advances from the Company availed by APX2 and Hijos. The Company also availed interest-bearing advances from ARI.
- The Company obtained standby letters of credit (SBLC) and DSRA letter of credit and is acting as surety and guarantor for the benefit of certain subsidiaries, associates and joint ventures in connection with certain loans and credit accommodations. As of December 31, 2024 and 2023, the Company provided SBLCs for AP Renewables, Inc. (APRI), Cebu Energy Development Corporation (CEDC), Luzon Hydro Corporation (LHC), SN Aboitiz Power-Benguet, Inc. (SNAP B), Therma South (TSI), Pagbilao Energy Corporation (PEC), Hedcor Inc. (HI), SPI, and TVI in the amount of ₱3.6 billion and ₱3.8 billion, respectively. The Company received guarantee fee from GNP Power Dingin Ltd. Co (GNPD) amounting to ₱107.3 million and ₱75.9 million in 2024 and 2023, respectively.

- e. AEV and ACO provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Company and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates to ensure competitive pricing. Service Level Agreements are in place to ensure quality of service. This arrangement enables the Company to maximize efficiencies and realize cost synergies.
- f. Cash deposits and money market placements with Union Bank of the Philippines (UBP) and CitySavings Bank (CSB), associates of AEV. At prevailing rates, these fixed-rate investments earned interest income amounting to ₱51.6 million and ₱47.0 million in 2024 and 2023, respectively. Outstanding balances amounted ₱205.6 million and ₱1.3 billion as of December 31, 2024, and 2023, respectively.
- g. Rentals paid at current market rates to AEV and Cebu Praedia Development Corporation (CPDC) for the use of meeting rooms, parking lots and properties by the Company's officers and employees.
- h. Aviation service fees paid to AAI for the use of aircraft during travel of the Company's officers and employees.
- i. HI renders technical services to the Company for the technical expertise of its highly qualified professionals on the Company's project management.
- j. Consultancy service fees paid to Aboitiz Data Innovation PTE. Ltd (ADI) for services relating to data innovation initiatives.
- k. TMI incurred shared services relating to corporate support for the Company.
- l. The Company engaged in NDF contracts with ARI which were mirrored from a separate contract with banks, with the intention of ultimately hedging ARI's exposure.
- m. The Company incurs expenses for the research and development of projects which are subsequently reimbursed by the related party.
- n. The Company sold 1.2 billion RPS of HI at ₱1 per share amounting to ₱1.2 billion to ARI.

The parent company balance sheets and parent company statements of income include the following accounts resulting from the above transactions with related parties:

17. Financial Risk Management Objectives and Policies

The Company's principal financial instruments comprise of cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise financing for the Company's operations. The Company has various other financial instruments such as trade and other receivables and trade and other payables which arise directly from its operations.

The Company also enters into derivative transactions, particularly foreign currency forwards, to economically hedge its foreign currency risk from foreign currency denominated liabilities (see Note 18).

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Company.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Company's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Company's risks in line with the policies and limits.

The main risks arising from the Company's financial instruments are credit risk involving possible exposure to counter party default on its cash and cash equivalents, and trade and other receivables; liquidity risk in terms of the proper matching of the type of financing required for specific investments; and foreign exchange risk in terms of foreign exchange fluctuations that may significantly affect its foreign currency denominated placements.

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company.

The Company's credit risk on cash in banks and cash equivalents and trade and other receivables pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these assets. With respect to cash in banks and cash equivalents, the risk is mitigated by the short-term and/or liquid nature of its short-term deposits mainly in bank deposits and placements, which are placed with financial institutions of high credit standing. With respect to trade and other receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Company's policy that all debtors who wish to trade on credit terms are subject to credit procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

The Company has no significant concentration risk to a counterparty or group of counterparties.

As of December 31, 2024 and 2023, The aging analyses presented per class, is as follows (amounts in thousands):

2024

	Total	Current	30 days	30 - 60 days	More than 60 days
Cash and cash equivalents*	₱9,977,151	₱9,977,151	₱—	₱—	₱—

Total	₱2,685,901	₱2,667,587	₱14,846	₱—	₱3,468

*Excluding cash on hand

Liquidity risk

Liquidity risk is the potential of not meeting obligations as they come due because of an inability to liquidate assets or obtain adequate funding. The Company maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay dividend declarations.

In managing its short-term fund requirements, the Company's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term borrowings. With regard to its long-term financing requirements, the Company's policy is that not more than 25% of long-term borrowings should mature in any 12-month period.

The financial assets that will be principally used to settle the financial liabilities presented in the following table are from cash and cash equivalents amounting to ₱10.0 billion and ₱2.2 billion as of December 31, 2024 and 2023, respectively, and trade and other receivables amounting to ₱410.2 million and ₱495.9 million as of December 31, 2024 and 2023, respectively. Cash and cash equivalents can be withdrawn anytime while trade and other receivables are expected to be collected/realized within one year.

The following tables summarize the maturity profile of the Company's financial liabilities based on contractual undiscounted payments as of December 31 (amounts in thousands):

2024

		Contractual undiscounted payments				
	Total Carrying Value	Total	On Demand	Less than 1 year	1 to 5 years	More than 5 years

Market Risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Company's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Foreign exchange risk

The foreign exchange risk of the Company pertains significantly to its foreign currency denominated obligations. To manage its foreign exchange risk, stabilize cash flows and improve investment and cash flow planning, the Group enters into foreign currency forward contracts aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on financial performance and cash flows.

Presented below are the Company's foreign currency denominated financial assets and liabilities as of December 31, 2024 and 2023, translated to Philippine Peso:

	2024		2023	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
<i>Financial asset:</i>				
Cash and cash equivalents	\$120,880,118	₱6,992,310,448	\$1,247,734	₱69,087,057

The exchange rate for December 31, 2024 and 2023 is ₱57.845:US\$1 and ₱55.370:US\$1, respectively. As a result of the translation of this foreign currency denominated liability, the Company reported net unrealized foreign exchange of ₱32.5 million gain and ₱17.2 million loss in 2024 and 2023, respectively.

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Company's income before income tax as of December 31, 2024 and 2023 (amounts in thousands).

	Increase (decrease) in US dollar	Effect on income before tax
2024		
US dollar-denominated accounts	5%	₱349,616
US dollar-denominated accounts	-5%	(349,616)
2023		
US dollar-denominated accounts	5%	₱3,454
US dollar-denominated accounts	-5%	(3,454)

There is no other impact on the Company's equity other than those already affecting the parent company statements of income.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flow of financial instrument will fluctuate because of the changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to its long-term debt with a floating interest rate and to its derivative asset.

The Company's policy is to manage its interest cost using effective hedging derivatives subject to BOD approval.

As of December 31, 2024, the Company has no long-term debt with floating interest rate.

The interest expense and other financing costs recognized according to sources are as follows:

	2024	2023	2022
Long-term debts (see Note 11)	₱3,069,105,055	₱2,647,103,266	₱3,167,986,832
Lease liabilities (see Note 19)	24,781,738	2,059,805	1,589,481
Loss on loan extinguishment	—	—	44,959,786
Other obligations	118,743,112	116,084,385	193,691,649
	₱3,212,629,905	₱2,765,247,456	₱3,408,227,748

Capital management

The primary objective of the Company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. The Company considers equity presented in the parent company balance sheets as its core capital.

The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. Its policy is to keep the gearing ratio at 70% or below. The Company determines net debt as the sum of interest-bearing short-term and long-term loans less cash and short-term deposits.

	2024	2023
Long-term debts (Note 11)	₱53,790,380,430	₱53,739,157,504
Cash and cash equivalents (Note 4)	(9,978,716,980)	(2,191,015,624)
Net debt (a)	43,811,663,450	51,548,141,880
Equity	61,115,894,365	58,017,986,745
Equity and net debt (b)	₱104,927,557,815	₱109,566,128,625
Gearing ratio (a/b)	41.75%	47.05%

Part of the Company's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the lenders to immediately call loans and borrowings. The Company is in compliance with the financial covenants attached to its long-term debts as of December 31, 2024 and 2023 (see Note 11).

No changes were made in the objectives, policies or processes during the years ended December 31, 2024, 2023 and 2022.

18. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

Set out below is a comparison by category of carrying amounts and fair values of the Company's financial instruments whose fair values are different from their carrying amounts (amounts in thousands).

	2024		2023	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial liabilities:				
Long-term debts	₱53,790,380	₱50,810,882	₱53,739,158	₱50,043,214
Lease liabilities	925,407	823,482	51,481	47,338
	₱54,715,787	₱51,634,364	₱53,790,639	₱50,090,552

The following method and assumption are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, trade and other payables and advances from related party

The carrying amounts of cash and cash equivalents, trade and other receivables, trade and other payables and advances from related party approximate fair values due to the relatively short-term maturity of these financial instruments.

Long-term debts

The fair value of long-term debt is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Discount rates used range from 7.42% to 7.63% in 2024 and 7.39% to 7.44% in 2023.

Lease liabilities

The fair values are computed using Level 3 of the fair value hierarchy and are based on the discounted value of expected future cash flows using the applicable credit-adjusted risk-free rates of 7.42% to 7.63% and 7.41% in 2024 and 2023, respectively.

Derivative Financial Instruments

The fair value of forward contracts is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date (Level 2), taking into account its remaining term to maturity. The fair value of the IRS and interest rate cap are determined by generally accepted valuation techniques with reference to observable market data such as interest rates.

Non-deliverable Forward

In 2022, the Company entered into non-deliverable forward (NDF) contracts with counterparty banks to manage foreign currency risks associated with ARI's US Dollar commitments for the completion of its renewable projects. These contracts were mirrored in a separate NDF with ARI, with the intention of ultimately hedging ARI's exposure. In 2024, these non-deliverable forward contracts matured and settled.

The NDF contracts resulted in both derivative assets and derivative liabilities of the same amount, with an offsetting effect on profit and loss. The notional amount of these contracts was \$218.2 million (₱13.34 billion).

To account for the fair value of the NDF contracts, the Company designated them as fair value hedges.

The outstanding notional amount and fair value of the NDF for each derivative asset and liability amounted to ₱4.9 billion and ₱481.6 million as of December 31, 2023.

Dollar-Hold

In 2024, certain USD-denominated cash and cash equivalents in various banks aggregating to \$64.4 million are designated as hedging instrument for the foreign currency risk of the \$64.4 million portion of \$712.3 million highly probable forecasted acquisition.

There is an economic relationship between the hedged item and the hedging instrument since the critical terms of the forecasted acquisition costs and the USD-denominated cash and cash equivalents (notional amount and currency denomination) are matched. The hedge ratio is 1:1 as the notional amount of the hedging instrument exactly matches the notional amount of the hedged portion of the USD-denominated forecasted acquisition costs.

A possible source of ineffectiveness could be the impact of the time value of money due to the timing of the highly probable forecasted acquisition. Nonetheless, since the expected acquisition is highly probable within the next twelve months, the impact of the time value of money might be considered insignificant.

Foreign currency forward contracts

In 2024, the Company entered into foreign currency forward contracts with counterparty banks to manage foreign currency risks associated with foreign currency-denominated infusion. The notional amount of the forward contract is \$330.0 million (P19.3 billion).

The following is the maturity analysis of the notional amount and the corresponding average forward rate:

As of December 31, 2024

	Maturity					Total
	Less than 3 months	3 to 6 months	6 to 12 months	1 to 2 years	More than 2 years	
Dollar hold - Derivative asset						
Notional amount	P64,452,413	P—	P—	P—	P—	P64,452,413
Average rate	55.610 - 57.642	—	—	—	—	
Forwards - Derivative liability						
Notional amount	330,000,000	—	—	—	—	330,000,000
Average forward rate	58.108 - 59.103	—	—	—	—	—

As of December 31, 2023

	Maturity					Total
	Less than 3 months	3 to 6 months	6 to 12 months	1 to 2 years	More than 2 years	
NDF - Derivative liability						
Notional amount	P—	P—	P4,903,795,100	P—	P—	P4,903,795,100
Average forward rate	—	—	61.26 - 61.67	—	—	
NDF - Derivative asset						
Notional amount	—	—	4,903,795,100	—	—	4,903,795,100
Average forward rate	—	—	61.26 - 61.67	—	—	

The impact of the hedged item and hedging instrument in the parent company balance sheets and in the parent company statements of income and parent company statements of comprehensive income is as follows:

As of December 31, 2024

	Carrying amount	Change in fair value	Total hedging gain (loss) recognized in other comprehensive income
Dollar Hold - Derivative asset	P64,366,949	P64,366,949	P64,366,949
Forwards - Derivative liability	(160,976,360)	(160,976,360)	(160,976,360)
	(P96,609,411)	(P96,609,411)	(P96,609,411)

As of December 31, 2023

	Carrying amount	Change in fair value	Total hedging loss recognized in other income (charges)
NDF - Derivative asset	P481,595,229	P481,595,229	P481,595,229
NDF - Derivative liability	(481,595,229)	(481,595,229)	(481,595,229)
	P—	P—	P—

The changes in the fair value of derivatives designated as cash flow hedges were deferred in equity under "Cash flow hedge reserve." The changes in the fair value of derivatives designated as fair value hedge is recognized in the parent company statement of income.

Fair Value Hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For the years ended December 31, 2024 and 2023, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements were made.

19. Lease Agreements

a. Operating Lease Agreement with Manta Equities, Inc. (MEI)

The Company entered into an operating lease agreement with MEI for its use of administrative office space and parking space for a period of ten (10) years from April 1, 2013 to May 31, 2023 and nine (9) years and three (3) months from and March 1, 2014 to May 31, 2023, respectively. Both lease contracts have an escalation rate of 5.0% per annum.

The Company entered additional operating lease agreement with MEI in 2020 for use of administrative office space and parking space for a period of three (3) years and five (5) months from January 1, 2020 to May 31, 2023. The lease contract has an escalation rate of 5.0% per annum.

In 2023, the Company renewed the lease with MEI for the use of administrative office and parking space for a period of three (3) years from June 1, 2023 to May 31, 2026. The lease contract has an escalation rate of 5.0% per annum.

b. Operating Lease Agreement with Ayala Land, Inc. (ALI)

The Company entered into an operating lease agreement with ALI for its use of administrative office space and parking space for a period of 16 years from August 1, 2024 to July 31, 2040. The lease contract has an escalation of 3.0% per annum.

The Company also has certain leases with lease terms of 12 months or less. The Company applies the 'short-term lease' recognition exemptions of these leases.

Set out below, are the carrying amounts of the Company's lease liabilities and the movements during the years ended December 31, 2024 and 2023:

	2024	2023
Balance at beginning of year	₱51,480,684	₱4,760,368
Additions	873,681,144	70,325,312
Interest expense	24,781,738	2,059,805
Payments	(24,536,953)	(25,664,801)
	925,406,613	51,480,684
Less current portion	19,883,034	23,938,768
Noncurrent portion	₱905,523,579	₱27,541,916

The Company also has certain leases of conference rooms with lease terms of 12 months or less. The Company applies the 'short-term lease' recognition exemption on these arrangements.

Set out below, are the amounts recognized in the parent company statements of income for the years ended December 31, 2024, 2023 and 2022:

	2024	2023	2022
Amortization expense of right-of-use assets	₱46,193,884	₱18,396,820	₱16,622,071
Interest expense on lease liabilities	24,781,738	2,059,805	1,589,481
Rent expense - short-term leases	7,406,002	3,704,750	1,442,303
	₱78,381,624	₱24,161,375	₱19,653,855

20. Note to Statements of Cash Flows

The following are the cash flow movements of the Company's financing liabilities:

	January 1, 2024	Net cash flows	Non-cash Changes					December 31, 2024
			Dividend declaration	Amortized deferred financing costs	Foreign exchange movement	Interest expense	Others	
Lease liability	₱51,480,684	(₱24,536,953)	₱—	₱—	₱—	₱24,781,738	₱873,681,144	₱925,406,613
Non-current interest-bearing loans and borrowings	53,739,157,504	(50,000,000)	—	101,222,926	—	—	—	53,790,380,430
Interest on loans and borrowings	304,657,609	(2,896,294,541)	—	—	—	3,069,105,055	17,520,187	494,988,310

Total liabilities from financing activities	₱54,056,598,839	(₱16,555,986,296)	₱13,760,590,054	₱96,042,933	₱—	₱2,649,163,071	₱90,366,763	₱54,096,775,364

21. Events After the Financial Reporting Date

On February 25, 2025, the BOD approved, among others, the filing of a registration statement under the shelf registration program of the SEC for peso-denominated fixed-rate retail bonds in the aggregate principal amount of ₱100 billion (the "Retail Bonds"), which will, from time to time and subject to market conditions, be issued in tranches. The BOD also approved the issuance of the first tranche of the Retail Bonds, consisting of up to ₱20,000,000,000, with oversubscription option of up to ₱10,000,000,000.

In March 2024, the Company, through its subsidiary, Therma NatGas Power, Inc. ("TNGP"), entered into an Investment Agreement with Meralco PowerGen Corporation ("MGen") to acquire 60% and 40% interests, respectively, in Chromite Gas Holdings, Inc. ("Chromite Gas"). Chromite Gas intends to acquire a 67% equity interest in each of the 1,278 MW Ilijan power plant, the 1,320 MW combined cycle power facility, currently under construction, and the LNG import and regasification terminal owned by Linseed Field Corporation ("LFC"). San Miguel Global Power Corporation will retain a 33% stake in these power plants and gain a corresponding interest in LFC.

On December 23, 2024, the transaction was approved by the Philippine Competition Commission. On January 28, 2025, after the satisfaction of the conditions precedent, the parties have completed the transaction.

22. Supplementary Information Required Under Revenue Regulations (RR) 15-2010

The Company also reported and/or paid the following types of taxes for the year:

VAT

The Company's sales are subject to output value added tax (VAT) while its purchases from other VAT-registered individuals or corporations are subject to input VAT. The VAT rate is 12%.

i. Net Receipts and Output VAT declared in the Company's VAT returns in 2024

	Net Sales/ Receipts	Output VAT
Taxable Sales:		
Sales of services	₱2,025,975,730	₱221,056,205

ii. Input VAT for 2024

Balance at January 1	₱—
Current year's domestic purchases/payments for:	
Goods other than for resale or manufacture	5,376,048
Capital goods subject to amortization	10,558,234
Capital goods not subject to amortization	—
Services lodged under the other accounts	168,201,539
	184,135,821
Claims for tax credit/refund and other adjustments	(184,135,821)
Balance at December 31	₱—

Other taxes and licenses

Taxes and licenses, local and national, include real estate taxes, licenses and permit fees for 2024:

Documentary stamp taxes (DST)	₱73,047,345
License and permit fees	17,855,040
Fringe benefit taxes	12,468,650
Deficiency taxes	8,230,709
Others	374,921
	<u>₱111,976,665</u>

Withholding taxes

Final withholding taxes	₱1,128,239,286
Withholding taxes on compensation and benefits	464,962,440
Expanded withholding taxes	108,821,995
Withholding VAT	17,271,395
	<u>₱1,719,295,116</u>

Tax Assessment and Cases

The Company has no pending tax cases outside of the administration of the BIR as of December 31, 2024.

ABOITIZ POWER CORPORATION

STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The management of **Aboitiz Power Corporation** is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached therein, for the years ended **December 31, 2024, 2023, and 2022** in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders
Aboitiz Power Corporation
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

Opinion

We have audited the consolidated financial statements of Aboitiz Power Corporation and its subsidiaries (the Group), which comprise the consolidated balance sheets as at December 31, 2024 and 2023, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2024, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2024 and 2023, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2024 in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Impairment Testing of Goodwill

Under PFRS Accounting Standards, the Group is required to annually test the amount of goodwill for impairment. As of December 31, 2024, the goodwill attributable to cash-generating unit (CGU) of GNPowder Mariveles Energy Center Ltd. Co. amounted to ₱45.69 billion or 9% of total consolidated assets, which is considered significant to the consolidated financial statements. In addition, management's assessment process requires significant judgment and is based on assumptions which are subject to estimation uncertainty, specifically discount and growth rates, revenue assumptions, and material price inflation.

The Group's disclosures about goodwill are included in Note 13 to the consolidated financial statements.

Audit Response

We involved our internal specialist in assessing the methodologies and assumptions used. We compared the key assumptions used, such as growth rate and revenue assumptions against the historical performance of the CGU, industry outlook and other relevant external data. We tested the parameters used in the determination of the discount rates against market data. We also reviewed the Group's disclosures about those assumptions to which the outcome of the impairment test is most sensitive; specifically, those that have the most significant effect on the determination of the recoverable amount of goodwill.

Revenue Recognition of Distribution Utilities

The distribution utilities' revenue from the sale of electricity amounting to ₱57.0 billion for the year ended December 31, 2024 accounts for 29% of the Group's consolidated revenues and is material to the Group. This matter is significant to the audit because the revenue recognized depends on the electric consumption captured, the rates applied across different customers, and the systems involved in the billing process. Electric consumption captured is based on the meter readings taken on various dates for the different types of customers (i.e., industrial, commercial, and residential customers) within the franchise areas of operations of the distribution utilities.

The Group's disclosures related to this matter are provided in Notes 3 and 21 to the consolidated financial statements.

Audit Response

We obtained an understanding and evaluated the design and tested the controls over the billing and revenue process which includes the capture and accumulation of meter data in the billing system and calculation of billed amounts, and uploading of billed amounts from the billing system to the financial reporting system. We performed a test calculation of the rates using the Energy Regulatory Commission-approved rates and formulae, then compared them with the rates used in billing statements.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material

misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Jhoanna Feliza C. Go.

ABOITIZ POWER CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in Thousands, Except Earnings per Share and Exchange Rate Data and When Otherwise Indicated)

1. Corporate Information

Aboitiz Power Corporation (the Company) was incorporated in the Philippines and registered with the Securities and Exchange Commission on February 13, 1998. The Company is a publicly-listed holding company of the entities engaged in power generation, retail electricity supply and power distribution in the Aboitiz Group. As of December 31, 2024, Aboitiz Equity Ventures, Inc. (AEV; also a publicly-listed entity incorporated in the Philippines) and JERA Asia Private Limited own the Company by 52.97% and 27.57%, respectively. The ultimate parent of the Company is Aboitiz & Company, Inc. (ACO).

The Company's registered office address is 32nd Street, Bonifacio Global City, Taguig City, Metro Manila.

The consolidated financial statements of the Group were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) of the Company on March 6, 2025.

2. Group Information

The consolidated financial statements comprise the financial statements of the Company, subsidiaries of the Company and a joint operation that is subject to joint control (collectively referred to as "the Group"; see Note 11). The following are the subsidiaries as of December 31 of each year:

	Nature of Business	Percentage of Ownership

In 2024, non-controlling interests include the return of contributions of other partners of GMEC amounting to ₱687.3 million. In 2022, non-controlling interests includes contribution of other partners of GMEC amounting to ₱625.3 million.

3. Summary of Material Accounting Policy Information

Basis of Preparation

The consolidated financial statements have been prepared on a historical cost basis, except for derivative financial instruments, financial assets at FVTPL and investment properties which are measured at fair value. The consolidated financial statements are presented in Philippine peso which is the Company's functional currency and all values are rounded to the nearest thousand except for earnings per share and exchange rates and as otherwise indicated.

The consolidated financial statements provide comparative information in respect of the previous periods.

Statement of Compliance

The consolidated financial statements are prepared in compliance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Company, its subsidiaries and a joint operation that is subject to joint control, as of December 31 of each year.

The financial statements of the subsidiaries and its joint operation are prepared for the same reporting year as the Company.

New Standards, Interpretations and Amendments

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of new standards effective in 2024. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

The adoption of these amended standards did not have an impact on the consolidated financial statements of the Group.

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*

The amendments clarify:

- That only covenants with which an entity must comply on or before reporting date will affect a liability's classification as current or non-current.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

The amendments specify how a seller-lessee measures the lease liability arising in a sale and leaseback transaction in a way that it does not recognize any amount of the gain or loss that relates to the right of use retained.

- Amendments to PAS 7 and PFRS 7, *Disclosures: Supplier Finance Arrangements*

The amendments specify disclosure requirements to enhance the current requirements, which are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

Standards Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. The Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2025

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, Insurance Contracts. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

On December 15, 2021, the FSRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the IASB.

On February 14, 2025, the FSRSC approved the amendment to PFRS 17 Insurance Contracts that further defers the date of initial application by an additional two (2) years, to annual periods beginning on or after January 1, 2027. This will provide more time for the insurance industry to fully prepare and assess the impact of adopting the said standard.

On the same date, the FSRSC also adopted the amendments to PFRS 9 and PFRS 7, Contracts Referencing Nature-dependent Electricity that clarify the application of 'own-use' requirements for in-scope contracts that reference nature-dependent electricity and expose an entity to variability in an underlying amount of electricity. With respect to hedge accounting requirements, the amendments now allow an entity to designate a contract referencing nature-dependent electricity as the hedging instrument in a hedge of forecast electricity transactions. An entity shall apply the foregoing amendments for annual reporting periods beginning on or after January 1, 2026, with earlier application permitted.

- Amendments to PAS 21, *Lack of exchangeability*

The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

The amendments are effective for annual reporting periods beginning on or after January 1, 2025. Earlier adoption is permitted and that fact must be disclosed. When applying the amendments, an entity cannot restate comparative information.

Effective beginning on or after January 1, 2026

- Amendments to PFRS 9 and PFRS 7, *Classification and Measurement of Financial Instruments*

The amendments clarify that a financial liability is derecognized on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. They also introduce an accounting policy option to derecognize financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met.

The amendments also clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features. Furthermore, the amendments clarify the treatment of non-recourse assets and contractually linked instruments.

- Annual Improvements to PFRS Accounting Standards—Volume 11

The amendments are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversight or conflicts between the requirements in the Accounting Standards. The following is the summary of the Standards involved and their related amendments.

- Amendments to PFRS 1, *Hedge Accounting by a First-time Adopter*

The amendments included in paragraphs B5 and B6 of PFRS 1 cross references to the qualifying criteria for hedge accounting in paragraph 6.4.1(a), (b) and (c) of PFRS 9. These are intended to address potential confusion arising from an inconsistency between the wording in PFRS 1 and the requirements for hedge accounting in PFRS 9.

- Amendments to PFRS 7, *Gain or Loss on Derecognition*

The amendments updated the language of paragraph B38 of PFRS 7 on unobservable inputs and included a cross reference to paragraphs 72 and 73 of PFRS 13.

- Amendments to PFRS 9

- Lessee Derecognition of Lease Liabilities

The amendments to paragraph 2.1 of PFRS 9 clarified that when a lessee has determined that a lease liability has been extinguished in accordance with PFRS 9, the lessee is required to apply paragraph 3.3.3 and recognize any resulting gain or loss in profit or loss.

- Transaction Price

The amendments to paragraph 5.1.3 of PFRS 9 replaced the reference to 'transaction price as defined by PFRS 15 Revenue from Contracts with Customers' with 'the amount determined by applying PFRS 15'. The term 'transaction price' in relation to PFRS 15 was potentially confusing and so it has been removed. The term was also deleted from Appendix A of PFRS 9.

- Amendments to PFRS 10, *Determination of a 'De Facto Agent'*

The amendments to paragraph B74 of PFRS 10 clarified that the relationship described in B74 is just one example of various relationships that might exist between the investor and other parties acting as de facto agents of the investor.

- Amendments to PAS 7, *Cost Method*

The amendments to paragraph 37 of PAS 7 replaced the term 'cost method' with 'at cost', following the prior deletion of the definition of 'cost method'.

Effective beginning on or after January 1, 2027

- PFRS 18, *Presentation and Disclosure in Financial Statements*

The standard replaces PAS 1 Presentation of Financial Statements and responds to investors' demand for better information about companies' financial performance. The new requirements include:

- Required totals, subtotals and new categories in the statement of profit or loss
- Disclosure of management-defined performance measures
- Guidance on aggregation and disaggregation

- *PFRS 19, Subsidiaries without Public Accountability*

The standard allows eligible entities to elect to apply PFRS 19's reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other PFRS Accounting Standards. The application of the standard is optional for eligible entities.

Deferred effectivity

- *Amendments to PFRS 10, Consolidated Financial Statements, and PAS 28, Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial and Sustainability Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the IASB completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Summary of Material Accounting Policy Information

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree pertaining to instruments that represent present ownership interests and entitle the holders to a proportionate share of the net assets in the event of liquidation either at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interest are measured at fair value unless another measurement basis is required by PFRSs Accounting Standards. Acquisition-related costs incurred are expensed and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability, will be recognized either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as equity, it should not be remeasured until it is finally settled within equity.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized as "bargain purchase gain" in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units (CGUs) that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Impairment of goodwill

Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit or group of cash-generating units, to which the goodwill relates. Where the recoverable amount of the cash-generating unit or group of cash-generating units is less than the carrying amount, an impairment loss is recognized.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

The Group's valuation team (the Team) determines the policies and procedures for fair value measurement of its investment properties. External valuers (the Valuers) are involved in the periodic valuation of these assets. The respective subsidiary's Team decides the selection of the external valuers after discussion with and approval by its Chief Financial Officer (CFO). Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Team also determines, after discussions with the chosen Valuers, which valuation techniques and inputs to use for each case.

At each reporting date, the Team analyses the movements in the values of the investment properties which are required to be re-measured or re-assessed in accordance with the subsidiaries' accounting policies. The team, in coordination with the Valuers, also compares each of the changes in the fair value of each property with relevant external sources to determine whether the change is reasonable.

On the re-appraisal year, the Team and Valuers present the valuation results and the major assumptions used in the valuation to its CFO.

Investments in Associates and Joint Ventures

The Group's investments in its associates and joint ventures are accounted for using the equity method.

The aggregate of the Group's share of profit or loss of an associate and a joint venture is shown on the face of the consolidated statement of income outside operating profit and represents profit or loss after tax and non-controlling interests in the subsidiaries of the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

Foreign Currency Translation

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currencies are initially recorded in the functional currency at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. All differences are taken to the consolidated statement of income. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

The functional currency of its subsidiaries; GMEC, AP Int., APIBV, LHC, SPI and PIPL, is the United States (US) Dollar. As at the balance sheet date, the assets and liabilities of these entities are translated into the presentation currency of the Group (the Philippine peso) at the rate of exchange ruling at the balance sheet date and their statement of income and statement of comprehensive income are translated at the weighted average exchange rates for the year. The exchange differences arising on the translation are taken directly to other comprehensive income as cumulative translation adjustment. Upon disposal of the subsidiary and associate, the deferred cumulative amount recognized in other comprehensive income relating to that particular entity is recognized in the consolidated statement of income.

Financial Instruments - Classification and Measurement

Classification of financial assets

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income, and fair value through profit or loss.

Financial assets are classified in their entirety based on the contractual cash flows characteristics of the financial assets and the Group's business model for managing the financial assets. The Group classifies its financial assets into the following measurement categories:

- financial assets measured at amortized cost
- financial assets measured at fair value through profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are reclassified to profit or loss
- financial assets measured at fair value through other comprehensive income, where cumulative gains or losses previously recognized are not reclassified to profit or loss

Contractual cash flows characteristics

If the financial asset is held within a business model whose objective is to hold assets to collect contractual cash flows or within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, the Group assesses whether the cash flows from the financial asset represent solely payments of principal and interest (SPPI) on the principal amount outstanding.

In making this assessment, the Group determines whether the contractual cash flows are consistent with a basic lending arrangement, i.e., interest includes consideration only for the time value of money, credit risk and other basic lending risks and costs associated with holding the financial asset for a particular period of time. In addition, interest can include a profit margin that is consistent with a basic lending arrangement. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual terms that introduce exposure to risks or volatility in the contractual cash flows that is unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are solely payments of principal and interest on the principal amount outstanding.

Business model

The Group's business model is determined at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Group's business model does not depend on management's intentions for an individual instrument.

The Group's business model refers to how it manages its financial assets in order to generate cash flows. The Group's business model determines whether cash flows will result from collecting contractual cash flows, selling financial assets or both. Relevant factors considered by the Group in determining the business model for a group of financial assets include how the performance of the business model and the financial assets held within that business model are evaluated and reported to the Group's key management personnel, the risks that affect the performance of the business model (and the financial assets held within that business model) and how these risks are managed and how managers of the business are compensated.

Financial assets at amortized cost

A financial asset is measured at amortized cost if (i) it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the EIR method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an

integral part of the EIR. The amortization is included in 'Interest income' in the consolidated statement of income and is calculated by applying the EIR to the gross carrying amount of the financial asset, except for (i) purchased or originated credit-impaired financial assets and (ii) financial assets that have subsequently become credit-impaired, where, in both cases, the EIR is applied to the amortized cost of the financial asset. Losses arising from impairment are recognized in 'Provision for credit and impairment losses' in the consolidated statement of income.

The Group's debt financial assets as of December 31, 2024 and 2023 consist of cash in banks, including restricted cash, cash equivalents, trade and other receivables, concession contract asset and the Power Sector Assets and Liabilities Management Corporation (PSALM) deferred adjustment - net of current portion included in "Other noncurrent assets" in the consolidated balance sheets. The Group assessed that the contractual cash flows of its debt financial assets are SPPI and are expected to be held to collect all contractual cash flows until their maturity. As a result, the Group concluded these debt financial assets to be measured at amortized cost.

Financial assets at FVTPL

Financial assets at FVTPL are measured at its fair value unless these are measured at amortized cost or at FVOCI. Included in this classification are equity investments held for trading and debt instruments with contractual terms that do not represent solely payments of principal and interest. Financial assets held at FVTPL are initially recognized at fair value, with transaction costs recognized in the consolidated statement of income as incurred.

Additionally, even if the asset meets the amortized cost or the FVOCI criteria, the Group may choose at initial recognition to designate the financial asset at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) that would otherwise arise from measuring financial assets on a different basis.

Trading gains or losses are calculated based on the results arising from trading activities of the Group, including all gains and losses from changes in fair value for financial assets and financial liabilities at FVTPL, and the gains or losses from disposal of financial investments.

The Group's investments in quoted equity securities and in unquoted equity shares are measured at FVTPL as of December 31, 2024 and 2023.

Classification of financial liabilities

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Financial liabilities are subsequently measured at amortized cost, except for the following:

- financial liabilities measured at fair value through profit or loss;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the Group retains continuing involvement;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in accordance with PFRS 3.

A financial liability may be designated at fair value through profit or loss if it eliminates or significantly reduces a measurement or recognition inconsistency (an accounting mismatch) or:

- if a host contract contains one or more embedded derivatives; or

- if a group of financial liabilities or financial assets and liabilities is managed and its performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

Where a financial liability is designated at fair value through profit or loss, the movement in fair value attributable to changes in the Group's own credit quality is calculated by determining the changes in credit spreads above observable market interest rates and is presented separately in other comprehensive income.

The Group's financial liabilities measured at amortized cost as of December 31, 2024 and 2023 include trade and other payables (excluding taxes and fees, output value-added tax (VAT) and unearned revenue), customers' deposits, short-term loans, lease liabilities, long-term obligation on power distribution system, long-term debts, and other noncurrent liabilities and (see Note 33).

Reclassifications of financial instruments

The Group reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Group and any previously recognized gains, losses or interest shall not be restated. The Group does not reclassify its financial liabilities.

The Group does not reclassify its financial assets when:

- A financial asset that was previously a designated and effective hedging instrument in a cash flow hedge or net investment hedge no longer qualifies as such;
- A financial asset becomes a designated and effective hedging instrument in a cash flow hedge or net investment hedge; and
- There is a change in measurement on credit exposures measured at fair value through profit or loss.

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments, including embedded derivatives, are initially recognized at fair value on the date in which a derivative transaction is entered into or bifurcated, and are subsequently remeasured at FVTPL, unless designated as effective hedge. Changes in fair value of derivative instruments not accounted as hedges are recognized immediately in the consolidated statement of income. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative.

An embedded derivative within a financial asset host is not accounted for separately. The financial asset host together with the embedded derivative is required to be classified in its entirety as either at amortized cost or at fair value depending on whether the cash flows of the hybrid contract are solely payments of principal and interest and the assessment of the business model within which the financial asset is held. On the other hand, an embedded derivative with a financial liability or a non-financial host is separated from the host and accounted for as a separate derivative if: its economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss.

Separated embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modified the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

The Group uses derivative financial instruments, such as foreign currency forward, interest rate swap (IRS) and commodity swap contracts to hedge its foreign currency risks, interest rate risks and commodity price risks, respectively.

For the purpose of hedge accounting, the Group's hedges are classified as cash flow hedges. Hedges are classified as cash flow hedge when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognized firm commitment.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

The Group's hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedge

The effective portion of the gain or loss on the hedging instrument is recognized in the cash flow hedge reserve, while any ineffective portion is recognized immediately in the consolidated statement of income. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedged item.

The Group uses foreign currency forward contracts as hedges of its exposure to foreign currency risk in forecast transactions, IRS contracts to manage its floating interest rate exposure on its loans and commodity swap contracts for its exposure to volatility in the commodity prices. The ineffective portion relating to these contracts are recognized in other operating income or expenses as realized gain or loss on derivative instruments.

The Group designated all of the foreign currency forward, IRS and commodity swap contracts as hedging instrument. The amounts accumulated in other comprehensive income are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognized in other comprehensive income for the period. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

For any other cash flow hedges, the amount accumulated in other comprehensive income is reclassified to the consolidated statement of income as a reclassification adjustment in the same period or periods during which the hedged cash flows affect profit or loss.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in other comprehensive must remain in accumulated other comprehensive income if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to profit or loss as a reclassification adjustment. After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated other comprehensive must be accounted for depending on the nature of the underlying transaction as described above.

Derecognition of Financial Assets and Liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when, and only when:

- the rights to receive cash flows from the asset expires;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group retains the contractual rights to receive the cash flows of a financial asset but assumes a contractual obligation to pay those cash flows to one or more entities, the Group treats the transaction as a transfer of a financial asset if the Group:

- has no obligation to pay amounts to the eventual recipients unless it collects equivalent amounts from the original asset;
- is prohibited by the terms of the transfer contract from selling or pledging the original asset other than as security to the eventual recipients for the obligation to pay them cash flows; and
- has an obligation to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In transactions where the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset and it retains control over the financial asset, the financial asset is recognized to the extent of the Group's continuing involvement in the financial asset. The extent of the Group's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset. When the Group's continuing involvement takes the form of guaranteeing the transferred asset, the extent of the Group's continuing involvement is the lower of (i) the amount of the asset and (ii) the maximum amount of the consideration received that the Group could be required to repay ('the guarantee amount'). When the Group's continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the extent of the Group's continuing involvement is the amount of the transferred asset that the Group may repurchase. However, in the case of a written put option on an asset that is measured at fair value, the extent of the Group's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price. When the Group's continuing involvement takes the form of a cash-settled option or similar provision on the transferred asset, the extent of the Group's continuing involvement is measured in the same way as that which results from non-cash settled options.

Modification of contractual cash flows

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Group recalculates the gross carrying amount of the financial asset as the present value of the renegotiated or modified contractual cash flows discounted at the original EIR (or credit-adjusted EIR for purchased or originated credit-impaired financial assets) and recognizes a modification gain or loss in the consolidated statement of income.

When the modification of a financial asset results in the derecognition of the existing financial asset and the subsequent recognition of the modified financial asset, the modified asset is considered a 'new' financial asset. Accordingly the date of the modification shall be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset.

Financial liabilities

A financial liability (or a part of a financial liability) is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability or a part of it are substantially modified, such an exchange or modification is treated as a derecognition of the original financial liability and the recognition of a new financial liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Impairment of Financial Assets

The Group recognizes ECL for the following financial assets that are not measured at FVTPL:

- debt instruments that are measured at amortized cost and FVOCI;
- loan commitments; and
- financial guarantee contracts.

No ECL is recognized on equity investments.

ECLs are measured in a way that reflects the following:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Financial assets migrate through the following three stages based on the change in credit quality since initial recognition:

Stage 1: 12-month ECL

For credit exposures where there have not been significant increases in credit risk since initial recognition and that are not credit-impaired upon origination, the portion of lifetime ECLs that represent the ECLs that result from default events that are possible within the 12-months after the reporting date are recognized.

Stage 2: Lifetime ECL - not credit-impaired

For credit exposures where there have been significant increases in credit risk since initial recognition on an individual or collective basis but are not credit-impaired, lifetime ECLs representing the ECLs that result from all possible default events over the expected life of the financial asset are recognized.

Stage 3: Lifetime ECL - credit-impaired

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

Loss allowances are recognized based on 12-month ECL for debt investment securities that are assessed to have low credit risk at the reporting date. A financial asset is considered to have low credit risk if:

- the financial instrument has a low risk of default

- the borrower has a strong capacity to meet its contractual cash flow obligations in the near term
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade', or when the exposure is less than 30 days past due.

Determining the stage for impairment

At each reporting date, the Group assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Company considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

The simplified approach, where changes in credit risk are not tracked and loss allowances are measured at amounts equal to lifetime ECL, is applied to 'Trade and other receivables'. The Group has established a provision matrix for customer segments that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Financial Guarantee Contracts and Loan Commitments

Financial guarantees are contracts issued by the Group that require it to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantees are initially recognized in the financial statements at fair value. Subsequently, these are measured at the higher of:

- the amount of the loss allowance determined in accordance with the ECL model and
- the amount initially recognized less, when appropriate, the cumulative amount of income recognized in accordance with the principles of PFRS 15.

Loan commitments provided by the Group are measured as the amount of the loss allowance. The Group has not provided any commitment to provide loans that can be settled net in cash or by delivering or issuing another financial instrument or that are issued at below-market interest rates.

For loan commitments and financial guarantee contracts, the loss allowance is recognized as a provision. However, for financial instruments that include both a loan and an undrawn commitment (i.e. loan commitment) component where the Group cannot separately identify the expected credit losses on the loan commitment component from those on the loan component, the expected credit losses on the loan commitment should be recognized together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the financial asset, the expected credit losses should be recognized as a provision.

Inventories

Materials and supplies are valued at the lower of cost and net realizable value (NRV). Cost is determined on moving average method. NRV is the current replacement cost. An allowance for inventory obsolescence is provided for slow-moving, defective or damaged goods based on analyses and physical inspection.

Property, Plant and Equipment

Except for land, property, plant and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value.

Land is stated at cost less any accumulated impairment in value. Depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows:

Category	Estimated Useful Life (in years)
Buildings, warehouses and improvements	10-50
Power plant equipment	2-50
Transmission, distribution and substation equipment:	
Power transformers	30
Poles and wires	20-40
Other components	12-30
Transportation equipment	5-10
Office furniture, fixtures and equipment	2-20
Electrical equipment	5-25
Meters and laboratory equipment	25
Steam field assets	20-25
Tools and others	2-20

Leasehold improvements are amortized over the shorter of the lease terms and the lives of the improvements ranging from 5 to 15 years.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use (ROU) assets

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use) included as part of "Property, plant and equipment" account in the consolidated balance sheet. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Category	Number of years
Land	10-50
Building	2-50
Power plant	38
Equipment and others	2-20

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include

the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the consolidated statement of income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Service Concession Arrangements

Public-to-private service concession arrangements where: (a) the grantor controls or regulates what services the entities in the Group must provide with the infrastructure, to whom it must provide them, and at what price; and (b) the grantor controls-through ownership, beneficial entitlement or otherwise-any significant residual interest in the infrastructure at the end of the term of the arrangement, are accounted for under the provisions of Philippine Interpretation IFRIC 12, *Service Concession Arrangements*. Infrastructures used in a public-to-private service concession arrangement for its entire useful life (whole-of-life assets) are within the scope of this Interpretation if the conditions in (a) are met.

This interpretation applies to both: (a) infrastructure that the entities in the Group constructs or acquires from a third party for the purpose of the service arrangement; and (b) existing infrastructure to which the grantor gives the entity in the Group access for the purpose of the service arrangement.

Infrastructures within the scope of this Interpretation are not recognized as property, plant and equipment of the Group. Under the terms of contractual arrangements within the scope of this Interpretation, an entity acts as a service provider. An entity constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time.

An entity recognizes and measures revenue in accordance with PFRS 15, for the services it performs. If an entity performs more than one service (i.e. construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable shall be allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.

When an entity provides construction or upgrades services, the consideration received or receivable by the entity is recognized at the stand-alone selling price of the related service. An entity accounts for revenue and costs relating to construction or upgrade services in accordance with PFRS 15. Revenue from construction contracts is recognized based on the percentage-of-completion method, measured by reference to the percentage of costs incurred to date to estimated total costs for each contract. The applicable entities account for revenue and costs relating to operation services in accordance with PFRS 15.

An entity recognizes a financial asset to the extent that it has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. An entity recognizes an intangible asset to the extent that it receives a right (a license) to charge users of the public service.

When the applicable entities have contractual obligations it must fulfill as a condition of its license (a) to maintain the infrastructure to a specified level of serviceability or (b) to restore the infrastructure to a specified condition before it is handed over to the grantor at the end of the service arrangement, it recognizes and measures these contractual obligations in accordance with PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, i.e., at the best estimate of the expenditure that would be required to settle the present obligation at the balance sheet date.

Borrowing cost attributable to the construction of the asset if the consideration received or receivable is an intangible asset, is capitalized during the construction phase. In all other cases, borrowing costs are expensed as incurred.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is fair value as at the date of the acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the consolidated statement of income in the year in which the expenditure is incurred.

Service concession right

The Group's intangible asset - service concession right pertains mainly to its right to charge users of the public service in connection with the service concession and related arrangements. This is recognized initially at the fair value which consists of the cost of construction services and the fair value of future fixed fee payments in exchange for the license or right. Following initial recognition, the intangible asset is carried at cost less accumulated amortization and any accumulated impairment losses.

The intangible asset - service concession right is amortized using the straight-line method over the estimated economic useful life which is the service concession period, and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The estimated economic useful life is ranging from 18 to 25 years. The amortization period and the amortization method are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Franchise

The Group's franchise pertains to VECO's franchise to distribute electricity within an area granted by the Philippine Legislature, acquired in the business combination in 2013. The franchise is initially recognized at its fair value at the date of acquisition. Following initial recognition, the franchise is carried at cost less accumulated amortization and any accumulated impairment losses. The Group's franchise is amortized using the straight-line method over the estimated economic useful life, and assessed for impairment whenever there is an indication that the franchise may be impaired. The estimated economic useful life of the franchise is 40 years. The amortization period and amortization method for franchise are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits

embodied in the franchise are accounted for by changing the amortization period or method, as appropriate, and treated as a change in accounting estimates. The amortization expense on franchise is recognized in the consolidated statement of income in the expense category consistent with its function.

Intangible assets - customer contracts

The Group's intangible assets - customer contracts pertain to contracts entered by subsidiaries relating to the provision of utility services to locators within an industrial zone.

These are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

The intangible assets - customer contracts are amortized using the straight-line method over the remaining life of the contract, and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and method are reviewed at least at each financial year end.

The amortization expense is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Project development costs

Project development costs include power plant projects in the development phase which meet the "identifiability" requirement under PAS 38, *Intangible Assets*, as they are separable and susceptible to individual sale and are carried at acquisition cost. These assets are transferred to "Property, plant and equipment" when construction of each power plant commences. During the period of development, the asset is tested for impairment annually.

Research and Development Expenditure

The Group's policy is to record research expenses in the consolidated statement of income in the period when they are incurred.

Development costs are recognized as an intangible asset on the consolidated balance sheet if the Group can identify them separately and show the technical viability of the asset, its intention and capacity to use or sell it, and how it will generate probable future economic benefits.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortization and accumulated impairment losses. Amortization of the asset begins when development is complete and the asset is available for use. It is amortized over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

Impairment of Non-financial Assets

Property, plant and equipment, intangible assets, investments and advances and other current and noncurrent assets excluding restricted cash and PSALM deferred adjustment

The Group assesses at each balance sheet date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are

recognized in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each balance sheet date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Decommissioning Liability

The decommissioning liability arose from the Group's obligation, under their contracts, to decommission, abandon and perform surface rehabilitation at the end of the useful lives of the steam field assets, or the end of the lease term, or upon abandonment of the plant. A corresponding asset is recognized as part of property, plant and equipment. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognized in the consolidated statement of income under "Interest expense" account. The estimated future costs of decommissioning are reviewed annually and adjusted prospectively.

Changes in the estimated future costs or in the discount rate applied are added or deducted from the cost of property, plant and equipment. The amount deducted from the cost of property, plant and equipment, shall not exceed its carrying amount.

If the decrease in the liability exceeds the carrying amount of the property, plant and equipment, the excess shall be recognized immediately in the consolidated statement of income.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued. When the Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Capital stock includes common stock and preferred stock.

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are debited to the "Paid-in capital" account. If additional paid-in capital is not sufficient, the excess is charged against an equity reserve account.

Retained Earnings

The amount included in retained earnings includes accumulated earnings of the Company and reduced by dividends on capital stock. Dividends on capital stock are recognized as a liability and deducted from equity when they are approved by the BOD. Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting date. Retained earnings may also include effect of changes in accounting policy as may be required by the transition provisions of new and amended standards.

Revenue Recognition

The following specific recognition criteria must also be met before revenue is recognized:

Sale of power

For power generation and ancillary services where capacity and energy dispatched are separately identified, these two obligations are to be combined as one performance obligation since these are not distinct within the context of the contract as the buyer cannot benefit from the contracted capacity alone without the corresponding energy and the buyer cannot obtain energy without contracting a capacity. The combined performance obligation qualifies as a series of distinct goods or services that are substantially the same and have the same pattern of transfer.

Revenue from power generation and ancillary services is recognized in the period actual capacity is delivered. Revenue is recognized over time since the customer simultaneously receives and consumes the benefits as the seller supplies power.

In contracts with fixed capacity payments which are determined at contract inception, the fixed capacity payments for the entire contract period is determined at day 1 and is recognized over time. Specifically, on contracts where capacity payments are fixed but escalates throughout the contract period without any reference to market indices, the fixed escalation is recognized on a straight-line basis over the contract period.

Some contracts with customers provide unspecified quantity of energy, includes provisional Energy Regulatory Commission (ERC) rates, and volume and prompt payment discounts that give rise to variable consideration. The variable consideration is estimated at contract inception and constrained until the associated uncertainty is subsequently resolved.

Power distribution and retail supply also qualify as a series of distinct goods or services that are substantially the same and have the same pattern of transfer accounted for as one performance obligation. Revenue is recognized over time and based on amounts billed.

Technical, management and other fees

Technical, management and other fees are recognized when the related services are rendered.

Interest income

Interest is recognized as it accrues taking into account the effective interest method.

Other income

Revenue is recognized when non-utility operating income and surcharges are earned.

Pension Benefits

The Group has defined benefit pension plans which require contributions to be made to separately administered funds. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. To the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization on that asset shall be determined as the actual borrowing costs incurred on that borrowing during the period less any investment income on the temporary investment of those borrowings. To the extent that funds are borrowed generally, the amount of borrowing costs eligible for capitalization shall be determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate shall be the weighted average of the borrowing costs applicable to the borrowings of the Group that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period shall not exceed the amount of borrowing costs incurred during that period.

Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as of the balance sheet date.

Current income tax relating to items recognized directly in equity is recognized in the consolidated statement of comprehensive income and not in the consolidated statement of income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax

Deferred income tax is provided using the liability method on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of unused tax credits and unused tax losses can be utilized except:

- where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred income tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the balance sheet date.

Income tax relating to items recognized directly in other comprehensive income is also recognized in other comprehensive income and not in the consolidated statement of income.

Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

VAT

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

For its VAT-registered activities, when VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated balance sheet. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated balance sheet up to the extent of the recoverable amount.

For its non-VAT registered activities, the amount of VAT passed on from its purchases of goods or service is recognized as part of the cost of goods/asset acquired or as part of the expense item, as applicable.

Input VAT, which is presented as part of “Other current assets” and/or “Other noncurrent assets” in the consolidated balance sheet, is recognized as an asset and will be used to offset the Group’s current output VAT liabilities and/or applied for claim for tax credit certificates. Input VAT is stated at its estimated NRV.

Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statement of income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Events After the Reporting Period

Post year-end events that provide additional information about the Group’s financial position at balance sheet date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed when material.

Earnings Per Common Share

Basic earnings per common share are computed by dividing consolidated net income for the year attributable to the equity holders of the Company by the weighted average number of common shares issued and outstanding during the year, after giving retroactive effect for any stock dividends declared and stock rights exercised during the year.

Diluted earnings per share amounts are calculated by dividing the consolidated net income for the year attributable to the equity holders of the parent by the weighted average number of common shares outstanding during the year plus the weighted average number of common shares that would be issued for outstanding common stock equivalents. The Group does not have dilutive potential common shares.

Operating Segments

For management purposes, the Group is organized into two major operating segments (power generation and power distribution) according to the nature of the services provided, with each segment representing a significant business segment. The Group’s identified operating segments are consistent with the segments reported to the BOD which is the Group’s Chief Operating Decision Maker (CODM). Financial information on the operating segment is presented in Note 31.

4. Significant Accounting Judgments, Estimates and Assumptions

The Group's consolidated financial statements prepared in accordance with PFRSs Accounting Standards require management to make judgment, estimates and assumptions that affect amount reported in the consolidated financial statements and related notes. The judgment, estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the consolidated financial statements. Actual results could differ from such estimates. Judgments, estimates and assumptions are continually evaluated and are based on historical experiences and other factors, including expectations of future events that are believed to be reasonable under circumstances. The following items are those matters which the Group assess to have significant risk arising from judgements and estimation uncertainties:

Judgments

In the process of applying the Group's accounting policies, management has made judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Determining functional currency

Based on the economic substance of the underlying circumstances relevant to the companies in the Group, the functional currency of the companies in the Group has been determined to be the Philippine Peso except for certain investees whose functional currency is the US Dollar. The Philippine Peso is the currency of the primary economic environment in which companies in the Group operates and it is the currency that mainly influences the sale of power and services and the costs of power and of providing the services. The functional currency of the Group's investees is the Philippine Peso except for GMEC, AP Int., APIBV, LHC, SPI and PIPL whose functional currency is the US Dollar.

Service concession arrangements - Companies in the Group as Operators

Based on management's judgment, the provisions of Philippine Interpretation IFRIC 12 apply to SEZ's Distribution Management Service Agreement (DMSA) with Subic Bay Metropolitan Authority (SBMA); MEZ's Built-Operate-Transfer agreement with Mactan Cebu International Airport Authority (MCIAA), LHC's Power Purchase Agreement (PPA) with the National Power Corporation (NPC) and SPI's PPA with NPC.

SEZ, MEZ and LHC's service concession agreements were accounted for under the intangible asset model. SPI's service concession agreement was accounted for under the financial asset model.

Refer to the accounting policy on service concession arrangements for the discussion of intangible asset and financial asset models.

Nonconsolidation of Manila-Oslo Renewable Enterprise, Inc. (MORE) and its investees, AA Thermal, Inc. (AA Thermal) and GNPowder Dingin Ltd. Co. (GNPD)

The Group has 83.33% interest in MORE which has a 60% ownership interest in SN Aboitiz Power-Magat, Inc. (SNAP M), SN Aboitiz Power-Benguet, Inc. (SNAP B), SN Aboitiz Power-RES, Inc. (SNAP RES), and SN Aboitiz Power-Generation, Inc.

The Group has 60% economic interest in AA Thermal. Further, the Group has 70% economic interest in GNPD, direct 40% via TPI and indirect 30% via AA Thermal.

The Group does not consolidate MORE, AA Thermal and GNPD since it does not have the ability to direct the relevant activities which most significantly affect the returns of MORE and its investees, AA Thermal and GNPD. This is as a result of the agreements among the shareholders and partners which, among others, stipulate that the management and operation of MORE, AA Thermal and GNPD are vested in their respective BOD or "Management Committee" and the affirmative vote of the other shareholders or partners are required for the approval of certain corporate actions which include financial and operating undertakings (see Note 10).

Determining a joint operation

The Group has 50% interest in Pagbilao Energy Corporation (PEC). The Group assessed that the joint arrangement is a joint operation as the financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

Contractual cash flows assessment

For each financial asset, the Group assesses the contractual terms to identify whether the instrument is consistent with the concept of SPPI.

‘Principal’ for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgment and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

Evaluation of business model in managing financial instruments

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. The Group’s business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed; and
- The expected frequency, value and timing of sales are also important aspects of the Group’s assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realized in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Identifying performance obligations

The Group identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group’s promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

The Group assesses performance obligations as a series of distinct goods and services that are substantially the same and have the same pattern of transfer if i) each distinct good or services in the series are transferred over time and ii) the same method of progress will be used (i.e., units of delivery) to measure the entity’s progress towards complete satisfaction of the performance obligation.

For power generation and ancillary services where capacity and energy dispatched are separately identified, these two obligations are to be combined as one performance obligation since these are not distinct within the context of the contract as the buyer cannot benefit from the contracted capacity alone without the corresponding energy and the buyer cannot obtain energy without contracting a capacity.

The combined performance obligation qualifies as a series of distinct goods or services that are substantially the same and have the same pattern of transfer since the delivery of energy every month are distinct services which are all recognized over time and have the same measure of progress.

Power distribution and retail supply also qualify as a series of distinct goods or services which is accounted for as one performance obligation since the delivery of energy every month are distinct services which are recognized over time and have the same measure of progress.

Revenue recognition

The Group recognizes revenue when it satisfies an identified performance obligation by transferring a promised good or service to a customer. A good or service is considered to be transferred when the customer obtains control. The Group determines, at contract inception, whether it will transfer control of a promised good or service over time. If the Group does not satisfy a performance obligation over time, the performance obligation is satisfied at a point in time.

The Group's revenue from power generation, power distribution, ancillary services and retail supply are to be recognized over time, since customers simultaneously receives and consumes the benefits as the Group supplies power.

Identifying methods for measuring progress of revenue recognized over time

The Group determines the appropriate method of measuring progress which is either through the use of input or output methods. Input method recognizes revenue on the basis of the entity's efforts or inputs to the satisfaction of a performance obligation while output method recognizes revenue on the basis of direct measurements of the value to the customer of the goods or services transferred to date.

For power generation and ancillary services, the Group determined that the output method is the best method in measuring progress since actual electricity is supplied to customers. The Group recognizes revenue based on:

For power generation and ancillary services:

- a. For the variable energy payment, actual kilowatt hours consumed which are billed on a monthly basis.
- b. For fixed capacity payments, the Group allocates the transaction price on a straight-line basis over the contract term. The allocated fixed payments are also billed on a monthly basis.

For power distribution and retail supply, the Group uses the actual kilowatt hours consumed, which are also billed on a monthly basis.

Determining method to estimate variable consideration and assessing the constraint

The Group includes some or all the amounts of variable consideration estimated but only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. The Group considers both the likelihood and magnitude of the revenue reversal in evaluating the extent of variable consideration the Group will subject to constraint. Factors such as i) highly susceptibility to factors outside the Group's influence, ii) timing of resolution of the uncertainty, and iii) having a large number and broad range of possible considerations amount are considered.

Some contracts with customers provide unspecified quantity of energy, provisional ERC rates, and volume and prompt payment discounts that give rise to variable consideration. In estimating the variable consideration, the Group applies the expected value method in estimating the variable consideration given the large number of customer contracts that have similar characteristics and the range of possible outcomes.

Before including any amount of variable consideration in the transaction price, the Group considers whether the amount of variable consideration is constrained. The Group determined that the estimates of variable consideration are to be fully constrained based on its historical experience (i.e., volume and prompt payment discounts), the range of possible outcomes (i.e., unspecified quantity of energy), and the unpredictability of other factors outside the Group's influence (i.e., provisional ERC rates).

Allocation of variable consideration

Variable consideration may be attributable to the entire contract or to a specific part of the contract. For power generation, power distribution, ancillary services and retail supply revenue streams which are considered as series of distinct goods or services that are substantially the same and have the same pattern of transfer, the Group allocates the variable amount that is no longer subject to constraint to the satisfied portion (i.e., month) which forms part of the single performance obligation, and forms part of the monthly billing of the Group.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the cash-generating unit and also to choose a suitable discount rate in order to calculate the present value of those cash flows. The carrying amount of goodwill as of December 31, 2024 and 2023 amounted to ₱46.59 billion and ₱44.62 billion, respectively (see Note 13). No impairment of goodwill was recognized in 2024, 2023 and 2022.

Estimating useful lives of property, plant and equipment

The Group estimates the useful lives of property, plant and equipment based on the period over which assets are expected to be available for use. The estimated useful lives of property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, the estimation of the useful lives of property, plant and equipment is based on collective assessment of internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the factors and circumstances mentioned above. As of December 31, 2024 and 2023, the net book values of property, plant and equipment, excluding land and construction in progress, amounted to ₱193.87 billion and ₱188.81 billion, respectively (see Note 12).

Assessing impairment of nonfinancial assets

The Group assesses whether there are any indicators of impairment for nonfinancial assets at each balance sheet date. These nonfinancial assets (property, plant and equipment, intangible assets (excluding goodwill), and other current and noncurrent assets) are tested for impairment when there are indicators that the carrying amounts may not be recoverable.

Determining the recoverable amount of non-financial assets, which requires the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Group to make estimates and assumptions that can materially affect its consolidated financial statements. Future events could cause the Group to conclude that the property, plant and equipment, intangible assets

(excluding goodwill), and other current and noncurrent assets are impaired. Any resulting impairment loss could have a material adverse impact on the consolidated balance sheet and consolidated statement of income.

As of December 31, 2024 and 2023, the aggregate net book values of these assets amounted to ₱259.67 billion and ₱241.83 billion, respectively (see Notes 8, 12, 13 and 14). Impairment losses and write-off recognized on these non-financial assets in 2024, 2023 and 2022 amounted to ₱648.3 million, ₱604.1 million and ₱1.01 billion, respectively (see Notes 12, 13 and 24).

Measurement of expected credit losses

ECLs are derived from unbiased and probability-weighted estimates of expected loss, and are measured as follows:

- *Financial assets that are not credit-impaired at the reporting date:* as the present value of all cash shortfalls over the expected life of the financial asset discounted by the effective interest rate. The cash shortfall is the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive.
- *Financial assets that are credit-impaired at the reporting date:* as the difference between the gross carrying amount and the present value of estimated future cash flows discounted by the effective interest rate.
- *Financial guarantee contracts:* as the expected payments to reimburse the holder less any amounts that the Group expects to recover.

The Group leverages existing risk management indicators (e.g. internal credit risk classification and restructuring triggers), credit risk rating changes and reasonable and supportable information which allows the Group to identify whether the credit risk of financial assets has significantly increased.

Inputs, assumptions and estimation techniques

The ECL is measured on either a 12-month or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), defined as follows:

- *Probability of default*
The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months, or over the remaining life of the obligation. PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures. The 12-months and lifetime PD represent the expected point-in-time probability of a default over the next 12 months and remaining lifetime of the financial instrument, respectively, based on conditions existing at the balance sheet date and future economic conditions that affect credit risk.
- *Loss given default*
Loss Given Default represents the Group's expectation of the extent of loss on a defaulted exposure, taking into account the mitigating effect of collateral, its expected value when realized and the time value of money. LGD varies by type of counterparty, type of seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of EAD.
- *Exposure at default*
EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months or over the remaining lifetime.

The ECL is determined by projecting the PD, LGD, and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The lifetime PD is developed by applying a maturity profile to the current 12-month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by customer segment.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. LGDs are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies including contracted debt sales and price.

The assumptions underlying the ECL calculation such as how the maturity profile of the PDs change are monitored and reviewed on a quarterly basis.

Simplified approach for trade receivables

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for various customer segments that have similar loss patterns (i.e., by geography, customer segment and coverage by letters of credit).

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the industrial segment, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

There have been no significant changes in estimation techniques or significant assumptions made during the reporting period.

Incorporation of forward-looking information

The Group incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL.

The Group has identified and documented key drivers of credit risk and credit losses of each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

The macro-economic variables include the following key indicators for the Philippines: unemployment rates, inflation rates, gross domestic product growth and net personal income growth.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 5 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

The Group has not identified any uncertain event that it has assessed to be relevant to the risk of default occurring but where it is not able to estimate the impact on ECL due to lack of reasonable and supportable information.

An increase in the Group's allowance for expected credit losses of trade and other receivables and concession contract asset will increase the Group's recorded expenses and decrease current assets. As of December 31, 2024 and 2023, allowance for expected credit losses amounted to ₱3.51 billion and ₱3.38 billion, respectively. Trade and other receivables, net of allowance for ECL, amounted to ₱36.59 billion and ₱34.25 billion as of December 31, 2024 and 2023, respectively (see Note 6). The concession contract asset amounted to ₱8.89 billion and ₱9.35 billion as of December 31, 2024 and 2023, respectively (see Notes 8 and 14).

Estimating the incremental borrowing rate (IBR)

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates. The carrying amount of the lease liabilities amounted to ₱4.45 billion and ₱2.91 billion as of December 31, 2024 and 2023, respectively (see Note 35).

Estimating decommissioning liability

Under the Geothermal Resource Service Contract (GRSC), the Group has a legal obligation to decommission, abandon and perform surface rehabilitation on its steam field asset at the end of its useful life. The Group also has a legal obligation under its land lease agreements to decommission the power plants at the end of their lease terms. The Group recognizes the present value of the obligation to decommission the plant, abandon and perform surface rehabilitation of the steam field asset and capitalizes the present value of these costs as part of the balance of the related property, plant and equipment, which are being depreciated and amortized on a straight-line basis over the useful life of the related asset.

These costs are accrued based on in-house estimates, which incorporates estimates of the amount of obligations and interest rates, if appropriate. Assumptions used to compute the provision are reviewed and updated annually. Each year, the provision is increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with charges being recognized as accretion expense, included under "Interest expense" in the consolidated statement of income.

Changes in the decommissioning liability that result from a change in the current best estimate of cash flow required to settle the obligation or a change in the discount rate are added to (or deducted from) the amount recognized as the related asset and the periodic unwinding of the discount on the liability is recognized in the consolidated statement of income as it occurs.

While the Group has made its best estimate in establishing the decommissioning provision, because of potential changes in technology as well as safety and environmental requirements, plus the actual time scale to complete decommissioning activities, the ultimate provision requirements could either increase or decrease significantly from the Group's current estimates.

The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

Decommissioning liability amounted to ₱5.26 billion and ₱7.36 billion as of December 31, 2024 and 2023, respectively, (see Note 19).

Recognition of deferred income tax assets

The Group reviews the carrying amounts of deferred income tax assets at each balance sheet date and reduces deferred income tax assets to the extent that it is no longer probable that sufficient income will be available to allow all or part of the deferred income tax assets to be utilized. The Group recognizes deferred taxes based on enacted or substantially enacted tax rates for renewable of 10% and for non-renewable of 25%. The Group has deferred income tax assets amounting to ₱6.10 billion and ₱6.79 billion as of December 31, 2024 and 2023, respectively.

Details of the Group's unused net operating loss carryover (NOLCO) and excess minimum corporate income tax (MCIT) are disclosed in Note 29.

Pension benefits

The cost of defined benefit pension plans, as well as the present value of the pension obligation, are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 27.

Net benefit expense amounted to ₱450.8 million in 2024, ₱401.8 million in 2023, and ₱512.9 million in 2022. The net pension assets as of December 31, 2024 and 2023 amounted to ₱78.3 million and ₱40.5 million, respectively. Net pension liabilities as of December 31, 2024 and 2023 amounted to ₱889.8 million and ₱903.1 million, respectively.

Fair value of financial instruments

Where the fair value of financial assets and financial liabilities recorded in the consolidated balance sheet cannot be derived from active markets, their fair value is determined using valuation techniques which include the discounted cash flow model and other generally accepted market valuation model. The inputs for these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The fair values of the Group's financial instruments are presented under Note 34.

Legal contingencies

The estimate of probable costs for the resolution of possible claims has been developed in consultation with outside counsels handling the Group's defense in these matters and is based upon an analysis of potential results. No provision for probable losses arising from legal contingencies was recognized in the Group's consolidated financial statements for the years ended December 31, 2024, 2023 and 2022.

5. Cash and Cash Equivalents

	2024	2023
Cash on hand and in banks	₱7,812,135	₱23,074,172
Short-term deposits	48,947,162	31,464,612
	₱56,759,297	₱54,538,784

Cash in banks earn interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods depending on the immediate cash requirements of the Group and earn interest at the respective short-term deposits rates. Interest income earned from cash and cash equivalents amounted to ₱1.81 billion in 2024, ₱1.67 billion in 2023, and ₱678.7 million in 2022.

6. Trade and Other Receivables

	2024	2023
Trade receivables - net (see Notes 32 and 33)	₱27,062,648	₱26,641,290
Others		
Non-trade receivable	7,799,983	5,966,458
Dividends receivable (see Note 10)	1,014,100	880,000
Advances to contractors	491,140	616,738
Interest receivable	225,374	143,056
	₱36,593,245	₱34,247,542

Trade and other receivables are noninterest-bearing and are generally on 10 - 30 days' term.

For terms and conditions relating to related party receivables, refer to Note 32.

Non-trade receivable relates mostly to claims from insurance and advances to partners in GMEC.

Advances to contractors refer to noninterest-bearing advance payments made for acquisition of inventories and services which are offset against progress billings to be made by the suppliers.

The rollforward analysis of allowance for expected credit losses as of December 31, 2024 and 2023, which pertains to trade receivables, is presented below:

	2024	2023
January 1	₱3,376,162	₱3,329,397
Provision (reversal) (see Note 24)	22,495	(227,964)
Write-off	(182,920)	(133,245)
Step-acquisition to subsidiary	—	327,151
Effect of changes in foreign exchange rate	297,153	80,823
December 31	₱3,512,890	₱3,376,162

7. Inventories

	2024	2023
Plant spare parts and supplies	₱8,834,269	₱7,929,236
Fuel	4,018,971	4,589,745
Transmission and distribution supplies	1,388,894	1,132,205
Other parts and supplies	9,584	24,345
	₱14,251,718	₱13,675,531

Inventories are carried at lower of cost and NRV as of December 31, 2024 and 2023.

The cost of inventories recognized as part of cost of generated power in the consolidated statements of income amounted to ₱40.62 billion in 2024, ₱56.00 billion in 2023, and ₱52.19 billion in 2022 (see Note 23). The cost of inventories recognized as part of operations and maintenance in the consolidated statements of income amounted to ₱416.4 million in 2024, ₱548.9 million in 2023, and ₱337.8 million in 2022 (see Note 25). The allowance for inventory obsolescence to arrive at NRV amounted to ₱12.4 million for December 31, 2024 and 2023.

8. Other Current Assets

	2024	2023
Restricted cash (see Note 17)	₱6,098,865	₱4,736,120
Prepaid expenses	3,244,973	1,131,153
Prepaid tax	2,886,357	3,205,447
Concession contract asset (see Note 14)	1,352,797	1,368,375
Input VAT	758,353	1,600,347
Advances to NGCP	551,506	551,506
Others	214,596	393,314
	₱15,107,447	₱12,986,262

Restricted cash represents proceeds from sale of power under the control of trustees of TVI and TSI's lenders as per loan agreement (see Note 17). The asset will be used to pay the current portion of loans payable, interest payments and operating costs in the following period.

Advances to NGCP pertain to TVI's cost of construction and installation of substation and transmission facilities which are subject for reimbursement.

Prepaid expenses mainly include prepayments for insurance.

9. Business Combination

Step-acquisition of SPI

SPI is the first coal-fired power plant in Mindanao operating with a 232 MW capacity.

Prior to the acquisition, the Company holds 34% stake in SPI. La Filipina Uy Gongco Corporation holds the other 15% while the majority of shares are owned by STEAG GmbH (Germany) at 51%.

On September 15, 2022, STEAG GmbH entered into a Share Purchase Agreement with the Company for the purchase by the Company of an additional 35.4% stake in SPI. The total purchase price for the shares is US\$36.1 million, plus locked box interest at a simple rate of 4% per annum (on the basis of a 365-day year) from January 1, 2021 to March 31, 2022.

In June 2023, all of the closing condition have been met allowing the Company to complete the acquisition of the 35.4% ownership interest in SPI from STEAG GmbH. As a result of the acquisition, SPI became a subsidiary of the Company owning at 69.4% interest.

The following are the fair values of the identifiable assets and liabilities assumed on acquisition date:

Assets:	
Cash and cash equivalents	₱1,562,017
Trade and other receivables	1,108,962
Inventories	2,254,849
Other current assets	409,700
Concession contract asset	9,937,575
Property and equipment	373,078
Pension asset	24,322
Other noncurrent assets	452,748
	<u>₱16,123,251</u>
Liabilities:	
Trade and other payables	₱1,477,444
Income tax payable	71,203
Deferred income tax liabilities, net	1,311,276
Lease liabilities	17,972
Long-term debt	2,687,509
	<u>5,565,404</u>
Total identifiable net assets at fair value	<u>₱10,557,847</u>
Total consideration	₱2,132,115
Fair value of previously-held interest in SPI	3,589,668
Fair value of NCI	3,230,701
	<u>8,952,484</u>
Less: Total identifiable net assets at fair value	10,557,847
Bargain purchase gain	<u>₱1,605,363</u>
Cash flow on acquisition:	
Cash paid	₱2,132,115
Net cash acquired with the subsidiary	1,562,017
Net cash outflow	<u>(₱570,098)</u>

Remeasurement of the previously-held interest in SPI as at the date of acquisition follows:

Carrying value of the previously held-interest	₱3,449,376
Fair value of previously-held interest	3,589,668
Loss on the remeasurement of previously-held interest	<u>₱140,292</u>

In 2023, SPI contributed ₱4.54 billion to the consolidated revenue and ₱878.4 million to the consolidated net income of the Group. If the combination had taken place at the beginning of 2023, the Group's revenue would have been ₱211.38 billion and net income would have been ₱36.75 billion.

The gain on bargain purchase including gain on remeasurement is presented as part of "Other income" in the 2023 consolidated statements of income. The gain on this acquisition arose from changes to the fair value of the net identifiable assets during the period prior to the closing date.

In May 2024, the Company purchased the remaining 15.6% interest of STEAG GmbH for US\$11.0 million (₱632.9 million) which resulted the Company to own 85% equity interest in SPI.

This transaction was treated as an acquisition from a non-controlling shareholder.

Accordingly, the excess of consideration paid over the value of the net assets acquired was recorded as an equity reserve. This excess was determined as follows:

Carrying value of the additional interest in SPI	₱1,595,842
Less consideration paid to non-controlling shareholder	632,885
Difference recognized as equity reserve	₱962,957

10. Investments and Advances

	2024	2023

*Amounts are based on appraised values which are adjusted to historical amounts upon equity take-up of the Group. Using cost method in accounting for property, plant and equipment, net income amounted to ₱639.1 million, ₱601.9 million and ₱610.8 million in 2024, 2023, and 2022, respectively, for SFELAPCO.

**The financial information of insignificant associates and joint ventures is indicated under "Others".

11. Joint Operation

Name of Joint Operation	Nature of Business	Percentage of Ownership		
		2024	2023	2022
PEC	Power generation	50.00	50.00	50.00

**PEC's principal place of business and country of incorporation is the Philippines.*

On May 15, 2014, the Group entered into a shareholders' agreement with TPEC Holdings Corporation (TPEC) for the development, construction and operation of the 400 MW Pagbilao Unit III in Pagbilao, Quezon through PEC. TPI and TPEC both agreed to provide their respective capital contributions and subscribe to common shares such that each stockholder owns 50% of the issued and outstanding shares of stock of PEC.

The financial and operating activities of the operation are jointly controlled by the participating shareholders and are primarily designed for the provision of output to the shareholders.

The Group's share of assets, liabilities, revenue, expenses and cash flows of joint operations are included in the consolidated financial statements on a line-by-line basis.

In 2024 and 2023, the Group has determined that an impairment test has to be performed on certain segments of its property, plant and equipment amounting to ₱2.84 billion and ₱3.01 billion, respectively. In performing an impairment test calculation, the Group determined the recoverable amount of the relevant property, plant and equipment through value in use (VIU). VIU is derived based on financial budgets prepared by senior management covering the project's entire life. Pre-tax discount rate of 7.72% to 10.67% in 2024 and 9.45% to 11.51% in 2023 was used.

The calculation of value in use of these property, plant and equipment are most sensitive to the following assumptions:

- Discount rate - Discount rate reflects the management's estimate of risks applicable to these projects. The benchmark used by the management to assess operating performance and to evaluate future investment proposals. In determining appropriate discount rates, consideration has been given to various market information, including, but not limited to, government bond yield, bank lending rates and market risk premium.
- Material price inflation - Estimates are obtained from published indices from which the materials are sourced, as well as data relating to specific commodities. Forecast figures are used if data is publicly available, otherwise past actual material price movements are used as an indicator of future price movement.
- Growth rate - The long-term rate used to extrapolate future cash flows excludes expansions and potential improvements in the future. Management also recognized the possibility of new entrants, which may have significant impact on existing growth rate assumptions. Management however, believes that new entrants will not have a significant adverse impact on the forecasts included in the financial budget.

Management have reflected future economic uncertainty in the risk-adjusted cash flows, giving a more accurate representation of the risks specific to the projects.

In addition, the Group also performed an assessment whether there are specific equipment that should have been impaired. These assessments resulted to the net reversal of impairment losses amounting to ₱367.4 million in 2024 and recognition of impairment losses amounting to ₱220.0 million in 2023.

Reclassifications and others include adjustment from decommissioning liability, cumulative translation adjustments, and reclassification of construction-in-progress account to proper asset accounts. In 2024 and 2023, power plant equipment and steam field assets decreased by ₱2.52 billion and increased by ₱1.29 billion, respectively, due to the change in accounting estimate on decommissioning liability (see Note 19).

In 2024 and 2023, additions to "Construction in progress" include capitalized borrowing costs, net of interest income earned from short-term deposits which amount to ₱1.06 billion and ₱513.4 million, respectively (see Note 17). The rate used to determine the amount of borrowing costs eligible for capitalization ranged from 5.91% to 7.0% in 2024 and 4.54% to 8.02% in 2023, which are the effective interest rate of the specific borrowings.

Property, plant and equipment with carrying amounts of ₱45.5 billion and ₱48.12 billion as of December 31, 2024 and 2023, respectively, are used to secure the Group's long-term debts (see Note 17).

Additions to property, plant and equipment include non-cash right-of-use assets and other assets amounting to ₱2.81 billion and ₱198.0 million in 2024 and 2023, respectively.

As of December 31, 2024 and 2023, the Group has significant purchase commitments amounting to ₱6.7 billion and ₱16.6 billion, respectively (see Note 36).

13. Intangible Assets

The table below shows the rollforward of intangible assets:

December 31, 2024

	Goodwill	Franchise	Service concession rights	Project development costs	Software and licenses	Customer contracts	Total
Cost:

Net book values	₱44,616,281	₱2,263,929	₱1,161,284	₱1,176,850	₱538,753	₱—	₱49,757,097

Impairment Testing of Goodwill

Goodwill acquired through business combinations have been attributed to individual CGUs.

The carrying amount of goodwill follows:

	2024	2023
GMEC	₱45,691,872	₱43,736,996
LEZ	467,586	467,586
HI	220,228	220,228
BEZ	191,471	191,471
ICWPC	18,256	—
	₱46,589,413	₱44,616,281

The recoverable amounts of the investments have been determined based on a value-in-use calculation using cash flow projections based on financial budgets approved by senior management covering a five-year period.

Key assumptions used in value-in-use calculation for December 31, 2024 and 2023

The following describes each key assumption on which management has based its cash flow projections to undertake impairment testing of goodwill.

Discount rates and growth rates

The discount rates applied to cash flow projections are from 7.72% to 10.67% in 2024 and 9.45% to 11.51% in 2023, and cash flows beyond the five-year period are extrapolated using a 2% growth rate.

Revenue assumptions

Revenue assumptions are based on the expected electricity to be sold. Revenue growth used for the next five (5) years are as follows:

	2024				2023			
	LEZ	BEZ	GMEC	HI	LEZ	BEZ	GMEC	HI
Year 1	6%	16%	-5%	7%	-5%	-17%	-15%	-5%
Year 2	1%	11%	-3%	2%	2%	9%	2%	9%
Year 3	3%	4%	10%	0%	3%	2%	-2%	-2%
Year 4	-11%	15%	-5%	-1%	4%	10%	12%	-3%
Year 5	9%	1%	1%	6%	10%	1%	-3%	1%

Materials price inflation

In 2024, the assumption used to determine the value assigned to the materials price inflation is 3.36% in 2025, 3.21% in 2026, 3.40% in 2027, 3.60% in 2028 and 3.80% in 2029. The starting point of 2024 is consistent with external information sources.

In 2023, the assumption used to determine the value assigned to the materials price inflation is 2.39% in 2024, and settles at 2.61% for the next 4 years until 2028.

Foreign exchange rates

In 2024, the assumption used to determine foreign exchange rate is a weakening Philippine peso which starts at a rate of ₱55.97 to a dollar in 2025, then depreciates annually at an average of 1% until 2029. In 2023, the assumption used to determine foreign exchange rate is a weakening Philippine peso which starts at a rate of ₱54.87 to a dollar in 2024, then depreciates annually at an average of 0.5% until 2028.

Based on the impairment testing, no impairment of goodwill was recognized in 2024 and 2023.

With regard to the assessment of value-in-use, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying value of the goodwill to materially exceed its recoverable amount.

Service Concession Rights

Service concession arrangements entered into by the Group are as follows:

- a. On November 24, 1996, LHC entered into a PPA with NPC, its sole customer, for the construction and operation of a 70-megawatt hydroelectric power generating facility (the Power Station) in Bakun River in Benguet and Ilocos Sur Provinces on a build-operate-transfer scheme. Under the PPA, LHC shall deliver to NPC all electricity generated over a cooperation period of 25 years until February 5, 2026.

On the Transfer Date, as defined in the PPA, LHC shall transfer to NPC, free from any lien or encumbrance, all its rights, title and interest in and to the Power Station and all such data as operating manuals, operation summaries/transfer notes, design drawings and other information as may reasonably be required by NPC to enable it to operate the Power Station.

Since NPC controls the ownership of any significant residual interest of the Power Station at the end of the PPA, the PPA is accounted for under the intangible asset model as LHC has the right to charge users for the public service under the service concession arrangement.

The Power Station is treated as intangible asset and is amortized over a period of 25 years, which is the service concession period, in accordance with Philippine Interpretation IFRIC 12. The intangible asset with a carrying value of ₱308.9 million and ₱593.1 million as of December 31, 2024 and 2023, respectively, was used as collateral to secure LHC's long-term debt (see Note 17).

- b. On May 15, 2003, the SBMA, AEV and DLP entered into a DMSA for the privatization of the SBMA Power Distribution System (PDS) on a rehabilitate-operate-and-transfer arrangement; and to develop, construct, lease, lease out, operate and maintain property, structures and machineries in the Subic Bay Freeport Zone (SBFZ).

Under the terms of the DMSA, SEZ was created to undertake the rehabilitation, operation and maintenance of the PDS (the Project), including the provision of electric power service to the customers within the Subic Bay Freeport Secured Areas of the SBFZ as well as the collection of the relevant fees from them for its services and the payment by SBMA of the service fees throughout the service period pursuant to the terms of the DMSA. The DMSA shall be effective for 25-year period commencing on the turnover date.

For and in consideration of the services and expenditures of SEZ for it to undertake the rehabilitation, operation, management and maintenance of the Project, it shall be paid by the SBMA the service fees in such amount equivalent to all the earnings of the Project, provided, however, that SEZ shall remit the amount of ₱40.0 million to the SBMA at the start of every 12-month period throughout the service period regardless of the total amount of all earnings of the Project. The said remittances may be reduced by the outstanding power receivables from SBMA, including streetlights power consumption and maintenance, for the immediate preceding year.

Since SBMA controls ownership of the equipment at the end of the agreement, the PDS are treated as intangible assets and are amortized over a period of 25 years up to year 2028, in accordance with Philippine Interpretation IFRIC 12.

The carrying value of the intangible asset arising from the service concession arrangement amounted to ₱449.5 million and ₱504.4 million as of December 31, 2024 and 2023, respectively.

- c. The transmission and distribution equipment of MEZ are located within Mactan Export Processing Zone (MEPZ) II. Since MCIAA controls ownership of the equipment at the end of the agreement, the equipment are treated as intangible assets and are amortized over a period of 21 years up to year 2028, in accordance with Philippine Interpretation IFRIC 12.

The carrying amount of the intangible asset arising from the service concession arrangement amounted to ₱52.6 million and ₱63.8 million as of December 31, 2024 and 2023, respectively.

14. Other Noncurrent Assets

	2024	2023
Input VAT and tax credit receivable, net of allowance for impairment loss of ₱236.3 million and ₱180.7 million as of December 31, 2024 and 2023, respectively	₱4,579,915	₱4,288,360
Concession contract asset - net of current portion	7,533,867	7,977,067
Prepaid taxes	4,655,192	3,395,899
Advances to contractors and projects	1,544,247	639,171
Refundable deposits	1,405,212	872,371
Advances to NGCP - net of current portion	565,752	565,732
Investment properties	394,902	368,702
Prepaid expenses	3,333,053	167,717
Others	1,217,506	442,077
	₱25,229,646	₱18,717,096

Concession contract asset pertains to SPI's PPA with NPC which has been accounted for under the provisions of Philippine Interpretation IFRIC 12. Under the terms of the PPA, SPI will receive capital recovery fees from NPC representing recovery of SPI's capital cost incurred in relation to the construction of the Power Station. These capital recovery fees are recognized at their discounted value in the consolidated financial statements using a prevailing market rate when SPI was acquired by the Group in June 2023 (see Note 9).

Concession contract asset due not later than one year is presented as current asset in the consolidated balance sheets (see Note 8).

Total finance income recognized as part of revenue in the 2024 and 2023 consolidated statements of comprehensive income amounted to ₱1.19 billion and ₱716.2 million, respectively.

Prepaid expenses include prepaid rent that pertains to TLI's prepayment for PSALM Pagbilao Land Lease Agreement amounting to ₱3.02 billion (see Note 35).

15. Trade and Other Payables

	2024	2023
Trade payables (see Note 33)	₱20,834,329	₱19,023,369
Accrued expenses:		
Interest	3,166,997	2,574,531
Taxes and fees	1,987,803	1,575,967
Claims conversion costs	257,184	155,769
Insurance	44,253	43,743

(Forward)

	2024	2023
Nontrade	₱2,293,208	₱3,118,256
Output VAT	3,277,272	3,457,962
Amounts due to contractors and other third parties	2,088,808	1,582,506
Customers' deposit (see Note 18)	453,107	41,203
Unearned revenues	282,230	219,943
Dividends payable	190,938	168,770
Others	830,512	906,654
	₱35,706,641	₱32,868,673

Trade payables are noninterest-bearing and generally on 30-day terms.

Accrued taxes and fees represent accrual of real property tax, transfer tax and other fees.

Amounts due to contractors and other third parties include liabilities arising from the power plant construction (see Note 12).

Others include withholding taxes and other liabilities and are generally payable within 12 months from the balance sheet date.

16. Short-term Loans

	Interest Rate	2024	2023
Peso loans - financial institutions - unsecured	5.50% - 6.87% in 2024 4.92% - 6.87% in 2023	₱23,705,000	₱18,298,000
Dollar loans - financial institutions - unsecured (see Note 17)	5.50% in 2024 6.70% - 7.00% in 2023	1,330,435	1,661,100
		₱25,035,435	₱19,959,100

The Peso loans are unsecured short-term notes payable obtained from local banks. These loans are covered by the respective borrower's existing credit lines with the banks and are not subject to any significant covenants and warranties.

Interest expense on short-term loans amounted to ₱1.11 billion in 2024, ₱1.16 billion in 2023, and ₱662.8 million in 2022 (see Note 33).

17. Long-term Debts

	2024 Interest Rate	2023 Interest Rate	2024	2023
Company:				
Bonds due 2025	3.94%	3.94%	₱550,000	₱550,000
Bonds due 2025	4.00%	4.00%	4,800,000	4,800,000
Bonds due 2026	5.28%	5.28%	7,250,000	7,250,000
Bonds due 2026	3.82%	3.82%	8,000,000	8,000,000
Bonds due 2027	5.34%	5.34%	3,000,000	3,000,000
Bonds due 2027	5.31%	5.31%	3,000,000	3,000,000
Bonds due 2028	8.51%	8.51%	2,500,000	2,500,000
Bonds due 2028	5.03%	5.03%	7,200,000	7,200,000
Bonds due 2029	5.74%	5.74%	7,000,000	7,000,000

* London Interbank Offered Rate (LIBOR)

Interest expense and other financing costs on long-term debt amounted to ₱12.78 billion in 2024, ₱11.26 billion in 2023, and ₱10.03 billion in 2022 (see Note 33).

Company

In September 2014, the Company issued a total of ₱10.0 billion bonds, broken down into a ₱6.60 billion 7-year bond due 2021 at an annual fixed rate equivalent to 5.21% and a ₱3.40 billion 12-year bond due 2026 at an annual fixed rate equivalent to 6.10%. The bonds have been rated PRS Aaa by PhilRatings.

The principal amount of these bonds shall be payable on a lump sum basis on the respective maturity date at its face value. These bonds may be redeemed in advance by the Company based on stipulated early redemption option dates and on agreed early redemption price.

In July 2017, the Company issued a ₱3.00 billion 10-year bond due 2027 at an annual fixed rate equivalent to 5.34%. The bonds have been rated PRS Aaa by PhilRatings.

In October 2018, the Company issued a total of ₱10.20 billion bonds, broken down into a ₱7.70 billion 5.25-year bond due 2024 at an annual fixed rate equivalent to 7.51% and a ₱2.50 billion 10-year bond due 2028 at an annual fixed rate equivalent to 8.51%. The bonds have been rated PRS Aaa by PhilRatings.

In October 2019, the Company issued ₱7.25 billion 7-year bond due 2026 at a fixed rate of 5.28%. The bonds have been rated PRS Aaa by PhilRatings.

In July 2020, the Company issued the fourth and last tranche of its ₱30.00 billion debt securities program, equivalent to ₱9.55 billion in July (the "Series E and F Bonds"). The Fixed Rate "Series E and F Bonds" has an interest rate of 3.13% and 3.94% per annum maturing in 2022 and 2025, respectively. The bonds have been rated PRS Aaa by PhilRatings.

In March 2021, the Company issued the first tranche of its ₱30.00 billion debt securities program equivalent to ₱8.00 billion (the "Series A Bonds") with an annual fixed rate of 3.82% due in 2026.

In July 2021, the Company availed ₱6.00 billion 7-year fixed-rate notes due 2026 at an annual fixed rate equivalent to 4%.

In September 2021, the Company settled its 2014 Series 'B' Bonds by prepaying ₱3.40 billion twelve-year bond maturing in 2026 and paying as scheduled its ₱6.60 billion seven-year bond.

In December 2021, the Company issued a total of ₱12.00 billion bonds, broken down into a ₱4.80 billion 4-year bond due 2025 at a fixed rate equivalent to 4% p.a. and a ₱7.20 billion 7-year bond due 2028 at a fixed rate equivalent to 5.03% p.a. The bonds have been rated PRS Aaa by PhilRatings.

In March 2022, the Company issued ₱3.00 billion 5-year bond due 2027 and ₱7.00 billion 7-year bond due 2029 at an annual fixed rate equivalent to 5.31% and 5.74%, respectively, and as part of the third tranche of its ₱30.00 billion debt securities program.

In July 2022, the Company fully paid the 2-year bond availed in 2020 amounting to ₱9.00 billion.

In October 2022, the Company prepaid the 5.25-year bond amounting to ₱7.70 billion.

In April 2019, the Company executed and availed a US\$300.0 million syndicated bridge loan facility loan agreement with DBS Bank Ltd., Mizuho Bank, Ltd., MUFG Bank, Ltd., and Standard Chartered Bank as lead arrangers and bookrunners to finance AA Thermal's acquisition. The loan bears a floating interest based on credit spread over applicable LIBOR plus 1.2% margin. The loan will mature on the 5th anniversary of the first utilization date.

In April and July 2021, the Company prepaid a total of US\$245.0 million of the US\$300.0 million syndicated bridge loan facility availed in 2019 to finance AA Thermal's acquisition. This loan is due in 2024.

In April 2022, the Company fully paid the remaining balance amounting to US\$55.0 million out of the US\$300.0 million loan.

In 2022, loss on extinguishment of the above loans amounted to ₱45.0 million included as part of the "Interest expense and other financing costs" account in the consolidated statements of income (see Note 32).

In November 2019, the Company obtain a ₱5.00 billion 7-year long term loan from the BDO Unibank, Inc. at a fixed rate of 5.28% p.a.

In 2020, the Company amend the "Mode of Payment" for the Principal from bullet payment to partial payments equal to 1 percent (%) of total principal amount payable annually starting November 2020 and the remaining 94 percent (%) upon maturity.

On July 13, 2021, the Company reached a rate reduction agreement to amend the interest rates of the loan from fixed rate loan of 5.28% to the sum of a benchmark rate and a spread of 0.90%, divided by an applicable factor and 4.125% per annum, whichever is higher.

GMEC

On August 29, 2017, GMEC entered into a Notes Facility Agreement (NFA) with local banks with BDO Capital and Investment Corporation as Lead Arranger, with the maximum principal amount of US\$800.0 million, the proceeds of which will be used to refinance GMEC's existing loan obligation and for other general corporate purposes.

On September 29, 2017, US\$600.0 million was drawn from the NFA, out of which \$462.4 million was used to prepay the outstanding loans. In February 2018, the remaining principal amount of US\$200.0 million was drawn from the NFA.

GMEC also has an existing facility agreement with certain banks to finance the GMEC's working capital requirements presented as part of short-term loans in the balance sheets (see Note 15).

Loans payable consist of the following dollar denominated loans:

	2024	2023	Interest Rate Per Annum	Payment Schedule
<i>NFA</i>				
Fixed Rate Loan	\$304,902	\$334,559	(i) Fixed rates of 2.5514% and 3.4049% plus 1.45% margin for the first seven-year period and (ii) Fixed Rate Loan Benchmark plus 1.45% margin for the subsequent five-year period	24 semi-annual payments starting from the first Interest Payment Date
LIBOR Loan	181,408	201,733	Six-month LIBOR plus 1.70% margin	24 semi-annual payments starting from the first Interest Payment Date
<i>Working Capital</i>				
Security Bank Corporation (SBC)	23,000	30,000	LIBOR plus 5.5% applicable margin	Payable within three months
Total borrowings	509,310	566,292		
Less current portion	47,756	78,489		
Loans payable - net of current portion	\$461,554	\$487,803		

TMI

On February 23, 2021, TMI entered into a Loan Agreement with China Banking Corporation (CBC) for an aggregate principal amount of ₱2.60 billion. The loan proceeds will be utilized, among others, to finance capital expenditures for the development and integration of a Battery Energy Storage System, working capital requirements, and for other financing and corporate purposes of TMI. Total amount drawn in 2021 amounted to ₱1.79 billion. In 2022, TMI made additional drawdown totaling ₱810.0 million.

Interest is payable semiannually and is fixed at the rate shown below for the first five years, with an adjustment for inflation on the five-year period thereafter. The principal amount is payable starting September 1, 2023 in 16 equal semi-annual installments. The total interest expense capitalized to construction in progress in 2023 and 2022 amounted to ₱157.6 million and ₱133.0 million, respectively.

Loan Amount	Rate for the 1st 5 Years
₱780 million	4.54%
₱1,010 million	5.86%
₱210 million	6.26%
₱600 million	7.68%

HSAB

On December 16, 2021, HSAB entered into an Omnibus Notes Facility and Security Agreement (Agreement) with Bank of the Philippine Islands (BPI) (Lender) for a loan facility in the principal amount of ₱1.15 billion for capital expenditures and other general purposes.

Based on the loan agreement, borrowing shall be for a term of ten (10) years reckoned from initial borrowing date. HSAB shall pay the first principal amount in six months from the initial borrowing date and shall continue on every six months interval. HSAB may not re-borrow any part of the loan that has already been paid.

This loan is subject to an annual interest fixed at 4.92% for the first 5 years. For the remaining five years, interest rate will be repriced. HSAB shall pay interest on the unpaid principal amount of the loan on each interest payment date. The interest rate shall be set on an interest rate setting date, and on the interest rate resetting date, as applicable.

TVI

On June 18, 2015, TVI entered into an omnibus agreement with local banks for a project loan facility with an aggregate principal amount of ₱31.97 billion. As of December 31, 2024 and 2023, ₱31.52 billion has been drawn from the loan facility.

The loan is available in two tranches, as follows:

- Tranche A, in the amount of ₱25.60 billion, with interest rate fixed for the first eight years and will be repriced and fixed for another seven years.
- Tranche B, in the amount of ₱5.90 billion, with a fixed interest rate for fifteen years.

70% of the principal amount of the loan is payable in 20 equal semi-annual installments, with the remaining 30% payable in full on the final maturity date. TVI may prepay the loan in part or in full beginning on the end of the fourth year from the initial advance or on the project completion date, whichever is earlier. Any prepayment shall be subject to a certain percentage of prepayment penalty on the principal to be prepaid.

The loan is secured by a mortgage of all its assets with carrying amount of ₱38.55 billion and ₱40.36 billion as of December 31, 2024 and 2023, respectively, and a pledge of TVI's shares of stock held by its shareholders.

API

On April 16, 2020, API entered into a loan agreement with BPI with a principal amount of ₱600.0 million, which was fully drawn in 2020. The term of the loan is 10 years and interest is fixed at 4.87% for 5 years subject to reset two (2) days prior to the 5th anniversary. The loan is payable in equal, semi-annual amortizations of at least one percent (1.00%) of the loan amount per annum, with balloon payment at maturity date.

TSI

On October 14, 2013, TSI entered into an omnibus agreement with local banks for a project loan facility with an aggregate principal amount of ₱24.00 billion, which was fully drawn in 2014.

On October 28, 2015, TSI entered into an additional loan agreement with principal amount of ₱1.68 billion, which was fully drawn in 2016.

The loan is secured by a mortgage of all its assets with carrying amount of ₱19.71 billion and ₱28.60 billion as of December 31, 2024 and 2023, respectively, and a pledge of TSI's shares of stock held by the shareholders and TPI.

Interest rate ranging from 4.50% - 5.15% is fixed for the first seven years and will be repriced and fixed for another five years. In 2018, upon release of AP guarantee, interest was increased by 0.5%.

Fifty percent of the principal amount of the loan is payable at semi-annual installments within 12 years with a two-year grace period, with the remaining 50% payable in full on the final maturity date.

TSI may prepay the loan in part or in full beginning on the end of the third year from the initial advance or on the project completion date, whichever is earlier. Any prepayment shall be subject to a prepayment penalty of 2% on the amount prepaid.

In 2021, TSI also entered into amendments of its existing loan agreements with local banks to obtain additional financing intended to finance the prepayment of its loan, to pay costs, expenses and fees in relation to the loan prepayment and amendments and to re-leverage and optimize the capital structure of TSI. Moreover, the parties have agreed to amend certain financial terms of the existing loan agreements, including but not limited to the interest rate and final maturity date, and shall take effect after the prepayment.

The amendments resulted to the following:

- a. TSI has drawn additional loan principal in the amount of ₱2.50 billion;
- b. Interest rate for the initial 5-year period from the effective date of amendment until the 5th anniversary of the effective date will be the 3-day average of the 5-year BVAL rate plus a spread of 130 basis points (the original spread), divided by the applicable premium factor, subject to a floor rate of 4.25% per annum. For the subsequent 7-year period commencing on the date following the 5th anniversary of the effective date, interest rate will be the 3-day average of the 7-year BVAL rate plus a spread equivalent to the original spread, divided by the applicable premium factor, subject to a floor rate equivalent to the initial 5-year rate divided by the applicable premium factor; and,
- c. 58.5% of the outstanding principal amount is payable in 18 equal semi-annual installments, 16.5% of the remaining principal amount is payable in another 5 equal semi-annual installments, with the remaining 25% payable in the final maturity date of the loan in 2033.

APRI

On February 29, 2016, APRI entered into an omnibus agreement with BPI, Asian Development Bank (ADB) and Credit Guarantee and Investment Facility (CGIF). This has been certified to have met the requirements of the Climate Bond Standard. The loan proceeds were used for return of equity to shareholders and to fund necessary operating and capital expenditures.

The loan is available in two tranches, as follows:

- a. The Notes Facility Agreement, in the amount of ₱10.70 billion, with interest rate already fixed for ten years. 41.6% of the principal amount is payable in ten equal semi-annual installments and the balance payable in another ten semi-annual installments
- b. The ADB Facility Agreement, in the amount of ₱1.80 billion, with interest rate fixed for five years and principal repayments made in ten equal semi-annual installments.

On December 23, 2021, APRI entered into a ₱12.00 billion loan facility agreement with BPI to refinance its existing term loan under the Omnibus Agreement; finance the design, development, construction, and operation of the 16 MW Binary Cycle Geothermal Plant to be developed in Tiwi, Albay (Project); and other general corporate purposes.

The loan is available in three tranches, as follows:

- a. A portion of the Facility in the amount equivalent to the total amount outstanding under the Omnibus Agreement, duly supported by a Statement of Account to be provided by the Intercreditor Agent, and to be used to finance the its payment of all outstanding obligations under the Omnibus Agreement.
- b. A portion of the Facility to be used by APRI for other general corporate purposes, in the amount equivalent to the resulting difference after deducting Tranche A and Tranche C from the maximum amount of the Facility.
- c. A portion of the Facility to be used by APRI to finance the Project up to the total amount of ₱1.40 billion. APRI has started the construction of 16 MW Binary Cycle Geothermal Plant and the construction is expected to be completed in December 2023.

Tranche A and B were already drawn from the initial borrowing date with the interest rate already fixed for 5 years. Maturity of all tranches shall be up to ten (10) years from initial drawdown date. 40% of the principal amount is payable in ten equal semi-annual installments, 20% is payable in succeeding four equal semi-annual installments, 30% is payable in succeeding five equal semi-annual installments, and the 10% balance is payable in the last installment.

The loan is secured by mortgage of its assets with carrying amount of ₱28.99 billion as of December 31, 2024, and pledge of APRI's shares of stock held by shareholders and assignment of Project Agreements and Project Accounts.

Hedcor Bukidnon

On April 3, 2020, Hedcor Bukidnon entered into a loan agreement with BPI, up to the maximum principal amount of ₱225.0 million which was fully drawn in 2020 for the construction of the Transformer Facility and other general corporate purposes.

The term of the loan is eight (8) years and the loan shall be paid as follows: (i) payment of an aggregate amount equivalent to 70% of the total principal amount of the loans, by equal semi-annual amortizations beginning on the seventh interest payment date up to and including the maturity date; and (ii) payment of the amount equivalent to 30% of the total principal amount of the loans, on the maturity date.

On September 29, 2020, Hedcor Bukidnon entered into an omnibus agreement for a loan facility in the principal amount of ₱9.09 billion which was fully drawn in 2020 to refinance the project loan availed in 2015.

The term of the loan is ten (10) years and the loan shall be paid as follows: (i) payment of an aggregate amount equivalent to 70% of the total original amount of the loan, by equal semi-annual amortizations beginning on the first interest payment date up to and including the Maturity Date; and (ii) payment of the amount equivalent to 30% of the total original amount of the loan, on the maturity date.

Hedcor Sibulan

On November 17, 2016, Hedcor Sibulan entered into a NFA with various institutions with Metrobank - Trust Banking Group as the Notes Facility Agent, for a loan facility with an aggregate principal amount of up to ₱4.10 billion to return equity to shareholders, and for other general corporate purposes.

The unsecured notes were issued in ten tranches with interest payable semi-annually at annual fixed rates ranging from 4.05% - 5.42% with principal maturity as follows:

Tranche	Maturity Date	Principal Amount
1	Fifteen months from issue date	₱96.8 million
2	Two (2) years from issue date	₱96.8 million
3	Three (3) years from issue date	₱84.0 million
4	Four (4) years from issue date	₱84.0 million
5	Five (5) years from issue date	₱284.0 million
6 (Series A&B)	Six (6) years from issue date	₱388.4 million
7 (Series A&B)	Seven (7) years from issue date	₱445.8 million
8	Eight (8) years from issue date	₱451.4 million
9	Nine (9) years from issue date	₱508.1 million
10 (Series A&B)	Ten (10) years from issue date	₱1,660.7 million

Prior to maturity date, Hedcor Sibulan may redeem in whole or in part the relevant outstanding notes on any interest payment date plus a one percent prepayment penalty.

HI

On August 6, 2013, HI availed of a ten-year ₱900.0 million loan from a local bank. This loan is subject to a semi-annual principal payment with annual interest fixed at 5.25% for the first 5 years. For the remaining five years, interest rate will be repriced and fixed on the fifth anniversary from the drawdown date. The debt is secured by a pledge of HI's shares of stock held by ARI.

On December 14, 2018, HI entered into a Notes Facility Agreement with a local bank to borrow ₱1.39 billion, which will mature on August 31, 2033, to finance the rehabilitation and/or expansion of the Bineng hydropower plant, refinance its short-term loans and for other general corporate purposes. This loan is subject to a semi-annual principal payment with annual interest fixed at 7.87% for the first five (5) years. For the next five (5) years, interest rate will be repriced and fixed one banking day prior to August 31, 2023. For the remaining five (5) years, interest rate will be repriced and fixed one banking day prior to August 31, 2028. The debt is secured by a continuing suretyship from ARI.

PV Sinag

On November 11, 2022, PV Sinag entered into an Omnibus Notes Facility and Security Agreement (Agreement) with BPI (Lender) for a loan facility in the principal amount of ₱3.60 billion for capital expenditures of project.

Based on the loan agreement, the borrowing shall be for a term of fifteen (15) years, reckoned from initial borrowing date. PV Sinag shall pay the first principal amount at the end of twelve (12) months after the First Issue Date, seventy percent (70%) of the principal amount outstanding shall be repaid in semi-annual installments, and the balance of thirty percent (30%) of the principal amount outstanding shall be paid on Maturity Date.

All payments of interest (including default interest) shall be computed on the basis of number of actual days elapsed in three hundred sixty (360) day year basis.

On March 15, 2023, PV Sinag made and executed an amended and restated Omnibus Notes Facility and Security Agreement with BPI (Note Holder).

The Note Holder hereby grants PV Sinag an aggregate amount up to ₱9.70 billion broken down as follows:

- a. up to ₱6.10 billion worth of Series B notes wherein ₱0.85 billion issued on March 14, 2024 and ₱5.25 billion issued on March 22, 2023 to fund the Laoag Solar Project; and
- b. up to ₱3.60 billion worth of Series A notes issued on November 11, 2022 to fund the Cayanga-Bugallon Solar Project

ARI

On December 23, 2022, ARI entered into a Notes Facility Agreement with Land bank of the Philippines as the issuer, with a principal amount of up to ₱20.00 billion worth of fixed-rate corporate notes, of which ₱12.00 billion was drawn on December 28, 2022, at an annual interest rate of 6.91%, to be repriced on the 5th anniversary of the first issue date.

On March 14, 2024, ARI drew the second tranche amounting to ₱8.00 billion at an annual interest rate of 6.6457% to be repriced on the 5th anniversary of the issuance date.

Based on the facility agreement, interest is payable every six months. The principal's maturity date is 10 years after the issue date, inclusive of 12-month grace period. Ten percent (10%) of the principal amount shall be paid in equal semi-annual installments commencing after the expiration of the grace period until maturity date. Thereafter, the remaining ninety percent (90%) of the principal amount shall be paid on maturity date.

HTI

On December 16, 2021, HTI entered into an Omnibus Notes Facility and Security Agreement (Agreement) with BPI (Lender) for a loan facility in the principal amount of ₱752.0 million for capital expenditures and other general purposes.

Based on the loan agreement, borrowing shall be for a term of ten (10) years reckoned from initial borrowing date. HTI shall pay the first principal amount in six months from the initial borrowing date and shall continue on every six months interval. HTI may not re-borrow any part of the loan that has already been paid.

This loan is subject to an annual interest fixed at 4.92% for the first 5 years. For the remaining five years, interest rate will be repriced. HTI shall pay interest on the unpaid principal amount of the loan on each interest payment date. The interest rate shall be set on an interest rate setting date, and on the interest rate resetting date, as applicable.

AI

In April 2017, AI entered into a loan agreement with AEV for the principal sum of ₱300.0 million with maturity in April 2022. The loan shall be interest bearing payable on a per annum basis. The interest rate is at 3.5% per annum. On December 27, 2021, AI gave its notice of extension to extend the final maturity to April 2027 pursuant to the same terms and conditions under the note. The outstanding balance was settled in 2024.

TLI

On October 21, 2022, TLI entered into a term loan agreement with a local bank intended for the settlement of monthly payments to PSALM in the amount of ₱15.0 billion. Interest rate is 7.39% floating rate every five years. 2% of the principal is payable on the third year in equal semi-annual installments, 8.5% is payable on the fourth year, 4.95% is payable in 11 equal semi-annual installments and the 40% is payable on the final maturity date of the loan.

New loan availment was availed by TLI on November 8, 2023 for a total amount of ₱11.4 billion. Interest rate is 7.4% floating rate every five years.

SPI

On December 8, 2014, SPI and BDO together with BDO Unibank Inc. Trust and Investments Group as Onshore Trustee, DB Trustees (Hong Kong) Limited as Offshore Trustee and STEAG GmbH, Aboitiz Power Corporation and La Filipina Uygongco Corporation as Sponsors agreed to further amend and restate the Original Omnibus Agreement to incorporate the Second BDO Facility Agreement. The Original Omnibus Agreement as amended on September 2, 2010 and December 8, 2014 is hereinafter referred to as the "Omnibus Agreement". The Second BDO Facility Agreement covers a 10-year US\$40,200,000 term loan for general corporate expenses. The interest rate of the loan under the BDO Second Facility Agreement is fixed at 5% per annum and repayment for the principal is in accordance with a specified schedule with January 31, 2015 specified as first repayment date.

CEDI

In 2018, CEDI entered into a USD-denominated loan agreement with Mainstream Renewable Power Limited (MRPL) to enable CEDI to finance respective working capital requirements. In 2018, the BOD of CEDI also approved the conversion of CEDI's advances from affiliates to loan payables amounting to 26.60 million. In 2023, CEDI also obtained loans from MRPL subject to 8% interest amounting to US\$0.16 million (₱8.62 million).

On November 8, 2023, the BOD of CEDI approved the conversion of long-term debt amounting to US\$1.20 million (₱65.49 million) to equity.

In order to facilitate the completion of the debt-to-equity conversion, the following were undertaken on November 29, 2023:

- MRPL, with the intention to be partially substituted by its subsidiary International Mainstream Renewable Power Limited (IMRPL) in the Loan Agreement, entered into a partial novation with IMRPL and CEDI for a portion of the principal amounting to US\$1.20 million (₱65.49 million).
- CEDI, IMRPL and Mainstream Renewable Power Philippines Holdings B.V. (MRPPHBV) entered into a novation agreement substituting IMRPL by MRPPHBV as creditor of the principal loan amounting to US\$1.20 million (₱65.49 million).

In 2023, CEDI and MRPL entered into Deed of Waiver and Release, wherein, MRPL waives partial principal of the loan amounting to US\$14.57 million and interest payable amounting to ₱45.28 million. No interest will be charged to CEDI after the waiver.

The outstanding loan as of December 31, 2024 will be waived in 2025 as part of the share purchased agreement between ARI and MRPPHBV.

Long-term debt of Joint Operation (see Note 11)

This pertains to TPI's share of the outstanding project debt of its joint operation.

In May 2014, PEC entered into an omnibus agreement with various local banks for a loan facility in the aggregate principal amount of up to ₱33.31 billion with maturity period of 15 years.

The loan facility is subject to a semi-annual interest payment with annual fixed interest ranging from 5.50% - 8.31%. The loans may be voluntarily prepaid in full or in part commencing on and from the third year of the date of initial drawdown with a prepayment penalty.

The loans are secured by a mortgage of substantially all its assets with carrying amount of ₱31.13 billion as of December 31, 2024, and a pledge of the shares of stock held by the joint operators.

Loan covenants

The loan agreements on long-term debt of the Group provide for certain restrictions with respect to, among others, mergers or consolidations or other material changes in their ownership, corporate set-up or management, investment and guaranties, incurrence of additional debt, disposition of mortgage of assets, payment of dividends, and maintenance of financial ratios at certain levels.

These restrictions and requirements were complied with by the Group as of December 31, 2024 and 2023.

18. Customers' Deposits

	2024	2023
Bill and load	₱6,737,958	₱5,941,911
Lines and poles	1,913,923	1,618,794
Transformers	1,317,117	1,342,309
	9,968,998	8,903,014
Less current portion (see Note 15)	453,107	41,203
Noncurrent portion	₱9,515,891	₱8,861,811

Transformers and lines and poles deposits are obtained from certain customers principally as cash bond for their proper maintenance and care of the said facilities while under their exclusive use and responsibility.

Effective April 1, 2010, the Amended Distribution Services and Open Access Rules (Amended DSOAR), increased the refund rate from 25% to 75% of the gross distribution revenue generated from the extension lines and facilities until such amounts are fully refunded.

Bill deposit serves to guarantee payment of bills by a customer which is estimated to equal one month's consumption or bill of the customer.

Both the Magna Carta and Distribution Services and Open Access Rules (DSOAR) also provide that residential and non-residential customers, respectively, must pay a bill deposit to guarantee payment of bills equivalent to their estimated monthly billing. The amount of deposit shall be adjusted after one year to approximate the actual average monthly bills. A customer who has paid his electric bills on or before due date for three consecutive years, may apply for the full refund of the bill deposit, together with the accrued interests, prior to the termination of the service; otherwise, bill deposits and accrued interests shall be refunded within one month from termination of service, provided all bills have been paid.

In cases where the customer has previously received the refund of his bill deposit pursuant to Article 7 of the Magna Carta, and later defaults in the payment of his monthly bills, the customer shall be required to post another bill deposit with the distribution utility and lose his right to avail of the right to refund his bill deposit in the future until termination of service. Failure to pay the required bill deposit shall be a ground for disconnection of electric service.

Interest expense on customers' deposits amounted to ₱2.2 million in 2024, ₱2.5 million in 2023, ₱1.2 million in 2022 (see Note 33).

The Group classified customers' deposits under noncurrent liabilities due to the expected long-term nature of these deposits. The portion of customers' deposits to be refunded within 12 months amounted to ₱453.1 million and ₱41.2 million as of December 31, 2024 and 2023, respectively, and are presented as part of "Trade and other payables" (see Note 15).

19. Decommissioning Liability

Decommissioning liability includes the estimated costs to decommission, abandon and perform surface rehabilitation on the steam field assets at the end of their useful lives, and the best estimate of the expenditure required to settle the obligation to decommission power plant at the end of its lease term (see Note 12).

	2024	2023
Balance at beginning of year	₱7,363,729	₱5,654,234
Change in accounting estimate (see Note 12)	(2,520,525)	1,287,688
Accretion of decommissioning liability (see Note 33)	416,001	421,807
Balance at end of year	₱5,259,205	₱7,363,729

The actual dismantling and removal cost could vary substantially from the above estimate because of new regulatory requirements, changes in technology, increased cost of labor, materials, and equipment or actual time required to complete all dismantling and removal activities. Adjustment, if any, to the estimated amount will be recognized prospectively as they become known and reliably estimable. The change in accounting estimate is due to the updating of discount and inflation rates. The asset retirement obligation was discounted using interest rates ranging from 5.19% - 6.11% in 2024 and 5.20% - 6.25% in 2023.

20. Equity

a. Paid-in Capital (number of shares not rounded)

	2024	2023
Capital Stock		
Authorized - ₱1 par value		
Common shares - 16,000,000,000 shares		
Preferred shares - 1,000,000,000 shares		
Issued		
Common shares - 7,358,604,307 shares	₱7,358,604	₱7,358,604
Additional Paid-in Capital	12,588,894	12,588,894
	₱19,947,498	₱19,947,498

On May 25, 2007, the Company listed with the PSE its 7,187,664,000 common shares with a par value of ₱1.00 to cover the initial public offering (IPO) of 1,787,664,000 common shares at an issue price of ₱5.80 per share. On March 17, 2008, the Company listed an additional 170,940,307 common shares, which it issued pursuant to a share swap agreement at the IPO price of ₱5.80 per share. The total proceeds from the issuance of new shares

amounted to ₱10.37 billion. The Company incurred transaction costs incidental to the initial public offering amounting to ₱412.4 million, which is charged against “Additional paid-in capital” in the consolidated balance sheets.

In 2023, the Company purchased a total of 152,750,000 shares of its own common shares for ₱4.89 billion. The acquisition is pursuant to the authority approved by the Company's Board of Directors on August 29, 2023.

As of December 31, 2024, 2023 and 2022, the Company has 582, 578 and 594 shareholders, respectively.

Preferred shares are non-voting, non-participating, non-convertible, redeemable, cumulative, and may be issued from time to time by the BOD in one or more series. The BOD is authorized to issue from time to time before issuance thereof, the number of shares in each series, and all the designations, relative rights, preferences, privileges and limitations of the shares of each series. Preferred shares redeemed by the Company may be reissued. Holders thereof are entitled to receive dividends payable out of the unrestricted retained earnings of the Company at a rate based on the offer price that is either fixed or floating from the date of the issuance to final redemption. In either case, the rate of dividend, whether fixed or floating, shall be referenced, or be a discount or premium, to market-determined benchmark as the BOD may determine at the time of issuance with due notice to the SEC.

In the event of any liquidation or dissolution or winding up of the Company, the holders of the preferred shares shall be entitled to be paid in full the offer price of their shares before any payment in liquidation is made upon the common shares.

There are no preferred shares issued and outstanding as of December 31, 2024 and 2023.

b. Retained Earnings

As of December 31, 2024 and 2023 total appropriated retained earnings amounted to ₱11.9 billion which was approved by the BOD for appropriation for project development and construction of power plants on March 7, 2019.

On November 22, 2023, the BOD also approved the reversal of ₱8.2 billion retained earnings appropriation set up in 2019 for the equity requirement of the 300MW Cebu Coal plant.

On March 4, 2022, the BOD approved the declaration of regular cash dividends of ₱1.45 per share (₱10.67 billion) to all stockholders of record as of March 18, 2022. The cash dividends were paid on March 30, 2022.

On March 3, 2023, the BOD approved the declaration of regular cash dividends of ₱1.87 per share (₱13.76 billion) to all stockholders of record as of March 17, 2023. The cash dividends were paid on March 30, 2023.

On March 5, 2024, the BOD approved the declaration of regular cash dividends of ₱2.30 a share (₱16.57 billion) to all stockholders of record as of March 19, 2024. These dividends were paid on March 26, 2024.

To comply with the requirements of Section 43 of the Corporation Code, on March 6, 2025, the BOD approved the declaration of regular cash dividends of ₱2.35 per share (₱16.95 billion) to all stockholders of record as of March 21, 2025. The cash dividends are payable on March 28, 2025.

- c. The balance of retained earnings includes the accumulated equity in net earnings of subsidiaries, associates and joint arrangement amounting to ₱138.10 billion and ₱123.78 billion as of December 31, 2024 and 2023, respectively. Such amounts are not available for distribution until such time that the Company receives the dividends from the respective subsidiaries, associates and joint arrangement (see Note 10).

21. Sale of Power

Sale from Distribution of Power

1. The Uniform Rate Filing Requirements on the rate unbundling released by the ERC on October 30, 2001, specified that the billing for sale and distribution of power and electricity will have the following components: Generation Charge, Transmission Charge, System Loss Charge, Distribution Charge, Supply Charge, Metering Charge, the Currency Exchange Rate Adjustment and Interclass and Lifeline Subsidies. National and local franchise taxes, the Power Act Reduction (for residential customers) and the Universal Charge are also separately indicated in the customer's billing statements.
2. Pursuant to Section 43(f) of Republic Act (R.A.) No. 9136, otherwise known as the Electric Power Industry Reform Act of 2001 (EPIRA), and Rule 15, section 5(a) of its Implementing Rules and Regulations (IRR), the ERC promulgated the Distribution Wheeling Rates Guidelines on December 10, 2004. These were subsequently updated and released on July 26, 2006 as the Rules for Setting Distribution Wheeling Rates (RDWR) for Privately Owned Utilities entering Performance Based Regulation (PBR).

Details of the PBR regulatory period and the date of implementation of the approved rates are as follows:

	CLP	DLP	VECO	SEZ
				October 1, 2025
Current regulatory period	April 1, 2023 to March 31, 2027	July 1, 2024 to June 30, 2028	July 1, 2024 to June 30, 2028	to September 30, 2029
Date of implementation of approved distribution supply and metering charges	May 1, 2009	August 1, 2010	August 1, 2010	November 26, 2011

The reset process for the Third Regulatory Period to adjust the previously approved distribution supply and metering charges were deferred due to the changes on PBR rules.

The Energy Regulatory Commission has issued ERC Resolution No. 10, Series of 2021 Modifying the Rules for Setting the Distribution Wheeling Rates (RDWR) for Privately-Owned Distribution Utilities Entering Performance-Based Regulation (PBR) and ERC Resolution No. 11, Series of 2021 Adopting the Regulatory Asset Base (RAB) Roll-Forward Handbook for Privately-Owned Electricity Distribution Utilities.

Based on the RDWR, the regulatory periods shall be as follows:

- (i) CLP: April 1, 2023 to March 31, 2027
- (ii) DLP and VECO: July 1, 2024 to June 30, 2028
- (iii) SEZ: October 1, 2025 to September 30, 2029

The reset process for the Fourth Regulatory Period has not started for all private DUs as the above-mentioned ERC rules have not been published, which is a condition for their effectivity.

Total sale from distribution of power amounted to ₱56.99 billion, ₱53.36 billion, and ₱57.24 billion in 2024, 2023 and 2022, respectively.

Sale from Generation of Power and Retail Electricity

- a. Energy Trading through the Philippine Wholesale Electricity Spot Market (WESM)

Certain subsidiaries are trading participants and direct members under the generator sector of the WESM. These companies are allowed to access the WESM Market Management System through its Market Participant Interface (MPI). The MPI is the facility that allows the trading participants to submit and cancel

bids and offers, and to view market results and reports. Under its price determination methodology as approved by the ERC, locational marginal price method is used in computing prices for energy bought and sold in the market on a per node, per hour basis. In the case of bilateral power supply contracts, however, the involved trading participants settle directly with their contracting parties.

Total sale of power to WESM amounted to ₱33.84 billion, ₱32.96 billion, and ₱27.72 billion in 2024, 2023 and 2022, respectively.

b. Power Supply Agreements

i. *Power Supply Contracts assumed under Asset Purchase Agreement (APA) and IPP Administration Agreement*

Revenue recognition for customers under the power supply contracts assumed under the APA and IPP Administration Agreements are billed based on the contract price which is calculated based on the pricing structure approved by the ERC. Rates are calculated based on the time-of-use pricing schedule with corresponding adjustments using the GRAM and the ICERA.

ii. *Power Purchase/Supply Agreement and Energy Supply Agreement (PPA/PSA and ESA)*

Certain subsidiaries have negotiated contracts with NPC, Private Distribution Utilities, Electric Cooperatives and Commercial and Industrial Consumers referred to as PPA/PSA or ESA. These contracts provide a tariff that allows these companies to charge for capacity fees, fixed operating fees and energy fees.

iii. *Feed-in-Tariff (FIT)*

Certain subsidiaries were issued a FIT Certificate of Compliance from the ERC which entitles them to avail the FIT rate. These subsidiaries also signed agreements with the National Transmission Corporation (NTC), the FIT administrator. These agreements enumerate the rights and obligations under the FIT rules and FIT-All guidelines, in respect to the full payment of the actual energy generation of the generator, at a price equivalent to the applicable FIT rate, for the entire duration of its FIT eligibility period.

Total sale of power under power supply agreements amounted to ₱52.75 billion in 2024, ₱69.63 billion in 2023 and ₱70.27 billion in 2022.

c. Ancillary Services Procurement Agreement (ASPA)

Certain subsidiaries have ASPA with the National Grid Corporation of the Philippines. Ancillary services are support services such as frequency regulating, contingency and dispatchable reserves, reactive power support, and black start capability which are necessary to support the transmission capacity and energy that are essential in maintaining power quality and security of the grid. Total sale of power under ASPA amounted to ₱6.59 billion in 2024, ₱4.20 billion in 2023 and ₱3.51 billion in 2022.

d. Retail Electricity Supply Agreements (see Note 40i)

Certain subsidiaries have negotiated contracts with contestable customers. These contracts provide supply and delivery of electricity where capacity fees, fixed operating fees and energy fees are at fixed price/kwh or time of use.

Total sale of power under retail electricity supply agreements amounted to ₱45.87 billion, ₱46.12 billion and ₱35.18 billion in 2024, 2023 and 2022, respectively.

22. Purchased Power

Distribution

The Group's distribution utilities entered into contracts with NPC/PSALM and generation companies for the purchase of electricity, and into Transmission Service Agreements with NGCP for the transmission of electricity.

To avail of opportunities in the competitive electricity market, some of the Group's distribution utilities registered as direct participants of the WESM.

Total power purchases amounted to ₱28.55 billion, ₱26.45 billion and ₱29.58 billion in 2024, 2023, 2022, respectively.

Generation

Purchased power takes place during periods when power generated from power plants are not sufficient to meet customers' required power as stated in the power supply contracts. Insufficient supply of generated energy results from the shutdowns due to scheduled maintenance or an emergency situation. The Group purchases power from WESM to ensure uninterrupted supply of power and meet the requirements in the power supply contracts.

The Group entered into Replacement Power Contracts with certain related parties (see Note 32). Under these contracts, the Group supplies power to counterparties when additional power is needed. Correspondingly, when faced with energy shortfalls, the Group purchases power from counterparties.

Total purchased power amounted to ₱9.66 billion, ₱15.43 billion and ₱23.92 billion in 2024, 2023 and 2022, respectively.

Retail Electricity Supply

The Group also purchases from WESM in order to supply its contestable customers.

Total purchased power amounted to ₱29.93 billion, ₱29.58 billion and ₱15.88 billion in 2024, 2023 and 2022, respectively.

23. Cost of Generated Power

	2024	2023	2022
Fuel costs (see Note 7)	₱40,619,982	₱56,001,318	₱52,189,877
Steam supply costs (see Note 36)	5,694,787	6,891,818	7,514,100
Energy fees	630,737	832,137	664,405
Wheeling expenses	107,897	182,310	185,299
Ancillary charges	75,401	65,317	65,448
	₱47,128,804	₱63,972,900	₱60,619,129

24. General and Administrative

	2024	2023	2022
Personnel costs (see Note 26)	₱4,711,700	₱5,018,077	₱3,917,407
Outside services (see Note 32)	2,707,649	1,742,578	1,235,134
Taxes and licenses	1,648,634	1,645,867	1,234,587
Professional fees (see Note 32)	1,347,228	1,450,995	1,021,534
Information technology and communication	758,029	612,889	322,564

(Forward)

	2024	2023	2022
Insurance	₱602,037	₱426,869	₱363,324
Transportation and travel (see Note 32)	510,681	575,842	382,369
Provision for impairment of VAT claims and contingencies	264,695	179,562	42,247
Corporate social responsibility (CSR) (see Note 40)	208,691	319,331	273,899
Repairs and maintenance	202,953	274,797	368,709
Entertainment, amusement and recreation	122,307	103,334	73,389
Advertisements	113,359	65,709	209,706
Rent (see Notes 32 and 35)	105,904	146,511	84,932
Training	95,002	70,606	39,270
Freight, handling, gasoline and oil	56,465	3,363	3,820
Provision for (reversal of) expected credit losses of trade receivables (see Note 6)	22,495	(227,964)	133,735
Market service and administrative fees	22,169	18,902	10,061
Others	476,590	682,043	478,216
	₱13,976,588	₱13,109,311	₱10,194,903

“Others” include host community-related expenses, provision for probable losses, claims conversion costs and utilities expenses.

25. Operations and Maintenance

	2024	2023	2022
Repairs and maintenance	₱4,304,199	₱3,370,485	₱3,542,960
Personnel costs (see Note 26)	2,630,506	2,404,249	1,955,070
Outside services	2,509,732	2,241,004	1,891,540
Insurance	2,399,063	2,906,036	2,545,162
Taxes and licenses	2,129,744	2,084,788	1,764,000
Materials and supplies (see Note 7)	406,403	541,679	334,435
Transportation and travel	109,409	103,965	81,131
Fuel and lube oil (see Note 7)	9,990	7,218	3,405
Rent (see Note 35)	10,101	2,751	15,876
	₱14,509,147	₱13,662,175	₱12,133,579

26. Personnel Costs

	2024	2023	2022
Salaries and wages	₱4,695,799	₱5,982,595	₱4,551,472
Employee benefits (see Note 27)	2,646,407	1,439,731	1,321,005
	₱7,342,206	₱7,422,326	₱5,872,477

27. Pension Benefit Plans

Under the existing regulatory framework, RA 7641, otherwise known as *The Retirement Pay Law*, requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity. It further states that the employees' retirement benefits under any collective bargaining and other agreements shall not be less than those provided under the law. The law does not require minimum funding of the plan.

The Company and its subsidiaries have funded, non-contributory, defined retirement benefit plans ("Plan") covering all regular and full-time employees and requiring contributions to be made to separately administered funds. The retirement benefit fund ("Fund") of each subsidiary is in the form of a trust being maintained and managed by AEV, under the supervision of the Board of Trustees (BOT) of the Plan. The BOT, whose members are also corporate officers, is responsible for the investment of the Fund assets. Taking into account the Plan's objectives, benefit obligations and risk capacity, the BOT periodically defines the investment strategy in the form of a long-term target structure.

The following tables summarize the components of net benefit expense recognized in the consolidated statements of income and the funded status and amounts recognized in the consolidated balance sheets for the respective plans.

Net benefit expense (recognized as part of personnel costs under operations and maintenance and general and administrative expenses):

	2024	2023	2022
Current service cost	₱389,376	₱368,118	₱490,815
Net interest cost	62,180	33,725	10,791
Past service cost	(785)	—	11,325
	₱450,771	₱401,843	₱512,931

Remeasurement effects to be recognized in other comprehensive income:

	2024	2023	2022
Actuarial gains (losses) due to:			
Changes in financial assumptions	(₱91,745)	(₱287,433)	₱354,280
Changes in demographic assumptions	(4,567)	(1,527)	8,582
Return on assets excluding amount included in net interest cost	93,047	(82,173)	(78,561)
Experience adjustments	(9,404)	91,221	(237,509)
	(₱12,669)	(₱279,912)	₱46,792

Net pension assets

	2024	2023
Fair value of plan assets	₱385,547	₱415,625
Present value of the defined benefit obligation	(307,243)	(375,166)
	₱78,304	₱40,459

Net pension liabilities

	2024	2023
Present value of the defined benefit obligation	₱3,729,739	₱3,310,370
Fair value of plan assets	(2,839,895)	(2,407,232)
	₱889,844	₱903,138

Changes in the present value of the defined benefit obligation are as follows:

	2024	2023
At January 1	₱3,685,536	₱2,656,666
Net benefit expense:		
Current service cost	389,376	368,118
Interest cost	238,041	196,876
Past service cost	(785)	—
	626,632	564,994
Benefits paid from retirement fund	(422,896)	(88,313)
Benefits paid from operating funds	(7,995)	(8,501)
Foreign exchange translation differences	24,857	(18,989)
Fund transfer from affiliates	1,394	(16,115)
Remeasurements in other comprehensive income:		
Actuarial losses (gains) due to:		
Experience adjustments	9,404	(91,221)
Changes in demographic assumptions	4,567	1,527
Changes in financial assumptions	91,745	287,433
	105,716	197,739
Increase from step-acquisition (Note 9)	—	398,055
Others	23,738	—
At December 31	₱4,036,982	₱3,685,536

Changes in the fair value of plan assets are as follows:

	2024	2023
At January 1	₱2,822,857	₱2,140,613
Contribution by employer	531,004	283,354
Interest income included in net interest cost	175,861	163,151
Fund transfer from affiliates	1,394	(16,115)
Foreign exchange translation differences	1	(37)
Return on assets excluding amount included in net interest cost	93,047	(82,173)
Benefits paid	(422,896)	(88,313)
Increase from step-acquisition (Note 9)	—	422,377
Others	24,174	—
At December 31	₱3,225,442	₱2,822,857

Changes in net pension liability recognized in the consolidated balance sheets are as follows:

	2024	2023
At January 1	₱862,679	₱516,053
Retirement expense during the year	450,771	401,843
Benefits paid from operating funds	(7,995)	(8,501)
Contribution to retirement fund	(531,004)	(283,354)
Actuarial loss recognized during the year	12,669	279,912
Foreign exchange translation differences	24,856	(18,952)
Increase from step-acquisition (Note 9)	—	(24,322)
Others	(436)	—
At December 31	₱811,540	₱862,679

The fair value of plan assets by each class as at the end of the reporting period are as follows:

	2024	2023
Cash and fixed-income investments	₱551	₱—
Financial assets at FVOCI	₱603,314	₱676,039
Financial assets at amortized cost	804,526	1,393,335
Equity instruments:		
Financial Institution	120,073	491,953
Power	193,681	130,341
Holding	920,046	58,865
Others	583,251	72,324
Fair value of plan assets	₱3,225,442	₱2,822,857

All equity instruments held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets are diverse and do not have any concentration risk.

The BOT reviews the performance of the plans on a regular basis. It assesses whether the retirement plans will achieve investment returns which, together with contributions, will be sufficient to pay retirement benefits as they fall due. The Group also reviews the solvency position of the different member companies on an annual basis and estimates, through the actuary, the expected contribution to the Retirement plan in the subsequent year.

The Company's retirement benefit fund for its employees has investments in the equity of the Company. The carrying value of these investments as of December 31, 2024 and 2023 amounted to ₱138 million. The losses of the Fund arising from such investments in 2024 and 2023 amounted to nil and ₱4.0 million, respectively.

The principal assumptions used as of December 31, 2024, 2023 and 2022 in determining pension benefit obligations for the Group's plans are shown below:

	2024	2023	2022
Discount rates	5.93% - 7.27%	5.83% - 7.93%	3.51% - 6.07%
Salary increase rates	7.00%	7.00%	6.00%

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation, assuming if all other assumptions were held constant:

		2024	2023
	Increase (decrease) in basis points	Effect on defined benefit obligation	
Discount rates	100	(P302,119)	(P168,764)
	(100)	348,945	193,195
Future salary increases	100	P359,254	P201,177
	(100)	(316,595)	(178,891)

The Group's defined benefit pension plans are funded by the Company and its subsidiaries.

The Group expects to contribute P512.2 million to the defined benefit plans in 2025. The average durations of the defined benefit obligation as of December 31, 2024 and 2023 are 5.20 to 18.65 years and 8.79 to 18.30 years, respectively.

28. Other Income

	2024	2023	2022
Net foreign exchange gain (loss)	(P153,619)	P132,865	(P1,139,785)
Surcharges	616,315	632,134	633,962
Rental income	183,245	224,014	200,018
Non-utility operating income	126,774	99,236	146,723
Unrealized fair valuation gain on investment property	26,200	52,401	78,600
Gain (loss) on disposal/retirement of property, plant and equipment	(292,280)	12,634	(34,843)
Write off of project development costs (see Note 13)	(260,284)	(204,546)	(238,021)
Reversal of (provision for) impairment losses on property, plant and equipment (see Note 12)	367,427	(220,000)	(729,255)
Bargain purchase gain and remeasurement of previously held interest - net (see Note 9)	—	1,745,655	—
Others - net	1,067,312	2,159,421	1,597,931
	P1,681,090	P4,633,814	P515,330

Included in "Net foreign exchange gain (loss)" are the net gains and losses relating to currency forward transactions (see Note 34).

Reversal of (provision for) impairment losses mainly pertain to the impairment test calculation of Sacasun and TPVI's property, plant and equipment. Sacasun recognized a gain from the reversal of impairment loss amounting to P490.7 million in 2024 while TPVI recognized additional impairment losses amounting to P55.1 million, P220.0 million and P685.0 million in 2024, 2023 and 2022, respectively, based on specifically identified components that are already considered obsolete.

"Others - net" include derivative gain/loss arising from TLI's commodity hedge amounting to P4.2 million in 2024, P194.0 million in 2023 and P1.70 billion in 2022, net derivative gains arising from currency forward transactions amounting to P308.8 million in 2024 and P121.0 million in 2023, and insurance claims amounting to P303.6 million in 2024 and P1.40 billion in 2023. "Others - net" also include non-recurring items like sale of scrap and sludge oil, and reversal of provisions.

29. Income Tax

The provision for income tax account consists of:

	2024	2023	2022
Current:			
Corporate income tax	₱7,142,864	₱5,346,695	₱3,419,050
Final tax	318,997	290,548	111,785
	7,461,861	5,637,243	3,530,835
Deferred	751,075	1,639,622	1,170,170
	₱8,212,936	₱7,276,865	₱4,701,005

Reconciliation between the statutory income tax rate and the Group's effective income tax rates follows:

	2024	2023	2022
Statutory income tax rate	25.00%	25.00%	25.00%
Tax effects of:			
Nontaxable share in net earnings of associates and joint ventures	(8.54%)	(11.33%)	(11.57%)
Deductible lease payments	—%	(3.86%)	(7.57%)
Income under income tax holiday (ITH)	(0.61%)	(1.53%)	(3.34%)
Movements in unrecognized deferred income tax assets	3.67%	6.88%	9.89%
Nondeductible interest expense	0.39%	0.68%	1.70%
Nondeductible depreciation expense	0.03%	0.64%	0.87%
Interest income subjected to final tax at lower rates - net	(1.18%)	(0.90%)	(0.37%)
Others	(0.88%)	1.05%	(0.24%)
	17.88%	16.63%	14.37%

Deferred income taxes of the companies in the Group that are in deferred income tax assets and liabilities position consist of the following at December 31:

	2024	2023
Net deferred income tax assets:		
Allowances for impairment and probable losses	₱206,037	₱246,517
Net income from commissioning	1,230,826	1,103,664
Difference between the carrying amount of nonmonetary assets and related tax base	(1,902,205)	(1,578,558)
Unrealized foreign exchange loss	928,482	691,888
Net operating loss carryover (NOLCO)	301,553	313,886
Pension liability (asset):		
Unamortized contributions for past service	25,027	31,884
Recognized in other comprehensive income	39,598	26,874
Recognized in statements of income	2,817	83,763
Derivatives - hedge accounting	15,809	88,827
Unamortized customs duties and taxes capitalized	(30,148)	(31,816)
Net provision for rehabilitation and restoration costs	385,934	290,546
Lease liability	204,524	209,700
Right-of use assets	(138,334)	(186,659)
Others	63,564	47,110
Net deferred income tax assets	₱1,333,484	₱1,337,626

	2024	2023
Net deferred income tax liabilities:		
Unamortized franchise	₱546,742	₱565,982
Fair value adjustments of property, plant and equipment	88,959	94,741
Unrealized foreign exchange gains	30,000	718
Capitalized interest	5,927	—
Unamortized customs duties and taxes capitalized	3,434	3,659
Pension asset (liability):		
Recognized in other comprehensive income	(50,423)	(83,672)
Recognized in statements of income	(15,645)	19,107
Unamortized past service cost	(1,795)	(12,067)
Allowances for impairment and probable losses	(373,280)	(334,922)
Difference in treatment of PPA under financial and tax reporting	1,301,638	1,327,887
Lease liability	6,168,658	6,374,957
Right-of-use assets	(2,257,839)	(3,226,683)
Others	32,116	99,780
Net deferred income tax liabilities	₱5,478,492	₱4,829,487

In computing for deferred income tax assets and liabilities, the rates used were 25% and 10% as of December 31, 2024 and 2023, which are the rates expected to apply to taxable income in the years in which the deferred income tax assets and liabilities are expected to be recovered or settled and considering the tax rate for renewable energy (RE) developers as allowed by the Renewable Energy Act of 2008 (see Note 40i).

No deferred income tax assets were recognized on the Group's NOLCO and MCIT amounting to ₱31.31 billion and ₱797.3 million, respectively, as of December 31, 2024 and ₱27.15 billion and ₱619.3 million, respectively, as of December 31, 2023, since management expects that it will not generate sufficient taxable income in the future that will be available to allow all of the deferred income tax assets to be utilized.

Provision for or benefit from deferred income tax on cash flow hedges recognized in other comprehensive income amounted to ₱73.0 million, ₱829.0 million and ₱506.0 million in 2024, 2023 and 2022, respectively.

There are no income tax consequences to the Group attaching to the payment of dividends to its shareholders.

The Organisation for Economic Co-operation and Development (OECD) has published the Global Anti-Base Erosion (GloBE) Model Rules ("Pillar Two Rules"), which subjects multinational enterprises with an annual consolidated group revenue of EUR750 million or more for 2 out of the 4 immediately preceding fiscal years to a minimum 15% tax rate in each of the jurisdictions where they operate.

The Group is a member of a multinational enterprise group that is in-scope for Pillar Two. The Group assessed the applicable Pillar Two tax legislation in all the countries in which its subsidiaries operate to determine whether a Pillar Two 'top-up' tax liability needs to be recognized. However, none of the jurisdictions in which the Group operates has an enacted and effective Pillar Two tax legislation for the current audit period. Hence, the Group does not expect an exposure to Pillar Two income taxes for the year 2024.

Nonetheless, the Group assessed its potential Pillar Two 'top-up tax' exposure for the year ended December 31, 2024 by applying the Transitional CbCR Safe Harbour (TCSH) test to the jurisdictions where it operates. Technically, the TCSH test should be based on a qualified country-by-country report (CbCR) for the year. However, as of the date of these consolidated financial statements, the CbCR for 2024 is not available. Hence, the Group used the most recent information on the financial performance of the Group. Based on the assessment performed, the jurisdictions where the Group operates should benefit from the transitional CbCR safe harbour relief such that there should be no impact to the consolidated financial statements of the Group.

The Group adopts the PAS 12 amendments which allows a mandatory temporary exception from recognizing or disclosing information about deferred tax assets and liabilities related to Pillar Two at December 31, 2024.

30. Earnings Per Common Share

Basic and diluted earnings per common share amounts were computed as follows:

	2024	2023	2022
a. Net income attributable to equity holders of the parent	₱33,900,184	₱33,101,720	₱25,998,668
b. Weighted average number of common shares issued and outstanding	7,205,854,307	7,318,142,937	7,358,604,307
Basic and diluted earnings per common share (a/b)	₱4.70	₱4.52	₱3.53

There are no dilutive potential common shares for the years ended December 31, 2024, 2023 and 2022.

31. Operating Segment Information

Operating segments are components of the Group that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the Group's CODM to make decisions about how resources are to be allocated to the segment and assess their performances, and for which discrete financial information is available.

For purposes of management reporting, the Group's operating businesses are organized and managed separately according to services provided, with each segment representing a strategic business segment. The Group's identified operating segments, which are consistent with the segments reported to the BOD, which is the Group's CODM, are as follows:

- "Power Generation" segment, which is engaged in the generation and supply of power to various customers under power supply contracts, ancillary service procurement agreements and for trading in WESM;
- "Power Distribution" segment, which is engaged in the distribution and sale of electricity to the end-users; and
- "Parent Company and Others", which includes the operations of the Company, retail electricity sales to various off takers that are considered to be eligible contestable customers (see Note 40i) and electricity related services of the Group such as installation of electrical equipment.

The power generation segment's revenue from contracts with customers is mainly from power supply contracts. Set out below is the disaggregation of the Group's revenue from contracts with customers:

2024

	Power Generation	Power Distribution	Retail electricity supply	Parent and Others	Total
Revenue from power supply contracts	₱52,751,975	₱—	₱—	₱—	₱52,751,975
Revenue from distribution services	—	56,994,259	—	—	56,994,259
Revenue from retail electricity sales	—	—	45,868,950	—	45,868,950
Revenue from non-power supply contracts	40,431,518	—	—	—	40,431,518
Revenue from technical and management services	—	—	—	260,264	260,264
Revenue from interest income on concession contract asset	1,185,291	—	—	—	1,185,291
	₱94,368,784	₱56,994,259	₱45,868,950	₱260,264	₱197,492,257

2023

	Power Generation	Power Distribution	Retail electricity supply	Parent and Others	Total
Revenue from power supply contracts	₱69,630,934	₱—	₱—	₱—	₱69,630,934
Revenue from distribution services	—	53,362,657	—	—	53,362,657
Revenue from retail electricity sales	—	—	46,123,403	—	46,123,403
Revenue from non-power supply contracts	37,164,944	—	—	—	37,164,944
Revenue from technical and management services	—	—	—	101,741	101,741
Revenue from interest income on concession contract asset	716,218	—	—	—	716,218
	₱107,512,096	₱53,362,657	₱46,123,403	₱101,741	₱207,099,897

2022

	Power Generation	Power Distribution	Retail electricity supply	Parent and Others	Total
Revenue from power supply contracts	₱70,268,058	₱—	₱—	₱—	₱70,268,058
Revenue from distribution services	—	57,235,327	—	—	57,235,327
Revenue from retail electricity sales	—	—	35,179,570	—	35,179,570
Revenue from non-power supply contracts	31,232,574	—	—	—	31,232,574
Revenue from technical and management services	—	—	—	78,059	78,059
	₱101,500,632	₱57,235,327	₱35,179,570	₱78,059	₱193,993,588

The revenue from contracts with customers is consistent with the revenue with external customers presented in segment information.

The Group has only one geographical segment as most of its assets are located in the Philippines. The Group operates and derives principally all of its revenue from domestic operations. Thus, geographical business information is not required.

Management monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment revenue and segment expenses are measured in accordance with PFRSs Accounting Standards. The presentation and classification of segment revenue and segment expenses are consistent with the consolidated statements of income. Interest expense and financing charges, depreciation and amortization expense and income taxes are managed on a per segment basis.

The Group has inter-segment revenues in the form of management fees as well as inter-segment sales of electricity which are eliminated in consolidation. The transfers are accounted for at competitive market prices.

Capital expenditures consist of additions of property, plant and equipment and intangible asset - service concession rights. Adjustments as shown below include items not presented as part of segment assets and liabilities.

Revenue is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

Financial information on the operations of the various business segments is summarized as follows:

2024

	Power Generation	Power Distribution	Parent Company/ Others	Eliminations and adjustments	Consolidated

32. Related Party Disclosures

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

The Group enters into transactions with its parent, associates, joint ventures and other related parties, principally consisting of the following:

- a. The Company provides services to certain associates and joint ventures such as technical and legal assistance for various projects and other services.
- b. Energy fees are billed by the Group to related parties and the Group also purchased power from associates and joint ventures, arising from the following:
 - PPA/PSA or ESA (see Note 21)
 - Replacement power contracts (see Note 22)
- c. AEV provides human resources, internal audit, legal, treasury and corporate finance services, among others, to the Group and shares with the member companies the business expertise of its highly qualified professionals. Transactions are priced based on agreed rates, and billed costs are always benchmarked to third party rates. Service level agreements are in place to ensure quality of service. This arrangement enables the Group to maximize efficiencies and realize cost synergies. These transactions result to professional and technical fees paid by the Group to AEV (see Note 24).
- d. Aviation services are rendered by AAI, an associate, to the Group.
- e. Lease of commercial office units by the Group from Cebu Praedia Development Corporation (CPDC) and Aboitizland, Inc. and subsidiaries. CPDC and Aboitizland, Inc. are subsidiaries of AEV.
- f. Aboitiz Construction, Inc. (ACI), a wholly owned subsidiary of ACO, rendered its services to the Group for various construction projects.
- g. LEZ entered into a Concession Agreement with Lima Land, Inc. (LLI) for which it is entitled to the exclusive right to distribute and supply electricity to LLI's locators.
- h. Interest-bearing advances from AEV and subsidiaries availed by the Group.

- i. TLI entered into a contract for difference with SNAP-Magat to pay with respect to the difference between the strike price and the reference price for a specified electricity quantity.
- j. Cash deposits with Union Bank of the Philippines (UBP) earn interest at prevailing market rates (see Note 5). UBP is an associate of AEV.
- k. The Company obtained Standby Letter of Credit (SBLC) and is acting as surety for the benefit of certain associates and joint ventures in connection with loans and credit accommodations. The Company provided SBLC for SPI, CEDC, and SNAP B in the amount of nil in 2024, nil in 2023 and ₱100.2 million in 2022.

The above transactions are settled in cash.

The consolidated balance sheets and consolidated statements of income include the following significant account balances resulting from the above transactions with related parties:

a. Revenue - Technical, management and other fees

The Company's Fund is in the form of a trust being maintained and managed by AEV. In 2024 and 2023, other than contributions to the Fund, no transactions occurred between the Company or any of its direct subsidiaries and the Fund.

Compensation of BOD and key management personnel of the Group follows:

	2024	2023	2022
Short-term benefits	₱749,670	₱236,237	₱236,170
Post-employment benefits	5,850	5,980	4,000
	₱755,520	₱242,217	₱240,170

33. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise of cash and cash equivalents and long-term debts. The main purpose of these financial instruments is to raise finances for the Group's operations. The Group has various other financial instruments such as trade and other receivables, investments in equity securities, short-term loans, trade and other payables, lease liabilities, long-term obligation on power distribution system and customers' deposits, which generally arise directly from its operations.

The Group also enters into derivative transactions, particularly foreign currency forwards to economically hedge its foreign currency risk from foreign currency denominated liabilities and purchases, commodity swap contracts to hedge the price volatility of forecast coal purchases and interest rate swap agreement to hedge the variability in the interest cash flow of its LIBOR loan.

Risk Management Structure

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group.

Financial risk committee

The Financial Risk Committee has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Group's approach to risk issues in order to make relevant decisions.

Treasury service group

The Treasury Service Group is responsible for the comprehensive monitoring, evaluating and analyzing of the Group's risks in line with the policies and limits.

The main risks arising from the Group's financial instruments are interest rate risk, credit risk, liquidity risk, commodity price risk and foreign exchange risk.

Liquidity risk

Liquidity risk is the risk of not meeting obligations as they become due because of the inability to liquidate assets or obtain adequate funding. The Group maintains sufficient cash and cash equivalents to finance its operations. Any excess cash is invested in short-term money market placements. These placements are maintained to meet maturing obligations and pay any dividend declarations.

In managing its long-term financial requirements, the Group's policy is that not more than 25% of long-term borrowings should mature in any twelve-month period. 7.31% and 4.78% of the Group's debt will mature in less than one year as of December 31, 2024 and 2023, respectively. For its short-term funding, the Group's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

The financial assets that will be principally used to settle the financial liabilities presented in the following table are from cash and cash equivalents amounting to ₱56.76 billion and ₱54.54 billion as of December 31, 2024 and 2023, respectively, and trade and other receivables amounting to ₱36.59 billion and ₱34.25 billion as of December 31, 2024 and 2023, respectively. Cash and cash equivalents can be withdrawn anytime while trade and other receivables are expected to be collected/realized within one year.

The following tables summarize the maturity profile of the Group's financial liabilities as of December 31, 2024 and 2023 based on contractual undiscounted payments including future interest:

December 31, 2024

	Total carrying value	Contractual undiscounted payments				
		Total	On demand	<1 year	1 to 5 years	> 5 years

Long-term obligation on PDS	122,730	160,000	—	40,000	120,000	—
Derivative liabilities	481,595	481,595	—	481,595	—	—
	₱274,485,678	₱299,261,763	₱3,705,291	₱58,166,570	₱119,212,996	₱118,176,906

Market risk

The risk of loss, immediate or over time, due to adverse fluctuations in the price or market value of instruments, products, and transactions in the Group's overall portfolio (whether on or off-balance sheet) is market risk. These are influenced by foreign and domestic interest rates, foreign exchange rates and gross domestic product growth.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to its long-term debt obligations. To manage this risk, the Group determines the mix of its debt portfolio as a function of the level of current interest rates, the required tenor of the loan, and the general use of the proceeds of its various fund raising activities. As of December 31, 2024, 7% of the Group's long-term debt had annual floating interest rates ranging from 1.5% to 7.68%, and 93% have annual fixed interest rates ranging from 4.27% to 9%. As of December 31, 2023, 7% of the Group's long-term debt had annual floating interest rates ranging from 1.5% to 7.68%, and 93% have annual fixed interest rates ranging from 4.27% to 9%.

The following tables set out the carrying amounts, by maturity, of the Group's financial instruments that are exposed to cash flow interest rate risk:

As of December 31, 2024

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	₱1,834,178	₱12,529,622	₱162,494	₱14,526,294

As of December 31, 2023

	<1 year	1-5 years	>5 years	Total
Floating rate - long-term debt	₱1,802,301	₱7,566,932	₱6,606,116	₱15,975,349

Interest on financial instruments classified as floating rate is repriced at intervals of less than one year. Interest on financial instruments classified as fixed rate is fixed until the maturity of the instrument. The other financial instruments of the Group that are not included in the above tables are noninterest-bearing and are therefore not subject to interest rate risk. The Group's derivative assets and liabilities are subject to fair value interest rate risk (see Note 34).

The following table demonstrates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant, of the Group's income before tax (through the impact on floating rate borrowings):

	Increase (decrease) in basis points	Effect on income before tax
December 2024	200	(₱290,526)
	(100)	145,263
December 2023	200	(₱319,507)
	(100)	159,753

There is no other impact on the Group's equity other than those already affecting the consolidated statements of income.

The interest expense and other finance charges recognized according to source are as follows:

	2024	2023	2022
Short-term loans and long-term debt (see Notes 16 and 17)	₱13,891,846	₱12,409,419	₱10,651,537
Lease liabilities (see Note 35)	266,546	1,283,213	2,391,695
Customers' deposits (see Note 18)	2,245	2,492	1,207
Loss on loan extinguishment (see Note 17)	—	8,586	44,962
Other long-term obligations (see Notes 19)	440,086	457,936	330,947
	₱14,600,723	₱14,161,646	₱13,420,348

Commodity Price Risk

Commodity price risk of the Group arises from transactions on the world commodity markets to secure the supply of fuel, particularly coal, which is necessary for the generation of electricity.

The Group's objective is to minimize the impact of commodity price fluctuations and this exposure is hedged in accordance with the Group's commodity price risk management strategy.

Based on a 36-month forecast of the required coal supply, the Group hedges the purchase price of coal using commodity swap contracts. The commodity swap contracts do not result in physical delivery of coal, but are designated as cash flow hedges to offset the effect of price changes in coal.

Foreign exchange risk

The foreign exchange risk of the Group pertains significantly to its foreign currency denominated obligations. To manage its foreign exchange risk, stabilize cash flows and improve investment and cash flow planning, the Group enters into foreign currency forward contracts aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on financial performance and cash flows. Foreign currency denominated borrowings account for 14.11% and 13.22% of total consolidated borrowings as of December 31, 2024 and 2023, respectively.

Presented below are the Group's foreign currency denominated financial assets and liabilities translated to Philippine Peso:

	December 31, 2024		December 31, 2023	
	US Dollar	Philippine Peso equivalent ¹	US Dollar	Philippine Peso equivalent ²
Financial assets:				
Cash and cash equivalents	\$214,008	₱12,379,293	\$159,006	₱8,804,162
Trade and other receivables	2,443	141,315	70,309	3,893,009
Advances to associates	21	1,215	258	14,285
Total financial assets	216,472	12,521,823	229,573	12,711,456
Financial liabilities:				
Trade and other payables	3,753	217,092	64,986	3,598,275
Total net financial assets	\$212,719	₱12,304,731	\$164,587	₱9,113,181

¹US\$1 = ₱57.85

²US\$1 = ₱55.37

The following table demonstrates the sensitivity to a reasonable possible change in the US dollar exchange rates, with all other variables held constant, of the Group's income before tax as of December 31:

	Increase (decrease) in US Dollar	Effect on income before tax
2024		
US Dollar denominated accounts	US Dollar strengthens by 5%	₱615,237
US Dollar denominated accounts	US Dollar weakens by 5%	(615,237)
2023		
US Dollar denominated accounts	US Dollar strengthens by 5%	₱455,659
US Dollar denominated accounts	US Dollar weakens by 5%	(455,659)

The increase in US Dollar rate represents the depreciation of the Philippine Peso while the decrease in US Dollar rate represents appreciation of the Philippine Peso.

The following table presents LHC's, GMEC's, SPI's and PIPL's foreign currency denominated assets and liabilities:

	2024		2023	
	Philippine Peso	US Dollar Equivalent ¹	Philippine Peso	US Dollar Equivalent ²
Financial assets:				
Cash and cash equivalents	₱6,989,954	\$120,839	₱9,008,117	\$162,689
Trade and other receivables	11,077,046	191,495	7,078,677	127,843
	18,067,000	312,334	16,086,794	290,532
Financial liabilities:				
Trade and other payables	8,480,737	146,611	4,154,504	75,032
Net foreign currency denominated assets	₱9,586,263	\$165,723	₱11,932,290	\$215,500

¹US\$1 = ₱57.85

²US\$1 = ₱55.37

The following tables demonstrate the sensitivity to a reasonable possible change in the US dollar exchange rate in relation to Philippine peso, with all variables held constant, of the Group's income before tax as of December 31:

	Effect on income before tax	
	2024	2023
US dollar appreciates against Philippine peso by 5.0%	(\$8,286)	(\$10,775)
US dollar depreciates against Philippine peso by 5.0%	8,286	10,775

There is no other impact on the Group's equity other than those already affecting the consolidated statements of income.

Credit risk

For its cash investments (including restricted portion) and receivables, the Group's credit risk pertains to possible default by the counterparty, with a maximum exposure equal to the carrying amount of these investments. With respect to cash investments, the risk is mitigated by the short-term and/or liquid nature of its cash investments mainly in bank deposits and placements, which are placed with financial institutions and entities of high credit standing. With respect to receivables, credit risk is controlled by the application of credit approval, limit and monitoring procedures. It is the Group's policy to only enter into transactions with credit-worthy parties to mitigate any significant concentration of credit risk. The Group ensures that sales are made to customers with appropriate credit history and it has internal mechanisms to monitor the granting of credit and management of credit exposures.

Concentration risk

Credit risk concentration of the Group's receivables according to the customer category as of December 31, 2024 and 2023 is summarized in the following table:

	2024	2023
Power distribution:		
Industrial	₱11,415,839	₱9,250,799
Residential	3,363,528	2,193,446
Commercial	1,135,639	1,147,583
City street lighting	36,456	33,964
Power generation:		
Power supply contracts	9,990,081	14,210,326
Spot market	4,633,995	3,181,336
	₱30,575,538	₱30,017,454

The above receivables were provided with allowance for ECL amounting to ₱3.51 billion and ₱3.38 billion as of December 31, 2024 and 2023, respectively (see Note 6).

The following are the details of the Group's assessment of credit quality and the related ECLs as at December 31, 2024 and 2023:

	2024				Total
	Stage 1 12-month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL	Lifetime ECL Simplified Approach	
Gross carrying amount	₱81,275,422	₱—	₱—	₱30,575,538	₱111,850,960
Loss allowance	—	—	—	3,512,890	3,512,890
Carrying amount	₱81,275,422	₱—	₱—	₱27,062,648	₱108,338,070

	2023				
	Stage 1 12-month ECL	Stage 2 Lifetime ECL	Stage 3 Lifetime ECL	Lifetime ECL Simplified Approach	Total
Gross carrying amount	₱76,585,810	₱—	₱—	₱30,017,454	₱106,603,264
Loss allowance	—	—	—	3,376,162	3,376,162
Carrying amount	₱76,585,810	₱—	₱—	₱26,641,292	₱103,227,102

Trade and other receivables that are individually determined to be impaired at the balance sheet date relate to debtors that are in significant financial difficulties and have defaulted on payments and accounts under dispute and legal proceedings.

The Group evaluated its cash and cash equivalents and restricted cash as high quality financial assets since these are placed in financial institutions of high credit standing.

With respect to other receivables, investments in equity securities and derivative assets, the Group evaluates the counterparty's external credit rating in establishing credit quality.

Below is the information about the credit risk exposure on the Group's trade receivables using a provision matrix:

December 31, 2024

	Expected credit loss					
	Current	< 30 days	31- 60 days	61 - 90 Days	Over 90 days	Total
Expected credit loss rate	0.75%	1.89%	2.40%	1.01%	92.91%	
Estimated total gross carrying amount at default	₱20,392,594	₱2,339,373	₱621,889	₱3,708,792	₱3,512,890	₱30,575,538
Expected credit loss	152,294	44,220	14,954	37,472	3,263,950	3,512,890

December 31, 2023

	Expected credit loss					
	Current	< 30 days	31- 60 days	61 - 90 days	Over 90 days	Total
Expected credit loss rate	1.41%	0.91%	6.86%	1.66%	87.72%	
Estimated total gross carrying amount at default	₱19,797,562	₱2,903,990	₱840,660	₱3,099,080	₱3,376,162	₱30,017,454
Expected credit loss	279,040	26,490	57,701	51,302	2,961,629	3,376,162

The tables below show the Group's aging analysis of financial assets:

December 31, 2024

	Total	Current	Less than 30 days	31 days to 60 days	Over 60 days	Individually impaired
Cash and cash equivalents:						
Cash on hand and in banks	₱7,812,135	₱7,812,135	₱—	₱—	₱—	₱—

Capital Management

Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares.

The Group monitors capital using a gearing ratio, which is net debt divided by equity plus net debt. The Group's policy is to keep the gearing ratio at 70% or below. The Group determines net debt as the sum of interest-bearing short-term loans, long-term loans, and lease liabilities less cash and short-term deposits (including restricted cash).

Gearing ratios of the Group as of December 31, 2024 and 2023 are as follows:

	2024	2023
Short-term loans	₱25,035,435	₱19,959,100
Long-term debt	213,719,266	214,271,130
Lease liabilities	4,445,893	2,914,845
Cash and cash equivalents	(56,759,297)	(54,538,784)
Restricted cash	(6,098,865)	(4,736,119)
Net debt (a)	180,342,432	177,870,172
Equity	215,896,682	193,974,365
Equity and net debt (b)	₱396,239,114	₱371,844,537
Gearing ratio (a/b)	45.51%	47.83%

Part of the Group's capital management is to ensure that it meets financial covenants attached to long-term borrowings. Breaches in meeting the financial covenants would permit the banks to immediately call loans and borrowings. The Group is in compliance with the financial covenants attached to its long-term debt as of December 31, 2024 and 2023 (see Note 17).

Certain entities within the Group that are registered with the BOI are required to raise a minimum amount of capital in order to avail of their registration incentives. As of December 31, 2024 and 2023, these entities have complied with the requirement as applicable (see Note 37).

No changes were made in the objectives, policies or processes during the years ended December 31, 2024 and 2023.

34. Financial Instruments

Fair Value of Financial Instruments

Fair value is defined as the amount at which the financial instrument could be sold in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

A financial instrument is regarded as quoted in an active market if quoted prices are readily available from an exchange, dealer, broker, pricing services or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. For a financial instrument with an active market, the quoted market price is used as its fair value. On the other hand, if transactions are no longer regularly occurring even if prices might be available and the only observed transactions are forced transactions or distressed sales, then the market is considered inactive. For a financial instrument with no active market, its fair value is determined using a valuation technique (e.g. discounted cash flow approach) that incorporates all factors that market participants would consider in setting a price.

Set out below is a comparison by category of carrying amounts and fair values of the Group's financial instruments whose fair values are different from their carrying amounts.

	December 31, 2024		December 31, 2023	
	Carrying Amounts	Fair Values	Carrying Amounts	Fair Values
Financial Asset				
Concession contract asset	₱8,886,664	₱10,167,633	₱—	₱—
Financial Liabilities				
Lease liabilities	₱4,445,893	₱6,048,230	₱2,914,845	₱3,119,858
Long-term debt - fixed rate	199,192,972	197,985,928	198,295,781	185,830,378
Long-term obligation on power distribution system	97,238	119,261	122,730	167,708
	₱203,736,103	₱204,153,419	₱201,333,356	₱189,117,944

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables. The carrying amounts of cash and cash equivalents, trade and other receivables, short-term loans and trade and other payables approximate fair value due to the relatively short-term maturity of these financial instruments.

Fixed-rate borrowings. The fair value of fixed rate interest-bearing loans is based on the discounted value of future cash flows using the applicable rates for similar types of loans. Interest-bearing loans were discounted using credit-adjusted interest rates ranging from 4.82% to 7.89% in 2024 and 5.12% to 7.71% in 2023.

Floating-rate borrowings. Since repricing of the variable-rate interest bearing loan is done on a quarterly basis, the carrying value approximates the fair value.

Lease liabilities. The fair value of lease liabilities was calculated by discounting future cash flows using discount rates of 5.30% to 12.5% for peso payments in 2024 and 5.30% to 12.5% for peso payments in 2023.

Concession contract asset. The fair value of the concession contract asset is calculated by discounting expected future cash flows at prevailing market rates. Discount rate used in discounting the asset is 7.89% in 2024. In 2023, the carrying amount approximates to its fair value.

Long-term obligation on PDS. The fair value of the long-term obligations on power distribution system is calculated by discounting expected future cash flows at prevailing market rates. Discount rates used in discounting the obligation ranges from 3.94% to 5.94% in 2024 and 2023.

Customers' deposits. The fair value of bill deposits approximates the carrying values as these deposits earn interest at the prevailing market interest rate in accordance with regulatory guidelines.

Financial assets at FVTPL. These equity securities are carried at fair value.

Derivative financial instruments. The fair value of forward contracts is calculated by reference to prevailing interest rate differential and spot exchange rate as of valuation date, taking into account its remaining term to maturity. The fair value of the IRS and interest rate cap are determined by generally accepted valuation techniques with reference to observable market data such as interest rates.

The Group entered into an IRS agreement to fully hedge its floating rate exposure on its foreign currency-denominated loan and par forward contracts to hedge the floating rate exposure on foreign-currency-denominated payments.

The Group also entered into deliverable and non-deliverable short-term forward contracts with counterparty banks to manage its foreign currency risks associated with foreign currency-denominated liabilities, purchases and highly probable forecasted purchases.

The Group also entered into commodity swap contracts to hedge the price volatility of its forecasted coal purchases.

IRS

On September 29, 2017, GMEC entered into an IRS agreement to hedge the variability in the interest cash flows on the entire amount of its LIBOR Loan (see Note 17), which bears interest based on six-month US LIBOR. Under the swap agreement, GMEC pays a fixed rate of 2.18% and receives six-month US LIBOR, semi-annually from March 29, 2018 until September 27, 2024. The IRS settlement dates coincide with the semi-annual interest payment dates of the NFA. GMEC designated the swap as a cash flow hedge. Due to the demise of LIBOR effective June 30, 2023, GMEC has transitioned to the adoption of US\$ Secured Overnight Financing Rate (SOFR), compounded in arrears and a credit adjustment of 35 basis points. GMEC did not renew the swap after its maturity in September 2024.

As of December 31, 2023, the outstanding notional amount and derivative asset as a result of the swap amounted to US\$200.8 million and ₱333.3 million, respectively.

Dollar-Hold

In 2024, certain USD-denominated cash and cash equivalents in various banks aggregating to US\$98.3 million are designated as hedging instrument for the foreign currency risk of the US\$98.3 million portion of US\$712.3 million highly probable forecasted acquisition.

There is an economic relationship between the hedged item and the hedging instrument since the critical terms of the forecasted acquisition costs and the USD-denominated cash and cash equivalents (notional amount and currency denomination) are matched. The hedge ratio is 1:1 as the notional amount of the hedging instrument exactly matches the notional amount of the hedged portion of the USD-denominated forecasted acquisition costs.

A possible source of ineffectiveness could be the impact of the time value of money due to the timing of the highly probable forecasted acquisition. Nonetheless, since the expected acquisition is highly probable within the next twelve months, the impact of the time value of money might be considered insignificant.

Foreign currency forward contracts

TLI has foreign exchange forward contracts designated as hedging instrument in a cash flow hedges of forecasted coal purchases and PSALM monthly fees in USD. These forecast transactions are highly probable and they comprise about 20% of TLI's total expected coal purchases in USD and PSALM USD payments for the following year. The foreign exchange forward contracts vary with the level of expected foreign currency purchases and changes in foreign exchange forward rates.

Non-deliverable forward contracts

In 2022, the Group entered into non-deliverable forward (NDF) contracts with counterparty banks to manage foreign currency risks associated with US Dollar commitments for the completion of its renewable projects. The Group designated these NDF contracts as a cash flow hedge. In 2024, these NDF contracts matured and settled.

In 2024, the Group entered into another NDF contract to manage foreign currency risk associated with its Chinese Yuan (CNY) commitments.

As of December 31, 2024, the outstanding notional amount and fair value of the NDF contracts amounted to ₱4.90 billion and ₱481.6 million, respectively. As of December 31, 2023, the outstanding notional amount and fair value of the NDF contracts amounted to ₱1.92 billion and ₱65.2 million, respectively.

Commodity swap contracts

In 2018, TLI entered into commodity swap contracts to hedge the price volatility of forecasted coal purchases. The commodity swaps do not result in physical delivery of coal, but are designated as cash flow hedges to offset the effect of price changes in coal. TLI hedges approximately 30% of its expected coal purchases considered to be highly probable. There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign currency forward and commodity swap contracts match the terms of the expected highly probable forecasted transactions.

There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign currency forward, IRS and commodity swap contracts match the terms of the expected highly probable foreign currency denominated forecasted purchases and floating rate loans. The Group has established a hedge ration of 1:1 for the hedging relationships as the underlying risk of the foreign currency forward, IRS and commodity swap contracts are identical to the hedged risk components. To test the hedge effectiveness, the Group uses the hypothetical derivative technique and compares the changes in the fair value of the hedging instruments against the changes in fair value of the hedged items attributable to the hedged risks.

The hedge ineffectiveness can arise from:

- Different reference prices linked to the hedged risk of the hedged items and hedging instruments
- Differences in the timing of the cash flows of the hedged items and the hedging instruments

- The counterparties' credit risk differently impacting the fair value movements of the hedging instruments and hedged items
- Changes to the forecasted amount of cash flows of hedged items and hedging instruments
- Non-zero fair value hedging instrument

The Group is holding the following hedging instruments designated as cash flow hedges:

December 31, 2024

The movements in fair value changes of all derivative instruments for the year ended December 31, 2024 and 2023 are as follows:

	2024	2023
At beginning of year	(₱126,287)	₱2,464,763
Net changes in fair value of derivatives designated as cash flow hedges	207,317	(2,591,050)
Net changes in fair value of derivatives not designated as accounting hedges	—	100,968
Fair value of settled instruments	—	(100,968)
At end of year	₱81,030	(₱126,287)

The net gains and losses from the net fair value changes of derivatives not designated as accounting hedges are included under “Net foreign exchange gain (losses)” in Note 28.

The changes in the fair value of derivatives designated as cash flow hedges were deferred in equity under “Cash flow hedge reserve.”

The net movement of changes to cash flow hedge reserve is as follows:

	2024	2023
Balance at beginning of year (net of tax)	(P215,114)	P2,135,647
Changes in fair value recorded in equity	499,389	(678,157)
	284,275	1,457,490
Derecognition	(249,967)	—
Changes in fair value transferred to profit or loss	25,409	(1,761,431)
Balance at end of year before deferred tax effect	59,717	(303,941)
Deferred tax effect	5,504	88,827
Balance at end of year (net of tax)	P65,221	(P215,114)

As of December 31, 2024 and 2023, the Group held the following financial instruments that are measured and carried or disclosed at fair value:

December 31, 2024

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
Derivative assets	P314,646	P—	P314,646	P—

Long-term debt - fixed rate	185,830,378	—	—	185,830,378
Long-term obligation on PDS	167,708	—	—	167,708

The fair values of the Group's investment properties were determined as follows:

- In valuing the land, the Group used the Sales Comparison Approach. This is a comparative approach to value that considers the sales of similar or substitute properties and related market data and establishes a value estimate by processes involving comparison.
- The appraiser gathers data on actual sales and/or listings, offers, and renewal options, and identifies the similarities and differences in the data, ranks the data according to their relevance, adjusts the sales prices of the comparable to account for the dissimilarities with the unit being appraised, and forms a conclusion as to the most reasonable and probable market value of the subject property.

The elements of comparison include location, physical characteristics, available utilities, zoning, and highest and best use. The most variable elements of comparison are the site's physical characteristics, which include its size and shape, frontage, topography and location.

Fair value investment properties are estimated under Level 3 inputs.

During the years ended December 31, 2024 and 2023, there were no transfers between level 1 and level 2 fair value measurements and transfers into and out of level 3 fair value measurement.

35. Lease Agreements

Company

The Company entered into an operating lease agreement with Ayala Land Inc. for its use of administrative office space and parking space for a period of 16 years from August 1, 2024 to July 31, 2040. The lease contract has an escalation of 3.0% per annum.

TLI

In 2009, TLI was appointed by PSALM as Administrator under the IPP Administration Agreement, giving TLI the right to receive, manage and control the capacity of the power plant for its own account and at its own cost and risk; and the right to receive the transfer of the power plant at the end of the IPP Administration Agreement for no consideration.

In view of the nature of the IPP Administration Agreement, the arrangement has been considered as a lease. Accordingly, TLI recognized the right-of-use asset and related liability of ₱44.79 billion (equivalent to the present value of the minimum lease payments using TLI's incremental borrowing rates of 10% and 12% for dollar and peso payments, respectively) in the consolidated financial statements as "ROU - Power plant" and "Lease liabilities" accounts, respectively.

In November 2023, TLI prepaid the full amount of the remaining lease payments amounting to ₱13.80 billion. This resulted to a reduction in the right-of-use asset account amounting to ₱3.56 billion.

In December 2024, TLI entered into a lease agreement with PSALM for the parcels of land situated in Pagbilao. The lease will commence on the transfer date of the power plant for a period of 20 years. In 2024, TLI prepaid the lease amounting to ₱3.0 million (see Note 14).

APRI

On May 25, 2009, APRI entered into a lease agreement with PSALM for a parcel of land owned by the latter on which a portion of the assets purchased under the APA is situated. The lease term is for a period of 25 years commencing from the Closing Date as defined in the APA which falls on May 25, 2009. The rental fees for the whole term of 25 years amounting to ₱492.0 million were paid in full after the receipt by APRI of the Certificate of Effectivity on the lease (see Notes 8 and 14).

GMEC

In August 2007, a 25-year lease agreement with Authority of the Freeport Area of Bataan for land at Bataan Economic Zone, used as an access road and right of way for electric power transmission lines.

In January 2010, a 50-year land lease agreement with PMR Group Retirement Plan, Inc. (PGRPI), used for its power plant facilities. GMEC, upon mutual agreement of PGRPI, has the right and option to extend the lease for a period of twenty-five years. In August 2016, GMEC entered into another lease agreement with PGRPI for land to be used for staff house.

On January 16, 2015, GMEC and Worth Properties, Inc. executed a Lease Agreement for the lease of 276.13 square meters office space and two parking lots. The contract of lease is effective for a period of five years commencing on February 17, 2015 and was terminated effective on December 31, 2021.

HI, HTI, HBI, HSAB, LHC and HSI

HI, HTI, HBI, HSAB, LHC and HSI entered into contracts with various lot owners for lease of land where their power plants are located. Terms of contract are for a period of 1 to 50 years renewable upon mutual agreement by the parties.

Sacasun

Sacasun entered into a contract for lease of land where the power plant is located. The contract pertains to rent for 23 years renewable upon mutual agreement by the parties.

EAUC

Lease agreement with PEZA for a piece of land located inside Mactan Economic Zone for its power plant facilities for a period of 25 years.

TPVI

TPVI entered into a contract for lease of land where the power plant is located. The contract pertains to rent for 25 years renewable upon mutual agreement by the parties. The lease term may be renewed or extended for another 5 years upon the mutual written agreement of the parties. In 2024, TPVI assigned to its affiliate the right to purchase the land. The sale was executed on October 9, 2024. This resulted to derecognition of the right-of-use asset with carrying value of ₱447.0 million.

TMI

TMI entered into a lease contract with the Philippine Fisheries Development Authority on April 26, 2022 for some portions of the breakwater area of the Navotas Fishport Complex for a period of 15 years. They also have a lease contract with Montgomery Real Estate Lessor for their administrative office for a period of 15 years.

SPI

Lease agreement covering its head office, which was renewed in May 2021 until June 2026, with escalation clause of 3% applicable annually starting on the second year of the term.

CEDI

CEDI entered into a Forest Landuse Agreement with the Philippine government for the exclusive right to occupy, manage and develop forest land for the construction of its project effective until December 31, 2043. The related lease obligation is payable annual subject to 10% annual escalation.

APREC

APREC executed a lease agreement with various lessors on pieces of land where the plant is located in Olongapo City, Zambales for a period of 25 to 99 years. The lease term may be renewed or extended upon the mutual written agreement of the parties.

RERI

RERI executed a lease agreement with various lessors on pieces of land where the two (2) power plants are located in City of Tarlac for a period of 25 to 30 years. The lease term may be renewed or extended upon the mutual written agreement of the parties.

ASPI

ASPI executed a lease agreement for the eight (8) parcels of land located in Calatrava, Province of Negros Occidental for twenty-seven (27) years. The contract shall be renewable at the option of the Lessee and be effective for another five (5) years from renewal.

Set out below, are the carrying amounts of the Group's right-of-use assets and lease liabilities and the movements during the years:

December 31, 2024

	Right-of-use assets				Total	Lease Liability
	Land	Building	Power Plant	Equipment and Others		
Balances at the beginning of the year	₱3,114,636	₱103,242	₱25,658,351	₱132,789	₱29,009,018	₱2,914,845
Additions	717,431	873,681	—	—	1,591,112	1,484,385
Amortization expense	(164,689)	(59,942)	(938,170)	(5,375)	(1,168,176)	—

Payments	—	—	—	—	—	(22,680,908)
Others	(2,751)	—	—	(1,774)	(4,525)	136,770
Balances at the end of the year	₱3,114,636	₱103,242	₱25,658,351	₱132,789	₱29,009,018	₱2,914,845

The carrying amount of the Group's right-of-use assets as of December 31, 2024 and 2023 is presented as part of "Property, plant and equipment".

The Group also has certain leases of equipment, meeting rooms and event sites with lease terms of 12 months or less. The Group applies the 'short-term lease' recognition exemption of these leases.

Set out below, are the amounts recognized in the consolidated statements of income:

	2024	2023	2022
Amortization expense of right-of-use assets	₱1,168,176	₱1,273,198	₱1,284,410
Interest expense on lease liabilities	266,546	1,283,213	2,391,695
Rent expense - short-term leases	116,005	149,262	100,808
	₱1,550,727	₱2,705,673	₱3,776,913

36. Agreements

Pagbilao IPP Administration Agreement

TLI and PSALM executed the IPP Administration Agreement wherein PSALM appointed TLI to manage the 700MW contracted capacity (the "Capacity") of NPC in the coal-fired power plant in Pagbilao, Quezon.

The IPP Administration Agreement includes the following obligations TLI would have to perform until the transfer date of the power plant (or the earlier termination of the IPP Administration Agreement):

- a. Supply and deliver all fuel for the power plant in accordance with the specifications of the original Energy Conservation Agreement (ECA); and
- b. Pay to PSALM the monthly payments (based on the bid) and energy fees (equivalent to the amount paid by NPC to the IPP).

TLI has the following rights, among others, under the IPP Administration Agreement:

- a. The right to receive, manage and control the Capacity of the power plant for its own account and at its own cost and risk;
- b. The right to trade, sell or otherwise deal with the Capacity (whether pursuant to the spot market, bilateral contracts with third parties or otherwise) and contract for or offer related ancillary services, in all cases for its own account and its own risk and cost. Such rights shall carry the rights to receive revenues arising from such activities without obligation to account therefore to PSALM or any third party;
- c. The right to receive the transfer of the power plant at the end of the IPP Administration Agreement (which is technically the end of the ECA) for no consideration; and
- d. The right to receive an assignment of NPC's interest to existing short-term bilateral Power Supply Contract from the effective date of the IPP Administration Agreement the last of which were scheduled to end in November 2011.

Agreements with Contractors and Suppliers

- a. APRI total steam supply cost reported as part of "Cost of generated power" amounted to ₱5.69 billion in 2024, ₱6.89 billion in 2023, and ₱7.51 billion in 2022 (see Note 23).

On May 26, 2013, APRI's steam supply contract with Chevron Geothermal Philippines Holdings, Inc. (CGPHI) shifted to a GRSC. The change is due to an existing provision under the government's existing contract with CGPHI when the Tiwi-Makban facilities were bidded out under the former's privatization program. Under the GRSC, the effective steam price of APRI payable to PGPC will be a premium to coal.

To ensure that APRI will continue to remain competitive in the market, a two-month interim agreement supplementing the GRSC was implemented on August 14, 2013 and extended until August 25, 2018. On August 24, 2018, a new contract was signed by the Company and Philippine Geothermal Production Company, Inc. which aims to ensure long-term operations of both parties. The Geothermal Resources Supply and Services Agreement took effect August 26, 2018 and shall continue in effect until October 22, 2034, unless earlier terminated or extended by mutual agreement of the Parties.

- b. TLI enters into short-term coal supply agreements. Outstanding coal supply agreements as of December 31, 2024 have aggregate supply amounts of 679,260.00 MT (equivalent dollar value is estimated to be at US\$47.4 million), which are due for delivery from January 2024 to Feb 2026. Outstanding coal supply agreements as of December 31, 2023 have aggregate supply amounts of 2,209,195.00 MT (equivalent dollar value is estimated to be at US\$186.5 million), which are due for delivery from January 2024 to March 2025. Terms of payment are by letter of credit where payment is due at sight against presentation of documents, and by telegraphic transfer where payment is due within seven (7) days from receipt of original invoice.
- c. GMEC has entered into a Coal Sales and Purchase Agreement for free on board (FOB) deliveries with PT. Bayan Resources Tbk. (Bayan) dated January 18, 2013 (as amended, the "Coal Supply Agreement"). The Coal Supply Agreement was novated to substitute the Partnership for GNPLC as the Purchaser under the Coal Supply Agreement pursuant to a Deed of Novation dated August 4, 2016. This novation is effective from September 2, 2016 to March 31, 2028. The agreement was subsequently amended last April 18, 2018 and was further amended last April 2021.

In 2022, the agreement between the Partnership and PT Bayan Resources Tbk underwent several amendments. On April 14, 2022, the agreement was revised to extend its term for an additional ten (10) years, which will end no later than December 31, 2034. Subsequently, on May 12 and October 11, 2022, the agreement underwent further amendments to address changes in the computation of the price per ton per shipment and to reduce the annual delivery quantity by 160,000 tons. Finally, on October 21, 2022, the agreement was amended again to increase the delivery quantity, adding 240,000 metric tons for the year 2022 and 400,000 metric tons for 2023. In 2022, the Partnership entered into numerous coal sales and purchase agreements for FOB deliveries with Flame Asia Resources Pte Ltd., Noble Resources International Pte Ltd. and Avra Commodities Pte Ltd.

- d. PEC entered into EPC with suppliers relating to the construction of the 400MW coal fired power plant on April 25, 2014. The Supply Contract with Mitsubishi Hitachi Power Systems, Ltd. and Daelim Industrial Co. Ltd. prescribes the design and engineering of the Project as well as the supply of certain material, property and equipment for the project. The Construction Contract with Desco Incorporated and Daelim Philippines Inc. prescribes the general requirements for the design, engineering, procurement, permitting, fabrication, construction, installation, commissioning, start-up, testing and safe and timely completion of the coal-fired power plant. Total EPC contract price for the complete performance of these contracts amount to US\$398.0 million and ₱7.00 billion. As of December 31, 2024 and 2023, the joint operation has a retention payable amounting to ₱141.2 million and ₱150.7 million, respectively, which is presented as part of "Trade and other payables" in the consolidated balance sheets.
- e. TMI entered into Heavy Fuel Oil (HFO) Supply Agreement with Pilipinas Shell Petroleum Corporation (PSPC) On September 1, 2014. The said agreement provides for the supply and delivery of HFO by PSPC to TMI, subject to terms and conditions of the agreement. The actual quantities may vary from month to month and are contingent to the actual generation of the TMI's power plant. The actual aggregate HFO delivered to the TMI from PSPC as of December 31, 2024 and 2023 is 204.3 million liters and 138.7 million liters, respectively. Moreover, on December 1, 2016, TMI entered into a Lube Oil Supply Agreement with PSPC for the supply and delivery of lube oil products with an agreed aggregate volume of 3.8 million liters. The actual aggregate of lube oil products delivered to TMI from PSPC as of December 31, 2024 and 2023 is 1.8 million liters and 1.7 million liters, respectively.
- f. EAUC entered with Supply Agreement with suppliers. On December 1, 2016, the Lube Oil Supply Agreement with PSPC. The actual aggregate lube oil delivered to the Company from PSPC as of December 31, 2024 and 2023 are 10,000 liters and 487,583 liters, respectively. Total consumption of lube oil amounted to ₱4.5 million and ₱7.7 million in 2024 and 2023, respectively. In 2023, the Company entered into a HFO SA with Shell Pilipinas Corporation (SPC). The said SA provides for the supply and delivery of a guaranteed aggregate volume of HFO on a consignment basis by SPC to the Company, subject to the terms and conditions of the SA. As of December 31, 2024, and 2023, the actual HFO consumed from the SA are 11.8 million liters and 13.1 million liters, respectively. Total consumption of HFO acquired from SPC amounted to ₱481.3 million in 2024 and ₱521.2 million in 2023.
- g. On December 12, 2019, SPI entered into a CSA with PT Bara Tabang for the supply of coal to meet the fuel requirements of the Power Plant on a fixed base and option tonnage. On December 15, 2021, the parties signed the Amendment Agreement to the CSA which extended the term until December 31, 2023 or until the last shipment under the fourth Contract Year. On December 6, 2022, the CSA was amended to include one shipment as additional contract quantity for contract year 2023, and to include coal specifications and pricing. On September 11, 2023, SPI signed a short term CSA which covers two shipments to be delivered in October and November 2023 plus an option tonnage to be notified before October 2023. The option was exercised and the shipment was delivered in December 2023. The September 11, 2023 CSA was amended on December 27, 2023 to cover additional shipments to be delivered in January and February 2024.

Engineering, Procurement, and Construction Contracts

- a. ASPI executed the following contracts for the Calatrava Solar Power Project.

On August 10, 2023, ASPI entered into an (i) Offshore Engineering, Design and Supply Contract with Sumec Complete Equipment and Engineering Co., Ltd. ("SCEECO") and (ii) Onshore Installation, Construction, Testing and Commissioning with Consortium of Everstone and Sumec Philippines to perform the offshore and onshore parts, respectively. The Project is to be paid on the basis of the milestones achieved.

On November 9, 2023, ASPI entered into a Coordination Agreement with SCEECO to perform construction and repair related services.

- b. APREC executed the following contracts for the Olongapo Solar Power Project.

On August 10, 2023, APREC entered into an (i) Offshore Engineering, Design and Supply Contract with China Energy Engineering Group Zhejiang Electric Power Design Institute Co., Ltd. ("China Energy ") and (ii) Onshore Installation, Construction, Testing and Commissioning with GEDI Construction Development Corporation ("GEDI") to perform the offshore and onshore parts, respectively. The Project is to be paid on the basis of the milestones achieved.

On the same date, APREC also entered into a Coordination Agreement with China Energy to perform construction and repair related services.

- c. RERI executed the following contracts for the Armenia Solar Power Project and San Manue Solar Power Project.

On November 9, 2023, RERI entered into (i) an Offshore Engineering, Design and Supply Contract with China Energy and (ii) Onshore Installation, Construction, Testing and Commissioning with Consortium of Anhui and JCE to perform the offshore and onshore parts, respectively, of the Armenia Solar Power Project.

On the same date, RERI entered into a Coordination Agreement with China Energy to perform construction and repair related services.

On August 29, 2024, RERI entered into (i) Offshore Engineering, Design and Supply Contract with China Energy and (ii) Onshore Installation, Construction, Testing, Commissioning, Completion and Remedying of Defects with GEDI to perform the offshore and onshore parts, respectively, of the San Manuel Solar Power Project.

The Projects are to be paid on the basis of the milestones achieved.

On August 29, 2024, RERI entered into a Coordination Agreement with China Energy to perform construction and repair related services to the San Manuel Solar Power Project.

37. Registration with the Board of Investments (BOI)

Certain power generation subsidiaries in the Group have been registered with the BOI. The following are the incentives granted by the BOI:

- a. ITH for a period of four (4) to seven (7) years, as follows:

Subsidiary/Joint operation	BOI Approval Date	Start of ITH Period	ITH Period
APRI	July 25, 2016	July 25, 2016	7 years
TVI	August 28, 2012	January 1, 2017 ¹	4 years
PEC	June 26, 2014	March 7, 2018	6 years
Sacasun	March 9, 2016	March 8, 2023	7 years
Hedcor Bukidnon ²	July 2, 2018	July 1, 2025	7 years
Hedcor Bukidnon ³	November 23, 2018	November 22, 2025	7 years
Hedcor, Inc. ⁴	July 1, 2019	June 30, 2026	7 years

¹ Or actual start of commercial operations, whichever is earlier.

² For Manolo-1 hydroelectric plant.

³ For Manolo-2 hydroelectric plant.

⁴ For La Trinidad hydroelectric plant.

The ITH shall be limited only to sales/revenue generated from the sales of electricity of the power plant and revenues generated from the sales of carbon emission reduction credits.

- For the first five (5) years from date of registration, the registrant shall be allowed an additional deduction from taxable income of fifty percent (50) of the wages corresponding to the increment in the number of direct labor for skilled and unskilled workers in the year of availment as against the previous year if the project meets the prescribed ratio of capital equipment to the number of workers set by BOI of US\$10,000 to one worker and provided that this incentive shall not be availed of simultaneously with the ITH.
- Employment of foreign nationals may be allowed in supervisory, technical or advisory positions for five (5) years from date of registration.
- Importation of consigned equipment for a period of ten (10) years from the date of registration, subject to the posting of re-export bond.
- Special realty tax rates on equipment and machinery and tax credit on domestic capital equipment and services
- For APRI, it may qualify to import capital requirement, spare parts and accessories at zero (0%) duty rate from the date of registration to June 16, 2011 pursuant to Executive Order No. 528 and its Implementing Rules and Regulations.

As a requirement for availment of the incentives, the registrant has to maintain a minimum equity requirement.

As of December 31, 2024 and 2023, the power generation subsidiaries referred to above, which are currently availing the incentives, have complied with the requirements.

38. Notes to Consolidated Statement of Cash Flows

The following are the cash flow movements of the Group's financing liabilities:

December 31, 2024

	January 1, 2024	Net cash flows	Non-cash Changes						December 31, 2024
			Dividend Declaration	Amortized deferred financing costs	Foreign exchange movement	Changes in fair values	Accreted interest	Others

Others includes the effect of reclassification of noncurrent portion of interest-bearing loans and borrowings.

39. Contingencies

The Group is a party to certain proceedings and legal cases with other parties in the normal course of business. The ultimate outcome of these proceedings and legal cases cannot be presently determined. Management, in consultation with its legal counsels, believes that it has substantial legal and factual bases for its positions and is currently of the opinion that the likely outcome of these proceedings and legal cases will not have a material adverse effect on the Group's financial position and operating results. It is possible, however, that the future results of operations could be materially affected by changes in estimates or in the effectiveness of the strategies relating to these proceedings and legal cases.

40. Other Matters

a. Temporary Restraining Order (TRO) affecting power generation companies trading in WESM

On December 19, 2013, Bayan Muna representatives filed a Petition for Certiorari against the ERC and MERALCO with the Supreme Court (SC). On December 20, 2013, National Association of Electricity Consumers for Reforms filed a Petition for Certiorari and/or Prohibition against MERALCO, ERC and Department of Energy (DOE). These cases raised and questioned, among others, the alleged substantial increase in MERALCO's power rates for the billing period of November 2013, the failure of the ERC to protect consumers from high energy prices and perceived market collusion of the generation companies.

These cases were consolidated by the SC which issued a TRO for a period of 60 days from December 23, 2013 to February 21, 2014, preventing MERALCO from collecting the increase in power rates for the billing period of November 2013. The TRO was subsequently extended for another 60 days ending April 22, 2014 by the SC. Thereafter, the TRO was extended indefinitely.

MERALCO, in turn, filed a counter-petition impleading generation companies supplying power to the WESM. The SC also ordered all the parties in the consolidated cases to file their respective pleadings in response to MERALCO's counter-petition. The SC set the consolidated cases for oral arguments last January 21, 2014, February 4 and 11, 2014. After hearing, all parties were directed to file their comments and/or memorandum. The case is now submitted for resolution.

As a result of the TRO, MERALCO has not been able to fully bill its consumers for the generation costs for the supply month of November 2013; and in turn, it has not been able to fully pay its suppliers of generation costs. In a Decision dated August 3, 2021, the Supreme Court declared that the ERC's action of allowing MERALCO to stagger its collection of pass-through generation costs for the November 2013 billing month in view of the high increase in generation costs was valid, but declared as null and void the Order of the ERC setting aside the Luzon WESM prices and imposing regulated prices for the November 2013 billing period. The Supreme Court denied with finality the motions for reconsideration filed by NASECORE, ERC, and Bayan Muna, in a Resolution dated October 11, 2022.

b. Imposition of financial penalties on Therma Mobile by PEMC

This case involves an investigation of Therma Mobile in the dispatch of its power barges during the November and December 2013 supply periods. As a result of the MERALCO price hike case brought before the SC, the SC ordered the ERC to investigate anti-competitive behavior and abuse of market power allegedly committed by some WESM participants.

PEMC conducted the investigation under the "Must-Offer" rules of the WESM Rules.

PEMC initially found that Therma Mobile violated the "Must-Offer Rule" during the period under investigation. In its letter dated January 30, 2015, the PEM Board imposed financial penalties amounting to ₱234.9 million on Therma Mobile. According to the PEM Board, the penalties will be collected from Therma Mobile through the WESM settlement process.

Therma Mobile maintains that there is no basis for the PEMC decision. It did not violate the Must-Offer Rule for the period covered, as it was physically impossible for Therma Mobile to transmit more than 100MW to MERALCO. Although Therma Mobile's rated capacity is 234 MW (Net), it could only safely, reliably and consistently deliver 100MW during the November and December 2013 supply period because of transmission constraints. Therma Mobile's engines and transmission lines were still undergoing major repairs to address issues on post rehabilitation.

On February 13, 2015, Therma Mobile filed a notice of dispute with the PEMC to refer the matter to dispute resolution under the WEM Rules and the WESM Dispute Resolution Market Manual.

Therma Mobile also filed a Petition for the Issuance of Interim Measures of Protection with the Regional Trial Court (RTC) of Pasig to hold off enforcement of the payment of the penalties during the pendency of the Therma Mobile and PEMC dispute resolution proceedings. On February 24, 2015, the RTC issued in favor of Therma Mobile an ex parte 20-day Temporary Order of Protection directing PEMC to refrain from (a) demanding and collecting from Therma Mobile the ₱234.9 million financial penalty; (b) charging and accruing interest on the financial penalty; and (c) transmitting the PEMC-ECO investigation report to the ERC.

On April 1, 2015, the RTC granted the prayer for the issuance of Writ of Preliminary Injunction, which ruling was assailed by the PEMC and elevated to the Court of Appeals (CA) via Petition for Review. On December 15, 2015, the CA issued a Decision confirming the RTC's findings. PEMC filed a Motion for Reconsideration, and in compliance with a Resolution of the CA, has filed a comment on the said motion.

On June 6, 2016, PEMC filed a petition before the SC questioning the CA's Decision. TMO also filed its Comment on the Petition on November 14, 2016. On June 1, 2017, TMO received the SC Notice dated March 29, 2017. In the Resolution, the SC noted TMO's Comment and PEMC's Reply.

On April 18, 2023, TMO received the Memorandum of PEMC dated March 17, 2023. On August 2, 2023, TMO personally secured a copy of the Resolution dated December 1, 2022 of the SC, directing both parties to file their respective memoranda within thirty (30) days from receipt. On August 30, 2023, TMO filed its Memorandum.

On April 4, 2024, external counsel received a copy of the Notice of Resolution dated November 8, 2023 from the SC Third Division taking note of the Memoranda filed by both parties.

The case is pending resolution before the SC Third Division.

c. Therma Marine Cases

In 2013, ERC issued Final Approval of various ESAs of Therma Marine with some modifications on ERC's provisionally approved rates which directed both parties to devise a scheme for the refund of the difference between the final and the provisionally approved rates.

On November 25, 2013, ERC issued its order for Therma Marine to refund the amount of ₱180.0 million to its customers for a period of 6 months with equal installments per month.

On August 27, 2014, ERC issued an order directing NGCP to refund its customers the amount of ₱12.7 million and the corresponding VAT for a period of twelve months. As such, Therma Marine will refund the said amount to NGCP and the latter will refund the same to its customers. In 2015, ERC issued Provisional Approvals (PA) on ESA contracts extensions with capacity fees lower than the previously approved rates. Therma Marine filed MRs on these PAs. During the last quarter of 2015, ERC issued Final Approvals on some of these ESA's sustaining the decision in the PA's, thus Therma Marine filed MRs on the final decisions. As of December 31, 2024, there is no resolution yet on the MRs on the Final Approvals.

d. ERC Case No. 2013-077 MC

On August 29, 2013, MERALCO filed a petition for dispute resolution against TLI/APRI, among other Successor Generating Companies (“SGCs”) under ERC Case No. 2013-077 MC. The case arose from a claim of refund of the alleged over charging of transmission line losses pursuant to the ERC Order dated March 4, 2013 and July 1, 2013 in ERC Case No. 2008-083 MC.

On September 20, 2013, TLI, together with the other SGCs, filed a Joint Motion to Dismiss arguing that MERALCO’s petition should be dismissed for failure to state a cause of action and ERC’s lack of jurisdiction over the subject matter of the case. The SGCs and Meralco have filed their respective comments, reply, rejoinder and sur-rejoinder after the filing of the Joint Motion to Dismiss. The Joint Motion to Dismiss has since then been submitted for resolution with the ERC. As of December 31, 2024, the ERC has yet to render its decision on the Joint Motion to Dismiss.

e. LHC Franchise Tax Assessment

In 2007, the Provincial Treasurer of Benguet issued a franchise tax assessment against LHC, requiring LHC to pay franchise tax amounting to approximately ₱40.4 million, inclusive of surcharges and penalties covering the years 2002 to 2007. In 2008, LHC has filed for a petition for the annulment of the franchise tax assessment, based primarily on the fact that LHC is not liable for franchise tax because it does not have a franchise to operate the business. Section 6 of R.A. No. 9136 provides that power generation shall not be considered a public utility operation. As such, an entity engaged or which shall engage in power generation and supply of electricity shall not be required to secure a national franchise. Accordingly, no provision has been made in the consolidated financial statements. The case remains pending as of December 31, 2024.

f. EPIRA of 2001

R.A. No. 9136 was signed into law on June 8, 2001 and took effect on June 26, 2001. The law provides for the privatization of NPC and the restructuring of the electric power industry. The IRR were approved by the Joint Congressional Power Commission on February 27, 2002.

R.A. No. 9136 and the IRR impact the industry as a whole. The law also empowers the ERC to enforce rules to encourage competition and penalize anti-competitive behavior.

R.A. No. 9136, the EPIRA, and the covering IRR provides for significant changes in the power sector, which include among others:

- i. The unbundling of the generation, transmission, distribution and supply and other disposable assets of a company, including its contracts with IPPs and electricity rates;
- ii. Creation of a WESM; and
- iii. Open and non-discriminatory access to transmission and distribution systems.

The law also requires public listing of not less than 15% of common shares of generation and distribution companies within 5 years from the effectivity date of the EPIRA. It provides cross ownership restrictions between transmission and generation companies and a cap of 50% of its demand that a distribution utility is allowed to source from an associated company engaged in generation except for contracts entered into prior to the effectivity of the EPIRA.

There are also certain sections of the EPIRA, specifically relating to generation companies, which provide for a cap on the concentration of ownership to only 30% of the installed capacity of the grid and/or 25% of the national installed generating capacity.

g. Retail Competition and Open Access

The EPIRA mandates the implementation of Retail Competition and Open Access (RCOA) subject to the fulfilment of the conditions as provided in the EPIRA. The ERC was tasked under the EPIRA Implementing Rules and Regulations to declare, after due notice and public hearing, the initial implementation of RCOA. Through the RCOA, eligible customers will have the option to source their electricity from eligible suppliers that have secured Retail Electricity Supplier (RES) licenses from the ERC. End users with a monthly average peak demand of at least 1 Megawatt (MW) for the preceding 12 months are eligible to be contestable customers. The 1 MW qualification would gradually be reduced upon evaluation of the ERC.

In June 2011, after due notice and public hearings, the ERC declared December 26, 2011 as the date to mark the commencement of the full operation of RCOA in Luzon and Visayas. However, due to deficiencies in the rules and guidelines governing the RCOA at that time, the December 26, 2011 commencement date was deferred several times until an interim system commenced on July 26, 2013.

The DOE and ERC have issued and revised several circulars, rules and resolutions on the implementation of the RCOA and the issuance of RES licences, including a Code of Conduct, Rules on Contestability, and Rules on RES Licencing.

On February 21, 2017, the SC issued a TRO enjoining the DOE and ERC from implementing the following issuances:

1. DOE Circular No. DC-2015-06-0010 or the DOE Circular Providing Policies to Facilitate the Full Implementation of RCOA in the Philippine Electric Power Industry;
2. ERC Resolution No. 5, Series of 2016 or the Rules Governing the Issuance of Licenses to RES and Prescribing the Requirements and Conditions Therefor;
3. ERC Resolution No. 10, Series of 2016 or a Resolution adopting the Revised Rules for Contestability;
4. ERC Resolution No. 11, Series of 2016 or a Resolution Imposing Restrictions on the Operations of DUs and RES in the Competitive Retail Electricity Market; and
5. ERC Resolution No. 28, Series of 2016 or the Revised Timeframe for Mandatory Contestability, Amending Resolution No. 10, Series of 2016, entitled Revised Rules of Contestability.

The TRO effectively enjoined the DOE and the ERC from imposing the mandatory migration of end-users with average monthly peak demand of at least 1MW and 750 kW on 26 February 2017 and 26 June 2017, respectively, and barring Local RESs and DUs from supplying electricity to the Contestable Market.

Due to the TRO, no new or renewed RES licenses were issued by the ERC due to the perceived risk of being declared in contempt by the SC. The renewal of PEI, AEI and API's RES licenses remain pending before the ERC. The application for RES licenses of TLI and APRI are likewise pending.

On November 29, 2017, DOE issued Department Circular No. 2017-12-0013, which provides, among other things, for voluntary participation of Contestable Customers in the Retail Market. On the same date, DOE issued Department Circular No. 2017-12-0014, which provides, among other things, the guidelines on the licensing of RES. Both DOE Circulars enjoin the ERC to promote the supporting guidelines to the DOE Circulars. Once the ERC promulgates these rules, approval of RES license applications and renewals can be expected.

h. Renewable Energy Act of 2008

On January 30, 2009, R.A. No. 9513, An Act Promoting the Development, Utilization and Commercialization of Renewable Energy Resources and for Other Purposes, which shall be known as the "Renewable Energy Act of 2008" (the Act), became effective. The Act aims to (a) accelerate the exploration and development of renewable energy resources such as, but not limited to, biomass, solar, wind, hydro, geothermal and

ocean energy sources, including hybrid systems, to achieve energy self-reliance, through the adoption of sustainable energy development strategies to reduce the country's dependence on fossil fuels and thereby minimize the country's exposure to price fluctuations in the international markets, the effects of which spiral down to almost all sectors of the economy; (b) increase the utilization of renewable energy by institutionalizing the development of national and local capabilities in the use of renewable energy systems, and promoting its efficient and cost-effective commercial application by providing fiscal and non-fiscal incentives; (c) encourage the development and utilization of renewable energy resources as tools to effectively prevent or reduce harmful emissions and thereby balance the goals of economic growth and development with the protection of health and environment; and (d) establish the necessary infrastructure and mechanism to carry out mandates specified in the Act and other laws.

As provided for in the Act, renewable energy (RE) developers of RE facilities, including hybrid systems, in proportion to and to the extent of the RE component, for both power and non-power applications, as duly certified by the DOE, in consultation with the BOI, shall be entitled to incentives, such as, income tax holiday, duty-free importation of RE machinery, equipment and materials, zero percent VAT rate on sale of power from RE sources, and tax exemption of carbon credits, among others.

i. Authority to Offer and Issue Peso-Denominated Fixed-Rate Retail Bonds

On February 25, 2025, the Board approved, among others, the filing of a registration statement under the shelf registration program of the SEC for peso-denominated fixed-rate retail bonds in the aggregate principal amount of ₱100 billion (the "Retail Bonds"), which will, from time to time and subject to market conditions, be issued in tranches. The Board also approved the issuance of the first tranche of the Retail Bonds, consisting of up to ₱20,000,000,000, with oversubscription option of up to ₱10,000,000,000.

j. Chromite Gas Investment Agreement with Meralco PowerGen Corporation

In March 2024, the Company, through its subsidiary, Therma NatGas Power, Inc. ("TNGP"), entered into an Investment Agreement with Meralco PowerGen Corporation ("MGen") to acquire 60% and 40% interests, respectively, in Chromite Gas Holdings, Inc. ("Chromite Gas"). Chromite Gas intends to acquire a 67% equity interest in each of the 1,278 MW Ilijan power plant, the 1,320 MW combined cycle power facility, currently under construction, and the LNG import and regasification terminal owned by Linseed Field Corporation ("LFC"). San Miguel Global Power Corporation ("SMGP") will retain a 33% stake in these power plants and gain a corresponding interest in LFC.

On December 23, 2024, the transaction was approved by the Philippine Competition Commission. On January 28, 2025, after the satisfaction of the conditions precedent, the parties have completed the transaction.

k. Transfer of Mainstream Renewable Power Philippines Holdings B.V.'s ("MRPPHBV") shares in CEDI to ARI

On January 10, 2025, ARI entered into an agreement with MRPPHBV for the acquisition of its 40% non-controlling interest in CEDI. As a result of this transaction, ARI now holds 100% ownership of CEDI.

Additionally, as part of the transaction, MRPPHBV condoned a ₱107 million loan previously extended to CEDI.

l. CSR Projects

The Group has several CSR projects in 2024, 2023 and 2022 which are presented as part of "General and administrative expenses" (see Note 24).

**INDEPENDENT AUDITOR'S REPORT
ON SUPPLEMENTARY SCHEDULES**

The Board of Directors and Stockholders
Aboitiz Power Corporation
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Aboitiz Power Corporation (the Company) as at December 31, 2024 and 2023, and for each of the three years in the period ended December 31, 2024, and have issued our report thereon dated March 6, 2025. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The schedules listed in the Index to Supplementary Schedules are the responsibility of the Company's management. These schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68 and are not part of the basic consolidated financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the information required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

About the Report

We are pleased to present the 2024 Aboitiz Integrated Report. This comprehensive report highlights the financial, operational, governance, social, and environmental performance areas that are most material to Aboitiz Equity Ventures Inc. (AEV) and its stakeholders.

Covering the full year from January 1 to December 31, 2024, the report focuses on AEV's strategic business units: Power, Banking and Financial Services, Food, Infrastructure, Land, and Data Science and Artificial Intelligence (DSAI).

We gathered reports on their performance in the following focus areas: team member engagement and development, corporate social responsibility, customer focus, disaster resilience, carbon emissions reduction, resource efficiency, renewable energy, waste management, and financial growth and returns.

Monetary values in this Report are presented in Philippine Pesos (PHP), which is AEV's functional currency. All information is disclosed to uphold the principles of ethics and transparency, and to communicate vital information to our stakeholders.

This report is published on April 15, 2025, coinciding with its submission to the Securities and Exchange Commission. Our previous Annual Integrated Reports are downloadable via the Corporate Governance section of our website www.aboitiz.com.

Reporting Standards and Guidelines

GRI Standards

AEV has reported with reference to the GRI Standards for the period from January 1, 2024 to December 31, 2024. We provide a summary of how we developed this report, determining material topics and reporting disclosures using GRI Material Topics 2021 and GRI Topic Standards for each material topic, as well as our GRI Content index to help readers locate specific information about our policies, programs, and performance.

Taskforce on Climate-related Financial Disclosure

AEV is the first Philippine signatory to the Task Force on Climate-related Financial Disclosures. We are committed to aligning our disclosures to its framework that will provide the company with better information and preparedness towards the impacts of climate-related business scenarios.

UN Global Compact Communication on Progress

Our Communication on Progress (CoP) sets out key information, including the following requirements:

1. Our CEO Message includes statements expressing our continued support for the UN Global Compact and renewing AEV’s ongoing commitment to the initiative.
2. AEV’s description of practical actions that the company has taken, or plans to take to implement the Ten Principles in each of the four areas: human rights, labor, environment, and anti-corruption.
3. Outcomes that are measured based on the aligned key performance indicators with the United Nations Sustainable Development Goals (SDGs) and the 10 business principles of the United Nations Global Compact. The company is also one of the participants of the enhanced CoP Early Adopter Program, and we have been providing information on our progress through the CoP Digital Platform since 2022.

SEC Compliance

This Report is in compliance with the Securities and Exchange Commission (SEC) Memorandum Circular No. 4 Series of 2019: “Sustainability Reporting Guidelines for Publicly Listed Companies.”

Reporting Principles

To define the content of this sustainability report, we follow these reporting principles:

- Balance: provided a balanced representation of our economic, governance, social, and environmental performance.
- Clarity: presented our information in a clear and concise manner to ensure that our stakeholders can easily understand our performance.
- Comparability: provided a basis for comparison with our previous performance and with other organizations to enhance transparency and accountability.
- Sustainability Context: identified the broader sustainability context of our business and provided information on how our performance aligns with our sustainability goals.
- Timeliness: reported on our performance within a reasonable timeframe to ensure that the information provided is relevant and up-to-date.
- Verifiability: ensured that our reported information is accurate and can be verified through a transparent and independent auditing process.
- Materiality: identified economic, social, and environmental issues that impact our business growth and of utmost importance to our stakeholders
- Stakeholder Inclusiveness: identified stakeholders and response to their expectations
- Completeness: identified material topics that are covered within identified boundaries were ensured to provide sufficient information that reflects the significant economic, social and environmental topics within the reporting period.

These report elements aim to provide a level of comfort among our stakeholders that our information is timely, accurate, reliable, and complete.

Reporting Scope

The reporting scope of our 2024 Aboitiz Integrated Report considers the level of operational control and influence that the holding company has on its business subsidiaries. The scope is different from the consolidation and scoping of our Annual Audited Financial Statements for reference please see our 2024 20-IS Report. We worked closely with the Aboitiz Group Sustainability Council and their respective sustainability stewards in business units across the region where we operate, using a standardized data collection and monitoring process. The business units covered in this report are:

- Aboitiz Land, Inc.

DATA SCIENCE AND ARTIFICIAL INTELLIGENCE (DSAI)

- Aboitiz Data Innovation

CORPORATE SOCIAL RESPONSIBILITY

- Aboitiz Foundation, Inc.

Materiality Assessment

Materiality, as defined by the GRI reporting framework, includes topics and disclosures that reflect the Group's significant economic, environmental, and social impacts, or those that would substantially influence the assessments and decisions of our stakeholders.

Our process involved an internal analysis of the importance of a broad list of sustainability issues related to our core businesses of power, banking and financial services, food, infrastructure, land, data science and artificial intelligence (DSAI), and our corporate foundation. At the parent company level, we integrated the common material issues that are within the medium-term horizon of our reporting parameters.

We also used discussions from stakeholder dialogues and company-wide feedback channels to inform the selection of these material issues, which were discussed and approved by the Aboitiz Group Management Committee as part of the focus areas of our Aboitiz Sustainability Synergy.

◀ Grounded in transparency and accountability, the Aboitiz Integrated Report reflects our commitment to balanced, reliable, and stakeholder-driven reporting.

Our Businesses

ABOITIZ EQUITY VENTURES

Aboitiz Equity Ventures Inc. (PSE: AEV) is the public holding company of the Aboitiz Group with major investments in power, banking and financial services, food and beverages, infrastructure, land, and data science and artificial intelligence. Today, it is recognized as one of the best-managed companies in the Philippines and in the ASEAN region, consistently cited for its commitment to good corporate governance and corporate social responsibility.

With five generations of success behind it, AEV is currently undergoing a Great Transformation to become the Philippines' first techglomerate. Amidst this evolution, Aboitiz remains committed to its core mission of driving change for a better world by advancing businesses and communities.

POWER

Aboitiz Power Corporation (PSE:AP) is a power generation, power distribution, and retail electricity provider that aims to supply reliable, reasonably priced, and responsibly sourced energy to communities and businesses.

In 2024, AboitizPower reinforced its position as a key player in the Philippine energy sector, adapting to shifting energy needs and growing calls for sustainability. With strategic foresight, we made significant progress by completing multiple renewable energy projects to expand our Cleanergy portfolio, which now exceeds 1,000 MW of capacity. At the same time, we also focused on reinforcing our thermal assets, ensuring a well-rounded energy mix that can meet baseload and peak demands.

AboitizPower produces over 20% of the country's total generation capacity, making it one of the Philippines' largest electricity producers. We plan to continue expanding our portfolio by enhancing our mix of hydroelectric, geothermal, wind, and solar energy alongside thermal plants, contributing to grid stability. Through our distribution utilities, AboitizPower also serves high-growth areas nationwide, delivering reliable and sustainable electricity to millions of Filipinos.

Looking ahead, we remain focused on accelerating the growth of our renewable energy capacity to support the national goal of achieving a 35% renewable energy share by 2030. With a strategic plan to triple our Cleanergy capacity by the turn of this decade, we are driven to play our role in advancing the Philippines' energy transition. By investing in innovative solutions such as energy storage and smart grid technologies, we are positioned to contribute to a more resilient energy future. With a clear vision and unwavering drive, we are poised to continue delivering value to all our stakeholders, contributing to the Philippines' journey toward a cleaner, more sustainable future.

[More about this report on Page 60 ►](#)

BANKING AND FINANCIAL SERVICES

Union Bank of the Philippines (PSE: UBP), a publicly listed universal bank, is at the forefront of redefining the future of banking. Widely recognized as a digital trailblazer, UnionBank continues to champion innovation. It has been strategically working toward its Great Retail Bank aspiration and now aims to build the next-generation institution for Filipinos and businesses.

On its digital transformation journey, UnionBank has set noteworthy milestones in banking innovation. It launched a well-designed, user-friendly, and feature-rich bank website, introduced online banking services, pioneered the Philippines' first electronic savings account (EON), and developed the chatbot Rafa. UnionBank also led the way in fully digital account opening and redefined branch banking with The Ark—its fully digital branch concept.

Capitalizing on the gains of transformation, UnionBank continued on the path of pursuing customer-focused banking solutions. In 2018, it launched UBX, now the Philippines' top open finance platform. In July 2022, it introduced UnionDigital, the only digital bank owned by a publicly listed bank in the country. By 2024, UnionBank successfully integrated Citigroup's retail business, a major acquisition from 2022.

UnionBank's commitment to innovation, digital transformation, and excellence in banking services, has consistently set industry benchmarks in customer experience and financial technology as seen by the local and international awards it has collected.

UnionBank's future-forward vision is to maintain its industry leadership by delivering exceptional experiences and empowering customers and businesses to achieve their financial goals.

FOOD AND BEVERAGES

Aboitiz Foods is an integrated regional food and agribusiness company driven by its massive transformative purpose, “Sustainably Feeding Asia’s Growth from Mill to Meal.” The company is committed to growing sustainably alongside Asia’s evolving needs.

As one of Asia’s largest privately-owned food and agribusiness companies, Aboitiz Foods operates in eight countries: the Philippines, Singapore, China, Vietnam, Malaysia, Indonesia, Thailand, and Brunei. Through its subsidiaries, Pilmico and Gold Coin, Aboitiz Foods integrates the value chain, from trading, feeds, specialty nutrition, and food. By leveraging world-class technology and expertise, Aboitiz Foods delivers quality products and services to its customers.

In its journey moving forward, advancing business and communities is how the Aboitiz Group will drive change for a better world, with Aboitiz Foods upholding its brand promise: “Together we nourish the future.”

Coca-Cola Europacific Aboitiz Philippines (CCEAP)—the bottling arm of Coca-Cola in the country—has a substantial local footprint and, consequently, a corresponding massive responsibility. It operates 18 manufacturing facilities, almost 70 distribution centers and sales offices nationwide, employs almost 9,000 regular employees, and supports and serves over 1 million micro-retailers as well as over 6,000 key accounts.

Coca-Cola Europacific Aboitiz Philippines is jointly owned by Coca-Cola Europacific Partners and Aboitiz Equity Ventures. CCEAP remains committed to its vision of refreshing Filipinos and making a difference across the Philippines.

INFRASTRUCTURE

Aboitiz InfraCapital (AIC), the infrastructure arm of the Aboitiz Group, aims to build purpose-driven infrastructure and serve as one of the building blocks of the country's economy. AIC develops and operates economic estates, water, digital infrastructure, and transport and mobility projects that enable businesses and uplift communities.

AIC Economic Estates, namely LIMA Estate in Batangas, MEZ2 (Mactan Economic Zone 2) Estate and West Cebu Estate in Cebu, and TARI Estate in Tarlac, account for over 2,000 hectares of development that are home to over 240 locators and around 100,000 employees. These economic zones are complemented by commercial, residential, and institutional components run by Aboitiz affiliates, including AboitizLand, AboitizPower, and Aboitiz Construction.

AIC's estate water units, namely LIMA Water, MEZ2 Water, West Cebu Water, and TARI Water provide end-to-end water and wastewater services to AIC Economic Estates, serving the growth needs of locators and businesses. In Davao City, Apo Agua Infraestructura, Inc. operates the largest bulk water treatment facility in the country, providing the Davao City Water District with 300 million liters of safe drinking water daily and serving over one million Davaoeños. AIC also owns a minority stake in Balibago Waterworks Systems, the country's fourth-largest water concessionaire, providing running water to over 330,000 households in its franchise area.

Unity Digital Infrastructure, Inc., AIC's joint venture with leading global private markets firm Partners Group, builds and operates passive telecommunications tower infrastructure across the Philippines to boost the coverage and connectivity of local telecommunications operators. AIC has also diversified into the data center industry through its partnership with EdgeConneX, the pioneer in global Hyperlocal to Hyperscale Data Center Solutions in the United States.

In 2024, AIC fully acquired the developer and operator of the award-winning Mactan Cebu International Airport, the country's second-busiest gateway whose Terminal 2 holds a Skytrax 4-Star Rating. AIC also holds the concessions to operate, upgrade, and maintain Laguindingan International Airport and Bohol-Panglao International Airport, the country's sixth- and ninth-busiest gateways, respectively, with scheduled official turnovers in April and June 2025.

Republic Cement, AEV's partnership with global building materials group CRH, operates six facilities across the Philippines that produce the biggest supply of cement in the country.

LAND

For 30 years, **Aboitiz Land, Inc.** has remained committed to delivering innovative housing solutions for Filipinos, carrying its legacy from Cebu to Luzon to shape the landscape of residential living across the Philippines. Established in 1994, Aboitiz Land transformed Cebu's real estate landscape with premier master-planned communities such as North Town Homes, Pristina North and Priveya Hills, making them among the most sought-after addresses in the city. Our national expansion began in 2014 with the strategic acquisition of LIMA Technology Center in Batangas. By 2020, we sharpened our focus on residential development, transferring our industrial and commercial business units to Aboitiz InfraCapital Economic Estates.

Our dedication to innovative residential development is reflected in a diverse portfolio catering to various homeowner needs. Our notable projects include the award-winning beachside community Seafront Residences in San Juan, Batangas, and Ajoya communities in Cabanatuan, Nueva Ecija; Capas, Tarlac; and Mexico, Pampanga—key developments driving our growth in Luzon. A major milestone followed in 2019 with the launch of The Villages at Lipa, a 49-hectare residential enclave within LIMA Estate, blending residential spaces with dynamic business districts to redefine living in progressive South Luzon. Further strengthening our footprint, we made a strategic move into Metro Manila's rental market with the full acquisition of Point Blue, a network of micro-studio rental apartments in prime business districts. Looking ahead, Aboitiz Land is poised to play a critical role in the expansion of Aboitiz Economic Estates, leveraging our established presence in key growth areas—Southern Luzon, Central Luzon, and Cebu.

With a diverse portfolio of residential offerings—ranging from workforce housing like Point Blue to mid-market, high-end, and leisure communities—we ensure accessibility, quality, and value across different price points. This breadth of offerings allows us to address the evolving needs of businesses, employees, and families.

By strategically aligning with the Economic Estates' growth trajectory, we reinforce our leadership in these high-potential locations and strengthen our role in shaping progressive, integrated communities. This synergy not only capitalizes on the increasing demand for high-quality developments beyond Metro Manila but also underscores our competitive advantage—scale, innovation, and a deep integration with industry and business. Now, with a comprehensive and forward-thinking housing strategy, Aboitiz Land is well-positioned as a key player in the evolution of residential living in the Philippines.

CORPORATE SOCIAL RESPONSIBILITY

Aboitiz Foundation, Inc. is the Aboitiz Group's corporate foundation established in 1988. In partnership with Aboitiz business units, the foundation empowers future leaders with resources and scholarships, creates jobs through community development and digital skills training, and prioritizes climate action with nature-based solutions for a sustainable future. After 35 years, it continues its legacy with a renewed commitment to expand flagship programs, foster global collaborations, and harness innovation in its unwavering mission to shape a brighter future for its communities, and for the nation.

DATA SCIENCE AND ARTIFICIAL INTELLIGENCE

Aboitiz Data Innovation (ADI) is a forward-thinking data science and AI start-up with a strong commitment to research and a human-centric approach. Our mission is to provide transformative AI-powered products and capabilities to businesses across diverse sectors.

With a heritage rooted in the Philippines' Aboitiz Group and headquartered in Singapore, ADI is uniquely positioned to serve clients in banking and financial services, power, and smart cities (real estate, airports, construction, land, and food) industries.

The company is committed to making a positive impact through innovation, sustainability, and excellence. Its team of experts leverages advanced data science techniques and a human-centric AI approach to developing solutions that are not only effective but also socially responsible. ADI's transformative Data & AI solutions drive value—fostering smarter and sustainable cities, strengthening risk management, and enhancing energy efficiency, benefitting both clients and society at large.

Endika's Message

Enrique Aboitiz

Chairman of the Board
Aboitiz Equity Ventures

"As we look ahead, our challenge is not only to understand what is changing, but why. The shifts we are experiencing didn't begin yesterday but are part of a broader evolution shaped by the hard-earned lessons of recent years."

We Invite You To Bet With Us!

Dear *Fellow Shareholders,*

Half a decade after Covid, we find ourselves navigating a world filled with increasing uncertainty and increasing complexity, both of which bring us more opportunity. What Aboitiz has learned from over 150 years of doing business in the Philippines is that chance favors the prepared. Being ready is what matters most as we adapt to change at the optimal moment. If adaptation is evolution's test for survival, then optimal adaptation is man's test to thrive. As an institution, we must strive to thrive by being prepared and adapting continually.

A flexible structure that adapts quickly has taken Aboitiz to where it is today. We operate with a governance and management structure at the helm of a team that adapts to remain relevant and competitive. This structure drives our behavior of cultivating committed shareholders who reinvest, stay the course, and pass their shares and values on to their children. We will continue to work as a team with adaptation pains to remain relevant, competitive, dynamic, and evergreen.

Our strategy is to focus on gaining competitive edges by doing what few can. It has guided our decision to divest a quarter of our power holdings, enabling us to invest in the retail business of our financial services group, our airport ventures, and Coca-Cola. All three areas are bets on the rising middle class, both in the Philippines and across the region.

We are betting that our three economic pillars, overseas workers, ICT BPO, and more and more tourism will drive the expansion of consumption for more and more of our people. We are betting that more and more of our Southeast Asian and Asean neighbors, as well as those from further out, will visit our spectacular country, pass through our airports, and consume power while experiencing Philippine hospitality as they enjoy a Coca-Cola. We are betting that infrastructure will be built at an increasing pace. Will that building be as fast as our neighbors? We hope so but bet that it will be sufficient.

“How are we adapting to thrive in a world of geopolitical and micro-political chaos?” is the question we must keep asking ourselves. This report will offer some pertinent answers and highlights. As we look ahead, our challenge is not only to understand what is changing, but why. The shifts we are experiencing didn’t begin yesterday but are part of a broader evolution shaped by the hard-earned lessons of recent years.

On behalf of the Board and management of the Aboitiz Group, thank you for your continued trust and confidence in us to do what is right to grow your company. We are determined to stay ahead by maximizing opportunities, strengthening our partnerships, and leading with impact. Bet with us.

Mabuhay!

Endika

Sabin's Message

Sabin Aboitiz

President and Chief
Executive Officer
Aboitiz Equity Ventures

Chairman of the Board
Aboitiz Power Corporation

"Our people are the heart of our transformation. As we always say: transformation starts with you and me—and we are rising to the challenge."

Dear *Shareholders,*

2024 was the year we became a techglomerate. And like all meaningful transformations, this one wasn't marked by a single moment—but by a series of decisions that signaled a shift in how we see ourselves and how we create value.

Over the past few years, we've spoken often about our Great Transformation. We began moving from believing in change to behaving differently. In 2024, we saw signs of *becoming* the future-focused organization we envisioned. We didn't just dream about transformation—we are making it happen.

Last year, we were awarded the Laguindingan and Bohol-Panglao airports, and began management in 2025, extending our capabilities in nation-building infrastructure. We welcomed Coca-Cola into the Aboitiz Group with a great partner, CCEP, giving us a powerful foothold in the consumer sector. We ventured into LNG, via our 40% stake in Chromite Gas Holdings Inc, enhancing our energy portfolio. We launched the Aboitiz Foods identity, giving form to a revitalized business with renewed ambition. We completed the full integration of Citi's retail business into UnionBank. And we initiated leadership transitions across AP, UnionBank, Aboitiz Land, and Aboitiz Data Innovation to ensure we have the right people at the helm as we accelerate into the future.

These were not incremental steps. They were defining moves that restructured our portfolio, expanded our reach, and reshaped the mindset of our organization. Yet as any seasoned investor knows, transformation doesn't stop at ambition—it must translate into performance.

And here, the truth is clear: while we've made progress, we are not yet where we want to be.

Returns are improving, but they remain below expectations. And our businesses—while evolving—are still too complex.

By acquiring a stake in CCBPI, AEV expanded into consumer goods and strengthened business synergies, prompting a rebrand to Coca-Cola Europacific Aboitiz Philippines Inc. in early 2025.

2025: Being a Techglomerate

2025, then, must be the year of acceleration. The year of execution. The year of *Being* a techglomerate.

We will simplify. Too many of our business units have grown into “mini-conglomerates,” adding layers of complexity that slow us down. We must cut through the noise to create focus, clarity, and efficiency.

We will connect the dots. Our businesses are becoming an interconnected ecosystem where insights, capabilities, and opportunities flow more freely across the Group. A new Synergy Office is unlocking these connections, enabling everything from shared infrastructure and talent strategies to integrated data systems that help us make smarter, faster decisions. Data-sharing across business units is beginning to uncover operational efficiencies, customer insights, and cross-sector innovation we’ve only begun to tap. This is how we turn our scale into a true advantage—and how we’ll accelerate value creation from the inside out.

And we will explore bold, breakout moves. Our CEOs are pursuing strong, well-planned strategies—but linear plans alone won’t get us to our targets fast enough. We’re exploring

partnerships, restructurings, and new models that could reimagine our path to value creation. Like with Coca-Cola, where bringing in a world-class partner unlocked enormous potential—we believe this “Coke Model” can be applied elsewhere, from banking to infrastructure to food.

This mindset—*simplify, connect, reimagine*—will define us in 2025 and beyond.

A Future We Are Building Together

As we step into this new chapter, we do so with a sharper sense of who we are: We are not a traditional conglomerate. We are not a holding company. We are a *techglomerate*—a unique ecosystem of businesses advancing innovation, sustainability, and impact, powered by a people-first culture and an insight-driven portfolio strategy.

Our teams across the Group are embracing AI, harnessing data, and pushing boundaries. We’ve embedded transformation metrics into scorecards, created foresight capabilities to anticipate change, and aligned business units around core strategic goals. Sustainability is not a sidebar—it’s built into how we think, how we act, and how we invest.

In 2024, we advanced several renewable energy projects and supported climate resilience efforts in our host communities, reinforcing our long-standing commitment to people, planet, and prosperity.

But more than tools or strategies, our greatest transformation is cultural. And like all meaningful change, it’s still in its early stages. Across the Group, new people are joining—some unfamiliar with our culture, others already aligned. This mix brings its own set of challenges and opportunities. We are building a workplace where curiosity is encouraged, ownership is expected, and collaboration becomes second nature—but we are not there yet. What’s clear is that our people are the heart of our transformation. As we always say: transformation starts with you and me—and we are rising to the challenge.

And with transformation come real risks. Some of our biggest opportunities—like power privatizations, our foreign investments, and our capital-raising plans—carry uncertainty. But the greater risk is standing still. We move forward, eyes open, with a balanced view of ambition and discipline, and a firm belief in the power of execution.

To our shareholders, your continued belief in this journey gives us the license to keep pushing forward. You have trusted us to be bold. You have supported us through disruption. And we intend to reward that trust with performance, discipline, and long-term value.

Let’s keep connecting the dots—between what we dream and what we do, between people and purpose, between capital and impact. The future isn’t waiting. It’s ours to build.

Sincerely,

Sabin

◀ Transformation starts with our people—driving innovation, culture, and impact across the Group.

Senior Vice President
Chief Financial Officer
Aboitiz Equity Ventures Inc.

Juan
Alejandro
Aboitiz

Senior Vice President
Chief Financial Officer
Aboitiz Power Corporation

Dear *Fellow Stakeholders,*

2024 had been a transformative year for AEV as we continued to execute on our diversification strategy. We acquired a 40% stake in Coca-Cola Bottlers Philippines, Inc. (CCBPI), which we later renamed to Coca-Cola Europacific Aboitiz Philippines, Inc. (CCEAP), through a joint venture with The Coca-Cola Company's largest bottler by revenue globally, Coca-Cola Europacific Partners (CCEP). This marked our entry into the fast-moving consumer goods (FMCG) sector, which further strengthened our push to increase revenues coming from the consumer market. AboitizPower entered into a joint venture agreement with Meralco PowerGen Corp, to purchase a 40% stake in Chromite Gas Holdings, Inc., which in turn, purchased a 67% stake in two liquified natural gas (LNG) plants and a gas terminal from San Miguel Global Power Holdings Corp. This is AboitizPower's first foray into the LNG space.

Aboitiz InfraCapital (AIC), on the other hand, continued to execute on its portfolio strategy. In February 2024, it commenced commercial operations of its bulk water supply business under Apo Agua Infraestructura, Inc. in Davao City. With a capacity of 300 million liters per day, it stands as the largest facility of its kind in the Philippines. In addition, AIC was awarded two new regional airports - the Laguindingan and Bohol-Panglao airports. With these two new additions, along with Mactan-Cebu International Airport, AIC is well on its way to building its airport portfolio.

All of these investments happened under a favorable macroeconomic environment. With the downtrend in domestic inflation rates, the Bangko Sentral ng Pilipinas (BSP) cut policy rates by 75 basis points from 6.50% to 5.75%

allowing the local economy to achieve a full-year GDP growth of 5.6%.

AEV's beneficial EBITDA (earnings before interest, taxes, depreciation, and amortization), which represents our proportional share in the EBITDAs of our subsidiaries and affiliates, rose 32% to PHP64.5 billion in 2024, from PHP48.9 billion in 2023. AboitizPower remains to be the largest contributor, accounting for 60% of our total beneficial EBITDA. On a year-on-year basis, growth was mainly driven by our Food and Beverage segment, whose EBITDA more than doubled to PHP13.9 billion in 2024.

The growth in AEV's beneficial EBITDA translated to a 15% year-on-year growth in our core net income to PHP25.5 billion. However, after booking a PHP7.5 billion impairment on our 45% stake in Republic Cement and Building Materials, AEV's net income stood at PHP18.1 billion, down 23% from PHP23.5 billion in 2023. This translates to an earnings per share of PHP3.24 in 2024 and a return on shareholders' equity (ROE) of 7%.

AEV's consolidated balance sheet remains well-positioned for opportunistic expansions. We ended 2024 with total cash levels of PHP80.8 billion, down from PHP112.3 billion, following the settlement of our acquisition of 40% of CCEAP in February and our participation in UnionBank's stock rights offering in May. Despite the decline in cash, growth in investments and property, plant, and equipment led to an increase in our consolidated asset base, which rose to PHP893.0 billion from PHP833.9 billion in 2023. Total liabilities increased by 8%, primarily driven by higher debt availments to fund our ongoing expansions in the power and infrastructure segments. Despite this

increase, our net debt-to-equity and debt-to-equity ratios remained stable at 0.8x and 1.0x, respectively.

On March 7, 2025, the Board of Directors of AEV approved a cash dividend of PHP1.54 per share. This is equivalent to 33% of AEV's core net income in 2024, with an implied dividend yield of 4.6% on the day of its announcement.

Meanwhile, the beneficial EBITDA of AboitizPower rose by 13% to PHP73.3 billion in 2024. EBITDA growth was fueled by higher gross margins in power generation and higher energy sales across the distribution utilities. The double-digit beneficial EBITDA growth in 2024 drove core net income 5% higher to PHP33.7 billion. This translated to an earnings per share of PHP4.70 and an ROE of 20%.

On March 7, 2025, the Board of Directors of AboitizPower also approved a cash dividend of PHP2.35 per share. This is equivalent to 50% of its net income in 2024 and implied a dividend yield of 5.7% on the date of its announcement. This is the highest dividend per share that AboitizPower has paid out in the company's history.

FUND RAISING

In 2024, AEV, together with CCEP, secured a PHP24 billion, 10-year term loan with the Bank of the Philippine Islands to fund our acquisition of CCEAP. Beyond this, the Parent focused on servicing its outstanding debt.

AboitizPower, on the other hand, secured a total of PHP22.2 billion of loans, of which PHP13.2 billion was used to fund its renewable energy pipeline, while PHP9.1 billion was used to refinance the maturing financial obligations of its distribution utilities.

S&P Global Ratings

In 2024, AEV continued to be recognized as a constituent company in the S&P Global Corporate Sustainability Assessment. The S&P Global Sustainability Assessment is highly regarded for companies to benchmark their improvements in ESG performance. AEV scored 47 at the 81st percentile rank in the 2024 S&P Global Corporate Sustainability Assessment (CSA Score as of 18.09.2024), performing in the top quintile of the Industrial Conglomerates Sector among 102 companies in the same industry. Meanwhile, the company maintained its A rating in the MSCI ESG Rating.

S&P Global Ratings

AboitizPower's efforts to "transform energy for a better world" continue to be recognized by various independent ESG assessors. S&P Global gave the Company a score of 50 in its 2024 Corporate Sustainability Assessment (CSA), a one-point decrease compared to the previous year. The Company is positioned at the 75th percentile among its global peers in the Electric Utilities industry, showing strong performance in the areas of Labor Practices, Privacy Protection and Information Security / Cybersecurity & System Availability, Privacy Protection, and marked improvements in the areas of Market Opportunities, Materiality, and overall Environmental Dimension.

In the Sustainalytics ESG Risk Ratings, the Company remains in the medium risk category at 27.3. According to the report, despite the Company's high exposure to various ESG risks, its strong management kept its risk rating at a medium level, especially in Environmental Management, Health and Safety Management Systems, and improvements in the performance of Carbon Intensity.

Following the FTSE4Good Index Series Quarterly Review in September 2023, AboitizPower was delisted from the FTSE4Good Index Series as the company was ineligible for the FTSE All-World Index. Despite this, FTSE Russell continues to assess the Company annually and gave an ESG score of 3.4 in 2024, 0.4 points higher than the previous year. The increase in score was due to improvements in Risk Management and Pollution & Resources.

ESG ASSESSMENTS

Sustainability remains at the core of AEV's Great Transformation. The company continues to rank in the upper quartile among global peers in the same category and, in September 2024, placed first among Philippine companies in the Industrial Conglomerate Sector of the 2024 S&P Global Corporate Sustainability Assessments.

Likewise, AboitizPower ranks at the 73rd percentile in the Electric Utilities Sector of the 2024 S&P Global Corporate Sustainability Assessment, with a score of 50/100—a one-point decline from the previous year. It also received an ESG Risk Rating of 27.3 (Medium) from Sustainalytics, placing the company ahead of its local peers assessed within the same industry.

RISK FINANCE

In 2024, the Group focused on managing the rise in premium costs. On top of continuing to leverage on the Group's diverse portfolio

and scale to secure competitive coverage, AEV, including all of its SBUs, conducted bespoke risk studies to better understand exposures, engaged in strategic business discussions with lead insurers through a series of roadshows, and explored maximizing local insurer's capacities and alternative risk transfer solutions in order to optimize risk transfer costs.

AEV's captive insurance company, Archipelago Insurance, continues to play a vital role in retaining risk for programs where industry pricing does not align with the risk management practices of our SBUs.

In 2024, AboitizPower established its own captive entity, Potentia International Pte Ltd, enabling Archipelago Insurance to re-allocate its coverage to the Group's non-power SBUs, strengthening the Group's commitment to proactive risk management and sustainable risk financing.

▼ AboitizPower continues to deliver strong returns while scaling renewables, entering LNG, and driving the country's energy transition.

◀ Coca-Cola Europacific Aboitiz Philippines marks a bold step in AEV's journey toward diversification and consumer impact.

THANK YOU

To our valued shareholders, we deeply appreciate your unwavering confidence and trust. We are poised for an even more transformative year in 2025 as we focus on simplifying operations, prioritizing efficiency, and ensuring that our SBUs operate smarter and more collaboratively. With a diverse portfolio spanning power, banking, food, real estate, infrastructure, and fast-moving consumer goods, we are committed to delivering sustainable, long-term value to you, our shareholders, and to the nation.

Sincerely yours,

Toto Sandro

CHAPTER 02

Our Value Creation Story

As the Aboitiz Group's Great Transformation continues, we remain committed to exceptional value creation through innovation, synergies, and transformative technologies. Being the Philippines' first techglomerate involves reshaping our business from the inside out into a company and organization that thinks and acts like a life-changing startup, anchored on a legacy of advancing business and communities.

In 2025, Aboitiz Equity Ventures is strengthening its role as an active portfolio manager for the Group. Our federated structure is paving the way for diversification strategies and an expanding footprint, particularly in the domestic consumer sector. By leveraging emerging technology, including artificial intelligence and machine learning, we are optimizing our areas of operations while enhancing investment decision-making, risk assessment, and overall financial performance.

AEV's ESG (environment, social, and governance) principles are firmly in place to ensure that investments align with sustainability and corporate social responsibility. These guide a deliberate approach to innovation, strategic collaborations, and ethical investment practices that reinforce our position as a forward-thinking industry leader, delivering long-term value for all stakeholders.

A Year of Synergies

Established in mid-2023, the AEV Synergy Office was created to generate incremental value by unlocking inter-SBU opportunities and ecosystem plays across the Aboitiz Group. Anchored on three pillars—supporting AEV’s shift to an active portfolio manager, enabling cultural transformation, and driving value creation. In 2024, we successfully operationalized the synergy mandate by institutionalizing synergies through a framework, governance structure, and synergy KPIs. As AEV evolves into an active portfolio manager, synergies will play a central role in our strategy.

2024 Synergy Wins

-  **AboitizPower** - Secured major retail energy supply contracts and solar power purchase agreements across the SBUs.
-  **UnionBank** - Onboarded key suppliers from all SBUs onto UnionBank’s platforms.
-  **Aboitiz InfraCapital** - Provided a full suite of ecosystem services to its locators through Aboitiz Group-affiliated companies, including power, water, banking, construction, housing, and cement.
-  **Aboitiz Construction*** - Delivered key construction projects and secured maintenance service contracts with Aboitiz InfraCapital, AboitizPower, Aboitiz Land, Aboitiz Foods, and Republic Cement.

2025 Priorities

-  **Maximizing the Low-Hanging Fruit** - Sustaining the momentum and building on the 2024 Wins
 - AboitizPower - Further securing retail energy supply contracts and delivering solar power solutions
 - UnionBank - Capturing the banking requirements of the Aboitiz Ecosystem and promoting active usage of UnionBank products
 - Aboitiz InfraCapital - Providing an integrated solution to current and future locators through collaboration with other SBUs
 - Aboitiz Construction* - Positioning Aboitiz Construction to capture construction and maintenance requirements of the Group through developing tailored innovative solutions for SBUs
-  **Developing Co-Creations** - Co-designing projects and developing new solutions that harness the Aboitiz platform of businesses
-  **Leveraging Ecosystem Plays** - Maximizing existing businesses and factoring the synergy potential in future businesses and projects
-  **Institutionalizing Synergies** - Further embedding synergies in how we do business, including establishing policies and tools to enable synergies, connecting people across SBUs, and communicating the value addition of synergy

*A wholly owned subsidiary of Aboitiz & Company

Our Six Capitals

Capital Type	Description	Key Metrics
Financial	Our Financial Capital, comprising funds allocated for the production of goods and delivery of services, is strengthened by our robust investor and shareholder relationships, which enables the Group to further build and sustain a resilient business portfolio.	Economic Value Generated and Distributed
Social and Relationship	We recognize the importance of Social and Relationship Capital in making a positive impact on society, including job creation, community development, and innovative philanthropy. Our concept of shared value helps us build trust and loyalty with our various stakeholder networks, creating more value from the relationships and connections we have established and nurtured over time.	Number of partnership engagements Number of membership organizations Number of awards and recognition
Manufactured	In order to reach and serve our customers, we invest in Manufactured Capital, which includes physical assets such as our various spreadquarters, power plants, flour and feed milling facilities, commercial estates, water and electricity distribution facilities, bank branches, and other assets.	Number of physical assets Number of new physical assets Prospective investments
Human	At the core of our success is our Human Capital. Recognizing the capacity and motivations of our people to innovate, we invest in their skills and engagement to ensure they have a fulfilling experience with the company. This helps us achieve our goals for GT2025 and beyond.	Number of FTE, Beneficiaries, communities served
Intellectual	As a leader in the life-essential sectors, we recognize the importance of Intellectual Capital in maintaining a competitive advantage. By building and acquiring intellectual capital, we create unique organizational systems and processes that deepen our understanding of customers and enable us to provide quality products and services essential to their daily lives.	Number of ideas created Innovation projects Implemented or R&D expense Number of patents/licenses
Natural	We recognize that our Natural Capital sustains the goods and services we provide to society. Our businesses rely on finite natural resources and healthy ecosystems and we, therefore, work to ensure the responsible use and conservation of clean air and water, fertile soils, and biodiversity.	Amount of Water and Energy Consumption Number of trees planted Number of Environmental projects/investments

◀ As we evolve into a techglomerate, our commitment remains the same: advancing business, empowering communities.

Driving Impact at Scale

Our evolving value creation model is driving impact at scale while advancing the Aboitiz Group’s sustainability agenda. With over 100 years of business operations and a strong legacy, we recognize that sustainability is essential to long-term viability and success. By co-creating value through innovative products and services, we safeguard the well-being of people and protect the environment, reinforcing our role as a responsible corporate citizen.

This approach enables us to deliver meaningful contributions to national and regional development. By continually refining our value creation model and aligning our sustainability strategy with our techglomerate vision, we are driving positive change across industries while future-proofing our businesses and empowering our people and communities. This fosters long-term resilience, allowing us to create lasting value for future generations.

Results of Operations

The Results of Operations section of the Aboitiz Integrated Report details the performance of our business units—highlighting key operational wins, milestones, and metrics that matter—while outlining the value created in 2024 and our outlook for continued growth and impact in 2025.

POWER

AboitizPower is proud to play a key role in the Aboitiz Group's journey, growing our business in all power segments and thoughtful adoption of technology.

We've made significant strides in delivering power generation projects and growing the number of customers we serve every day.

The road ahead is paved with opportunities to expand our impact, innovate further, and build a stronger and more sustainable energy system that benefits millions of Filipinos now and in the future.

Daniel Aboitiz
President and Chief Executive Officer
Aboitiz Power Corporation

In 2024, AboitizPower reinforced its position as a key player in the Philippine energy sector, adapting to shifting energy needs and growing calls for sustainability. With strategic foresight, we made significant progress by completing multiple renewable energy projects to expand our Cleanergy portfolio, which now exceeds 1,000 MW of capacity. At the same time, we also focused on reinforcing our thermal assets, ensuring a well-rounded energy mix that can meet baseload and peak demands.

AboitizPower produces over 20% of the country's total generation capacity, making it one of the Philippines' largest electricity producers. We plan to continue expanding our portfolio by enhancing our mix of hydroelectric, geothermal, wind, and solar energy alongside thermal plants, contributing to grid stability. Through our distribution utilities, AboitizPower also serves high-growth areas nationwide, delivering reliable and sustainable electricity to millions of Filipinos.

Looking ahead, we remain focused on accelerating the growth of our renewable energy capacity to support the national goal of achieving a 35% renewable energy share by 2030. With a strategic plan to triple our Cleanergy capacity by the turn of this decade, we are driven to play our role in advancing the Philippines' energy transition. By investing in innovative solutions such as energy storage and smart grid technologies, we are positioned to contribute to a more resilient energy future. With a clear vision and unwavering drive, we are poised to continue delivering value to all our stakeholders, contributing to the Philippines' journey toward a cleaner, more sustainable future.

◀ The 173-MWp Calatrava Solar Project is AboitizPower's second solar power plant on Negros Island, bringing us closer to our target of reaching at least 4,600 MW of renewable energy in our portfolio.

- ▶ Total hectares covered:
291.46 hectares
- ▶ Total number of volunteers:
3,206

Transition Business Group

- ▶ The AP Transition Business Group (TBG) has significantly improved asset availability and reliability, with new plants like GNPD and TVI achieving up to 90%
- ▶ The TBG prioritizes safety, recently celebrating key milestones and attaining safety awards. It has also achieved certification in four ISO standards and is driving innovation with 22 projects estimated to save PHP272 million.

Safety Achievements:

1. East Asia Utilities Corp. and Therma Visayas Inc. reached millions of safe man-hours without incidents.
2. Therma Marine Inc. - M2 was recognized at the 13th Gawad Kaligtasan at Kalusugan (GKK) Awards, winning at the regional level.

Innovation and Cost Savings

22 projects in the pipeline are expected to save PHP272 million, with specific savings projections:

- NL projects: PHP156.94 million
- GMEC projects: PHP8.6 million
- GNPD projects: PHP148.35 million

Distribution Business Group

- ▶ We achieved a Net Income After Tax (NIAT) of PHP4,598 million in 2024, reflecting a 13% increase compared to last year's performance. This growth was driven by higher energy sales at 8,016Mn GWh, which is an 8.46% growth versus 2023, driven mostly by residential customers.
- ▶ Customer safety remains our top priority. In 2024, the distribution utilities group responded to emergencies within 30 minutes 92% of the time, a 2% improvement from 2023.

Renewables Business Group

- ▶ We surpassed our annual target for land prospects by securing exclusivity for 985 hectares for 2024.
- ▶ 924 Beneficial MW (318 installed) of new capacity under construction
 - Olongapo Solar: 172 MW
 - San Manuel Solar: 67 MW
 - Bay Battery Energy Storage System: 20 MW
 - Libmanan Wind: 35 MW Beneficial / 58.5 MW Installed (currently in the early works stage, not yet included in the Manufactured Capital list)

Retail Business Group

- ▶ The Advent Energy brand was officially launched, establishing a distinct and independent identity for AboitizPower in the competitive retail energy market.
- ▶ AboitizPower Retail continues to be the largest retail electricity supplier in terms of market share per demand (MW) at 28.56%.
 - The group's flagship retail electricity supplier (RES) entity, AdventEnergy, holds 17.64%, while AESI (now known as Advent Power) is at 8.63%.

- ◀ The 17-MW Tiwi Binary Geothermal Power Plant in Tiwi, Albay, harnesses residual heat from geothermal brine to generate electricity, improving thermal efficiency with a closed-loop system and zero emissions. This facility builds on the existing Tiwi Geothermal Power Plant, further strengthening the Philippines' renewable energy sector.

2025 Outlook

In line with the Aboitiz Group's vision to become the Philippines' first techglomerate, AboitizPower is driving the future of energy in the country. We are committed to supporting the nation's projected 6% to 8% economic growth by blending innovation with sustainability.

Our diversified energy strategy leverages advanced technologies across renewable energy, baseload thermal power, and enhanced distribution systems. We're particularly focused on developing innovative hybrid systems integrating thermal, renewable, and energy storage technologies, recognizing their crucial role in the evolving energy landscape.

With over 1,000 MW of disclosed projects across various indigenous energy sources, we continue actively pursuing solar, hydro, geothermal, wind, and energy storage opportunities, utilizing technology to optimize efficiency and impact. This approach underscores our efforts to deliver value to our stakeholders and accelerate the energy transition for a brighter future for millions of Filipinos.

◀ Therma South, Inc. is the first coal-fired power plant in the Philippines to construct a coal dome, designed to safely store coal deposits and minimize dust pollution from combustion. Located between Davao City and Sta. Cruz in Davao del Sur, the 300-MW plant employs advanced Circulating Fluidized Bed (CFB) technology to optimize combustion and enhance power generation efficiency.

BANKING AND FINANCIAL SERVICES

2024 was a milestone year for UnionBank. The timely completion of the migration of the Citi Philippines consumer business early in the year added to our growing retail customer base, resulting in a year-end total of over 17 million customers. Our concerted efforts to maximize opportunities to introduce our new customers to our differentiated digital experiences across platforms and offer them our innovative products and services have paid off, allowing us to close the year with record-breaking revenue growing to almost PHP80 billion and robust net income of PHP12 billion, up by +31% vs. the prior year. We are now well-positioned with a solid growth engine to deliver even greater value to both our customers and our shareholders in the coming years.

Ana Aboitiz Delgado
President and Chief Executive Officer
UnionBank

UnionBank's Continuing Transformation: Driving Growth Through Customer Centricity

UnionBank's customer-centric and digital-first market approach continue to be its main drivers for growth and expansion almost ten years since its pivotal digital transformation. To date, beyond leading in digital account penetration and successfully completing the full migration of the Citi Philippines consumer business, it has outpaced its peers in growing its retail customer base across segments, resulting in record-high revenues and a healthy bottom line for the Bank.

Metrics that Matter

The investments we have made over the past few years in digital transformation continue to yield significant results:

Record-High Net Revenues:
Increased 12% to
PHP79.5 billion year-on-year

Net Interest Margin (NIM)
expanded by 49 basis points;
Reached a record-high **6.0%**

Strong Bottom Line: Net income:
PHP12 billion (+31% YoY)
driven by strong revenue growth and
prudent cost management

Retail Segment Growth:
Retail loans now make up
61% of the total loan portfolio

Non-Interest Income grew by **14%** to
PHP21.5 billion; Fee-based income up
12% to PHP20 billion

Successfully Completed the Citi Consumer Integration

The completion of the Citi consumer business integration marked a major milestone in UnionBank’s transformation journey. Merging two banking operations of this scale was no easy feat—it required meticulous planning, seamless execution, and a customer-first approach. Despite the complexities, the integration was cited as one of the fastest with minimal client attrition which translated into significant business growth.

We are now reaping the benefits of the successful migration. New card acquisitions, fueled by targeted digital marketing and competitive promotional offers, surged nearly tenfold making UnionBank the third-largest credit card issuer in the market. The impact extended beyond credit cards:

-  **New card acquisitions increased 10x**
Through targeted strategies, digital marketing, and promotional offers, UnionBank has become the third-largest credit card issuer in the market.
-  **Total cards and unsecured consumer loans portfolio grew from PHP10 billion pre-pandemic to PHP128 billion**
Driven by innovative lending and a robust risk framework
-  **Wealth and Private Banking: Assets under management increased from PHP22 billion pre-pandemic to PHP242 billion**
Driven by enhanced wealth advisory services, new investment products, and an expanding retail investor base

▲ A groundbreaking achievement for the banking sector: UnionBank is “Marketing Company of the Year” at the 42nd Agora Awards.

Forging Ahead as a Digital Trailblazer

Without expanding the branch network, we grew our customer base mainly through digital platforms: UB Online for retail banking, The Portal servicing corporate clients, and UB Negosyante catering to SMEs.

In 2024, UnionBank’s retail customer base grew significantly (at 17.3 million by the end of 2024) with around 5 million users actively using the UB Online app. Key features like fund transfers, mobile check deposits, QR payments, bill payments, investment tools, and real-time tracking made it the most downloaded and highest-rated financial app on the Google Play Store.

The Portal and UB Negosyante have also gained traction. These platforms that enable broader market expansion and streamlined financial services for enterprises also enjoyed a significant increase in transactions during the past year.

To further improve accessibility and convenience for our clients, we have implemented an end-to-end digital application for credit cards and personal loans. This innovation enabled us to serve an exponentially growing client base while simplifying our processes for greater efficiency.

UnionBank’s commitment to excellence has earned widespread industry recognition:

- ▶ **Best Retail Bank in the Philippines** – The Asian Banker Global Excellence in Retail Financial Services Awards (5-time winner)
- ▶ **Digital Bank of the Year** – The Asset Triple A Digital Awards 2023 (6-time winner)
- ▶ **Marketing Company of the Year** – Agora Awards

Fast-Tracking Our Vision Through Strong Partnerships

UnionBank's dedication to digital transformation and financial innovation is further reinforced by strategic partnerships.

UBX – SBI Partnership

As UnionBank's in-house fintech arm, UBX plays a pivotal role in accelerating digital transformation. Since its inception in 2018, UBX has evolved from a corporate venture studio into a leading open and embedded finance platform in the Philippines. It has become a key player in the fintech ecosystem, providing financial solutions for businesses, financial institutions, and the government.

UBX's growth has been fueled by strategic partnerships, including a major investment from SBI Holdings Inc., a Japan-based global digital financial services leader. Known in Japan as a leader in digital banking, securities, insurance, and asset management, the SBI Group brings extensive expertise to its investment in UBX. This partnership enhances UBX's fintech capabilities, driving innovation, expanding financial access, and unlocking the Philippine market's growth potential.

The integration of the SBI Group and UnionBank Group ecosystems is expected to create synergies in digital financial services, offering UnionBank Group customers more diverse and enhanced options throughout their financial journey.

Beyond the private sector, UBX has also partnered with the Bureau of Internal Revenue (BIR) to modernize tax compliance, showcasing its ability to develop impactful public sector solutions. Within the UnionBank and Aboitiz ecosystems, UBX has deployed over 100 technology specialists to accelerate critical digital projects.

ATRAM and UBIMTC Partnership: Expanding Investment Solutions

UnionBank has taken a major step in enhancing its investment services by merging with ATRAM, one of the largest independent trust companies in the Philippines. This strategic move is a testament to our commitment to providing best-in-class financial and investment solutions for our customers.

ATRAM brings deep expertise in local and global fund management, catering to a diverse range of investment needs. This partnership allows

UnionBank to enhance its existing trust and investment products, offering clients more diversified and tailored financial solutions. Beyond investment management, ATRAM shares UnionBank's vision for digital innovation. Its focus on strengthening digital capabilities and expanding customer reach aligns with our strategy to broaden access to investment opportunities. By combining our strengths, we are creating synergies that will better serve the evolving needs of the market.

UB Retail Partnerships

Pre-existing UnionBank and Citi cards were not simply rebranded. By elevating features and expanding rewards, we have enhanced the customer experience at every touchpoint. For example, strategic financing partnerships with global tech leaders Apple and Samsung empower cardholders with seamless, cutting-edge purchasing options, reinforcing UnionBank's leadership in digital finance. Long time merchant partnerships such as Shell and Mercury Drug—were not merely retained; our partnerships were strengthened and the co brand cards were infused with greater perks and privileges. Adding new partners like S&R further expanded customer choices, ensuring that every transaction delivered more value, flexibility, and convenience than ever before.

These collaborations affirmed the strength of our strategy, underscoring that our emphasis on digital capabilities, financial inclusion, partnerships and customer-centric solutions paved the way for sustainable growth.

CitySavings: Empowering the Mass Market Through Accessible Loans

CitySavings has played a pivotal role in serving the mass market. Reinforcing its commitment to financial inclusivity and building on its strong foundation in salary lending, the Bank continues to expand while strengthening its presence in key communities.

Enhanced digital capabilities have also extended CitySavings' reach. In 2024, the monthly average active users of the CitySavings Mobile app (formerly Loan Ranger Mobile) grew more than 5x. The increasing adoption of digital lending solutions reflects the evolving needs of customers and the Bank's ability to provide accessible and convenient financial services. CitySavings continues to deliver financial growth. Interest Income and Fees increased by 10% year-on-year, reaching PHP19 billion. The total loan portfolio expanded by 8% to PHP109 billion, with the Department of Education (DepEd) loan portfolio remaining a key growth driver.

With an expanding suite of products and stronger digital capabilities, CitySavings is accelerating financial inclusion, providing accessible and affordable lending solutions to underserved markets.

UnionDigital: Expanding Financial Access Through Digital Banking

UnionDigital continues to extend short-term personal loans to digital clients, addressing their immediate financial needs. In 2024, we strengthened our credit positioning and underwriting processes, allowing us to responsibly serve a wider segment of the mass market while promoting financial inclusion.

While digital banking is still in its early stages, we believe it represents the future of financial services. There remains tremendous untapped potential to grow and cater to the needs of tech-savvy, mobile-first consumers. UnionDigital is well-positioned to drive innovation in this space, ensuring that digital banking remains accessible, efficient, and customer-focused.

▼ Partnerships that power profitability.

2025 Outlook

UnionBank is committed to elevating the customer experience through market-leading digital innovation. As the future of banking hinges on seamless, intuitive, and efficient services, we will continue to enhance our digital capabilities while empowering our clients with personalized recommendations to maximize their banking experience.

Moving forward, our focus is to further unlock the synergies from our 17.3M clients and expanded consumer business. We will leverage on our core strength of delivering exceptional customer experience with differentiated and innovative products, whose benefits are delivered and amplified by our digital platforms and touchpoints, including our branches.

We will continue to engage key customer segments with a targeted approach. The underserved and underbanked will continue to be serviced by our subsidiaries while the retail and middle market segments continue to actively engage on our online platforms. Here they will find a full banking suite from savings and investment products to FX and personal loans and credit cards. Our Institutional Banking group will continue to serve large businesses with customized financing, cash management, trade finance, and digital treasury services. While the requirements of our high-net-worth clients are serviced through our Private Banking and Wealth Management programs wherever they need to be fulfilled (whether digitally or in-person at our Wealth Centers).

Digital will continue to be our key enabler—it is the very foundation of how we operate and how we deliver value to all our customers.

Today's customers expect more than just banking; they demand seamless, secure, and intelligent financial solutions integrated into their daily lives. Reliability and 24/7 accessibility are the standard, but true leadership lies in delivering hyper-personalized experiences that anticipate needs before they arise.

We are committed to shaping the future of finance by delivering cutting-edge, customer-centric solutions that exceed expectations. To sustain our momentum in 2025, we must remain focused on two key pillars:

1. **Customer-Centricity** – Deeply understanding customer needs to develop the right products, seamlessly integrate into their daily banking journeys, and maximize cross-sell opportunities.
2. **High-Tech, High-Touch Operations** – Identifying the most impactful customer journeys and ensuring seamless execution. We aim to scale efficiently while optimizing costs to enhance service delivery.

By staying committed to these principles, we will continue to drive innovation, grow customer relationships, and redefine the banking experience toward strong and sustainable business growth.

FOOD AND BEVERAGES

Our transformation journey has been driven by the Dual Transformation strategy we introduced in 2023. Over the past year, this approach has not only strengthened the resilience of our core businesses—Flour, Feeds, and Farms—but also opened the door to new growth opportunities across our markets, reflecting the evolving needs of those we serve throughout the region. Our transformation is grounded on ensuring that our business is set up to meet the needs of our customers and other stakeholders today, and in the future. In 2024, we began a shift towards a more consumer-centric approach and will look to continue this by establishing meaningful partnerships, expanding our presence in key markets, and connecting more deeply with the lives we nourish.

• New facilities:

► **Gold Coin Long An Feed Mill (Vietnam) - launched in September**

The Gold Coin Long An Feed Mill marks a major milestone in Aboitiz Foods' regional expansion, reinforcing our growing presence in Vietnam. With an initial capacity of 200,000 metric tons — expandable to 300,000 metric tons — the facility is designed to meet the growing demand for high-quality livestock feed in Vietnam's southern region. Integrating advanced production technology, it enhances efficiency, ensures consistent supply, and supports industry stakeholders. This investment underscores our commitment to delivering innovative, sustainable solutions that drive the growth of Vietnam's feed and livestock industry.

◀ Our facility in Iligan features its own port, which can accommodate a variety of ships ranging from inter-island vessels to Panamax ships. This strategic advantage allows us to efficiently deliver our goods fresh to any location in the Philippines.

The Gold Coin Yunnan Feedmill is currently the largest comprehensive feedmill in Yunnan Province, covering a range of species feeds, including poultry, swine, aqua, ruminant, and premix.

► **Gold Coin Yunan Feed Mill (China) - launched in December**

The Gold Coin Yunnan Feedmill is a USD23.1 million investment, representing our commitment to strengthen our operations in China and the Asia Pacific. This facility is currently the largest comprehensive feedmill in Yunnan Province, covering a range of species feeds, including poultry, swine, aqua, ruminant, and premix. Our aim is to set new standards for productivity and efficiency, ensuring we can serve a growing customer base across diverse markets. Additionally, the facility was designed with scalability in mind—currently operating at a capacity of 300,000 metric tons, with the potential to expand to 500,000 metric tons as demand grows.

Social and Relationship

Pilmico’s 2018 acquisition of Gold Coin Management Holdings Ltd, a leading animal

feeds company in the Asia Pacific region, was a major step forward for the company. However, until recently, there was no single identity that unified and embodied the two companies together. To address this, on August 1st, we launched Aboitiz Foods, a corporate brand that unites Pilmico and Gold Coin under one identity. Aboitiz Foods represents more than just a new name or logo; it symbolizes the coming together of two powerful entities, while paying homage to the Aboitiz Group’s 100-year legacy. This new chapter also embodies our continued commitment to nourishing communities from mill to meal, as we move forward into a sustainable and impactful future.

To strengthen alignment with our new corporate identity, we rolled out the Aboitiz Foods Brand Roadshow, engaging 1,337 team members across eight countries. This initiative ensured a unified understanding of our purpose, values, and brand promise as we move forward as Aboitiz Foods.

Human

- 3,876 team members across 8 countries in Asia
- As part of our cultural transformation, we conducted Values Deepening Workshops to reinforce our refreshed value behaviors. These sessions provided team members with practical ways to embody our values in their daily work, fostering a stronger and more purpose-driven organization.

2025 Outlook

In 2024, the launch of Aboitiz Foods marked a significant milestone in our transformation journey. Unifying our businesses under a single corporate brand signifies our ongoing commitment to sustainably feed Asia's growth from mill to meal, as we strengthen our core operations and take advantage of new opportunities that bring us closer to consumers. As we move into 2025, we will continue to build on these initiatives across our Agribusiness and Food & Nutrition divisions.

This direction builds on the foundation that was laid in 2022, when we reorganized our businesses into two key segments: Agribusiness, which encompasses its regional animal nutrition businesses (feed, pet food, and specialty nutrition) across China, Vietnam, Thailand, Malaysia and Brunei, Indonesia, and the Philippines; and Food and Nutrition, which includes businesses catering to the consumer segment of the value chain—flour, farms, meats, and trading—in the Philippines, including retail and other business-to-customer (B2C) initiatives.

Agribusiness

In the coming years, we will continue to strengthen our market position in the Philippines by expanding production capacity in Visayas and Mindanao. We will also enhance our portfolio by investing in precise nutrition solutions, strengthening our pet food offerings, and accelerating the development of our specialty nutrition division.

Regionally, we remain focused on capturing opportunities in high-growth markets, particularly in aquafeeds and geographies where we have both a strong foothold and competitive advantage. The expansion of our feed milling capacity in China and Vietnam in 2024 will be a key enabler of this growth. With the completion of the mills in Yunnan and Long

An, we are set up to meet the increasing demand for livestock and aqua feed for the next few years, further strengthening our presence in those markets.

Food & Nutrition

The Flour division is focused on maximizing growth in Visayas and Mindanao, developing new channels in Luzon, and expanding its portfolio of value-added products.

In the Farms division, the continued integration of the value chain—supported by the third breeder farm expansion—will enhance supply capabilities and unlock new distribution opportunities. Meanwhile, The Good Meat is solidifying its presence in the B2C market, with physical stores, supermarket partnerships, and e-commerce channels driving accessibility and growth.

Strategic Investments for Sustainable Growth

To sustain its growth momentum, Aboitiz Foods has allocated approximately PHP3.5 billion in capital expenditures for 2025. These investments will primarily support the replacement of a feed mill in Malaysia, enhancements to feed mills in China and Vietnam, swine farm repopulation and refurbishments in the Philippines, and greenfield R&D initiatives across regional markets. This reinforces the company's commitment to innovation, operational efficiency, and long-term value creation.

As we move into 2025, Aboitiz Foods remains steadfast in its purpose of Sustainably Feeding Asia's Growth from Mill to Meal. By reinforcing our core businesses and expanding into high-growth consumer markets, we are shaping a future that is both resilient and forward-thinking, ensuring that we continue to nourish communities and drive sustainable value for all our stakeholders.

◀ Aboitiz Foods stands as one of the largest privately held agribusinesses in the region. A shared mission unites our network of over 3,800 partners across eight Asian countries: Sustainably feeding Asia's growth from mill to meal.

Coca-Cola Europacific Aboitiz Philippines

Rooted in the Aboitiz Group's legacy of impact, the Coca-Cola Europacific Aboitiz Philippines (CCEAP)—the bottling partner and official distributor of Coca-Cola products in the Philippines—is engaged in the manufacturing, production, sale, import and export of both non-alcoholic and alcoholic beverages. Its current product portfolio includes much-loved brands under 8 different beverage categories: sparkling, flavored sparkling, water, ready-to-drink teas and juices, dairy, energy, and alcoholic ready-to-drink (aRTD) beverages.

Coca-Cola has called the Philippines home for 113 years. It was the first market in Asia where Coca-Cola began local bottling operations. Today, CCEAP has a substantial local footprint—operating 18 manufacturing facilities, almost 70 distribution centers and sales offices nationwide, employs almost 9,000 regular employees, and supports and serves over 1.2 million micro-retailers as well as over 6,000 key accounts.

Through its great people, great beverages, great execution, and great partners, CCEAP aims to deliver happy, refreshing, and memorable moments across the Philippines every day while keeping sustainability at the core of its operations. CCEAP is committed to being the number one consumer choice in the market categories where it competes, while striving to leave a lasting positive impact on the communities it serves. It operates on the principles of its People First commitment—championing the people at the heart of its business and responding to the needs of its people, partners, and communities it serves. Formerly Coca-Cola Beverages Philippines Inc. (CCBPI), CCEAP is jointly owned by Coca-Cola Europacific Partners (CCEP) and Aboitiz Equity Ventures, Inc. (AEV) following the completed acquisition on February 2024. CCEAP remains committed to its mission of refreshing Filipinos and making a difference across the Philippines.

◀ With the strong dedication of its associates and an enduring commitment to quality and service, Coca-Cola Europacific Aboitiz Philippines (CCEAP) ensures that every bottle brings refreshing moments to Filipino families for generations to come.

Highlights

New products launched in 2024: Royal Tru Orange Zero, Sprite Zero, Absolut Sprite, Jack Daniel's® and Coca-Cola Zero, Lemon-Dou Peach, Monster Ultra, and Predator.

Sustainability remains at the core of our operations:

1. Significant strides in our Tapon to Ipon: Basta Klaro, Panalo! program partnerships - Tapon to Ipon has reached over 170 cities and municipalities. We have recently signed new partnerships for the collection of clear post-consumer PET bottles with City of Dumaguete, Municipality of San Juan, City of Naga, and the Province of Camiguin
2. Full compliance with the Extended Producer Responsibility (EPR) Law (achieved the 40% collection target for 2024).

Relief operations: We are at the frontlines making sure that communities have access to water in times of disaster. In 2024, we donated over 91,000 liters of water to affected communities.

CCEAP has grown alongside the communities it proudly serves—fostering partnerships, driving innovation, and making a meaningful impact.

▲ CCEAP lives by a People-First commitment—championing its people at the heart of its business and responding to the needs of associates, consumers, partners, and the bigger community.

In 2024, CCEAP reached an exciting new milestone when it was welcomed into the CCEP (Coca-Cola Europacific Partners) and AEV (Aboitiz Equity Ventures) families. Stepping into 2025, the company officially changed its name from Coca-Cola Beverages Philippines (CCBPI) to Coca-Cola Europacific Aboitiz Philippines (CCEAP)—signifying strong partnership and a shared mission of refreshing the Philippines and making a difference.

CCEAP has been on a consistent growth journey. The year 2024 was historic for the total beverage company—achieving record-breaking performance through the hard work of its Great People, making and selling Great Beverages, ensuring Great Execution, with the support of its Great Partners—all while ensuring safety and sustainability across operations every single day.

Now more than ever, CCEAP is driven by its strong commitment to sustained growth, an optimistic outlook for the future, and an unwavering dedication to serving its customers. CCEAP remains focused on becoming the number one consumer choice in the market categories where it competes, while promising to serve Filipinos for the next hundred years and beyond.

INFRASTRUCTURE

2024 has been a transformative year for Aboitiz InfraCapital. Our Economic Estates have reached new heights, from LIMA Estate's thriving Biz Hub to TARI Estate's expansion and the sustainability recognitions for MEZ2 Estate and West Cebu Estate. Apo Agua's successful commercial operations marked a historic milestone in the Water sector, Unity Digital surpassed 2,000 points of service, and our Transport & Mobility sector celebrated significant milestones with Mactan-Cebu International Airport's growth and the addition of Laguindingan and Bohol-Panglao International Airports to our network. These accomplishments are a testament to the impact of collaboration and shared purpose.

Cosette Canilao
President and Chief Executive Officer
Aboitiz InfraCapital

Value Created in FY 2024

In 2024, Aboitiz InfraCapital (AIC) made remarkable strides in expanding its presence across key infrastructure sectors and reinforced its position as a leading player in the country's infrastructure development landscape, with notable progress in airports, economic estates, water, and digital infrastructure.

Economic Estates

Recognition:

- ▶ Achieved **5-Star BERDE District Certifications** across all its operating estates—LIMA Estate, MEZ2 Estate, and West Cebu Estate, further solidifying Economic Estates' leadership in sustainable development, and becoming the first industrial developer in the Philippines to achieve this across all its developments.
- ▶ Awarded **Best Industrial Developer in the Philippines** by PropertyGuru for the fourth consecutive year, along with 14 other accolades

LIMA Estate in Batangas:

- ▶ Launched **The Pods at LIMA**, LIMA Estate's first dormitory facility for locator employees
- ▶ Achieved close to 50% occupancy for **LIMA Tower One**
 - Batangas' first premium office building
 - Secured the country's largest provincial office space take-up in 2024 by leasing to Conduent, a global leader in business process services.
 - This cements LIMA Tower One's role as a hub for IT-BPM operations in Southern Luzon
 - Forms part of the Biz Hub at LIMA Estate, Batangas' first masterplanned central business district - integrating industrial, commercial, and lifestyle components
 - Biz Hub at LIMA Estate reflects Aboitiz InfraCapital Economic Estates' commitment to building sustainable, integrated ecosystems that go beyond being business addresses
 - Boosted economic activity and employment in a high-growth region.

◀ LIMA Tower One, located within the 70-hectare Biz Hub at LIMA Estate, is a landmark development poised to transform Batangas into a premier business hub. This world-class office building, the first of its kind in the province, represents a significant step in the ongoing evolution of LIMA Estate into a vibrant, fully integrated business community.

TARI Estate in Tarlac:

- ▶ Launched **TARI Estate**, AIC Economic Estates' fourth Economic Estate
- ▶ Forged a partnership with **House of Investments**, expanding the initial 200-hectare development to nearly 400 hectares with a 184-hectare addition
- ▶ On track with TARI Estate Phase 1 development, signaling robust development with completion targeted for Q3 2026

Water

AIC Water

- ▶ Officially launched AIC Water Business Unit
- ▶ Established a Service Company (ServCo) or AIC Water Platform, focused on business development and strategy, technical evaluation, external affairs, and project management
- ▶ AIC Water ServCo will serve as a platform for the execution of AIC Water's growth roadmap, targeting a doubling of its capacity from 320 million liters per day (MLD) to 650 MLD by 2033.

Apo Agua

- ▶ Commenced commercial activities of Davao City Bulk Water Supply Project, **becoming the largest operating private bulk water supply facility in the Philippines**
- ▶ Davao City Bulk Water Supply Project was named **Best Public-Private Partnership (PPP) Project** by the International Finance Awards.

The Davao City Bulk Water Supply Project, a landmark public-private partnership (PPP) between Apo Agua and the Davao City Water District, was named the country's best PPP in 2024 by the International Finance Awards. The project features sustainable innovations, with a 2.4-MW integrated hydroelectric plant that fully powers the water treatment process and a completely gravity-fed pipeline network.

AIC Estate Water

- ▶ Launched two new projects: **TARI Water** and **MEZ2 Bulk Water**
- ▶ Successfully launched a **pilot solar deep well program**, transitioning West Cebu Estate's deep well facility to a fully off-grid, solar-powered system; the program integrates solar panels and a direct current (DC) solar water pump, enhancing the facility's energy independence and environmental footprint.

Transport and Mobility

Mactan-Cebu International Airport

- ▶ Assumed **full ownership** in October 2024
- ▶ Received **Skytrax 4-Star Terminal** Rating for Terminal 2
- ▶ Reaped several recognitions from **Airports Council International**:
 - Level 2 Airport Customer Experience Accreditation
 - Level 1 Airport Carbon Accreditation
 - Level 1 Accessibility Accreditation
 - Platinum Green Airport Award
- ▶ Introduced **new routes** to key destinations (Domestic: San Vicente, Masbate; International: Bangkok [Don Mueang], Kansai, Osaka, Narita, Cheong-ju), and signed on new airlines such as United Airlines and AeroK
- ▶ Launched **Cebu Connect** airport transfer service system, cutting layover time from one hour to 30 minutes or less

- ▶ **Unity Digital**, the joint venture telecommunications platform of Aboitiz InfraCapital and leading global private markets firm Partners Group, made significant strides in 2024 with its expansion to over 2,000 points of service nationwide.

- ▶ PHP800+ million in capital investments for facility enhancements, including Bridge-Mounted Equipment to reduce aircraft carbon footprint and lower airline operating costs, part of MCIA's commitment to the environment
- ▶ Launched **Abiba Sugbo**, MCIA's bid for the Best Airport Staff award at the Skytrax World Airport Awards 2025
- ▶ Served over **11 million passengers** in 2024 (8.5 million domestic, 2.8 million international)

Laguindingan and Bohol-Panglao International Airports

- ▶ Expanded airport portfolio by securing the concessions for Laguindingan and Bohol-Panglao International Airports, the first two successful unsolicited airport PPP projects awarded under the current administration
- ▶ To be turned over in April and June 2025, respectively

Digital Infrastructure

Unity Digital

- ▶ Expanded to over 2,000 points of service nationwide
- ▶ Balanced portfolio across the country and with all mobile network operator partners
- ▶ Third full year of operations and complete integration of acquired towers from Smart-PLDT and Globe Telecom

- Aboitiz InfraCapital assumed full ownership of Mactan-Cebu International Airport, the country's second-busiest airport, in October 2024. MCIA, which holds a Skytrax 4-Star Terminal Rating for its Terminal 2, welcomed over 11 million passengers in 2024 and received several prestigious recognitions from Airports Council International, including Level 2 Airport Customer Experience and Level 1 Airport Carbon Accreditations from, among others.

2025 Outlook

Looking ahead to 2025, AIC remains committed to its platform and pursuing strategic partnership, and will continue to build transformative infrastructure systems by leveraging synergies with other business units within the Aboitiz Group, driving transformation, and enhancing the value proposition across its various projects.

- Aboitiz InfraCapital mark its 10th year anniversary
- New groundbreakings at LIMA Estate and West Cebu Estate
- Economic Estates is poised for sustained growth as it continues to expand and evolve as the leading industrial-anchored solutions provider in Southeast Asia
- Apo Agua to focus on ramping up production and improving operational efficiencies
- Launch of AIC Water's brackish water desalination project in Cebu
- Official turnover of Laguindingan International Airport and Bohol-Panglao International Airport
- Further portfolio expansion of Unity Digital via macro tower builds and driving colocation across tower assets

◀ In 2024 Aboitiz InfraCapital Economic Estates broke ground on TARI Estate in Tarlac City. As AIC Economic Estates' fourth Economic Estate, the 384-hectare TARI Estate is set to redefine the industrial landscape of Central Luzon, propelling the region toward unprecedented growth.

- ▲ Republic Cement is the first cement company awarded with Domestic Bidder's Certificate of Preference, which certifies that a company's products are manufactured in the Philippines. Present in the awarding ceremony are Republic Cement representatives headed by Reinier Dizon, RCBM President, former DTI Competitiveness and Innovation Group Undersecretary Rafaelita Aldaba, Director Lilian Salonga, Division Chief Sheryl Santos, and Assistant Director Jo-Dann Darong.

Republic Cement and Building Materials

Republic Cement and Building Materials (RCBM), AEV's partnership with global building materials group CRH, operates six facilities across the country that support the Philippines' infrastructure and development growth.

The demand for cement in the country is estimated to have improved by 3% YoY in 2024 due to more robust infrastructure segment while demand for residential and non-residential segments remained soft. The outlook for 2025 is positive, driven by the favorable economic growth and the government's continued focus on infrastructure

development through the Build Better More program.

Although the demand outlook is promising, the continued influx of imported cement, mainly from Vietnam, remains a key challenge. In 2024, imports reached all-time high at 7.6 million tons (MT), which has adversely impacted the domestic industry. As a response to this serious concern, the Department of Trade and Industry has launched motu proprio investigation for possible Safeguards in November last year, the decision of which is expected in Q1 2025.

RCBM remains committed to serving its key markets throughout the country with high-quality products while improving efficiencies and reducing costs. RCBM is poised to capture the market needs with its ~9.7 MMT of cement production capacity.

To mitigate the impact of highly competitive market environment and rising input costs, RCBM continues to focus on operational excellence initiatives and cost control measures, including increase in the use of alternative fuels and harnessing renewable energy. RCBM also continues to staunchly support the Philippine government's Buy Local programs and in particular the recently signed laws on Tatak Pinoy Act and New Government Procurement Reform Act, which provides preference and priority to locally made products in government procurement projects.

- ◀ RapidSET® PLUS Type 1L is Republic Cement's latest innovative offering, proving the company's position as a pioneer in the cement industry. It is the first and only Type 1L cement accredited by the Department of Public Works and Highways (DPWH) for use in government projects after the success of the field performance of its pilot projects.

LAND

As Aboitiz Land celebrates its 30th year in the industry, we look forward to driving sustainable growth, delivering value to our stakeholders and fostering a culture of excellence and collaboration.

Rafael Fernandez de Mesa
President and Chief Executive Officer
Aboitiz Land

Steady Performance and Measured Growth in 2024

Aboitiz Land continues to deliver steady financial performance, reflecting sustained demand across our diverse portfolio and agility in responding to market trends.

 Net income after tax (NIAT) PHP931 million	Driven by strong sales in Priveya Hills and Seafront Residences, as well as increased site accomplishments, higher spot cash sales, and the introduction of more competitive payment schemes
 Garnered residential booked sales PHP4.09 billion	
 Posted total revenues of PHP4.33 billion, achieving a 14% improvement from last year	Due to expanded site development activities in high-end projects
 Gross Profit of PHP2.46 billion an increase of 22% from previous year	Underscoring the company's ability to achieve consistent growth and profitability

◀ The Villages at LIMA Estate unfolds – a testament to Aboitiz Land's 30 years of building communities. This aerial view captures the vibrant tapestry of Brook, Sierra, and Meadow, marking a new era as we step forward as the housing provider for Aboitiz economic estates.

OneVecino is an ecosystem of digital services designed to make the homebuying journey more convenient. Starting as a digital homebuying platform in 2020, it has quickly grown to include Vecino App, Vecino Pay, Vecino Support and Vecino Properties—platforms that ease the purchase process all the way to property management.

Delivering On Our Promise

Aboitiz Land is committed to providing quality homes and in keeping our vecinos’ needs at the forefront of our decisions, ensuring a positive and fulfilling customer experience.

23 residential communities built with over **10,000 vecinos** served.

871 homes turned over to new vecinos

PHP3.87 billion in collections, a 26% increase

- Driven by enhanced collection strategies and strong customer engagement

77% Customer Satisfaction Score

- Reflects commitment to vecino satisfaction and positive customer experiences

Leveraging On A Strong Foundation of Innovation

Innovation continues to drive our organization, as we continue to harvest the fruits of our early pivot towards technology and digitization.

The Vecino App, a cornerstone of our digital ecosystem, has achieved a 94% booking conversion rate, streamlining our booking process and supporting international sales by building trust with overseas partners. It also enhances the customer experience with features like virtual tours, online brochures, reservations, and payment tracking, as well as construction updates and virtual turnovers.

Our marketing efforts generated PHP2.7 billion in reservation sales for 2024, driven by effective digital strategies and on-ground execution.

Our finance operations continue to advance with new systems like the Vendor Portal for better planning and vendor management, while Vecino Pay has been upgraded to expand online payment options.

Sustained Industry Recognition and Accolades

Our dedication to value creation, innovation, and customer-focused development has earned industry recognition through multiple awards over the past year.

Awardee	Award	Event	Year

Aboitiz Land also continues to be recognized for its workplace culture, solidifying our brand of workplace excellence with a back to back award as one of **HR Asia's Best Companies to Work For in Asia**, alongside the prestigious **2024 5-Star Employer of Choice by HRD Asia**.

Seafront Residences in San Juan, Batangas is an award-winning seaside development that has grown into a thriving community, where residents enjoy coastal living and shared spaces by the sea.

- ▲ The Pawikan Conservation Program at Seafront Residences, has evolved into a community-driven program. The Pawikan Hatchery was launched in September, it has helped stabilize the hatching rates ending 2024-2025's Pawikan Hatching Season at 74%

Thriving with Nature and Neighbors

At Aboitiz Land, we go beyond building communities by embracing corporate social responsibility, pushing sustainable programs that uplift lives, protect the environment, and drive lasting positive change.

- Now in its sixth year, our Pawikan Conservation Program at Seafront Residences has evolved into a community-driven initiative with support from partners and local authorities. We have successfully released 4,004 hatchlings with a 74% hatching rate, helping protect the Olive Ridley turtles and marine biodiversity.
- We underscore our commitment to nature-sensitive development and sustainable practices through partnerships with the CORA Foundation

and local government, conducting regular coastal cleanups and tree-planting drives.

- Through Elevate AIDA, we empowered over 175 women in our communities with digital skills, enhancing their employment opportunities and supporting socio-economic development.

Reaching 30 years is a milestone few organizations achieve, but for Aboitiz Land, it stands as a testament to decades of innovation and dedication to creating communities where people flourish.

Innovation continues to drive our organization, as we continue to harvest the fruits of our early pivot towards technology and digitization.

2025 Outlook

Aboitiz Land sets its course for future growth with a transformative vision, guided by three core strategies.

1. Driving Sustainable Growth, Delivering Stakeholder Value

With nine ongoing residential projects spanning diverse market segments, product types, and geographical locations, Aboitiz Land is strategically positioned to capitalize on emerging market trends, drive sustainable growth, and deliver value for its stakeholders.

The rising demand for horizontal developments outside Metro Manila, boosted by new infrastructure in CALABARZON and Central Luzon, supports our expansion. In Cebu, we capitalize on our brand reputation to accelerate legacy projects. Our focus on inventory management, pricing optimization, and innovative marketing aims to boost sales and sustain demand. Strengthening synergies with Aboitiz affiliates and contractors ensures timely project completion, reinforcing our commitment to delivering high-quality homes and value for stakeholders.

We will draw on our innovative and agile culture to continue delivering value for our stakeholders and fulfill our promise to our vecinos of dynamic, master-planned spaces that enrich community living.

2. A Pivotal Role in the Aboitiz Economic Estates

As legacy projects near completion, Aboitiz Land will focus on providing housing solutions within and around the Aboitiz Economic Estates.

◀ Foressa Mountain Town offers a unique blend of nature and community—where scenic mountain landscapes meet thoughtfully designed spaces for adventure and relaxation.

The transformation of Economic Estates in Batangas, Tarlac, and Cebu offers opportunities for future residential initiatives. The Villages at LIMA Estate enhances LIMA's live-work-play experience, boosting property values. Our strategy includes mid-rise, high-rise, and rental housing formats, drawing on our success with Point Blue. This approach strengthens our position as the premier developer of residential communities and elevates the value of the Economic Estates.

3. Leveraging Strength in Synergies

We will maximize opportunities that come with being part of the country's first techglomerate. We will ensure that our stakeholders are able to take advantage of the synergistic value of belonging to the Aboitiz Group, which leverages the strength of its affiliates with expertise in power, water, financing, housing, construction and smart city technologies.

As Aboitiz Land caps its 30th year in the industry, we remain steadfast in our commitment to sustainable growth, stakeholder value, and innovation. By harnessing our expertise, embracing synergies within the Aboitiz Group, and helping drive progress in the Aboitiz Economic Estates, we are shaping a future where our residential communities thrive in dynamic, master-planned environments. With a clear vision and strategic direction, we are poised to redefine our future in the real estate landscape—creating lasting value for generations to come.

DATA SCIENCE AND ARTIFICIAL INTELLIGENCE

We believe that Gen AI will be a critical component for any business. Aboitiz Data Innovation's ability to equip our techglomerate with an in-house developed system will give us a competitive advantage in that we will understand the technology better and we can easily build upgrades to the use cases we find valuable. Having access to experts who are working with the group and actually developing these solutions has already proven to accelerate our ability to comprehend tools like digital twins which we are implementing in AboitizPower.

Nicolas Paris
OIC, Chief Data and Technology Officer
Aboitiz Data Innovation

2024 was a transformational year for Aboitiz Data Innovation as we streamlined the business to achieve 2025 profitability. Our goal to “get in the green” transformed our partnerships with Aboitiz business units by focusing on “value creation through Outsourced Staffing Partner (OSP)” and establishing defined focal points for external sales, positioning ADI for success in key areas.

- ▶ **Get in the Green:** ADI's adaptable structure allows it to adjust to project requirements and shifting customer demands. By efficiently managing our operational staffing levels, we have maintained our focus on our core strengths in Generative AI, data science, and data governance, ensuring that we remain on course to achieve profitability by the end of 2025.
- ▶ **Value Creation Through OSP:** In 2024, ADI has shifted its approach to synergizing with Aboitiz Group business units, moving from small-scale projects to serving as a trusted staffing partner for data science and data engineering expertise. This change aligns with the Aboitiz Group's growing technical maturity and supports our transformation roadmap. To date, AboitizPower currently serves as the largest beneficiary to this, followed by the banking unit.
- ▶ **Our Right to Win:** ADI's success in our project with Asian Development Bank (ADB) has proven our ability to design and deploy Generative AI use cases at scale in highly regulated environments.

Using an agentic approach, ADI delivered six generative AI agents, including AuditGenie, which assists ADB's audit and finance teams with complex queries through a human-in-the-loop model. Other agents support transport, search, and governance functions, with safeguards against large language model hallucinations by comparing outputs from three open-source models for accuracy.

- ◀ The ADI team for Project Arkanghel gathered at the kickoff held in Therma Visayas, with Nico Reyes, Gratz Redoble, Arjay Carangdan, Luis Gonzalez, Araz Kivi, and Er Obias representing key roles across project management, anomaly detection, integration, digital twin, and data science.

Metrics That Matter

Achieved a 40% reduction in operating expenses with a clear path to profitability by EOY 2025

ADI's Executive committee participated in over

100 hours

of thought leadership presentations and panel discussions

The **Digital Twins**

project identified a "good catch" through WS2 Anomaly Detection, avoiding costs of PHP1,645,504.67

Reduced daily revision time by 50% at AboitizPower, saving approximately

4.5 hours daily,

which is now used for optimization tasks

Improved the BCQ declaration process speed by 25% (from 8 to 6 hours) and increased data processing efficiency by

70% at AboitizPower

ADB estimated a

30% productivity increase

in high-value teams across accounting, special projects, and transport

Collaborated with National Privacy Commission on the testing, adoption, and promotion of privacy-enhancing technologies

ADI Customer Wins Highlights:

First Million-Dollar Customer:

UOB Singapore for data governance

Philippines Public Sector Team:

Added Department of Labor and Employment in customer base: with

multi-phase projects for recurring revenues and long-term partnership

New External Customers:

AGEAS, Prudential, UOB, Ryense, SingPost, DBS, Minglabs, NTT

2025 Outlook

ADI is optimistic about 2025 as we have aligned our vision to focus on key products and solutions that drive the most value. This strategy involves doubling down on our core offerings and prioritizing customers with potential for substantial, recurring contracts. By eliminating competing priorities for our sales and development teams, we have streamlined efforts towards what matters most.

The management team is focused on securing key accounts by leveraging our core products and services, which we believe are essential for achieving successful sales. These products are designed to support the techglomerate's current operations while also providing a distinct advantage in a competitive market. This approach reflects our strategic shift towards reinforcing our market position and ensuring sustainable growth.

◀ ADI and AboitizPower leads visited the Arkanghel partner REPCO Nex Digital Reliability Centre in Rayong, Thailand, joined by Pairote Phruethiworakulchai, Tanapat Techawuthik, Wee Chabthanom, Emmanuel Lopez, Shireen Prince, Warit Krittaphol, Luis Gonzalez, Philbright Ang Ti, and Gilbert Chua, representing key leadership roles across REPCO, AboitizPower, and ADI.

CORPORATE SOCIAL RESPONSIBILITY

At Aboitiz Foundation, we are driven by a clear vision: changing lives today to shape a better tomorrow. In 2024, we brought this vision to life through our three pillars—Future Leaders, Jobs, and Climate Action—empowering students, uplifting women, and restoring ecosystems. Our programs bridge education gaps, foster digital inclusion, financial independence, and promote sustainability by reducing waste and revitalizing ecosystems—proving that people and the planet can thrive together.

Challenges remain, but with innovation, collaboration, and determination, we are confident in our ability to scale impact and drive lasting change. Together, we are building a future where everyone can thrive.

Ginggay Hontiveros-Malvar
President
Aboitiz Foundation

Aboitiz Foundation's 2024 Transformation Journey

Rooted in the Aboitiz Group's legacy of impact, Aboitiz Foundation continues its mission to create positive change. Closely aligned to the One New Aboitiz Sustainability Framework, we focused on three pillars in 2024—Future Leaders, Jobs, and Climate Action—by expanding programs, strengthening partnerships, and securing vital funding to uplift communities.

Future Leaders: Empowering the Next Generation

The Aboitiz Future Leaders College Scholarship empowers future innovators and supports talented students, specifically in STEM fields like engineering, IT, and data science.

2024 Impact

- ▶ Aboitiz Foundation and Aboitiz Group business units supported 149 scholars, and partnered with several colleges and universities, including these schools:

We provided tuition coverage, mentorship, financial aid and career readiness programs to equip scholars and career professionals with both academic and practical skills.

- ▶ The Aboitiz Group's USD10 million donation to AIM created the Aboitiz School of Innovation, Technology, and Entrepreneurship (ASITE), a hub for future leaders in data science, technology, and entrepreneurship. With cutting-edge facilities, scholarships, and financing, ASITE equips students to thrive in a fast-evolving world.

2025 Vision

- ▶ To expand funding and strengthen partnerships with universities and private institutions, ensuring more students benefit from this transformative initiative.

- ◀ Aboitiz Foundation nurtures future leaders through education, mentorship, and opportunities for growth.

◀ Aboitiz Foundation's CarbonPH initiative restores ecosystems and sequesters carbon, building climate-resilient communities for a sustainable future.

AuroraPH: Bridging Education Gaps in Last-Mile Schools

AuroraPH is enhancing access to sustainable energy and connectivity in DepEd-identified last-mile schools through the installation of solar panels and battery storage, in partnership with Huawei, Starlink, and GivePower, along with active involvement from various Aboitiz Group business units. By integrating digital tools and technology into teaching practices, AuroraPH is transforming education and creating more conducive learning environments for students and teachers.

2024 Key Milestones	2025 and beyond
▶ Provided 11 last-mile schools with: • Updated learning materials • Reliable internet connectivity via Starlink • Sustainable energy solutions through GivePower ▶ Through collaboration with DepEd, integrated digital literacy into the national curriculum	▶ Powering up and connecting 300 last-mile schools ▶ Expand efforts to bridge educational gaps to shape a brighter future for students in underserved areas ▶ Continue improving access to technology and sustainable energy

Jobs: Empowering Women, Transforming Futures

The Elevate AIDA (Artificial Intelligence Data Annotation) program, a partnership between Aboitiz Foundation, Connected Women, Department of the Interior and Local Government (DILG), and Philippine Commission on Women (PCW), empowers Filipino women—especially stay-at-home mothers, single parents, and displaced workers—by equipping them with the skills needed to secure remote data annotation jobs.

2024 Key Milestones	2025 and Beyond
▶ Empowered 1,135 women through digital skills training; increased their income and improved community well-being ▶ Formed partnerships with 22 LGUs to expand program reach ▶ Gained continuous support from the DILG and PCW to advance gender equality and digital inclusion, creating opportunities for sustainable livelihoods	▶ Upskilling and creating jobs for 300,000 women ▶ Expand training programs to reach more women in underserved areas ▶ Strengthen public-private partnerships for broader impact ▶ Enhance job placement support for program graduates ▶ Continue driving economic empowerment and digital transformation

Climate Action: Nature-based Solutions

CarbonPH is a collaborative initiative led by the Aboitiz Group and the Provincial Government of Cebu, aiming to restore the Central Cebu Protected Landscape (CCPL). This project focuses on reforestation, watershed recovery, and the creation of sustainable livelihoods for local communities.

2024 Key Milestones	2025 and Beyond
▶ Mapped 22,000 hectares for reforestation, exceeding the initial 15,000-hectare target ▶ Established partnerships with local government units and stakeholders to support environmental conservation efforts ▶ Engaged local communities in sustainable job opportunities, including forest management, eco-tourism, and agroforestry, contributing to local economic growth	▶ Growing at least 5 million trees for reforestation and climate action ▶ Initiate reforestation activities within the mapped 22,000 hectares of the CCPL to restore biodiversity and protect watersheds ▶ Strengthen community involvement by providing training and resources for sustainable livelihood opportunities, fostering a green economy in the region

Wasteless Campaign: Promoting a Culture of Sustainability

The Wasteless Campaign is a sustainability initiative introduced during the 24th season of the Aboitiz Football Cup (AFC) in 2024. This campaign is composed of these projects:

1. “Tapon to Ipon: Basta Klaro, Panalo!” program by CCEAP
2. Project Rake in Batangas
3. Materials Recovery Facilities

The Wasteless Campaign collected 58,000 kilograms of waste and promoted waste reduction and recycling. Together, these initiatives highlight a balanced approach to addressing environmental challenges while

empowering communities. In 2025, the Foundation aims to collect 100,000 kilograms of waste, promoting recycling, repurposing, and proper disposal while educating communities on sustainable waste management.

However, the journey is not without challenges. Climate change’s unpredictability demands adaptable, long-term strategies, while deepening community engagement and securing stable funding remain critical. These challenges require ongoing collaboration, innovation, and investment to scale impact and ensure resilience.

AFC Season 24 kicks off the Wasteless Campaign with Coca-Cola Europacific Aboitiz Philippines’ Tapon to Ipon: Basta Klaro, Panalo! program. Encouraging the football community to recycle clear PET bottles, the campaign supports PETValue Philippines in giving them new life.

- ▲ Through Aboitiz Foundation’s Elevate AIDA, mothers embrace digital skills, proving that growth and resilience go hand in hand.

A Commitment to Lasting Impact

Looking ahead to 2025, we remain steadfast in our mission to foster education, employment, and environmental sustainability. By forging stronger partnerships, innovating solutions, and adapting to evolving challenges, we are determined to drive lasting, meaningful impact for Filipino communities. Together, we are building a future where people and nature thrive—proving that sustainability is a shared responsibility for a healthier, more resilient tomorrow.

Aspect	Total
Future Leaders	
 Projects implemented nationwide	144
 Amount granted in dedicated investments for high school and college scholarships	PHP66.04 million
 Classrooms built and/or repaired	209 classrooms
 5 BUs took part in Brigada Eskwela, benefiting	18 schools
 Computers and tablets donated	105
 Total scholars supported	803
Jobs	
 Government units that have adopted the Elevate AIDA program	26 LGUs
 Women trained and empowered through Elevate AIDA	2,178 nationwide
 Employment rate of Elevate AIDA trainees (through our partners)	40% and increasing
Climate Action	
 Projects implemented nationwide	62
 Individuals equipped through targeted capacity-building initiatives to effectively adapt to climate change impacts	30

Aspect	Total
Climate Action	
 Hatchlings released into their natural habitats, contributing to the conservation of endangered species	14,735
 Seedlings planted, fostering reforestation efforts and enhancing carbon sequestration capabilities	3,400
 Waste collected, supporting cleaner, healthier ecosystems	58,000 kgs

Innovation and Partnerships for Resilience: Aboitiz Sustainability in Action

With over 100 years of advancing business and communities, the Aboitiz Group has evolved into a diverse conglomerate across life-essential industries. Now, it aims to become the Philippines' first techglomerate, with sustainability at the core of this transformation. We use the business model and language of environment, social and governance (ESG) to enable holistic sustainability transformations and pivot to how the business should lead in a technology-driven future.

To learn more about our Sustainability Framework, Materiality Assessment process, and Sustainability governance, please visit our Sustainability Microsite: <https://sustainability.aboitiz.com/>.

Aboitiz Sustainability Playbook

In 2024, we further deepened our understanding of ESG, zooming in on what truly matters to address sustainability challenges effectively. Banking on the 2023-launched Aboitiz Sustainability Playbook, we’ve focused on a results-driven approach, empowering teams and stakeholders through innovation and technology. This is led by the Aboitiz Sustainability Council (formerly the ESG Technical Working Group), a team of Sustainability leaders across the Group that convenes regularly to tackle key ESG matters and share best practices, emphasizing our collaborative commitment to meaningful progress.

We have identified three goals where we can make the most most impact:

Our EESG-Focused Actions

Economic, Environment, Social, and Governance

Environment

The Aboitiz Group recognizes the interconnection of ecological, social, and economic systems, thus, our sustainability management approaches for the environment minimize impacts, promote ecological health, ensure compliance, and support a sustainable future while delivering economic, social, and community benefits. EMS (Environmental Management System) frameworks like

ISO 14001 guide our business units in managing environmental responsibilities through continuous improvement, performance monitoring, and effective governance. Regenerating natural capital restores and conserves ecosystems to sustain resources vital for human well-being, economic activities, and long-term business viability.

Environmental responsibility is built into our businesses—ensuring we thrive while helping nature recover and endure.

Aspect	Aboitiz Group's Approach	Strategies	Solutions
 Water	The Aboitiz Group prioritizes sustainable water management to address global and local water challenges. By prioritizing water stewardship and integrating water considerations into our operations and supply chains, our businesses can enhance resilience, minimize operational risks, safeguard water resources for future generations, and contribute to broader sustainable development goals.	▶ Understand water risks ▶ Optimize water usage ▶ Mitigate impacts on ecosystems and communities ▶ Engage with suppliers and stakeholders	▶ Water-efficient technologies ▶ Recycling and reuse systems ▶ Watershed conservation efforts
 Waste	The Aboitiz Group integrates circular economy principles to minimize waste and maximize resource efficiency. By adopting these and implementing innovative waste management strategies, our business reduces costs associated with waste disposal and enhances our competitiveness, and environmental stewardship.	▶ Embrace reduction, reuse, and recycling ▶ Design processes to generate less waste ▶ Close material loops	▶ Eco-efficiency initiatives ▶ Waste-to-energy conversion ▶ Recycling and reusing materials
 Energy	The Aboitiz Group is committed to sustainable energy management, prioritizing efficiency, conservation, and development of renewable energy, thus enabling us to monitor, control, and optimize energy consumption more effectively.	▶ Reduce energy consumption ▶ Promote energy-conscious behavior ▶ Leverage renewable energy sources	▶ Energy management systems, including audits and monitoring systems ▶ Data analytics for optimization ▶ Low-carbon energy consumption driven by solar

Ecosystem-Based Approach to Biodiversity

Led by our different SBUs, we have initiated programs to manage our impact on Life on Water (SDG 14) and Life on Land (SDG 15). Initial environmental impact assessments for business projects have led to our managing different flora and fauna species in ecosystems near the locations of operations of our business units.

Coastal

Verde Island Passage Preservation

In May 2024, the Aboitiz Group partnered with Department of Environment and Natural Resources, Department of Energy, Metro Pacific Investments Corporation, and San Miguel Corporation to protect the Verde Island Passage, a critical marine biodiversity area. This collaboration aims to strengthen marine conservation efforts in one of the world's most important marine corridors. The partnership focuses on science-based solutions, policy support, and community engagement to preserve marine ecosystems, enhance climate resilience, and ensure sustainable livelihoods for coastal communities that depend on the Verde Island Passage.

Key Impact:
Enhanced conservation of a vital marine ecosystem

Aboitiz Cleanergy Park

The Aboitiz Cleanergy Park is an 8-hectare biodiversity reserve in Davao City that serves as a key nesting site for critically endangered hawksbill sea turtles. It features mangroves, a botanical garden with 29 native tree species, 108 bird species, and the Pawikan Rescue Center. The park promotes conservation through tours, PawiCamp, awareness drives, and community activities like tree planting and coastal clean-ups, all aimed at protecting biodiversity and local ecosystems.

Key Impacts:

- ▶ Increased bird populations and turtle nesting activity
- ▶ Enhanced local environment and stronger community participation in conservation

Success Metrics as of April 2025:

Total No. of Hatchlings Released
10,062

Total No. of Rescued Turtles
32

Total No. of Nests Found
88

Total No. of Mangroves Planted
29,042

Total No. of Birds Species
108

Total No. of Visitors
21,741

Pawikan Conservation Project (Seafront)

The Pawikan Conservation Project in Seafront focuses on protecting Olive Ridley sea turtles nesting along the shores of San Juan, Batangas. It includes plans to establish a permanent hatchery, train stakeholders in nesting monitoring, and enhance conservation knowledge. The project supports biodiversity protection while meeting environmental compliance requirements, with future management set to transition to Seafront Residences homeowners to ensure long-term sustainability.

Key Impacts:

- ▶ Strengthened pawikan conservation activities
- ▶ Enhanced biodiversity protection, environmental impact offsetting, and community engagement

Success Metrics as of February 2025:

Total No. of Nests Found
13

Total No. of Hatchlings Released
861

Forests

CarbonPH

In August 2024, the Aboitiz Group and the provincial government of Cebu launched the CarbonPH Project, a multi-year reforestation and watershed recovery initiative. It aims to restore forestlands, boost carbon sequestration, enhance biodiversity, and ensure long-term water security, while also supporting local livelihoods and contributing to national sustainability goals.

Key Impact:

Revitalization of Cebu's protected landscapes and contribution to carbon sequestration efforts

Panigan-Tamugan Watershed

The Panigan-Tamugan Watershed project is a 200-hectare environmental initiative aimed at protecting, rehabilitating, and conserving vital watershed areas to ensure sustainable water resources for Davao City. In collaboration with partners and stakeholders, the project targets the planting of 35,000 endemic and fruit-bearing trees within a designated National Greening Program site of the DENR in Barangays Cadalian and Carmen.

Key Impact:

Sustainable water resources and environmental conservation

AboitizPower and Pangarap

In 2010, AboitizPower adopted a female Philippine eagle named Pangarap to support wildlife conservation efforts. The company provides ongoing funding for her food, veterinary care, and shelter. Originally part of a breeding program, Pangarap now serves as a conservation education ambassador, helping raise awareness about the importance of protecting endangered species. She is under the care of the Philippine Eagle Foundation in Davao City.

Key Impacts:

- ▶ Increased awareness of wildlife preservation
- ▶ Positive impact on conservation education

Rivers

Adopt-a-River/Estero Program

Through the Adopt-a-River/Estero Program, Aboitiz has adopted 12 waterways covering approximately 21.56 kilometers to address pollution, improve water quality, and restore biodiversity. The program includes regular river clean-ups, educational campaigns, and close collaboration with local government units, national agencies such as the DENR, and local communities. By engaging various stakeholders, the initiative promotes the sustainable management and long-term health of these vital waterways.

Key Impacts:

- ▶ Improved water quality and biodiversity
- ▶ Promoted environmental stewardship and community involvement in conservation

Energy

Solar-Powered Water Facility

In 2024, Aboitiz InfraCapital's ME22 and West Cebu Estates implemented several solar-powered projects. This included the launch of a fully off-grid solar-powered deepwell system, utilizing 48 solar panels, inverters, and batteries to generate 26.4 kW of solar power, shaded walkways and streetlights with solar-powered illumination, and the transition of the ME22 office to solar energy.

Key Impact:

Reduced carbon footprint and enhanced sustainability of water operations

Social

For Aboitiz, social sustainability management means embedding social considerations into our strategies, operations, and decisions to create positive impacts and promote well-being. By focusing on people, we prioritize building inclusive, equitable, and sustainable communities while supporting broader societal goals.

Aboitiz Academy: Empowering Continuous Learning and Development

Aboitiz Academy offers a range of programs tailored to the diverse needs of AEV team members through a mix of Core and Leadership programs designed to address professional and organizational capability-building needs. Core programs are open to all team members, focusing on developing essential skills and behaviors that drive personal and transformational growth. Leadership programs are part of targeted interventions based on assessments, designed to enhance the leadership competencies. While these programs may not yield direct, tangible ROI, they aim to build a capable and motivated workforce.

Team Member trainings are delivered through a combination of asynchronous (learning platform-based) and synchronous (live session) learning modalities, ensuring flexibility and accessibility for continuous learning and development.

Positive impacts can be seen through the increasing participation in core and leadership programs, and the high CSAT for both core and leadership programs, averaging at 4.53/5 in 2024. Efforts to provide continuous developmental programs for A-People are reflected in the improved AEV

engagement score, rising from 4.05 in 2023 to 4.13 in 2024. The Gallup survey score of 4.19 for Learning and Growth further demonstrates employees' strong appreciation for programs that meet their learning needs.

Trainings that tackle the Anti-Discrimination and Harassment were conducted in AEV:

- ▶ **#LearningLunes: Creating Safe and Respectful Workplaces** (Live Session)
- ▶ **Safe Spaces Act** (Asynchronous online session)

Currently, 90% of full-time employees (FTEs) have participated in either synchronous or asynchronous programs, showcasing the Academy's wide reach. AEV's learning methodology is built on the 70-20-10 model:

- ▶ **70%** of learning comes from on-the-job experiences such as cross-functional assignments and on-the-job training
- ▶ **20%** comes from mentoring, coaching, and 360-degree feedback
- ▶ **10%** comes from formal training through Aboitiz Academy programs and external courses

Performance Management

AEV's performance management system evaluates both individual and team-based outputs. Objectives are aligned across organizational, departmental, and individual levels to ensure organizational alignment. The system incorporates 360-degree feedback and continuous feedback, encouraging regular performance conversations to support continuous development.

Performance management is conducted year-round through an agile approach, allowing for ongoing goal-setting, monitoring, and calibration as needed to drive progress and align with dynamic business needs. This approach fosters a culture of continuous improvement and collaboration across teams.

As part of AEV's commitment to fostering a high-performance culture, we have developed a comprehensive rewards program that ensures individual contributions are aligned with overall organizational success.

Merit Increase Framework: A structured approach to recognizing and rewarding employees based on their performance, contributions, and impact. This framework ensures that high achievers are compensated fairly while reinforcing a culture of excellence, motivation, and continuous career growth

Regular Benefits Review and Benchmarking: Ensures that offerings remain competitive and aligned with industry standards to foster employee well-being, enhance job satisfaction, and create a supportive environment where our workforce can thrive

Comprehensive Benefits Offerings: Provides market-aligned benefits, wellness programs, and development opportunities to meet diverse employee needs

These initiatives reflect AEV's ongoing efforts to attract, retain, and motivate top talent, reinforcing a workplace built on the principles of excellence, fairness, and sustainability.

◀ Cebu A-People participated in AEVry Step Counts, contributing to a total of 22,157,706 steps in one month as part of AEV's wellness program.

AEVry Step Counts Challenge

- ▶ A company-wide initiative designed to promote physical fitness and teamwork, through a healthy competition

Training on Psychological First Aid

- ▶ Proactive capability building for leaders and the People Team to handle critical cases and support employees-in-need effectively

Flexible Benefit Program

- ▶ AEV enables team members to optimize their benefits through the MyBen Program, allowing them to convert unused benefits into other options that better support their health and wellness.

Labor Rights and Ethical Workplace Practices

- ▶ AEV adheres to the Labor Code of the Philippines through its Code of Discipline, and is committed to respecting labor rights of our team members.

AEV's Commitment to Diversity and Inclusion (D&I)

LGBTQ+ Inclusion: Team Members from the Aboitiz Group participated in the LoveLaban Pride March on June 22, 2024, and hosted "Creating Inclusive Workspaces," a DEI session promoting open discussions and a welcoming environment.

recognitions, a yoga wellness session, and a #BetterUsWomen's Month webinar on work-life balance and self-care.

Women's Empowerment: AEV celebrated Women's Month through our #BetterUs program, featuring LinkedIn Learning courses, badge

Mental Health Advocacy: We strengthened our commitment to employee well-being through onsite counseling, a webinar on workplace distress, and Psychological First Aid Training for leaders.

◀ Aboitiz Group team members celebrated all colors and inclusivity at the LoveLaban Pride March on June 22, 2024.

Fostering Team Member Well-being

At AEV, we recognize that our people are our most valuable asset, as highlighted by Aboitiz Group President and CEO Sabin Aboitiz, who emphasizes, "Our people are the heart of everything we do, and their well-being is key to our success." Guided by this principle, we've implemented a range of initiatives to promote a more holistic approach to wellness beyond physical health but includes mental, emotional, and financial wellness.

Employee Assistance Program (EAP)

- ▶ 24/7 online access to counseling, coaching, and resource materials through our partner Infnit Care, complemented by scheduled onsite counseling sessions for additional support; wellbeing webinars and learning sessions are extended to the broader Aboitiz Group
- ▶ Well-being assessment data from EAP shows a mean score of 58, placing AEV above the client benchmark, reflecting strong employee engagement and effectiveness of the program

Annual Physical Examinations and Executive Check-Ups

- ▶ Comprehensive medical coverage for employees to ensure regular health monitoring, including annual executive check-ups for early detection and proactive health management

Risk Management

In our journey to become the Philippines’ first techglomerate, we made 2024 the year to nurture the seeds planted in 2023 by maximizing our assets—including our people—and preparing for the future.

The AEV Risk Management Team, with the guidance of the Board Risk and Reputation Management Committee (BRRMC), continues to review and update its risk management framework to ensure a tailored management plan. Notwithstanding the federated approach, AEV maintains oversight of each SBU’s implementation of risk management practices tailored to their unique requirements. To warrant the promotion of an effective risk culture across the organization, AEV has regular risk management education through:

- ▶ launching of Risk Management microsite where references, studies and best practices on Risk Management knowledge are shared
- ▶ capability building conducted in order to promote risk management to every team member
- ▶ celebrating risk awareness month that provide specific discussions and skilling up of risk functions

Professional Development & Certification

- ▶ Partnerships with external Risk Management associations keep risk managers updated on trends, knowledge, and skills.
- ▶ Most AEV risk managers are now certified risk professionals, ensuring adherence to fundamental standards and that the execution of the risk management framework remains consistent across all business units.

Framework & Process Improvement

- ▶ The Aboitiz Group risk management framework and processes are continuously reviewed, improved, and validated for efficiency and effectiveness.
- ▶ AEV Risk Management Team collaborates with Group Internal Audit to:
 - Monitor Risk Management Plans (RMPs)
 - Ensure identified risk treatments are timely implemented
 - Board-approved Strategic RMP and Operational RMPs serve as key inputs to the internal audit’s risk-based audit plan

To ensure that the Group is managing its risks, BRRMC reviews the same twice a year as part of its oversight. The following are the identified risks being discussed and continuously monitored.

Relevant Updates on Previously Identified Top Risks

Risk	Updates	Risk Responses and Controls
 Implementation Risk	Likelihood and potential impact decreased as compared to last year	▶ Alignment of project development timelines for all stakeholders; establish clear, measurable and long-term objectives and introduction of group-wide targets cautiously ▶ Investment lookback review and application of lessons learned / output
 People Risk	Risk level remains unchanged The Group recognizes that human factors contribute to a wide range of risks, hence, mitigating that human component is a key part of each treatment plan.	▶ Priority training programs to build and develop Talent Leadership Capability and Competency ▶ Enhancement of strategic work planning, succession planning, and talent review in relation to key roles within the organization ▶ Active and strategic collaboration with academe, industry partners, and government agencies ▶ Adoption of people risk assessment considering the type of talents across the Group
 Cyber and Information Security Risk	Increased level of risk due to re-assessment of a ransomware attack Related risks includes governance, insider threat, and social engineering	▶ Development of Cyber Incident Response Playbook ▶ Reinforcement of Cyber Risk awareness, communication and training programs to each team member ▶ Secured and strengthened software access controls ▶ Adoption of Cyber Risk Management Framework and minimum cyber information security standards across the organization ▶ Adoption of people risk assessment considering the type of talents across the Group

◀ Aboitiz Leaders Raul Imperial Jr. (opposite page, seated at the center) and Jaime Moraza (photo on the left) share their strategic risk expertise at the PARIMA Manila Conference 2024.

Risk	Updates	Risk Responses and Controls
 Transition Risk	This risk reflects how exposed the organization is to operational, financial, and strategic difficulties brought on by the world's shift to a low-carbon economy. Changes in laws, rules, market dynamics, and technology that try to slow down global warming and enhance environmental sustainability are linked to this risk.	▶ Close collaboration and transparency in reports to lenders, government agencies, and other stakeholders ▶ Proactive communication and information educational campaign ▶ Looking into other potential impact such as market shifts and technological advancements
 Regulatory Risk	The potential threats and uncertainties with changes in laws and / or regulations that can materially impact the organization	▶ Engage with government agencies to contribute insights on policy development and implementation. ▶ Close monitoring of legislative agendas and possibly identify impact to particular business unit's operation
 Supply Chain Risk	The likelihood and impact of events at any point in the end-to-end supply chain from sources of raw materials to end use of customers. Also refers to any unplanned glitch or disruption affecting the supply chain leading to the non-fulfillment of customer's requests.	▶ Establish alternative support vendors through playbook for alternative supply sourcing ▶ Pre-qualification of other potential contractors and/or suppliers ▶ Leverage existing relationship of joint venture partners

Discussions on emerging risks are an essential agenda of BRRMC for ensuring long-term sustainability, protecting stakeholders' interests, maintaining the Group's competitive advantage and effectively navigating uncertainties, thereby achieving strategic objectives.

Geopolitical tensions, environmental changes, socioeconomic shifts and technological disruptions are some of the emerging risks that can significantly impact business operations, financial resilience and achievement of long-term strategic goals. In recent years, we witnessed a multitude of risks that may affect the landscape on a short and long-term basis.

Regional Geopolitical Tensions

Disputes such as those in the West Philippine Sea as well as between Taiwan and China pose direct threats to security and economic stability. This is reflected in the heightened geopolitical tensions, state-based armed conflict that is considered as top immediate, short-term global risk for 2025 discussed in the World Economic Forum (WEF) Global Risk Report.** Rising tensions between major powers affect trade and supply chain globally. This also affects geoeconomic confrontations where state imposed sanctions, tariffs and investment screenings contribute to rising inflation and economic downturn that could adversely affect growth and development, especially in the Southern Asia region.

**2025 WEF Global Risk Report: https://reports.weforum.org/docs/WEF_Global_Risks_Report_2025.pdf

Emerging Risks

In June 2024, AEV Risk Management team has conducted a discussion on Understanding Chinese Movements in the Region facilitated by security experts and consultants. The output of this discussion resulted in deeper understanding and contextualization of the regional tension, analysis of different scenarios and its potential impact to the Philippines and identification of potential

mitigation strategies for consideration across the organization.

Misinformation and Disinformation

The ever changing landscape of technological innovations and disruptions also brought the increasing spread of manipulated information, exacerbating political and social polarization. This risk is specifically being monitored as the persistent proliferation of false and/or misleading information or content influence the geopolitical environment, general public perception on personalities, products, services or even the country as a whole.

Linked to this is the widespread use of artificial intelligence (AI). We have seen considerable experimentation with respect to usage of AI tools given its fast-paced change and technological advancement. Lacking the necessary governance in relation to this technological capability may lead to various negative consequences on individuals, government, businesses and environment.

Extreme Weather Events

On a long-term basis, the Philippines being part of Southern Asia is highly exposed to extreme weather events which is forecasted to be more frequent and severe. This may cause economic disruptions and humanitarian crises as well as growing concerns over the impact of climate-related disasters on agriculture, real estate, infrastructure, environmental ecosystems and health systems. Regulatory pressure and climate adaptation challenges may pose significant risk across the organization.

For 2025, AEV Risk Management Team will continue to facilitate discussions, collaborate with internal and external experts with respect to emerging risks to ensure that we enhance our resilience, effectiveness of strategic planning, manage potential impact and capitalize on emerging opportunities.

Audit

The vision of AEV's internal audit is to be the Aboitiz Group's most trusted advisor committed to driving value creation through real-time assurance, advisory and anticipation. Across the Group, the different resident internal audit teams continue to institute global best practices to support the Great Transformation journey.

▲ Twenty-nine Aboitiz Group audit team leaders participated in the 2024 IIA-Philippines Convention to engage in thought leadership, strengthen industry best practices, and drive excellence in internal auditing.

AEV's 2024 Audit Achievements

- 1  Integration of the 2024 Global Internal Audit Standards in the audit charters for evaluating and elevating the quality of audit processes
- 2  Decentralization of technology and cybersecurity audits to foster greater specialization and efficiency
- 3  Strengthen audit governance to ensure a more robust oversight function as a means to achieve sustainable growth and effectively mitigate risks
- 4  Targeted audit projects focused on core and revenue processes, top risks and strategic alignment
- 5  Increased stakeholder collaboration through combined assurance planning to co-develop action plans that are practical and impactful, fostering a sense of accountability
- 6  Drive innovation in audit practices by leveraging on technology and moving towards more data-driven audits
- 7  Align policies and processes through continuous sharing of best practices across the group
- 8  Continuously building auditors' capabilities instrumental in providing better and more fair, accurate and valuable insights to stakeholders and customers

SBU Internal Audit Updates

SBU	2024 Achievements	2025 Focus
AboitizPower	▶ Real-Time Assurance: Decentralized Operational Technology (OT) / Information Technology (IT) and Cybersecurity Audits, implemented Defense-in-Depth strategy using the Cyber Kill Chain framework ▶ Advisory: Organized bootcamp sessions for 100+ internal assurance team members ▶ Anticipation: Launched Combined Assurance Planning, identifying 115 assurance activities for 2025	▶ Conduct more data-driven audits on operations, maintenance, and asset management ▶ Implement risk-based value chain audits for adaptability
UnionBank	▶ Deployed 18 new Continuous Audit (CA) projects—highest in a year ▶ Expanded data analytics-driven auditing, processing 295 data requests (2x 2023). Conducted 100+ validations for regulatory concerns ▶ Completed audit cycle for all 60 tiered application systems in 2 years	▶ Increase full-population testing using data analytics ▶ Expand pre-implementation reviews for earlier risk insights ▶ Strengthen IA in subsidiaries by aligning policies and best practices
Aboitiz Foods	▶ Strengthened Audit Governance to support the dual transformation strategy ▶ Enhanced Audit Committee Charter, developed assessment metrics, revised Group Internal Audit Charter to align with 2024 Global Internal Audit Standards ▶ Shifted to in-house audits, recruited IT Auditor, and developed an automated audit notification tool ▶ Reduced third-party costs by 34%, completed 132 projects (+21% vs. 2023) ▶ Reduced overdue action plans from 14% (2023) to 4% (2024)	▶ Expand risk-based audit planning ▶ Improve IA remediation rating to foster collaboration ▶ Continue enhancing IT audit capabilities
Aboitiz InfraCapital	▶ Strengthened Governance and Controls. ▶ Integrated Audit insights into Operational Efficiency and Strategic Decisions. ▶ Elevated Risk Awareness across all levels.	▶ Drive Innovation in audit practices using agile audit principles. ▶ Increase stakeholder collaboration to develop practical action plans. ▶ Upskill the IA Team in company tools, leadership, and cross-functional projects.

Innovation Management

Turning Our Techglomerate Ambitions into Reality

2024 marked an important stage in our journey to Becoming a techglomerate. This was a year of action, where we moved beyond the Believe and Behave stages of our Great Transformation and began translating our vision into tangible results. We strengthened our foundation and harnessed the culture of entrepreneurial, synergetic, and innovative behaviors to successfully solve problems and generate meaningful impact.

BELIEVE

Understand and embrace techglomerate mindsets and behaviors

BEHAVE

Build new capabilities and ways of working.

Identify problems and opportunities to create new value

BECOME

Successfully solve problems and generate impact

BE

Reach Techglomerate Native state

▼ Empowering a data-driven transformation through the Aboitiz Data Working Group by fostering collaboration, sharing best practices, and enhancing data capabilities across the organization

GT Directives 2024 Initiatives Wins/Metrics

 Ensuring Alignment across Leadership	Further empowered Strategic Business Units to lead their Transformation journeys while ensuring Groupwide alignment. Through the GT Steering Committee, we united the team leaders to drive Transformation goals and share best practices.	The team successfully integrated transformation in AEV scorecards, with Transformation metrics mapped (People, Process, Technology)
 Establishing Foresight Capability	The Foresight Project explores change signals and shifting landscapes to help stakeholders navigate uncertainties.	In 2024, AEV's Transformation, Risk, Strategy, and Synergy teams, with Aboitiz team leaders, identified 300+ signals across Society, Technology, Economy, Environment, and Political domains, shortlisting key insights for scenario planning.
 Driving Innovation Through Artificial Intelligence	Aboitiz drives innovation and responsible AI adoption through structured experimentation and capability building. AEV established governance and policies for secure, ethical AI use and evaluated AI and generative AI tools for business impact. Prompt Engineering programs equipped teams to maximize GenAI's potential, reinforcing Aboitiz's commitment to AI-driven transformation and innovation-led growth.	By integrating AI tools, teams have experienced an increase in efficiency, enabling a focus on more strategic and value-driven activities. Additionally, AI adoption has contributed to cost avoidance and resource optimization.
 Transforming Operations with Data Strategy	In 2025, we launched a comprehensive Data Strategy to transform AEV into an insight-driven organization. The strategy focuses on building data capabilities, elevating data maturity, and embedding data and analytics into business activities. A federated data governance model empowers corporate services units to own their data, while structured training, advanced analytics, and AI-driven insights ensure data is accessible, reliable, and actionable—optimizing processes, unlocking new revenue streams, and strengthening the organization's competitive edge.	Key initiatives include the launch of AEV's data platform, Data Maturity Model, Capability Baselineing, and data governance policies for security and compliance.

GT Directives	2024 Initiatives	Wins/Metrics
 Data-Driven Aboitiz	The Data Working Group (DWG) drives Aboitiz's Great Transformation by fostering a data-driven culture through learning and collaboration. Relaunched in 2024, it enhances data maturity by providing access to top experts and hands-on training in data strategy, governance, analytics, and visualization. DWG introduced the Data Maturity Model and Capability Baseline to identify challenges and opportunities, strengthening data capabilities, and elevating data maturity across the Group.	Through workshops, DWG has empowered teams with the skills to enhance data literacy and implement data best practices. DWG has successfully engaged a diverse group of learners, strengthened cross-business unit collaboration, and contributed to significant cost savings in capability building efforts as well as data strategy updates.
 Strengthening Aboitiz' Cyber Security Posture	Aboitiz successfully implemented the IT Infrastructure and Cyber & Information Security (CIS) Decentralization Program to enhance cybersecurity resilience and empower Strategic Business Units (SBUs) with greater autonomy and agility.	The program enabled SBUs to manage their own IT infrastructure while maintaining strict security standards. Key milestones included network separation, cloud migrations, telephony transitions, and critical CIS services like Identity and Access Management, Cybersecurity Incident Management, and Cyber Risk Management.
 Drive AEV's Core Transformation	The team partnered closely with AEV CSUs to drive transformation at the very core of AEV, aligning with its new role as an active portfolio manager.	Examples of programs include: the Super Ditch Program (eliminating non-value-adding processes to enhance efficiency), Futures Thinking Workshops (opening minds to key trends, possibilities, and customer-centric solution design), and Opportunity Exploration initiatives (exploring new business possibilities through strategic discovery and innovation).
 Making GT Visible	We ramped up our efforts to amplify GT stories across the Group to inspire Team Members to embrace Transformation and drive engagement, leveraging on the Integrated Communications Workgroup, a body of Communications and HR representatives from all SBUs.	ICW Team Members produced a total of 116 stories about impactful GT projects.

GT Directives	2024 Initiatives	Wins/Metrics
 On Demand and Special Projects	The team collaborated with various SBUs to drive transformation efforts aligned with their respective strategic and business goals. This included planning and implementing special projects, facilitating capability-building workshops, and providing on-demand advisory on areas like scorecards, innovation, and strategy. These initiatives empowered teams to embrace innovation, futures-thinking, and strategic growth.	Examples of programs include: 1AP Risk Contingency Planning (gamified planning to explore scenarios, assess risks and opportunities), 1FG Ideation Learning Session (workshop to drive customer-centric innovation), Security Group Futures Thinking Workshop (month-long series aimed to align Security Teams on the Transformation initiatives of the Group and activate Futures Thinking).

GT Stories for SBUs

Power: Project Arkanghel

AboitizPower partnered with REPCO NEX Industrial Solutions to transform its thermal power plants into smart power plants through "Project Arkanghel." The initiative involves creating digital twins—virtual replicas of power plants—and asset monitoring systems for the 300-megawatt Therma South Plant in Davao City and the 340-megawatt Therma Visayas Plant in Toledo City, Cebu. These will enable operators to simulate scenarios and detect issues in real-time, enhancing operational efficiency and reliability.

Banking and Financial Services: UnionBank's Reputation Radar

UnionBank developed its GenAI Reputation Radar that delivers real-time sentiment analysis and provides actionable insights. It has significantly improved the reputation management team's ability to generate accurate reports on current sentiments about the bank. With this enhancement, it enabled timely identification of potential issues and quick escalation and resolution of issues to protect the bank's reputation.

Food: TechMate

The TechMate program, first launched by the Aboitiz Foods' Robotics, Automation & Integration (RAI) team in 2023, empowers employees to automate tasks and enhance productivity using Google Workspace applications. Through training in Google Apps Script, participants develop automation projects that streamline workflows across various departments. The program fosters a culture of collaborative innovation, aligning with the organization's commitment to adaptability and agility in driving positive change.

Infrastructure: AIC ERP & EAM Systems Roll-Out

Aboitiz InfraCapital (AIC) launched in 2024 the AIC Economic Estates (EE) ERP System with the successful go-live of the Synergy-EE Package 1, AIC's biggest and most complex system implementation yet with four parallel projects going live simultaneously; AIC Service Asset Management and Work Clearance Management Modules. It also launched the Mactan-Cebu International Airport's SAP Enterprise Resource Management and Enterprise Asset Management (EAM) systems. These projects are aligned with AIC's move to digitalize processes and operations and improve overall data management. Building on the success of these launches, additional similar projects are already in the pipeline.

Land: OneVecino

OneVecino is a comprehensive digital ecosystem by AboitizLand that enhances the homebuying and ownership experience, evolving from a 2020 digital selling platform into an end-to-end solution. In 2024, it expanded to include Vecino App, Vecino Pay, Vecino Support, and Vecino Properties, streamlining property searches, payments, support, and management. A key milestone was the launch of UPay under Vecino Pay, enabling seamless transactions via GCash, GrabPay, VISA, and Mastercard. By continuously leveraging technology, OneVecino drives digital transformation in real estate, reinforcing AboitizLand's commitment to innovating ways of living.

Data: Enterprise-Grade GenAI Innovation

Aboitiz Data Innovation launched AVA AI in 2024, a Generative AI (GenAI) platform designed to enhance enterprise productivity across both public and private sectors. Built for seamless integration, AVA AI connects with existing systems to streamline complex workflows and empower teams to securely and efficiently extract valuable insights from their organization's collective data. Now available for external adoption, AVA AI is a scalable solution for businesses seeking to leverage AI-driven efficiency and innovation—with Asian Development Bank as its first client.

Construction: Project Nexus

Aboitiz Construction successfully transitioned to a new enterprise resource planning system designed to enhance efficiency across key functions, including Supply Chain, Finance, and Project & Portfolio Management. The upgraded platform integrates advanced project tracking tools, a mobile app for real-time site updates, and a vendor portal for improved supplier communication and visibility. These enhancements streamline operations, improve data accuracy, and support better project execution.

Group - Culture Pillar: Data Science Bootcamp

The Data Science Bootcamp, launched by the Culture Pillar and Aboitiz Academy as a pilot in 2023, trained 30 participants who formed five Data Science Challenge groups, with 10 individuals recognized for outstanding performance. Building on this success, Season 2 in 2024 saw a surge in participation, with 338 employees joining across the Group, featuring a learner-led bootcamp design for greater flexibility. The program combines theoretical and hands-on learning, including self-paced courses, enrichment sessions, and a data science challenge, providing a comprehensive and immersive learning experience.

The road ahead

In 2025, Aboitiz fully embraces its role as a Techglomerate, using this year as a springboard for sustained transformation. By strengthening collaboration and breaking silos, we unlock synergies that drive innovation and agility, positioning us to navigate challenges and seize new opportunities.

Tax Management

Advancing Business and Communities Through Responsible Tax Management

The Aboitiz Group strongly believes in and adheres to the fundamental principles of good governance which involves the payment of the correct taxes on time and compliance with all administrative and reportorial requirements of the relevant tax authorities. As a responsible corporate citizen, we do our best in doing our equitable share in contributing to the country's economic development and to maintain a sustainable long-term value for our business and stakeholders.

At the parent company, a Tax Committee has been instituted pursuant to its Charter to fulfill the following key objectives:

Align tax strategies and implementation plans with the overall business objectives of the Aboitiz Group.

Review and assess the adequacy of the Group's tax programs and strategies against industry benchmarks and best practices, and make recommendations on enhancements if necessary.

Analyze the potential impact of tax risks on the Group's businesses, operations, and reputation, and report the treatment plans and mitigation strategies to the Board Risk and Management Committee.

Maintain consistency in compliance processes and documentation, including adherence to international tax requirements and in-country audits.

Regulators are driving the need for greater transparency through increasingly stringent reporting requirements. Toward this end, the Tax Advisory & Compliance Services Team has undertaken reasonable steps to comply with the reporting standards set by the Organization for Economic Cooperation and Development (OECD) Guidelines under the Three-Tiered Approach, including the preparation of the Master File, Local File, Country-by-Country Report (CbCR), and the Global Information Return (GIR) under BEPS 2.0 Pillar 2.

The rapid advancement of technology has made it necessary to evolve how the Group relates to stakeholders, and customer priorities. To address this, tax transformation initiatives have been implemented, identifying solutions and leveraging existing technology where possible. These efforts have enabled a shift toward a data-driven and digitally-enabled tax function. Key innovations include the Audit Tracker, Storage and Retention (SnR) Database for automated safekeeping and compliance checks, the Audit

Readiness Program to streamline the process, and reinforce audit capabilities, and the automation of CbCR report generation to ensure data integrity.

To effectively execute tax strategies and uphold governance and compliance standards, close collaboration with controllers and finance teams across business units remains essential. This partnership ensures the adoption of best practices and the implementation of sustainable business solutions. A strong foundation of tax knowledge is maintained through continuous professional development, which is crucial for navigating complex regulatory landscapes.

Over-all, the Group's strategic pillars pave the way of having clarity of purpose of the overarching tax policies, philosophies and functions that will enable the organization to magnify on what matters the most in advancing business and communities.

◀ AEV FVP for TACS Joseph Tugonon was a panelist at the 2024 Tax Campaign Kickoff in Cebu City with the discussion focused on the importance of collaboration in improving tax compliance.

2024 Corporate Governance Report

Governance that Transforms

As the Aboitiz Group approaches the culmination of its Great Transformation journey in 2025, both AEV and AboitizPower have made significant strides in strengthening their governance structures to support the evolving needs of a modern, forward-looking organization. At the heart of this transformation is AEV’s strategic shift into an active portfolio manager—an approach that empowers the Group to optimize business performance, create synergies, and unlock long-term value across its diverse investments.

Guided by the ambition to become the Philippines’ first techglomerate, the Group continues to embrace innovation, enhance digital capabilities, and promote collaboration across its business units. These efforts are anchored in strong governance principles that ensure accountability, transparency, and alignment with the Group’s vision of driving meaningful impact for all stakeholders—communities, customers, partners, and employees alike.

Robust corporate governance remains the foundation upon which the Group builds its strategy and performance. Through deliberate oversight, structured decision-making, and a deep commitment to ethical leadership, the Boards of AEV and AboitizPower continue to steer their companies toward transformation, resilience, and sustainable growth.

At the forefront of this transformation are the Board of Directors of AEV and AboitizPower. Their steadfast dedication to principled governance ensures the Group remains agile, resilient, and prepared for the future. Through strong ethical leadership, clear oversight, and a commitment to transparency, the Board provides the strategic guidance needed to navigate uncertainty, capitalize on new opportunities, and sustain long-term value creation for all stakeholders.

Aboitiz Governance Framework

Our corporate governance framework, which is deeply rooted in the Aboitiz core values of Integrity, Teamwork, Innovation, and Responsibility, has been institutionalized in the respective AEV and AboitizPower Corporate Governance Manuals (Manual), Codes of Ethics and Business Conduct (Code of Ethics), and related governance policies and protocols.

AEV Governance Organization

AboitizPower Governance Structure
As of January 2025

Aboitiz High Impact Governance

Governance at Aboitiz is strengthened by the synergistic partnership between the highly skilled and diverse Boards and Board Committees of AEV and AboitizPower. This collaboration is reinforced by capable and responsible management teams, as well as empowered team members. In the face of a rapidly changing business landscape, this collaborative governance model equips Aboitiz with the adaptability to navigate challenges and pursue strategic growth directions.

Aboitiz High Impact Governance - 3 Program Components

Agile Board

- A Board that has the right size, committee structure, and profile that is aligned with the operational requirements and the growth aspirations of the Group,
- A Board that has the right mix of Technical and Behavioral Competencies and are exposed to the business.

Engaged Board

- A Board that has a productive working relationship amongst each other and with management.
- A Board that is FAMILIAR not only with the Company’s mission, vision, and culture, but also IMMERSSED in businesses, operations, initiatives of the Company through collaborations within and outside the confines of the Board room.

Supported Board

- A Board that is SUPPORTED by processes and protocols that facilitate the effective discharge of its functions, so that the directors can focus on governing, rather than administrative details.

BOARD OF DIRECTORS

The Boards of AEV and AboitizPower play a pivotal role in shaping and evaluating the purpose, vision, mission, and strategies of each company, ensuring a comprehensive understanding and effective execution of their respective goals. This oversight guarantees that the strategic direction of each business is not only well-defined and properly managed but also aligned with the overarching strategic objectives of the Aboitiz Group. Functioning independently from day-to-day management, both

AEV and AboitizPower Boards are dedicated to providing each company with a strategic roadmap for a modern and transformative future. This commitment is manifested through a focus on high-potential growth initiatives, fostering a renewed entrepreneurial mindset, and continuous investment in the development of team members within an enabling and inclusive work environment. This proactive approach reflects the Boards’ dedication to steering their companies towards innovation, growth, and sustainable success.

*From Mr. Erramon I. Aboitiz’s re-appointment as Director of AboitizPower, effective April 22, 2024.

Board Performance

In 2024, the members of the AEV and AboitizPower Boards conducted the following performance reviews and assessments:

Type of Assessment	Respondents and Scope	Criteria
1. Director Self-Assessment Completed: AEV - October 2024 AboitizPower - February 2024	Respondents: Members of the Board Scope: Individual and the collective performance of members of the Board and Board committees	(1) compliance with best governance practices and principles, (2) participation and contribution to the Board and committee meetings, and (3) performance of their duties and responsibilities as provided in the company’s Revised Manuals, Charters, Amended Articles, and Amended By-Laws
2. Key Officers Evaluation Completed: AEV - October 2024 AboitizPower - November 2024	Respondents: Members of the Board Scope: Chairman, Chief Executive Officer, Internal Audit Head, Risk Officer, Corporate Secretary, and Compliance Officer	
3. Director Evaluation Completed: AEV - October 2024	Respondents: Executive Officers Scope: Members of the Board and Board Committees	(1) business acumen, (2) independent judgment, (3) familiarity with the business, (4) active participation and effective challenge, (5) professional expertise and network, (6) value contribution, (7) embodiment of Aboitiz core values, and (8) goodwill and reputation
4. Board and Committee Charter Assessment Completed: AEV - December 2024 AboitizPower - November 2024	Respondents: Board and Committee Members	(1) membership and composition, (2) duties and responsibilities, (3) conduct of meetings, (4) support and resources

The Corporate Governance Code and the Revised Manuals require that at least once in every three years, the conduct of the Board performance assessment must be supported by an independent third-party facilitator. AEV complied with this requirement in 2023 with the engagement of Complete Coherence, a leadership development and coaching company based in the United Kingdom. The results of the assessment, as well as the recommendations from Complete Coherence, were presented and discussed at the Board meeting on December 12, 2023. AboitizPower complied with this requirement in 2023 with the engagement of the Institute of Corporate Directors (“ICD”), a non-stock, not-for-profit national association of corporate directors and other stakeholders engaged in corporate governance to support its Board performance assessment exercise.

Board Independence

At AEV, the Sustainability, Governance, and Related Party Transactions (SGRPT) Committee, and at AboitizPower, the Environmental, Social,

and Corporate Governance (ESCG) Committee, are instrumental in strengthening the corporate governance frameworks of their respective organizations. Operating in accordance with their approved Committee Charters and Corporate Governance Manuals, both bodies help ensure that the Boards function with independence and integrity. They do so by setting clear standards and policies related to the nomination, selection, performance, and ethical conduct of directors—reinforcing the principles that uphold effective and responsible Board leadership.

In 2024, the AEV and AboitizPower Boards were composed of a majority of Non-Executive Directors and Independent Directors. AEV has three qualified Independent Directors and five Non-Executive Directors out of its nine Board members. Meanwhile, AboitizPower has two qualified Independent Directors and five Non-Executive Directors out of its nine Board members. In addition, both Boards appointed a Lead Independent Director who serves as an intermediary between the Chairman and the other Directors whenever necessary. In 2024, AEV

and AboitizPower had no Independent Directors who served for more than nine years. AEV and AboitizPower, when needed, use professional search firms to recommend potential nominees.

Board Diversity Policy

The Board diversity policies of AEV and AboitizPower advocate for the selection of a diverse set of highly skilled Directors and Officers. These individuals bring to the table extensive knowledge and experience in the core industries relevant to the operations of the Group. The selection process prioritizes several factors, including a diverse range of business experiences, behavioral and technical competencies, varied backgrounds, age, and gender.

Both Boards are composed of professionals from diverse fields, including legal and finance experts, engineers, former or current CEOs/ COOs, auditors, and accountants. Their collective expertise reflects not only a wealth of industry-specific knowledge but also a broad spectrum of perspectives. Many members of the Boards have substantial management experience in both private and government sectors, as well as in multilateral agencies, thereby contributing to a well-rounded and adaptive leadership.

By embracing such diversity, AEV and AboitizPower recognize the inherent strength in bringing together individuals with varied skill sets and perspectives. This approach not only enhances the Boards’ decision-making processes but also reinforces their ability to navigate the complexities of the ever-evolving business landscape. The commitment to diversity extends beyond a mere acknowledgment of differences; it is a strategic imperative that ensures the Boards are equipped to meet the multifaceted challenges and opportunities of the industries they operate in.

In terms of gender, AEV currently has two female members in the Board of Directors.

Director Development Program – Aboitiz Board Learning Sessions and Virtual Asset Tours:

AEV and AboitizPower place a premium on the proactive engagement of their Directors with

current industry dynamics and business trends to bolster the Group’s competitiveness. Equally vital is the assurance that all Directors have a clear understanding of their duties and responsibilities, supported by the necessary information to effectively fulfill their functions.

To this end, the AEV and AboitizPower Manuals require every director to undergo an initial onboarding session upon first appointment to the Board, and to commit to a continuing professional training program (formal and informal) to ensure that Directors remain abreast of the latest developments in internal policies, pertinent laws and regulations, and the diverse business risks relevant to the Group’s operations. Taking a hands-on approach, the Chairmen of both Boards, in collaboration with their respective Compliance Officers, actively oversee the compliance of Directors and Key Officers with these requirements. This collaborative effort reinforces a commitment to continuous learning and professional development, positioning AEV and AboitizPower’s leadership to navigate the complexities of the business landscape with acumen and foresight.

In 2024, AEV continued to organize its “Aboitiz Board Learning Sessions” and “Board Consultation Sessions”, a series of online seminars and consultation sessions with renowned experts across the globe. These sessions were intended to provide the Directors and Officers with current industry developments, business trends, and corporate governance practices. These aim to promote the Group’s competitive advantage, build on the techglomerate premium, and address any identified skill or competency gaps. These sessions were attended by the Directors and Officers of the various strategic business units, including AboitizPower.

AEV organized 10 Board Learning Sessions and three Consultation Sessions. Some of these sessions were accredited by the Securities & Exchange Commission (SEC) in compliance with the four-hour mandatory corporate governance seminars for Directors and Officers of publicly listed companies. In 2024, all the Directors and Officers of AEV and AboitizPower were able to comply with the SEC’s mandatory annual corporate governance seminar.

2024 Director Development Program

*These trainings were accredited by the SEC as compliance with the annual four-hour mandatory corporate governance seminar for Directors and Officers of publicly-listed companies.

Director Compensation

The SGRPT Committee of AEV and the ESCG Committee of AboitizPower play a vital role in ensuring that the remuneration of Directors and Key Executives aligns with the Group’s culture, strategic direction, and business policies. Anchored in the Aboitiz Compensation Philosophy, these Committees consider a range of factors—including individual and company performance, market competitiveness, and inflationary trends—to design compensation structures that attract, retain, and motivate top talent essential to the Group’s continued success.

Each year, the findings of a comprehensive compensation study are transparently reviewed, discussed, and approved during the first meetings of the respective Committees. This deliberate and collaborative process reflects the Group’s strong commitment to fairness, meritocracy, and long-term value creation. By upholding these principles, the SGRPT and ESCG Committees help cultivate a high-performance culture that recognizes excellence and reinforces the Group’s commitment to sustainable leadership. The Directors of AEV and AboitizPower are not involved in the discussion of their respective compensation.

In 2024, the Directors of AEV and AboitizPower were entitled to the following compensation:

Remuneration	Type of Meeting	Directors / Committee Members	Chairman of the Board / Committee Chairman
Per Diem for Every Meeting Attended	Board Meeting	₱150,000.00	₱225,000.00
	Board Committee Meeting (except Audit Committee)	₱100,000.00	₱150,000.00

**** Retired on June 30, 2024.
***** Appointed as Director on July 1, 2024.
***** Resigned as director effective March 26, 2025.

BOARD COMMITTEES

The various AEV Board Committees - Audit, Sustainability, Governance and Related Party Transactions, Risk and Reputation Management, Executive Committee, and the Cyber and Information Security Committee - report regularly to the Board and are crucial in maintaining Board oversight in key management areas. Each Committee operates under clearly defined mandates and regularly reports to the full Board, providing in-depth reviews, recommendations, and updates on critical areas of governance and operations. Through this structure, the Board is equipped to maintain effective oversight across key domains such as financial integrity, regulatory compliance, sustainability, stakeholder engagement, risk management, information security, and overall corporate reputation. This multi-committee framework enhances the Board’s ability to make well-informed decisions, ensuring that AEV remains agile, resilient, and aligned with its long-term strategic goals.

The mandate of each AEV Board Committee, including key accomplishments in 2024, are described below:

A. The **Sustainability, Governance, and Related Party Transactions** (SGRPT) Committee of AEV plays a pivotal role in spearheading the creation of a robust governance mechanism. It is a mechanism specifically designed to champion sustainability practices, encompassing responsible environmental stewardship, meaningful social development, and the implementation of sound corporate governance principles. In 2024, the AEV Board approved the integration of the Environmental, Social, and Corporate Governance (ESCG) Committee and the Related Party Transactions (RPT) Committee to streamline oversight and enhance governance efficiency. The SGRPT Committee ensures responsible environmental stewardship, meaningful social development, sound corporate governance, and fair related party transactions while also fulfilling the functions of the Nomination and Remuneration Committees. Supported by Ex-Officio Members from compliance, human resources, sustainability, and external relations, the Committee benefits from expert insights to align governance decisions with the Group’s strategic objectives. In 2024, the voting members of the Committee were composed of all the three (3) Independent Directors, one (1) Non-Executive Director who is the Chairman of the Board, and (1) Executive Director. The Chairman of the Committee is an Independent Director who is not a chairman of any other committee.

Key Areas of Focus in 2024

Environmental and Social	- Updated the OneNewAboitiz Sustainability Playbook and monitored the progress of the Group-wide ESG Materiality Re-assessment. - Completed the prefeasibility stage of the Aboitiz CarbonPH Project - Ensured that the company’s ESG programs were implemented. - Continued to monitor the implementation of the Group’s 10-year Aboitiz ESG Roadmap.
Compliance	- Reviewed and monitored AEV’s compliance with new laws and regulations - Reviewed and monitored the status of whistleblowing reports.
Corporate Governance	Approved the integration of the Board Related Party Transactions Committee into the Board Environmental, Social, and Corporate Governance Committee, and renaming the latter Board Sustainability, Governance, and Related Party Transactions Committee.
Audit Charters	- Ensured that the nomination, selection, election, remuneration, and assessment of AEV and AboitizPower Directors and Officers are aligned with the Revised Manuals - Approved the final list of nominees for Directors for election after reviewing all the qualifications as provided in the Amended By-Laws, Revised Manuals, and other relevant SEC rules - Reviewed the qualifications of all persons nominated to appointed positions by the Board - Reviewed and approved the 2024 Group-wide merit increase guidelines
Completion of RPT Certification	- Updated and monitored compliance with the submission of the RPT Certification by Directors and Key Officers of AEV to comply with relevant BIR regulations on the reporting guidelines for transactions of individuals and juridical entities with related parties - Monitored the compliance of AEV with BIR’s reportorial requirements and SEC requirements
Fairness of RPTs	Continued to ensure that RPTs are on an arm’s length basis and within market rates, with sufficient documentation, and coursed through the appropriate levels of approval

The **Board Environmental, Social, and Corporate Governance Committee** of AboitizPower is responsible for ensuring the establishment of a governance mechanism that promotes sustainability practices through proper environmental stewardship, social development, and sound corporate governance. The ESCG Committees also perform the functions of the Nomination and Remuneration Committees. In carrying out their duties and responsibilities, the ESCG Committee is supported by the company’s Compliance Officer, Chief External Relations Officer, as well as the Group Chief Human Resources Officer. These officers regularly attend committee meetings to act as resource persons. The chairmen of the ESCG Committees are the Lead Independent Directors.

Key Areas of Focus in 2024 (AboitizPower)

Environmental and Social	- Approved the Company’s ESG Roadmap and Sustainability Ambition. - Monitored the progress of the ongoing ESG Activities.
Compliance	- Reviewed and monitored the AboitizPower’s compliance with new laws and regulations. - Ensured that the nomination, selection, remuneration, and assessment of each company’s directors and officers are aligned with the Manuals.
Corporate Governance	- Reviewed and endorsed for Board approval the proposed amendments to - the ESCG Committee’s Charter to clarify the committee’s role as the primary advisory and exploratory body that endorses to the Board of the Directors general strategies with respect to material, current, and emerging ESG and other similar matters that affect the Company. - Reviewed and monitored the status of whistleblowing reports.
Nomination and Compensation	- Approved the final list of nominees for directors for election after reviewing all the qualifications and none of the disqualifications as provided in the By-Laws, Revised Manuals, and other relevant SEC rules. - Reviewed the qualifications of all persons nominated to appointed positions by the Board. - Reviewed the Group’s merit increase guidelines.

The **Board Related Party Transaction Committee** of AboitizPower represents the Board in discharging its responsibility to ensure that related party transactions are taken on an arms’ length basis and within market rates, with sufficient documentation, and coursed through all appropriate and necessary levels of approval.

Key Areas of Focus in 2024 (AboitizPower)

Governance	Reviewed and endorsed for Board approval the proposed amendments to the Board RPT Committee Charter to align with the amended Board Protocols on the deadlines for submission of materials.
RPT Policy and Committee Charter	Conducted the annual review of AboitizPower’s RPT Policies to further strengthen the process of reviewing, reporting, and (if necessary) approving RPTs, particularly those falling below the SEC-defined materiality threshold.
Completion of RPT Certification	Monitored the compliance of AboitizPower with the reportorial requirements of the BIR.
Fairness of RPTs	Continued to ensure that RPTs are taken on an arm’s-length basis and within market rates, with sufficient documentation, and coursed through the appropriate levels of approval.

B. The **Board Audit Committees** serve as the Board’s representative in overseeing audit-related matters, ensuring transparency, accountability, and robust financial governance across the Group. Composed primarily of Independent Directors, including its Chairman, the Committee upholds objectivity and independent oversight. The Chief Financial Officer (CFO) and the Internal Audit Head, who functions as the Chief Audit Executive, regularly attend meetings as resource persons, providing critical insights into financial and audit matters. To reinforce its independence, the Committee holds executive sessions at the end of each meeting, convening without the presence of management to facilitate candid discussions and strengthen oversight effectiveness.

Key Areas of Focus in 2024 (AEV)

Financial Reports	- Reviewed, discussed, and approved for public disclosure the quarterly unaudited consolidated financial statements in 2024 - Endorsed for approval by the full Board the 2023 annual audited financial statements of AEV, its Subsidiaries and Affiliates.
External Auditors	- Reviewed the performance of SGV as AEV’s external auditor. - Endorsed to the Board the appointment of SGV as AEV’s External Auditor for 2024. - Reviewed and approved the overall scope and audit plan of SGV. - Reviewed and approved the audit plan, fees, and terms of engagement, which covers audit and non-audit services provided by SGV.
Internal Auditors	- Reviewed and approved the annual audit program for 2024 which also covers the adequacy of resources, qualifications and competency of the staff, and independence of the internal auditor - Confirmed that the internal audit function is executed effectively and internal auditors have conducted their responsibilities objectively and in an unbiased manner
Audit Charters	Updated the Board Audit Committee and Internal Audit Charters to improve on each of the company’s control performance by having an adequate and effective internal control system

Key Areas of Focus in 2024 (AboitizPower)

Governance	Reviewed and endorsed for Board approval the proposed amendments to the Board Audit Committee Charter to reflect necessary changes to the composition of the committee and to align with the amended Board Protocol.
Financial Reports	- Reviewed, discussed, and approved for public disclosure the 2024 quarterly unaudited consolidated financial statements. - Endorsed for approval by the full Board the 2023 annual audited financial statements of AboitizPower, its subsidiaries and affiliate.
External Auditors	- Reviewed the performance of SGV as AboitizPower’s external auditor. - Endorsed to the Board the appointment of SGV as AboitizPower’s External Auditor for 2024. - Reviewed and approved the overall scope and audit plan of SGV. - Reviewed and approved the audit plan, fees and terms of engagement which cover audit and non-audit services provided by SGV.
Internal Auditors	- Reviewed and approved the annual audit program for 2024 which also covers the adequacy of resources, qualifications and competency of the staff and independence of the internal auditor. - Reviewed the Internal Auditor’s evaluation of internal controls. - Reviewed sample CAPEX transactions to help ensure process integrity and promote continuous improvement. - Confirmed that the internal audit function is executed effectively and internal auditors have conducted their responsibilities objectively and in an unbiased manner.

Sufficiency of Internal Control and Compliance System

The AEV and AboitizPower Audit Committees assist their respective Boards in fulfilling oversight responsibilities over their company’s system of internal controls. They are responsible for monitoring, overseeing, and evaluating the duties and responsibilities of management, the internal audit activity, and the external auditors as those duties and responsibilities relate to the organization’s processes for controlling its operations. In 2024, the President and Chief Executive Officer, and Internal Audit Head attested to the sufficiency of the internal control and compliance system of AboitizPower. On the other hand, the President and Chief Executive Officer, the Internal Audit Head, and the Chief Compliance Officer attested to the sufficiency of the internal control and compliance system of AEV.

Audit and Non-Audit Fees

In 2024, AEV and AboitizPower reappointed accounting firm SyCip Gorres Velayo & Co. (SGV) as their respective independent external auditor. Ms. Jhoanna Feliza C. Go is the current audit partner on her second year after replacing Maria Veronica Andresa R. Pore in 2022. The Board Audit Committee reviews the performance of its external auditors. As a policy, the Board Audit Committees recommend to their respective Boards the choice of external auditor for the year. The committees also review the extent, nature, and fees for the services to be provided to ensure that the independence of the external auditors is preserved.

The following table sets out the aggregate fees paid by AEV and AboitizPower for professional fees rendered by SGV:

Fee Type (as of December 31, 2024)	AEV	AboitizPower
Audit and Audit Related Fees		
Audit Fees	₱625,000.00	₱1,193,500.00
Audit-Related Fees	₱3,457,500.00	₱6,000,000.00
Sub Total	₱4,082,500.00	₱7,193,500.00
Non-Audit Service Fees		
Other Assurance Fees	₱3,307,500.00	-
Consultancy Fees (Non-Audit)	₱2,240,870.00	₱102,000.00
Sub Total	₱5,548,370.00	₱102,000.00
Total Audit and Non-Audit Fees	₱9,630,870.00	₱7,295,500.00

The **Risk and Reputation Management Committees** exercise oversight functions over each company’s enterprise risk management and reputation management, including their respective corporate brands and communication strategies. The committees ensure the establishment and maintenance of a robust risk management framework and the requisite supporting governance mechanism within their respective companies. In 2024, the Risk and Reputation Management Committee of AEV was composed of all the three Independent Directors, one Executive Director, and one Non-Executive Director who also acted as the Chairman of the Committee. The Chairman of the Risk and Reputation Management Committee of AEV is not the Chairman of the Board or any other Board Committees. Meanwhile, the Risk and Reputation Management Committee of AboitizPower was composed of the two Independent Directors, one Executive Director, and three Non-Executive Directors, including the Chairman who is also the Chairman of the Board.

Key Areas of Focus in 2024 (AEV)

Governance	Reviewed and updated the Board Risk and Reputation Committee Charter
Enterprise Risk Management	- Reviewed and discussed AEV’s Mid Year and Year-End Top Risks Report where regulatory and cyber risks, respectively, took the top spot. - Introduced portfolio risk and implementation risk as among the new top risks of AEV as it takes on a more active portfolio and investment management role
Business Continuity	- Updated the Business Continuity Policy to reflect the minimum guardrails for Strategic Business Units (SBUs) in light of the Group’s federalization - Monitored Business Continuity Plan Testing of Aboitiz businesses
Risk Finance	Reviewed the proposed structure and utilization of AEV’s captive insurance vehicle.
Reputation	- Updated the committee on the annual reputation management plans, and results of the company’s brand and reputation surveys. - Discussed the Reputation Strategy & ESG Synergy framework

Key Areas of Focus in 2024 (AboitizPower)

Governance	- Continued alignment of the top-down approach through the key portfolio risks to strategic risk identification, where risks are identified at the 1AP Management Committee level, and the bottom-up approach of risks identified from the AboitizPower business and corporate service units. - Operationalized setting the risk appetite and risk tolerance (key risk indicators) for key portfolio risks through consultation with the Management Committee and Board Committee members. - Reviewed and endorsed for Board approval the proposed amendments to the Board Risk and Reputation Committee Charter to reflect necessary changes to the committee’s composition and to align with the amended Board Protocol.
Risk Planning	- Regularized the “Risk in Focus” segment in the agenda to discuss strategically relevant key portfolio risks with inputs from the subject matter and industry experts. - Regularized Learning Sessions segment in the agenda to reinforce board learning of key and foundational risk management concepts and practices. - Invited a resource speaker to provide the Committee information on the latest currency risks from global key markets, and its possible effects and risks to AP from an outside perspective. - Reviewed and discussed AboitizPower Group’s Mid-Year and Year-End Top Risks report where project risks and country concentration risks, respectively, took the top spot.
Risk Finance	- Shared best practices and key strategic initiatives with the other SBUs of the Aboitiz Group which were instrumental to the achievement of the annual insurance cost of AboitizPower. - Incorporated AboitizPower’s own insurance captive to retain underwriting profit and drive risk management across the entire Group.
Reputation	Discussed results of AboitizPower’s Reputation ID Score and PR Value for the year 2024 including the key activities that led to the changes of both figures.

The **Board Cyber and Information and Security Committees** assist the AEV and AboitizPower Boards in providing the strategic direction, ensuring the establishment of the company’s system of governance (processes, policies, controls and management) on all matters relating to information security and cybersecurity. In 2024, the AEV Cyber Committee was composed of two Independent Directors and two Non-Executive Directors, including its Chairman. Meanwhile, the AboitizPower Cyber Committee was composed of two Non-Executive Directors, one of which served as the Committee Chairman, and one Independent Director. In 2024, the AboitizPower Cyber Committee was composed of two Non-Executive Directors and one Independent Director who also served as the Chairman of the Committee.

Key Areas of Focus in 2024 (AEV)

Cybersecurity Manual and Committee Charter	Reviewed and amended the Committee Charter.
Organizational	Updated the membership to include the Chairman of the Board Risk and Reputation Management Committee as a permanent voting member.
Cybersecurity Strategy	- Approved the Guidelines for Federalization of Cybersecurity Management - Authorized the CISO Council, in collaboration with the Risk Management Committee to develop guidelines on vendor selection to share best practices across the Aboitiz Group.
Cybersecurity Risks	Reviewed the Cyber Risk Management Framework.

Key Areas of Focus in 2024 (AboitizPower)

Governance	Reviewed and endorsed for Board approval the proposed amendments to the Board CIS Committee Charter to align with the amended Board Protocols.
Organizational	Completed AboitizPower’s Cyber and Information Security Organization based on the approved functional structure
Cybersecurity Strategy	- Released the revised OT minimum security standard aimed at establishing OT relevant baseline security controls. - Established foundational cybersecurity governance policies, guidelines and procedures. - Intensified security awareness activities through the use of digital platforms and systems. - Established channels to better communicate and collaborate cybersecurity-related matters. - Engaged in an innovative and proactive way of discovering and resolving weaknesses/vulnerabilities in our digital environment. - Conducted comprehensive OT-specific tabletop exercises aimed at increasing AP BUs’ preparedness to manage or handle OT cybersecurity incidents. - Engaged external parties to conduct OT security assessment to identify vulnerabilities, risks and areas of improvement, assess cybersecurity posture and ensure compliance against internal policies and industry standards. - Engaged a consolidated IT & OT Managed Detection & Response (MDR) service including incident Response Retainership (IRR).
Cybersecurity Risks	Adopted the globally recognized MITRE Attack framework for ICS to systematically identify and quantify potential vulnerabilities in our OT environments, improving our threat detection and incident response capabilities, and overall OT risk management.

The **Executive Committees** assist the Board in overseeing the company’s day-to-day operations and ensure agility in its management and in strategic decision-making. They also ensure compliance with the Company’s governance policies during the intervening period between Board meetings. Since the company’s Board of Directors met monthly in 2024, no Executive Committee meetings were held during the year.

GOVERNANCE PRACTICES

Disclosure and Transparency

The Governance and Compliance Team, as well as the Board Secretariat, of AEV and AboitizPower monitor and timely disclose any changes in the share ownership of their respective Directors, Executives, and Key Officers. They also ensure that trading blackouts are implemented at the right time and to appropriate individuals.

Every quarter, AEV and AboitizPower disclose a public ownership report detailing the extent of ownership of their respective controlling stockholders, including the shareholdings of subsidiaries and affiliates, and of Directors and Key Officers. In addition, the two companies disclose a list of their top 100 stockholders every quarter. They also disclose their top 20 stockholders, including record and beneficial stockholders owning more than five percent of their respective outstanding capital stock. Both companies, however, have no control over external stockholders who opt to put their shares under nominee holding companies such as the PCD Nominee Corporation, and are thus unable to make any disclosure on the details of beneficial ownership.

Stockholders with at least 5% Beneficial Ownership of AEV as of December 31, 2024

Transactions of Directors and Officers

AEV and AboitizPower disclose the beneficial ownership of their Directors and Key Officers in regular filings of the Statement of Beneficial Ownership, and in the Annual Corporate Governance Report. The Revised General Trading Policies of both companies require the Board of Directors and Officers to notify the Office of the Corporate Secretary immediately after they deal in company shares.

These AEV and AboitizPower Directors and Officers made the following transactions as of December 31, 2024:

Compliance with Key Governance Policies

In 2024, AEV and AboitizPower updated their respective Codes to align with international best practices and promote the Group’s ESG efforts, and their commitment to ethical corporate citizenship. The following policies and guidelines were approved by the AEV and AboitizPower Board of Directors:

Manual on Corporate Governance	The Manuals of AEV and AboitizPower are the articulation of each company’s corporate governance principles. In addition, each company’s Manual defines their respective compliance system, outlines the functions and responsibilities of their Board of Directors, and provides for the rights of all stockholders and the protection of the interest of the minority stockholders. The Manuals are clear statements by their respective Board of Directors, management, employees, and stockholders that corporate governance is a fundamental component of sound strategic business management. Since the Manuals were first approved, these have since been reviewed and amended by subsequent Board actions in keeping with evolving best practices in the Philippines and the ASEAN Region. There are no reported major deviations from the Revised Manuals as of the date of this report.																				
Whistleblowing Policy	To support the implementation of the Revised Manuals and the Codes, both AEV and AboitizPower have a Whistleblowing Policy. Through their respective policies, allegations of violations of the Manuals, Codes, and other related policies or other illegal conduct can be reported through the Aboitiz Whistleblowing Portal. In keeping with global best practices, the management of the Aboitiz Whistleblowing Portal was migrated from an internally-managed platform to an independent third party-managed platform in 2022. Alleged violations can now be reported online through the following link: www.aboitiz.ethicspoint.com. Matters reported through the platform are discussed by the ESCG Committee and, if necessary, by the entire Board of Directors. Once received, whistleblowing reports undergo the Aboitiz Group’s investigation standard operating procedure and escalation process. The Group acknowledges that a key component to an effective whistleblowing policy is the whistleblower’s protection from retaliation. As such, AEV and AboitizPower’s Whistleblowing Policy ensures the complete anonymity of the whistleblower and that any person raising a serious concern in good faith will be protected from reprisals or retaliation. 2024 Summary of Whistleblowing Reports <table><tr><th></th><th>Reports Received</th><th>Corruption-Related</th><th>Closed</th><th>Ongoing Investigation</th></tr><tr><td>Groupwide</td><td>34</td><td>0</td><td>34</td><td>0</td></tr><tr><td>AEV</td><td>7</td><td>0</td><td>7</td><td>0</td></tr><tr><td>AboitizPower</td><td>10</td><td>0</td><td>10</td><td>0</td></tr></table>		Reports Received	Corruption-Related	Closed	Ongoing Investigation	Groupwide	34	0	34	0	AEV	7	0	7	0	AboitizPower	10	0	10	0
	Reports Received	Corruption-Related	Closed	Ongoing Investigation																	
Groupwide	34	0	34	0																	
AEV	7	0	7	0																	
AboitizPower	10	0	10	0																	

Related Party Transactions (RPT) Policy	In October 2019, the AEV and AboitizPower Boards approved the RPT Policy in compliance with the SEC Memorandum Circular No. 10 series of 2019 (SEC RPT Circular), which focuses and regulates only material RPTs or RPTs amounting to 10% or higher of a company’s total assets. The Circular also specifies an approval process for material RPTs and mandated publicly-listed companies to notify the SEC of their RPTs that breach the threshold. The AEV and AboitizPower Board RPT Committees have the mandate to ensure the fairness and arm’s-length bases of RPTs, with sufficient documentation, and coursed through all appropriate levels of necessary approvals. In 2024, AEV and AboitizPower did not enter into any material RPTs and there was no reported case of non-compliance with the laws, rules and regulations pertaining to significant or material RPTs. All RPTs were conducted at arm’s-length basis.
Conflict of Interest Policy	AEV and AboitizPower believe that it is the duty of the Board of Directors to advance the Group’s interests and those of the companies’ stakeholders. To this end, both companies have adopted a Policy on Conflict of Interest, which promotes an ethical corporate culture. It prohibits directors, officers, team leaders, and team members from taking advantage of their access to corporate property and proprietary information for personal gain. The policies require the disclosure of relationships, actions, or transactions that may give rise to a conflict of interest. In addition, AEV and AboitizPower Directors are required to abstain or inhibit themselves from any Board discussion or decision that affects or has relevance or relation to their personal, business, or professional interests. The Directors are also prohibited from engaging in any business that competes with or is antagonistic to the Group. In the event of a perceived or actual conflict of interest, the concerned director must notify the Board through the Corporate Secretary. Directors must also notify the Board, through the Corporate Secretary, before accepting any directorship outside the Aboitiz Group during their term. In 2024, there was no reported incident of non-compliance with the Conflict of Interest Policy.
Data Privacy Policy	In 2017, AEV and AboitizPower launched their respective data privacy compliance programs, which include the implementation of the Information Security Management System (ISMS). Since then, both companies have been able to establish a fundamental awareness of data privacy principles and the related ISMS philosophies, through various learning channels including e-learning modules, face-to-face trainings, and forums. They also continue to ensure the implementation of Data Privacy Policies, manuals, and guidelines that are aligned with the Data Privacy Act, including its implementing rules, and supporting National Privacy Commission (NPC) circulars. As the Aboitiz Group continues to operate in a highly digital and fast-changing environment, the Data Protection Teams of its business units will strive to keep up with the expectations of their data subjects, as well as with the evolving guidelines of the NPC. This constant review of requirements, downloading of information, updating of processes, and testing of capabilities aim to ensure that Aboitiz is able to meet stakeholders’ expectations. Inquiries or concerns regarding data privacy and/or data subjects’ rights may be submitted to the Data Privacy Officer through AEV: aevdpo@aboitiz.com and AboitizPower: apdpo@aboitiz.com

Disclosure Policy	To supplement the implementation of the Manuals and the Codes and in compliance with laws and regulations, AEV and AboitizPower each have their own Disclosure Policy that requires complete, timely, and accurate disclosures to the SEC, the PSE, and the PDEX. The company’s Board Secretariat ensures compliance with the disclosure rules. In 2024, there were no reported cases of non-compliance with the disclosure rules of the SEC, the PSE, and the PDEX.

Transparency, Communication, and Sustainability Reporting

Safeguarding the rights of its stockholders stands as a cornerstone principle for AEV and AboitizPower’s governance practices. The primary objective is to guarantee the unfettered exercise of stockholder rights, fostering an environment where every shareholder, irrespective of the quantity of shares they own, can actively and freely participate in corporate decision-making processes. This underscores not only a commitment to regulatory compliance but also a proactive approach in cultivating transparency, equity, and shareholder inclusivity within each company’s governance principles.

Among the rights of company stockholders are to: (i) receive notices of and to attend stockholders’ meetings; (ii) participate and vote on the basis of the one-share, one-vote policy; (ii) call for a special board meeting and propose a meeting agenda; (iii) participate and vote on the basis of the one-share, one-vote policy; (iv) vote in person, in absentia, or through proxy; (v) ratify corporate actions; (vi) nominate, elect, remove, and replace Board members (including via cumulative voting); (vii) inspect corporate books and records; (viii) receive dividends; and (viii) be informed in a timely and regular manner of the state of the company’s businesses.

Right to Actively Participate at Stockholders’ Meetings

AEV and AboitizPower are dedicated to conducting their Annual and Special Stockholders’ Meetings

(ASMs) with transparency and fairness, facilitating stockholders’ access to accurate and timely information to make informed decisions on matters presented for consideration or approval.

The comprehensive financial, non-financial, and operating performance summaries of AEV, AboitizPower, including their Subsidiaries are detailed in their respective Definitive Information Statements and Annual Reports. These documents, distributed ahead of ASMs and available on the companies’ websites. New and returning Directors’ profiles, along with a summary of the Board and Board Committee’s performance assessments, attendance records, compensation, and notable achievements for the year, are also shared with stockholders.

To enhance accessibility, notices for AEV and AboitizPower ASMs, complete with quick response (QR) codes to the Definitive Information Statements, are published in two widely circulated newspapers within 21 days before the meetings.

The commitment to shareholder engagement is evident in the conduct of stockholder meetings, with notices provided at least 28 days before the meeting, containing all agenda items for discussion. No new agenda items are introduced during the meeting, and the rationale for each item is included in the notices.

AEV and AboitizPower prioritize providing accessible venues for stockholders to exercise their right to attend and participate in shareholder meetings. In 2024, for the fifth consecutive year, AEV and AboitizPower conducted a fully digital stockholders’

meeting. Stockholders were given the option to cast votes through non-traditional means such as remote communication or in absentia via an online voting portal.

The open forum during stockholder meetings enables stockholders to voice concerns, ask questions, and comment on the state of the businesses through the ASM online portal or live interaction if time permits. There are no barriers preventing stockholders from communicating with each other, Directors, or the Corporate Secretary.

Commitment to transparency is evident as minutes from meetings, including questions, answers, issues, motions, agreements, and voting results, are reported and made publicly available on the companies’ websites under the Investor Relations page on the next working day. AEV and AboitizPower promptly disclose all approved items to the PSE, PDEX, and the SEC by the next business day.

Continuing their commitment, AEV and AboitizPower actively work to expand communication channels

with institutional and individual stockholders through their Investor Relations Office and Shareholder Relations Office, respectively.

Right to Dividends

The right to receive dividends is a basic stockholder right. AEV and AboitizPower promote this basic stockholder right by adopting a clear and transparent dividend policy.

Every year, AEV and AboitizPower pay dividends in an equitable and timely manner. All stockholders are treated equally, receiving dividends that are proportionate to their shareholdings. The period for paying the dividends is based on trading requirements or constraints of the SEC and PSE. In 2024, AEV and AboitizPower paid the cash dividends within 21 days from the declaration date.

In the last three years, AEV and AboitizPower have paid the following dividends:

		Declaration Date	Record Date	Payment Date	Dividends per Share	Total Dividends Declared
AEV	2024	March 5, 2024	March 19, 2024	March 26, 2024	₱1.40 (regular)	₱7.87bn
	2023	March 3, 2023	March 17, 2023	March 30, 2023	₱1.47 (regular)	₱8.28bn
	2022	March 4, 2022	March 18, 2022	March 30, 2022	₱1.62 (regular)	₱9.12bn
AboitizPower	2024	March 5, 2024	March 19, 2023	March 26, 2024	₱ 2.30 (regular)	₱16.57bn
	2023	March 3, 2023	March 17, 2023	March 30, 2023	₱ 1.87 (regular)	₱13.76bn
	2022	March 4, 2022	March 18, 2022	March 30, 2022	₱1.45 (regular)	₱10.66bn

AEV and AboitizPower believe that the rights and interests of minority stockholders are aligned with those of the controlling stockholders, not only in terms of returns on their investments, but also in the sustainability of the Group’s businesses. Both companies ensure the timely disclosure to stockholders regarding their respective businesses, and that stockholders receive dividends in accordance with established dividend policies.

Financial Statements

This section covers the audited financial statements and reports of Aboitiz Equity Ventures and AboitizPower for the year ending December 31, 2024. These documents highlight the financial performance of both companies and reflect our ongoing efforts to uphold transparency and sound governance. They offer stakeholders a clear look at how we commit to our brand promise of advancing business and communities.

The Board Audit Committee Report to the Board of Directors

Aboitiz Equity Ventures Inc.

The Board Audit Committee is pleased to present its report for the financial year ended December 31, 2024.

Audit Committee Responsibility

In giving effect to its duly approved charter, the Audit Committee assisted the Board of Directors in fulfilling its oversight responsibility to the public, governmental and/or regulatory bodies and other stakeholders in helping:

- a) Ensure the integrity of the Company’s financial reporting processes, including ensuring the integrity of financial reports and other financial information provided by the Company to the public, governmental and/or regulatory bodies;
- b) Ensure excellence in the Company’s control performance by having an adequate and effective internal control system, governance processes and risk management processes and reviewing the performance on the Company’s internal audit function;
- c) Review the annual independent audit of the Company’s financial statements and the external auditors’ qualifications and independence;
- d) Ensure compliance with applicable laws and regulations which may represent material financial exposure to the Company; and
- e) Provide an avenue of communication among the Company’s independent auditors, management, the internal auditing department and the Company.

The Committee has established a constructive and collaborative relationship with the Company’s senior leadership to give support, but not to pre-empt any responsibility in making final audit-related decisions.

Committee Membership

The Audit Committee is composed of five (5) members, three (3) of whom are independent directors including its Chairman.

Cesar G. Romero, Independent Director, is the Chairman of the Committee. Other members of the committee are Joanne De Asis (Independent Director), Peter D. Maquera (Independent Director), Erramon I. Aboitiz (Non-Executive Director) and Ana Maria A. Delgado (Non-Executive Director).

Meetings and Attendance

The Audit Committee carried out its function through its meetings with management, internal auditors, independent external auditors, advisers, and others where appropriate.

The audit charter provides for the Committee to hold at least four (4) regular meetings a year, with the authority to convene special meetings when deemed required.

In 2024, four (4) meetings were held. The attendance by each member of the committee is so indicated below:

Member	Mar 4, 2024 Regular Meeting (Virtual)	April 24, 2024 Regular Meeting (Virtual)	July 24, 2024 Regular Meeting (Virtual)	Oct 25, 2024 Regular Meeting (Virtual)
CESAR G. ROMERO Chairman, Independent Director	✓	✓	✓	✓
PETER D. MAQUERA Independent Director	✓	✓	✓	✓
JOANNE DE ASIS Independent Director	✓	✓	✓	✓
ERRAMON I. ABOITIZ, JR. Non-Executive Director	✓	✓	✓	✓
ANA MARIA A. DELGADO Non-Executive Director	✓	✓	✗	✓

Attendees to these committee meetings also include the Group Internal Audit Head and, by invitation, the Chief Risk Officer, the Chief Financial Officer, Controller and other key leaders whenever deemed appropriate and necessary.

Executive sessions, without the presence management, are scheduled after every regular committee meeting as part of the meeting agenda to allow for unfiltered and candid discussions.

One-on-one sessions between the Board Audit Committee Chairman and the AEV Group Internal Audit head are also held regularly at least once a quarter.

Financial Reports

The Board Audit Committee reviewed, discussed, and approved for public disclosure the 2024 quarterly unaudited consolidated financial statements. The Committee endorsed for approval by the full Board the 2024 annual audited financial statements of Aboitiz Equity Ventures, Inc., its subsidiaries and alliances. Included in the review were the Management Discussion and Analysis of Financial Condition and Results of Operations following prior review and discussion with management, accounting, and the company’s independent external auditor, Sycip Gorres Velayo & Co. (SGV)—member practice of Ernst & Young (EY) in the Philippines.

The activities of the Audit Committee are performed in the context—

- That management has the primary responsibility for the financial statements and the financial reporting process; and
- That the company’s independent external auditor is responsible for expressing an unqualified opinion on the conformity and consistency of application of the Company’s audited financial statements with Philippine Financial Reporting Standards.

External Auditors

The 2024 overall scope and audit plan of SGV were reviewed and approved during the October 25, 2023 regular Audit Committee meeting. The audit plan, fees and terms of engagement which covers audit-related services provided by SGV were also reviewed and found to be reasonable.

The results of the SGV audits and its assessment of the overall quality of the financial reporting process were presented and discussed during the first Audit Committee meeting the following year, March 5, 2025.

Non-audit services (NAS) were provided by SGV in 2024. The fees were related to the BIR 1709, transfer pricing consulting activities and AEV International SG corporate tax services including the conduct of trainings with regard to the adoption of new accounting standards and regulations.

All NAS provided by SGV has been approved in compliance with the new IESBA requirement for pre-concurrence for all proposed NAS before it is entered into or the provision of the services begin from those charged with governance, which in the case of AEV is its Board Audit Committee.

The Board Audit Committee, after evaluation of the performance of the external auditor in 2024 and finding it to be in accordance with the Standards, favorably endorsed to the full Board the re-appointment of SGV as external auditor for 2025. The full board, in its special meeting held March 7, 2025 approved the re-appointment of SGV with Jhoanna Feliza C. Go as the signing partner for AEV.

This re-appointment of SGV as the independent external auditor is subject to the final approval of the shareholders of AEV during the Annual General Stockholders meeting scheduled in April 28, 2025.

Internal Auditors

The Audit Committee is satisfied with the internal audit function and has assessed that it is operating effectively and generally covers the risks pertinent to the company in its audits. The Committee has reviewed and approved the annual audit program for the year which also covers the adequacy of resources, qualifications and competency of the staff and independence of the internal auditor.

With reference to the Global Internal Audit Standards - Domain II, Principle 2 Maintain Objectivity which states that *“Internal auditors maintain an impartial and unbiased attitude when performing internal audit services and making decisions”*, the Committee confirms that the function is executed effectively and internal auditors have conducted their responsibilities objectively and in an unbiased manner. The Committee further confirms that, to the best of its knowledge and belief, the auditors have no personal or other impediments that would prevent them from objectively planning, conducting, reporting, or otherwise participating and reaching independent conclusions in their audit assignments in 2024. Internal audit is organizationally positioned to be independent—functionally reporting to the Board Audit Committee and administratively to the President and Chief Executive Officer.

The Board Audit Committee is satisfied with the content and quality of reports prepared and issued by the internal auditors during the year under review.

The Group Internal Audit (GIA) remains to be the single-point-of-contact for the Audit Committee. It takes the lead in setting the standards, initiatives and overall direction of the group audit teams which, in turn, focus their reviews on the top risks of their respective business units. Except for AboitizPower, UnionBank and other financial business units, information systems and technology-related risks however, still remain to be an area covered by the Aboitiz Equity Ventures, Inc. group information systems auditors including the management of its outsourcing/co-sourcing activities.

Based on audit reports and highlights presented to the Committee and with the contribution provided by management and other key leaders on the issues raised to their attention, the Committee concurs with internal audit’s assessment that, generally, there is reasonable assurance that the existing system of internal controls, risk management and governance allow for a generally adequate management of identified risks and effectively supports the improvement of the management of the Company as a whole.

With cybersecurity risk still considered as one of the top risks of the company, continuous focus is given to continuously improve and further strengthen governance and controls over the implementation of security standards for information systems and related technologies. Internal audit prioritized business unit compliance reviews to the minimum information technology and operational technology security standards set and agreed upon at corporate level.

External Quality Assessment

The Internal Audit team of Aboitiz Equity Ventures, Inc., after undergoing an External Quality Assessment (EQA) review by the authorized validators of the Institute of Internal Auditors (IIA) Philippines that are duly accredited by the Institute of Internal Auditors (IIA) International, received the official EQAR results in 2017.

It is the opinion of the IIA that on the overall, the internal audit team of Aboitiz Equity Ventures, Inc., **“Generally Conforms”** to the International Standards for the Professional Practice of Internal Auditing and the Code of Ethics for internal audit practitioners. **Generally Conforms** is the highest rating awarded in connection with an EQA and the internal audit team has been commended for this achievement.

The EQA, much like any global certification is not required. Acquiring it helps build the reputation not just of internal audit but of Aboitiz as a company that not only conforms, complies and follows but adopts and implements the Standards and best practices of the internal audit function. The EQA certification is valid for 5 years or until 2022 only.

An EQA was not done in 2024 in view of the ongoing federalization in the internal audit function. Focus was on the set-up and transitioning of the resident internal audit teams for Aboitiz InfraCapital Inc. and AboitizFoods. Transitioning was also done for the information technology audit function from AEV group internal audit to the resident internal audit teams.

Nevertheless, AEV group internal audit continually works on its internal Quality Assurance Improvement Program and encourages its adoption especially to the newly organized resident internal audit teams.

Review of the Audit Charters

Annual review of the audit charters—Board Audit Committee charter and Internal Audit charter—was conducted. Proposed changes to the internal charter was presented, discussed and endorsed for full board approval during the October 25, 2024 Board Audit Committee meeting while the revisions to the Board Audit Committee charter was reviewed and endorsed for full board approval during its meeting dated January 28, 2025.

Changes were made to align to the new Global Internal Audit Standards (formerly known as the International Standard for the Professional Practice of Internal Auditing or ISPPIA). This new Global IA Standards was published January 9, 2024 and shall take effect the following year on January 9, 2025.

The charters reinforce the oversight responsibilities of the Board Audit Committee in helping ensure excellence in control performance by having an adequate and effective internal control system, governance and risk management processes.

The review and updating of the charters are done at least once a year, endorsed by the Audit Committee, approved by the Board and included in the report to the stockholders.

Self-Assessment

The Committee conducted its annual self-assessment in accordance with the guidelines of SEC Memo Cir. No. 19, series of 2016 and the Company’s Manual on Corporate Governance . The assessment result showed that the Committee complied with the requirements set forth in the Audit Charter and met the necessary and most important requirements set by global standards and best practices.

Risk Management

The partnership between the risk management team and internal audit has remained solid and vital in continuously providing objective assurance to the board on the effectiveness of the risk management function in the organization.

The top strategic risks, emerging risks and project risks are key inputs in the preparation and prioritization of internal audit’s master plan for the following year. The risk management plan, presented, discussed and approved by the Board Risk and Reputation Committee empowers the business to adequately identify and address the risks to ensure that the organization’s plans, strategies and business objectives are achieved.

The internal audit team presents to the Board Risk and Reputation Committee the results of the annual Strategic Risk Management Plan validation reviews conducted across the different business units. The reviews give an assurance to management and the Board on the existence status and effectiveness assessment, where verifiable, of the risk treatments plans to address the identified risks for the year.

After considering, analyzing and reviewing all pertinent information on the integrity of financial reporting, effectiveness of internal controls, risk management, governance and compliance within the Aboitiz group of companies, the Committee is of the view that, in all material aspects, the duties and responsibilities as so outlined in its Charter have been satisfactorily performed.

In behalf of the Board Audit Committee,

(SGD)
Cesar G. Romero
Independent Director
Board Audit Committee Chairman

Aboitiz Equity Ventures Inc.

Internal Control and Compliance System Attestation

For the year ended, December 31, 2024

Aboitiz Equity Ventures Inc.’s (AEV) corporate governance system includes a combination of internal and external mechanisms such as the structure of the board of directors and our committees, the oversight it exercises over management, and the formulation of sound policies and effective controls.

- The Board of Directors is responsible for providing governance and overseeing the implementation of adequate internal control mechanisms and risk management processes;
- Management is primarily responsible for designing and implementing an adequate (effective and efficient) internal control system and risk management processes as well as in ensuring compliance with statutory and regulatory requirements of the law;
- Management is responsible for developing a system to monitor and manage risks;
- SGV & Co., the Company’s external auditor is responsible for assessing and expressing an opinion on the conformity of the audited financial statements with the Philippine Financial Reporting Standards and the overall quality of the financial reporting process;
- Internal Audit adopts a risk-based audit approach in developing an annual audit master plan and conducts reviews to assess the adequacy of the Company’s internal control system; and
- The Company’s Group Internal Audit Head that acts as the equivalent of a Chief Audit Executive reports functionally to the Board Audit Committee to ensure independence and objectivity, allowing Internal Audit to fulfill its responsibilities.

Based on the above assurance provided by the internal auditors as well as the external auditors as a result of their reviews, we attest that AEV’s internal control and compliance system, which covers governance, risk management, and control processes, are generally adequate.

SVP Chief Legal and Compliance Officer

The Board Audit Committee Report to the Board of Directors

Aboitiz Power Corporation

The Board Audit Committee is pleased to present its report for the financial year ended December 31, 2024.

Board Audit Committee Responsibility

The primary purpose of the Committee is to assist the Board in fulfilling its responsibility to the public, governmental and/or regulatory bodies in:

- a) Ensuring the integrity of the Company’s financial reporting processes, including ensuring the integrity of financial reports and other financial information provided by the Company to the public, governmental and/or regulatory bodies;
- (b) Ensuring excellence in the Company’s control performance by having an adequate and effective internal control system, governance and risk management processes and reviewing the performance of the Company’s internal audit function;
- (c) Reviewing the annual independent audit of the Company’s financial statements and the external auditors’ qualifications and independence;
- (d) Ensuring compliance with applicable laws and regulations which may represent material financial exposure to the Company; and
- (e) Providing an avenue of communication among the Company’s independent auditors, management, the internal auditing department and the Company.

The Committee, in fulfilling its purpose, will establish a constructive and collaborative relationship with the Company’s senior leadership, especially the Company CEO, CFO and the heads of the different departments.

Committee Membership

The Board Audit Committee shall be composed of five (5) Directors, the majority of whom shall be independent directors and non-executive directors including the Chairman, Antonio A. Canova (Non-Executive Director). Other members of the committee are Eric Ramon O. Recto (Lead Independent Director), Cesar G. Romero (Independent Director), Eramon I. Aboitiz (Non-Executive Director), and Izumi Kai (Non-Executive Director).

Meetings and Attendance

The Board Audit Committee fulfilled its responsibilities through meetings with management, internal auditors, external auditors, advisors, and other relevant parties, as appropriate.

As outlined in the Audit Committee Charter, the committee is required to hold a minimum of four (4) regular meetings annually, with the authority to convene special meetings as necessary.

In 2024, the committee conducted four (4) regular meetings and one (1) special meeting. The attendance record of committee members is provided below:

Member	March 4, 2024 Regular Meeting	Apr 23, 2024 Regular Meeting	July 22 & 23, 2024 Regular Meeting	Oct 22, 2024 Regular Meeting	Nov 13, 2024 Special Meeting
ERIC RAMON O. RECTO Chairman, Lead Independent Director	✓	✓	✓	✓	
CESAR G. ROMERO Member, Independent Director	✓	✓	✓	✓	
EDWIN R. BAUTISTA Member*, Non-Executive Director	✓	✓	✓	✓	
LUIS MIGUEL O. ABOITIZ Member*, Non-Executive Director	✓	✓	✓	✓	
DANEL C. ABOITIZ Member*, Director					
ANTONIO A. CANOVA Chairman**, Non-Executive Director					
ERRAMON I. ABOITIZ Member***, Non-Executive Director					
IZUMI KAI Member***, Non-Executive Director	✓	✓	✓	✓	

**Member of the Committee until April 2024*
***Appointment as Chairman of the Committee, effective January 1, 2025*
****Appointed as Member of the Committee, effective April 25, 2024*

The attendees of these meetings included the AP Internal Audit Group Head, the Aboitiz Group Internal Audit Head, and, by invitation, the Chief Executive Officer, Chief Financial Officer, Chief Risk Officer, and other key leaders, as deemed appropriate.

Furthermore, regular one-on-one sessions between the AP Internal Audit Head and the Board Audit Committee Chairman were conducted before each scheduled Board Audit Committee meeting.

Financial Reports

The Board Audit Committee reviewed, discussed, and endorsed for approval by the full Board (for public disclosure) the 2024 quarterly unaudited consolidated financial statements and the 2024 annual audited financial statements of Aboitiz Power Corporation, including its subsidiaries and alliances.

The review also covered the Management Discussion and Analysis of Financial Condition and Results of Operations, following prior discussions with management, the accounting team, and the company’s independent external auditor, SyCip Gorres Velayo & Co. (SGV), a member firm of Ernst & Young (EY) in the Philippines.

The activities of the Board Audit Committee are performed in the context –

- Management holds primary responsibility for the preparation of the financial statements and the financial reporting process.
- The company’s independent external auditor is responsible for providing an unqualified opinion on the conformity and consistent application of the Company’s audited financial statements with Philippine Financial Reporting Standards (PFRS).

External Auditors

Upon the endorsement of the Board Audit Committee to the full Board, and subsequent approval by the shareholders of Aboitiz Power Corporation during the Annual General Stockholders’ Meeting held on April 22, 2024, SyCip Gorres Velayo & Co. (SGV) was reappointed as the independent external auditor for 2024, with Jhoanna Feliza C. Go serving as the signing partner for SGV.

The overall scope and audit plan of SGV were reviewed and approved during the Board Audit Committee’s regular meeting on October 22, 2024. The audit plan, fees, and terms of engagement, covering audit-related services provided by SGV, were also reviewed and deemed reasonable.

The results of SGV’s audits and its assessment of the overall quality of the financial reporting process were presented and discussed during the first Audit Committee meeting of the following year, held on March 5, 2025.

In 2024, the Company also engaged SGV for non-audit-related services, which were reviewed and approved by the Board Audit Committee in accordance with its oversight responsibilities.

Internal Auditors

The Board Audit Committee is satisfied with the internal audit function and has assessed that it is operating effectively and is able to generally cover the relevant risks pertinent to the company in its audits. The Committee has reviewed and approved the annual audit program for the year which also covers the adequacy of resources, qualifications and competencies of the staff, and independence of the internal auditor.

With reference to the International Professional Practices Framework (IPPF) Attribute Standard 1100 which states that “The Internal Audit Activity must be independent, and internal auditors must be objective in performing their work.”, the Board Audit Committee confirms that the function is executed effectively and internal auditors have conducted their responsibilities objectively and in an unbiased manner. The Committee further confirms that, to the best of its knowledge and belief, the auditors have no personal or other impairments that would prevent them from objectively planning, conducting, reporting, or otherwise participating and reaching independent conclusions in their audit assignments in 2024. Internal audit is organizationally positioned to be independent – functionally reporting to the Board Audit Committee and administratively to the President and Chief Executive Officer.

The Board Audit Committee is satisfied with the content and quality of reports prepared and issued by the internal auditors during the year under review.

The AP Group Internal Audit remains to be the single point of contact for the Board Audit Committee. It takes the lead in setting the standards, initiatives, and overall direction of the audit team which, in turn, focuses its reviews on the top risks of respective business units.

In 2024 and as part of the federalization initiative of the Group, the AP IT/OT and IS engagements are now fully under the responsibility of the AP Internal Audit Group.

Based on audit reports and highlights presented to the Board Audit Committee and with the contribution provided by management and other key leaders on the issues raised to their attention, the Board Audit Committee concurs with the internal audit’s assessment that, generally, there is a reasonable assurance that the existing system of internal controls, risk management, and governance allow for generally adequate management of identified risks and effectively supports the improvement of the management of the Company as a whole.

External Quality Assessment

The AP Internal Audit Group (IAG), after undergoing the External Quality Assessment (EQA) review by the authorized validator of the Institute of Internal Auditors (IIA) Australia that are duly accredited by the Institute of Internal Auditors (IIA) International, received the official EQAR results in October 2022.

Acquiring the EQA global certification helps build the reputation not just of internal audit but of Aboitiz Power Corp. as a company that not only conforms, complies, and follows but adopts and implements the International Standards for the Professional Practice of Internal Auditing. The EQA certification is valid for 5 years until 2027. Until then, AP Internal Audit Group ensures that it continually works on its Quality Assurance Improvement Program by doing its interim self-assessment annually.

Review of the Audit Charters

Annual review and updating of the Board Audit Committee Charter was conducted. Changes were effected in 2024. The existing Charter was updated to reflect necessary changes to the composition of the Board Audit Committee and to align with the amended Board Protocol.

The review and updating of the Internal Audit Team Charter are also done annually, and approved by the Board Audit Committee.

Self-Assessment

The Board Audit Committee conducted its annual self-assessment in accordance with the guidelines of SEC Memo Circular No. 4, series of 2012. The assessment results showed that it fully complied with the requirements set forth in the Audit Charter and met the necessary and most important requirements set by global standards and best practices.

Risk Management

The partnership between the functions of risk management and audit has remained solid. In order to continuously provide objective assurance to the Board on the adequacy (effectiveness and efficiency) of the internal control system, the top strategic risks that present a significant impact to the Company’s ability to execute its plans and strategies as well as to achieve its business objectives are prioritized. These top risks are among the relevant factors in consideration for the preparation of the internal audit’s master plan for the following year.

After considering, analyzing and reviewing all pertinent information to the integrity of financial reporting, adequacy of internal controls, risk management, governance, and compliance within Aboitiz Power Corp. and its affiliated companies, the Committee is of the view that, in all material aspects, the duties and responsibilities as so outlined in its Charter have been satisfactorily performed.

In behalf of the Board Audit Committee,

(SGD) **Antonio A. Canova**
Chairman, Non-Executive Director
Board Audit Committee

Aboitiz Power Corporation

Internal Control and Compliance System Attestation

For the year ended, December 31, 2024

Aboitiz Power Corporation’s (APC) corporate governance system includes a combination of internal and external mechanisms such as the structure of the board of directors and our committees, the oversight it exercises over management, and the formulation of sound policies and controls.

- The Board of Directors is responsible for providing governance and overseeing the effective implementation of adequate internal control mechanisms and risk management processes;
- Management is primarily responsible for designing and implementing an adequate (effective and efficient) internal control system and risk management processes as well as in ensuring compliance with legal requirements (statutory and regulatory);
- Management is responsible for developing a system to monitor and manage risks;
- SGV & Co., the Company’s external auditor is responsible for assessing and expressing an opinion on the conformity of the audited financial statement with Philippine Financial Reporting Standards and the overall quality of the financial reporting process;
- Internal Audit adopts a risk-based audit approach in developing an annual audit master plan and conducts reviews to assess the adequacy of the Company’s internal control system;
- The Company’s Internal Audit Head, serving as the equivalent of a Chief Audit Executive, reports functionally to the Board Audit Committee. This ensures independence and objectivity, enabling Internal Audit to effectively fulfill its responsibilities; and
- Internal Audit activities conform to the International Standards for the Professional Practice of Internal Auditing as re-assessed in November 2022 as “generally conforming” with “Optimising” maturity level assessment. This assessment is valid for 5 years (until 2027). Also, the Internal Audit Team is continuously evaluated annually through self-assessment and peer reviews.

Based on the above assurance provided by the internal auditors as well as the external auditors as a result of their reviews, we attest that Aboitiz Power Corporation’s internal control and compliance system, which covers governance, risk, and control processes, is generally adequate.

Statement of Management’s Responsibility for Financial Statements

Aboitiz Equity Ventures Inc.

SECURITIES & EXCHANGE COMMISSION

SEC Building, EDSA Greenhills
Mandaluyong, Metro Manila

STATEMENT OF MANAGEMENT’S RESPONSIBILITY
FOR FINANCIAL STATEMENTS

The management of **Aboitiz Equity Ventures, Inc.** is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached therein, for the years ended **December 31, 2024** and 2023, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company’s ability to continue as a going concern, disclosing, as applicable matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company’s financial reporting process.

The Board of Directors reviews and approves the consolidated financial statements including the schedules attached therein, and submits the same to the stockholders or members.

Sycip Gorres Velayo & Co., the independent auditor appointed by the stockholders, has audited the consolidated financial statements of the company in accordance with Philippine Standards on Auditing, and in its report to the stockholders or members, has expressed its opinion on the fairness of presentation upon completion of such audit.

Independent Auditor’s Report

Aboitiz Equity Ventures Inc.

The Stockholders and the Board of Directors
Aboitiz Equity Ventures, Inc.
32nd Street, Bonifacio Global City,
Taguig City, Metro Manila
Philippines

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Aboitiz Equity Ventures, Inc. and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at December 31, 2024 and 2023, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for each of the three years in the period ended December 31, 2024, and notes to the consolidated financial statements, including a summary of material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2024 and 2023 and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2024 in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor’s responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor’s responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Recoverability of Goodwill

Under PFRS Accounting Standards, the Group is required to annually test the amount of goodwill for impairment. As of December 31, 2024, the goodwill attributable to the cash-generating units (CGUs) of GNPowder Mariveles Energy amounted to Center Ltd. Co. and Gold Coin Management Holdings Pte. Ltd. amounted to ₱61.0 billion or 7% of total consolidated assets, which is considered significant to the consolidated financial statements. In addition, management’s assessment process requires significant judgment and is based on assumptions which are subject to estimation uncertainty, specifically discount and growth rates, revenue assumptions, and material price inflation.

The Group’s disclosures about goodwill are included in Note 14 to the consolidated financial statements.

Audit Response

We involved our internal specialist in assessing the methodologies and assumptions used. We compared the key assumptions used, such as growth rate and revenue assumptions against the historical performance of the CGUs, industry outlook and other relevant external data. We tested the parameters used in the determination of the discount rates against market data. We also reviewed the Group’s disclosures about those assumptions to which the outcome of the impairment test is most sensitive; specifically, those that have the most significant effect on the determination of the recoverable amount of goodwill.

Revenue Recognition of Distribution Utilities

The distribution utilities’ revenue from the sale of electricity amounting to ₱57.0 billion for the year ended December 31, 2024 accounts for 19% of the Group’s consolidated revenues and is material to the Group. This matter is significant to the audit because the revenue recognized depends on the electric consumption captured, the rates applied across different customers, and the systems involved in the billing process. Electric consumption captured is based on the meter readings taken on various dates for the different types of customers (i.e., industrial, commercial, and residential customers) within the franchise areas of operations of the distribution utilities.

The Group’s disclosures related to this matter are provided in Notes 2 and 26 to the consolidated financial statements.

Audit Response

We obtained an understanding and evaluated the design and tested the controls over the billing and revenue process which includes the capture and accumulation of meter data in the billing system and calculation of billed amounts, and uploading of billed amounts from the billing system to the financial reporting system.

We performed a test calculation of the rates using the Energy Regulatory Commission-approved rates and formulae, then compared them with the rates used in billing statements.

Accounting for Investment in an Associate (Union Bank of the Philippines)

The Group has an investment in Union Bank of the Philippines (UBP), which is a universal bank that is publicly listed in the Philippine Stock Exchange and accounted for under the equity method. For the year ended December 31, 2024, the Group’s share in the net income of UBPP amounted to ₱6.0 billion and accounts for 16% of the Group’s consolidated net income. The Group’s share in UBPP’s net income is

significantly affected by the level of provisioning of its loans and receivables applying the expected credit loss (ECL) model. This matter is significant to our audit because the application of the ECL model requires significant management judgment and estimates.

The Group's disclosures on investments in associates are in Notes 2 and 10 to the consolidated financial statements.

Audit Response

We obtained the financial information of UBP for the year ended December 31, 2024 and recomputed the Group's share in net income of UBP and assessed the disclosures of the investment in associate in the consolidated financial statements.

We obtained an understanding of the methodologies and models used for UBP's different credit exposures and assessed whether these considered the requirements of PFRS 9, *Financial Instruments*, to reflect an unbiased and probability-weighted outcome, and to consider the time value of money and the best available forward-looking information. We also inspected and considered the results of the model validation on the risk rating performed by management's specialist.

We (a) assessed UBP's segmentation of its credit risk exposures based on homogeneity of credit risk characteristics; (b) tested the definition of default and significant increase in credit risk criteria against historical analysis of accounts, credit risk management policies and practices in place; (c) tested UBP's application of internal credit risk rating system, by reviewing the ratings of sample credit exposures; (d) tested loss given default by inspecting historical recoveries and related costs, write-offs and collateral valuations, and the effects of credit enhancements provided by any party; (e) tested exposure at default considering outstanding commitments and repayment scheme; (f) checked the forward-looking information used for overlay through statistical test and corroboration using publicly available information and our understanding of UBP's lending portfolios and broader industry knowledge; and (g) tested the effective interest rate used in discounting the ECL.

Further, we checked the data used in the ECL models by reconciling data from source system reports to the data warehouse and from the data warehouse to the loss allowance models and financial reporting systems. To the extent that the loss allowance analysis is based on credit exposures that have been disaggregated into subsets of debt financial assets with similar risk characteristics, we traced or re-performed the disaggregation from source systems to the loss allowance analysis.

We recalculated impairment provisions on a sample basis. We involved our internal specialists in the performance of the above procedures.

Accounting for the Acquisition of Shares in Aboitiz GMR Megawide Cebu Airport Corporation (ASS)

In September 2022, the Group, through Aboitiz Infracapital, Inc. (AIC), acquired 33 1/3% -1 share interest in AGMCAC for a total consideration of ₱9.5 billion. The investment in AGMCAC was classified by the Group as an investment in associate and accounted for under the equity method. In addition, for a total consideration of ₱15.5 billion, AIC acquired noninterest-bearing exchangeable notes which can either be settled by exchanging Megawide Construction Corporation and GMR Airports International, B.V.'s remaining 66 2/3% +1 share stake in AGMCAC on October 30, 2024 or through a cash option which is equivalent to ₱15.5 billion plus interest of 19% per annum. The exchangeable notes were classified as a financial asset measured at fair value through profit or loss.

On October 30, 2024, the Group converted the exchangeable notes upon its maturity in exchange for the remaining 66 2/3% +1 share of AGMCAC. The conversion of these exchangeable notes resulted to the Group obtaining control over AGMCAC.

The acquisition of AGMCAC was accounted for as step-acquisition business combination under PFRS 3, *Business Combinations* and accordingly, on the date when the control was obtained, the Group performed a remeasurement of its previously held interest in AGMCAC based on provisional fair value and a purchase price allocation based on the provisional fair values of AGMCAC's assets and liabilities.

We consider the accounting for this transaction as a key audit matter because of the significance of the amount and the significant judgments and estimations involved in determining the provisional fair value of the Group's previously held interest in AGMCAC and the provisional fair values of AGMCAC's assets and liabilities in the conduct of the purchase price allocation. The Group's disclosures about these transactions are in Note 9 to the consolidated financial statements.

Audit Response

We reviewed documents such as the share purchase agreement covering the acquisition and assessed whether the acquisition has been properly accounted for. We considered the terms of the relevant agreements in evaluating the Group's determination of the total costs of acquisition. We also evaluated management's basis in determining the fair value of its previously held interest in AGMCAC and the provisional fair values of AGMCAC's assets and liabilities in its purchase price allocation. We involved our internal specialist in evaluating the methodologies and assumptions used in determining the provisional fair value of the Group's previously held interest and in arriving at the provisional fair values of AGMCAC's assets and liabilities using available information as of acquisition date.

We also assessed the adequacy of the related disclosures in the consolidated financial statements.

Other information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024, but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group’s financial reporting process.

Auditor’s responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor’s report is

Independent Auditor’s Report on Supplementary Schedules

Aboitiz Equity Ventures Inc.

The Stockholders and the Board of Directors
Aboitiz Equity Ventures, Inc.
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Aboitiz Equity Ventures, Inc. and Subsidiaries as at December 31, 2024 and 2023, and have issued our report thereon dated March 7, 2025. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The schedules listed in the Index to the Supplementary Schedules are the responsibility of the Company’s management. These schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68, and are not part of the basic consolidated financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the financial information required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

Independent Auditor’s Report on Components of Financial Soundness Indicators

Aboitiz Equity Ventures Inc.

The Stockholders and the Board of Directors
Aboitiz Equity Ventures, Inc.
32nd Street, Bonifacio Global City
Taguig City, Metro Manila
Philippines

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Aboitiz Equity Ventures, Inc. and Subsidiaries as at December 31, 2024 and 2023 and for each of the three years in the period ended December 31, 2024, and have issued our report thereon dated March 7, 2025. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Company’s management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) Accounting Standards and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purpose of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic consolidated financial statements prepared in accordance with PFRS Accounting Standards. The components of these financial soundness indicators have been traced to the Company’s consolidated financial statements as at December 31, 2024 and 2023 and for each of the three years in the period ended December 31, 2024 and no material exceptions were noted.

Statement of Management's Responsibility for Financial Statements

Aboitiz Power Corporation

The management of **Aboitiz Power Corporation** is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached therein, for the years ended **December 31, 2024, 2023, and 2022** in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

Opinion

We have audited the consolidated financial statements of Aboitiz Power Corporation and its subsidiaries (the Group), which comprise the consolidated balance sheets as at December 31, 2024 and 2023, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2024, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2024 and 2023, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2024 in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context

We have fulfilled the responsibilities described in the *Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Impairment Testing of Goodwill

Under PFRS Accounting Standards, the Group is required to annually test the amount of goodwill for impairment. As of December 31, 2024, the goodwill attributable to cash-generating unit (CGU) of GNPower Mariveles Energy Center Ltd. Co. amounted to ₱45.69 billion or 9% of total consolidated assets, which is considered significant to the consolidated financial statements. In addition, management’s assessment process requires significant judgment and is based on assumptions which are subject to estimation uncertainty, specifically discount and growth rates, revenue assumptions, and material price inflation.

The Group’s disclosures about goodwill are included in Note 13 to the consolidated financial statements.

Audit Response

We involved our internal specialist in assessing the methodologies and assumptions used. We compared the key assumptions used, such as growth rate and revenue assumptions against the historical performance of the CGU, industry outlook and other relevant external data. We tested the parameters used in the determination of the discount rates against market data. We also reviewed the Group’s disclosures about those assumptions to which the outcome of the impairment test is most sensitive; specifically, those that have the most significant effect on the determination of the recoverable amount of goodwill.

Revenue Recognition of Distribution Utilities

The distribution utilities’ revenue from the sale of electricity amounting to ₱57.0 billion for the year ended December 31, 2024 accounts for 29% of the Group’s consolidated revenues and is material to the Group. This matter is significant to the audit because the revenue recognized depends on the electric consumption captured, the rates applied across different customers, and the systems involved in the billing process. Electric consumption captured is based on the meter readings taken on various dates for the different types of customers (i.e., industrial, commercial, and residential customers) within the franchise areas of operations of the distribution utilities.

The Group’s disclosures related to this matter are provided in Notes 3 and 21 to the consolidated financial statements.

Audit Response

We obtained an understanding and evaluated the design and tested the controls over the billing and revenue process which includes the capture and accumulation of meter data in the billing system and calculation of billed amounts, and uploading of billed amounts from the billing system to the financial reporting system. We performed a test calculation of the rates using the Energy Regulatory Commission-approved rates and formulae, then compared them with the rates used in billing statements.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 but does not include the consolidated financial statements and our auditor’s report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditor’s report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group’s financial reporting process.

Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material

misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Independent Auditor’s Report on Supplementary Schedules

Aboitiz Power Corporation

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor’s report is Jhoanna Feliza C. Go.

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Aboitiz Power Corporation (the Company) as at December 31, 2024 and 2023, and for each of the three years in the period ended December 31, 2024, and have issued our report thereon dated March 6, 2025. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The schedules listed in the Index to Supplementary Schedules are the responsibility of the Company’s management. These schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68 and are not part of the basic consolidated financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the information required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Aboitiz Power Corporation (the Company) as at December 31, 2024 and 2023, and for each of the three years in the period ended December 31, 2024, and have issued our report thereon dated March 6, 2025. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The Supplementary Schedule on Financial Soundness Indicators, including their definitions, formulas, calculation, and their appropriateness or usefulness to the intended users, are the responsibility of the Company’s management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) Accounting Standards and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purpose of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the basic consolidated financial statements prepared in accordance with PFRS Accounting Standards. The components of these financial soundness indicators have been traced to the Company’s consolidated financial statements as at December 31, 2024 and 2023 and for each of the three years in the period ended December 31, 2024 and no material exceptions were noted.
