Under the baseline projections, incorporating forward-looking macroeconomic assumptions and scenarios on economic landscape, particularly possible peso depreciation amid geopolitical events, borrowers' exposure to climate (hydrometeorological) and other natural risks (seismic and volcanic risks) based on location, corporate borrowers belonging to industries vulnerable to transition risk through a carbon tax scenario, operational loss scenarios, possible losses on rate-sensitive assets and liabilities, and scenario on unexpected deposit withdrawals, the Bank's capital position on both consolidated and solo bases remain strong and well within the regulatory minimum CAR and CET1 ratios. Review of credit portfolios, products and programs, internal and regulatory credit stress tests, and risk reporting to Senior Management and the RCom are regularly conducted to ensure that the Bank is aligned with sound credit risk management best practices. Since January 2018, the Bank adopted the accounting standards on classification and measurement under PFRS 9 guidelines. The Bank began recognizing credit losses upon initial recognition of its assets through the Expected Credit Loss (ECL) models. The Bank also complies with BSP's requirement of maintaining 1% general loan loss provisions for Stage 1 loans as prescribed by BSP 1011. In view of the continuing volatilities in the macroeconomic environment, the Bank regularly updates its macroeconomic forecasts and uses these forecasts to update the forward-looking, point-in-time probability of default and loss rate models used in ECL calculation. For the first quarter of 2025, the Philippine Government Securities (GS)/PHP BVAL rates and US treasury rates were lower by an average of around 26 bps and 30 bps across the curve year-to-date in view of rising recession expectations in the US given the trade policy uncertainties, and its potential impact to global and Philippine growth projections and inflation, respectively. While market consensus is for interest rates to decline, the continued geopolitical risks as well as the impact of US tariffs may continue to give rise to market uncertainties and volatility which could potentially impact the Bank's trading and securities investment portfolios. ## RESULTS OF OPERATIONS

### For the Three Months ended March 31, 2025 and March 31, 2024

**Net income** of P16.64 billion for the three months of 2025 was up 9.0%, driven by strong **revenues**.

**Net interest income** at P34.42 billion, was up P4.57 billion, or 15.3%, with the average earning asset base growing 8.6% and net interest margin (NIM) expanding by 30 basis points (bps).

**Interest income, net of GRT** stood at P50.81 billion, up P6.24 billion or 14.0%, on the back of the following movements in interest income on:

- **Loans and advances** at P43.24 billion, up P5.92 billion or 15.9%, on higher average volume coupled with higher yield;
- **FA at FV through OCI** at P3.18 billion, up P716 million or 29.1%, also on higher average volume and higher yield;
- **FA at FV through profit or loss** at P294.76 million, up P71.80 million or 32.2%, on higher average volume partly offset by lower yield;
- **FA at amortized cost** at P3.49 billion, down P215 million or 5.8%, on lower average volume partly offset by higher yield;

**Other income, net of GRT** at P10.29 billion, was up P609.83 million or 6.3% versus same period last year due to the following movements:

- **Other operating income**, at P4.54 billion, up P689.08 million or 17.9%, on higher credit card income, trust fee, profit from assets sold and miscellaneous income.
- **Fees and commissions**, at P3.93 billion, up P539.40 million or 15.9%, on higher service charges, bank commissions and underwriting fees.

**Key Performance Indicators**

The following ratios, applied on a consolidated basis, are used to assess the performance of the Bank and its majority owned subsidiaries:

	<b>March 31, 2025</b>	<b>March 31, 2024</b>
Return on Equity (%)	15.35	15.69
Return on Assets (%)	2.05	2.02
Net Interest Margin (%)	4.49	4.19
Operating Efficiency Ratio	45.41	45.57
Capital Adequacy Ratio (%) - Basel III	15.43	* 15.58

\* indicative

**Return on equity (ROE)**, the ratio of net income to average equity at 15.35%, was 35 bps lower than last year's 15.69%, as the average equity grew at a faster pace than net income.

**Return on assets (ROA)**, the ratio of net income to average assets, was higher at 2.05%, compared to last year's 2.02%, as the growth in net income outpaced the expansion of average assets.

**Net interest margin (NIM)**, net interest income divided by average interest-bearing assets, higher at 4.49%, as the growth in net interest income outpaced the expansion in average earning assets.

**Operating efficiency (cost to income) ratio**, the ratio of operating expenses to income, lower at 45.41%, as the growth in revenues outpaced the growth in operating expenses.

**Capital adequacy ratio (CAR)**, the ratio of total qualifying capital to total risk-weighted assets, was at 15.43% (indicative), lower versus prior year's 15.58%. The CET 1 ratio at 14.69%, was also lower than the 14.75% from the same period last year. The decline in capital ratios is due to the growth in risk-weighted assets which outpaced the growth in qualifying capital. Both of the Bank's capital ratios are above the BSP's minimum requirement.
