PART I –FINANCIAL INFORMATION

Item 1. Financial Statements

The interim Consolidated Financial Statements of Megawide Construction Corporation (“Megawide”) as of June 30, 2025 with comparative figures as of December 31, 2024 and June 30, 2024, Cash Flows and Schedule of Aging Accounts Receivable is incorporated by reference as Exhibit 1.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

A. RESULTS OF OPERATIONS

Review of results for the six (6) months ended June 30, 2025 as compared with the results for the six (6) months ended June 30, 2024.

Revenues decreased by 25% or PhP 2.8 billion

Consolidated revenues for the period amounted to P8.6 billion, 25% or P2.8 billion lower than the same period last year as projects under the construction business enter tail-end of the project cycle.

In terms of segment, construction operations contributed P7.3 billion and accounted for 85% of total consolidated revenues. The slower performance was traced to the winding down phase for a number of existing projects, which generate lower revenues based on the S-Curve.

Revenue from real estate operations amounted to P1.1 billion – more than 3x from the previous year – which came from its ongoing projects such as My Enso Lofts, The Hive, Northscapes, Modan Lofts, One Lancaster Park and Lykee Condo. With healthy sales stock, revenues from the segment are expected to be sustained in the periods ahead.

Landport operations, meanwhile, delivered higher revenue of P217 million from its leasing assets, 6% more than the previous year, and contributed close to 3% to the total consolidated revenues. The segment benefitted from the steady influx of passenger traffic in the terminal and replacement of previous tenants in the office buildings.

Direct Costs declined by 32% or PhP 2.9 billion

In line with the consolidated revenue performance, consolidated direct costs declined 32% - or P2.9 billion - to P6.4 billion.

Construction direct costs were 38% lower, consistent with the pace of revenue associated with the tail-end phase in the S-Curve. The application of strategic vendor sourcing as well as push for project-wide use of more cost-efficient methodologies also contributed to the reduction in costs.

Cost of real estate operations, meanwhile, increased to P620 million and was aligned with the growth in revenues.

Landport-related costs amounted to P140 million, slightly lower by P11 million from the previous year, as office occupancy is still in ramp up mode.

Gross Profit increased by 6% or PhP 119 million

Consolidated gross profit reached P2.2 billion, translating to a consolidated gross profit margin of 26%, driven largely by the construction segment.

Specifically, the construction business contributed P1.7 billion – representing a gross margin of 23% and contributed 76% to consolidated gross profit. Real estate development chipped in P448 million and landport operations accounted for the balance of P77 million – representing gross margins of 42% and 35%, respectively.

Other Operating Expenses increased by 5% or PhP 38 million

Other Operating Expenses during the period amounted to P742 million. The increase was mainly due to the sales and marketing expenses associated with the ongoing and recently launched real estate projects under PH1.

Finance Costs increased by 20% or PhP 233 million

Finance costs amounted to P1.4 billion, higher by P233 million, which is attributable to the Group's bond issuance last May 2024 and availment of working lines of the Group. Higher interest rates also contributed to the increase in finance costs.

Finance Income increased by 16% or PhP 51 million

Finance income amounted to P358 million, P51 million higher than the same period in 2024. This came from interest income due from related parties, which were used to finance portion of their investing and working capital requirements.

Others - net increased by 137% or PhP 104 million

Others - net generated an income of P179 million, traced mainly to ancillary services and common area charges offered at PITX, income from scrap sales, and gain on disposals of property, plant and equipment.

Tax Expense increased by 1% or PhP 3 million

Tax expense amounted to P212 million – P3.0 million above the same period last year and in line with higher taxable income for the period.

Consolidated Net Income amounted to P436 million

Consolidated net income amounted to P436 million – at par with the previous year level. The performance was driven largely by construction operations, resulting from winding down phase for a number of existing projects that generate lower revenues based on the S-Curve but churn in better margins.

B. FINANCIAL CONDITION

Review of financial conditions as of June 30, 2025 as compared with financial conditions as of December 31, 2024.

ASSETS

Current Assets increased by PhP 3.0 billion

The following discussion provides a detailed analysis of the increase in current assets:

Cash and Cash Equivalents decreased by 23% or PhP 1.3 billion

The decrease in cash and cash equivalents was mainly due to dividend payments on preferred shares, coupons on outstanding bonds, payment of interest on and repayments of loans and borrowings, and other working capital requirements.

Trade and Other Receivables increased by 11% or PhP 2.5 billion

The increase in trade and other receivables is related to timing difference in collections, as substantial portion of work accomplishment have been billed towards the end of the quarter and are undergoing client evaluation. On the other hand, some recently billed receivables are not yet due.

Construction Materials increased by 8% or PhP 84 million

The increase in inventory levels during the period is mainly attributable to the higher volume of materials required to support upcoming projects. Furthermore, several ongoing projects have reached peak construction phases, necessitating larger quantities of materials on hand to replenish inventory and avoid supply interruptions.

Real estate inventories increased by 21% or PhP 935 million

The increase in real estate inventories is attributed to the costs incurred related to the Group's development and construction of its ongoing and recently launched projects.

Contract Assets increased by 15% or PhP 521 million

The increase in contract assets is attributed to the timing difference on actual billing for portion of work-in-progress completed during the period, which will be billed and evaluated by the client upon completion of the said scope or activity.

Other Current Assets increased by 3% or by PhP 333 million

The increase was mainly due to advances made to suppliers and subcontractors for new projects to lock in volume and prices for major construction materials. There is also an increase in deferred input VAT and prepaid taxes related to the excess of creditable withholding tax payments over the current tax due.

Non-Current Assets amounted to PhP 16.1 billion

The following discussion provides a detailed analysis of the decrease in non-current assets:

Investments in Associates and Joint Ventures decreased by 6% or PhP 14 million

The decrease is a result of share in declining net losses taken up on the Group's investment in associates.

Property, Plant and Equipment increased by 1% or PhP 70 million

The slight movement represents additional equipment and machinery procured across the Group to support operations and address specific requirement of the ongoing projects.

Investment Properties decreased by 1% or PhP 59 million

The decrease is mainly related to the depreciation charges on investment properties for the period and acquisition of additional investment properties.

Deferred tax assets decreased by 12% or PhP 114 million

The decrease was mainly due to temporary differences arising from the difference between the tax reporting and financial reporting bases used in revenue recognition.

Goodwill amounted to PhP 3.8 billion

On July 12, 2023, the Parent Company executed a Share Purchase Agreement to acquire 100% of the outstanding capital stock of PH1 World Developers, Inc. (PH1) from Citicore Holdings Investment, Inc. (CHII) for a total cash consideration of P5.20 billion. The transaction resulted in a goodwill from acquisition as the paid consideration is higher than the fair value of net identifiable assets acquired.

Other Non-Current Assets decreased by 1% or PhP 3 million

The increase in Other Non-Current Assets was mainly due to the procurement of computer software licenses.

LIABILITIES AND EQUITY

Current Liabilities increased by PhP 1.1 billion

The following discussion provides a detailed analysis of the increase in current liabilities:

Interest-Bearing Loans and Borrowings-Current increased by 2% or PhP 331 million

The increase is mainly due to the additional borrowings made during the year to support the working capital requirements of the Group.

Trade and Other Payables increased by 13% or PhP 619 million

The increase was mainly due to volume and timing of purchases and payments to suppliers and subcontractors as well as from the dividend declaration to the holders of Series 6 Preferred Shares.

Contract liabilities – current increased by 3% or PhP 120 million

The higher amount is mainly related to reclassification from non-current portion to current portion of contract liabilities, reduced by the recoupments from progress billings.

Other Current Liabilities increased by 4% or PhP 17 million

The movement was traced to the reclassification from non-current to current portion of the deposits and advances received from tenants.

Non-Current Liabilities increased by 3% or PhP 498 million

The following discussion provides a detailed analysis of the increase in non-current liabilities:

Loans and Borrowings-Non-Current increased by 4% or PhP 726 million

The increase is attributed to the additional drawdown by Cebu2world from its OLSA and availment by PH1 from its development loan to support its ongoing real estate projects.

Contract liabilities –noncurrent decreased by 9% or PhP 76 million

The decrease is related to the reclassification of the non-current portion to the current portion based on the remaining terms of the contract.

Other non-current liabilities decreased by 57% or PhP 152 million

The decrease is largely related to the application of outstanding security deposits from commercial tenants in the landport business.

Equity attributable to Parent increased by PhP 1.3 billion

The increase was primarily attributed to the issuance of Series 6 preferred shares amounting to P53 million, with additional paid-in capital of P5.2 billion, which was reduced by the redemption of P4.0 billion worth of Series 4 preferred shares. The Net Income for the period amounting to P441 million, less dividends to preferred stock shareholders amounting to P321 million, also helped shore up Retained Earnings.

In 2024, management reclassified certain parcels of land from property, plant and equipment to investment property. This reclassification was undertaken to better reflect the change in the intended use of these assets. The land, previously utilized in operational activities, is now held for the purpose of generating rental income and for the future capital appreciation.

There are no restrictions on title, and property, plant and equipment pledged as security liabilities, except for right-of-use assets with carrying amount of P562.0 million and P596.5 million as of June 30, 2025 and December 31, 2024, respectively. This includes an industrial lot acquired by MWM Terminals, Inc. from one of its tenants through dacion en pago, with a valuation of P106.1 million. Based on management's assessment, the carrying amounts of these assets are fully recoverable, hence, no impairment loss is required in both years.

There are no restrictions on the realizability of investment property or the remittance of income and proceeds of disposal. No contractual obligations to purchase, construct, or develop investment property, or for repairs and maintenance or enhancements has been agreed with.

12 Goodwill

On July 12, 2023, the Parent Company executed a Share Purchase Agreement to acquire 100% of the outstanding capital stock of PH1 from Citicore for a total cash consideration of P5,200.0 million. As a result of the acquisition, the Parent Company obtained controlling interest over PH1, which was accounted for under the acquisition method. The business combination is expected to integrate the innovative approaches of the Parent Company and PH1 in terms of construction and engineering to the residential projects of PH1 with respect to sustainability and technological advancement in living and community spaces.

At the date of acquisition, PH1 owns 100% and 49% of the outstanding capital stock of PH1-WL and Famtech, respectively. As a result of the acquisition of PH1, the Group obtained indirect ownership and control over PH1-WL and Famtech [Note 1.2(a)]. There were no contingent considerations arrangements and indemnification assets recognized by the Parent Company related to the business combination. Presented below is the breakdown of the acquisition-date fair value of the assets and liabilities, including the cost of investment.

Non-controlling interest	528,475,534
	5,728,475,534
Goodwill	3,797,069,546

Based on the management's assessment, the gross contractual amounts of receivable approximate the fair values as of the acquisition date. The best estimate of the contractual cash flows not expected to be collected at acquisition date is also deemed immaterial.

There were no significant acquisition-related costs incurred from this transaction.

The goodwill recognized from the foregoing acquisition reflects the opportunity to strengthen the Group's position in the real estate market, the synergies and economies of scale expected from combining the operations of the Group as a contractor and real estate developer. This also reflects the opportunity to accelerate the Group's growth momentum associated with property development in the long term.

The Group performed impairment testing of goodwill by using value-in-use in determining the recoverable amount. The value-in-use of the cash generating unit was determined using cash flow projections for 13 years, which reflects the timing of the development and completion of the residential projects including the collection period. The management applied a discount rate of 8.95% and growth rate of nil which are the key assumptions used in determining the value-in-use of the cash-generating unit.

The recoverable amount of the cash-generating unit was determined to be higher than its carrying amount. Management believes that any reasonably possible change of +/-1% in the discount rate and +/-1% in the growth rate would not cause the carrying amount of the cash-generating unit to exceed its recoverable amount; hence, management assessed that there is no impairment loss required to be recognized on goodwill as of June 30, 2025 and December 31, 2024.

13 Leases

The Group has leases for certain construction equipment and transportation equipment. Lease asset land, on the other hand, pertains to the share of the parent company's joint venture (Hdec-Megawide-Dongah JV). With the exception of short-term leases and leases of low-value underlying assets, each right-of-use asset and lease liability from leases are reflected on the consolidated statements of financial position as part of property, plant and equipment and interest bearing loans and borrowings, respectively. Variable lease payments which do not depend on an index or a rate are excluded from the initial measurement of the lease liability and asset.

Each lease generally imposes a restriction that, unless there is a contractual right for the Group to sublet the asset to another party, the right-of-use asset can only be used by the Group. Leases are either non-cancellable or may only be cancelled by incurring a substantive termination fee. Some leases contain an option to purchase the underlying lease asset outright at the end of the lease, or to extend the lease for a further term. The Group is prohibited from selling or pledging the underlying leased assets as security. For leases over warehouses and offices, the Group must keep those properties in a good state of repair and return the properties in their original condition at the end of the lease. Further, the Group must ensure the leased assets and incur maintenance fees on such items in accordance with the lease contracts.

13.1 Right-of-use assets

The carrying amounts of the Group's right-of-use assets presented as part of Property, Plant and Equipment account as at June 30, 2025 and December 31, 2024, and the movements during the periods are shown below.

	Land	Precast and construction equipment	Transportation equipment	Total
Balance at January 1, 2025	17,707,097	351,510,644	227,259,537	596,477,278
Amortization	(8,853,548)	(10,692,987)	(14,894,432)	(34,440,967)
Balance at June 30, 2025	8,853,549	340,817,657	212,365,105	562,036,311
Balance at January 1, 2024	16,990,939	390,986,834	115,016,894	522,994,667
Additions	-	-	141,569,974	141,569,974
Disposal	-	-	(993,025)	(993,025)
Remeasurement	18,184,535	-	-	18,184,535
Amortization	(17,468,377)	(39,476,190)	(28,334,306)	(85,278,873)
Balance at December 31, 2024	17,707,097	351,510,644	227,259,537	596,477,278

In 2024, the Company remeasured its lease liability pertaining to its joint venture (Hdec-Megawide-Dongah JV) due to an extension in the lease term. This remeasurement was necessitated by an increase in the lease term, which resulted in an adjustment to both the lease liability and the corresponding right-of-use asset amounting to P18.1 million.

13.2 Lease liabilities

Lease liabilities are presented in the condensed interim consolidated statements of financial position as part of Interest-bearing Loans and Borrowings (see Note 15) as at the reporting period as follows:

	June 30, 2025	December 31, 2024
Current	34,155,903	70,087,016
Non-current	101,339,538	112,313,897
	135,495,441	182,400,913

The use of extension and termination options gives the Group added flexibility in the event it has identified more suitable premises in terms of cost and/or location or determined that it is advantageous to remain in a location beyond the original lease term. An option is only exercised when consistent with the Group's business strategy and the economic benefits of exercising the option exceeds the expected overall cost.

As at June 30, 2025 and December 31, 2024, the Group has not committed to any leases which had not commenced.

13.3 Lease payments not recognized as liabilities

The Group has elected not to recognize a lease liability for short-term leases or for leases of low value assets. Payments made under such leases are expensed on a straight-line basis. In addition, certain variable lease payments are not permitted to be recognized as lease liabilities and are expensed as incurred.

The expenses pertaining to short-term leases and low-value assets amounted to P45.1 million in 2025 (2024 - P23.2 million) is presented as part of Other Operating Expenses in the condensed interim consolidated statements of income.

When the Group prepares its investor presentations and when the Group's Executive Committee evaluates the financial performance of the operating segments, it disaggregates revenue similar to its segment reporting as presented in Note 2.

The Group determines that the categories used in the investor presentations and financial reports used by the Group's management can be used to meet the objective of the disaggregation disclosure requirement of PFRS 15 [except for rentals accounted for under PFRS 16 and disclosed herein as additional information], which is to disaggregate revenue from contracts with customers and other counterparties into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

A summary of additional disaggregation from the segment revenues and other unallocated income for continuing operations is shown in the succeeding page.

Utility recoveries represent additional income recognized arising from utility bills that are to be recovered from and billed to tenants, supplementing the usual revenue streams.

Common use service area (CUSA) charges are supplementary to cover the costs associated with the maintenance and operation of the building's common areas.

Income from retirement sales arises from the sale of fixed assets as derecognized from the books.

24 Earnings (loss) per share

Earnings per share is calculated as Group's profit divided by the outstanding shares of its common stock and computed as follows:

	June 30, 2025	December 31, 2024
Continuing operations:		
Net profit attributable to shareholders of the Parent Company	434,790,764	447,030,662
Dividends on cumulative preferred shares	(320,754,295)	(215,323,406)
Net profit available to common shareholders of the Parent Company	114,036,469	231,707,256
Divided by weighted average number of outstanding common shares	2,013,409,717	2,013,409,717
Basic and diluted earnings per share	0.06	0.12

The Group does not have dilutive potential common shares outstanding as of June 30, 2025 and December 31, 2024; hence, diluted earnings (loss) per share is equal to the basic earnings per share.

25 Significant accounting judgments and estimates

The preparation of the interim condensed consolidated financial statements in accordance with PAS 34, "Interim Financial Reporting" requires management to make judgments and estimates that affect the amounts reported in the condensed interim consolidated financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately differ from these estimates.

26 Risk management objectives and policies

The Group is exposed to a variety of financial risks in relation to its financial instruments. The Group's financial assets and financial liabilities by category are summarized in succeeding pages. The main types of risk are market risk, credit risk and liquidity risk.

The Group's risk management is coordinated with the Group's Parent Company, in close cooperation with the BOD, and focuses on actively securing the Group's short-to-medium term cash flows by minimizing the exposure to financial markets. The Group does not actively engage in the trading of financial assets for speculative purposes, nor does it write options. The relevant financial risks to which the Group is exposed to are described below and in the succeeding pages.

26.1 Market risk

The Group is exposed to market risk through its use of financial instruments and specifically to foreign currency risk, interest rate risk and certain other price risk which result from its operating, investing, and financing activities.

(a) Foreign currency risk

Most of the Group's transactions are carried out in Philippine pesos, its functional currency. The Group also holds US dollar denominated cash in banks. The Group does not have any financial liabilities denominated in foreign currency.

Exposures to foreign exchange rates vary during the period depending on the volume of foreign currency transactions.

(b) Interest rate risk

The Group's policy is to minimize interest rate cash flow risk exposures on long-term financing. The Group is exposed to changes in market rates through its cash in banks and short-term placements which are subject to monthly repricing intervals and some short-term working capital loans which are subject to variable interest rate. Any increase in finance costs due to changes in interest rates will be mitigated by the finance income on cash and cash equivalents and short-term placements.

26.2 Credit risk

Credit risk is the risk that a counterparty may fail to discharge an obligation to the Group. The Group is exposed to this risk for various financial instruments, such as the granting of loans and receivables to customers and related parties and placing deposits with local banks.

The Group continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporate this information into its credit risk controls. The Group's policy is to deal only with creditworthy counterparties. Based on the Company's analysis, it has a degree of concentration of credit risk since a significant portion of its receivables is attributed only to three customers.

The maximum credit risk exposure of financial assets and contract assets is the carrying amount of the related assets as shown in the consolidated statements of financial position or in the detailed analysis provided in the notes to the consolidated financial statements, as summarized below.

	Notes	June 30, 2025	December 31, 2024
Cash and cash equivalents*	4	4,469,417,119	5,774,438,837

Refundable security and bond deposits	9	252,179,874	224,200,254
		33,042,101,348	31,332,025,974

*excludes cash on hand

**excludes advances to officers and employees

None of the Group's financial assets are secured by or other credit enhancements, except for cash and cash equivalents, as described below and in the succeeding pages.

(a) Cash and cash equivalents

The credit risk for cash and cash equivalents is considered negligible since the counterparties are reputable banks with high quality external credit ratings. Included in the cash and cash equivalents are cash in banks and short-term placements which are insured by the Philippine Deposit Insurance Corporation up to a maximum coverage of P0.5 million for every depositor per banking institution.

(b) Trade and other receivables and contract assets

The Group applies the PFRS 9 simplified approach in measuring ECL which uses a lifetime expected loss allowance for all trade receivables and other receivables and contract assets.

To measure the ECL, trade and other receivables and contract assets have been grouped based on shared credit risk characteristics and the days past due (age buckets). The Group also concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the other receivables as it shares the same credit risk characteristics.

The expected loss rates are based on the payment and aging profiles over a period of 36 months before June 30, 2025 or December 31, 2024 respectively, and the corresponding historical credit losses experienced within such period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Group has identified the interest rate in the Philippines to be the most relevant factor and accordingly adjusts the historical loss rates based on expected changes in this factor.

The Group identifies a default when the receivables become credit impaired or when the customer has not been able to settle the receivables when due, depending on the terms with customers or after completion and acceptance of the stage of completion as represented by the billings. In making the assessment, the Group considers the net position of the customer after advances and deposits received from the customer, reason for non-payment (i.e. dispute related to quality of work completed has been raised by the customer) and the credit standing of the customer. In addition, the Group considers qualitative assessment in determining default such as in instances where the customer is unlikely to pay its obligations and is deemed to be in significant financial difficulty. When customer is unlikely to pay a past due account in the next year due to financial difficulty, an ECL is recognized in the books.

The Group has determined that the credit standing and liquidity of the significant portion of its receivables and customers from the construction segment are not affected severely by COVID-19 as these customers have reputable cash management strategies.

On that basis, the loss allowance as at June 30, 2025 and December 31, 2024 was determined based on months past due, as follows, for both trade and other receivables:

	Not more than 3 months	More than 3 months but not more than 6 months	More than 6 months but not more than 1 year	More than 1 year	Total
June 30, 2025:

Loss allowance	-	-	-	271,899,526	271,899,526
December 31, 2024:					
Expected credit loss rate	-	-	-	27.40%	
Contract receivables	5,151,409,095	58,466,673	33,690,803	525,615,130	5,769,181,701
Lease receivables	762,307,611	17,883,719	4,841,948	466,599,306	1,251,632,584
	5,913,716,706	76,350,392	38,532,751	992,214,436	7,020,814,285
Loss allowance	-	-	-	271,899,526	271,899,526

The Group recognized an allowance for ECL amounting to P1,087.4 million representing unbilled costs incurred by the Group and assessed to be not recoverable (Note 7).

The real estate sales receivables account pertaining to PH1 is secured to the extent of the fair value of the residential condominium units sold (i.e., based on current prices less estimated cost to sell) since the title to the real estate properties remains with the Group until the real estate sales receivables are fully collected. In 2024, estimated fair value of collaterals held against the real estate sales receivables of PH1 exceeded the gross maximum exposure hence, the related credit risk exposure is deemed immaterial, and the expected loss given default on real estate sales receivables is nil.

The Group's rental receivables are secured to the extent of advance rentals and security deposits received from lessees. Furthermore, in case of delay in collection of rentals from lessees, the Group imposes penalties pursuant to its standard lease agreements.

ECL for advances to and receivable from related parties are measured and recognized using the liquidity approach. Management determines possible impairment based on the counterparties' ability to repay the receivables upon demand at the reporting date taking into consideration the historical defaults from the counterparties. The Group does not consider any significant risks in the advances to and receivable from related parties since the related parties have enough capacity to pay the advances and receivables upon demand.

(c) Refundable security and bond deposits

The Group is not exposed to any significant credit risk exposures to its lessors as lease agreements were executed with reputable entities. The Group can negotiate, before the end of the lease term, to apply deposit to rentals due.

26.3 Liquidity risk

The Group manages its liquidity needs by carefully monitoring cash outflows due in day-to-day business.

Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for six-month and one-year periods are identified monthly.

The Group maintains cash to meet its liquidity requirements for up to 60-day periods. Excess cash is invested in time deposits or short-term placements. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets.

27.1 Offsetting of financial assets and financial liabilities

Currently, all other financial assets and financial liabilities are settled on a gross basis and no offsetting of financial instruments has been made in 2025 and 2024. However, each party to the financial instrument (particularly related parties) will have the option to settle amounts on a net basis in the event of default of the other party through approval by both parties' BOD and stockholders. As such, the Group's outstanding receivables from and payables to the same related parties as presented in Note 20 can be potentially offset to the extent of their corresponding outstanding balances.

27.2 Fair value hierarchy

In accordance with PFRS 13, Fair Value Measurement, the fair value of financial assets and financial liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair value is disclosed in accordance with other relevant PFRS Accounting Standards, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurement date;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

For investments which do not have quoted market price, the fair value is determined by using generally acceptable pricing models and valuation techniques or by reference to the current market value of another instrument which is substantially the same after taking into account the related credit risk of counterparties, or is calculated based on the expected cash flows of the underlying net asset base of the instrument.

When the Group uses valuation technique, it maximizes the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to determine the fair value of an instrument are observable, the instrument is included in Level 2. Otherwise, it is included in Level 3.

27.3 Financial instruments measured at amortized cost

The table below summarizes the fair value hierarchy of the Group's financial assets and financial liabilities which are not measured at fair value in the consolidated statements of financial position but for which fair value is disclosed.

The table below shows the fair value of the Group's investment property measured at cost but for which fair value is disclosed and determined under the Level 3 fair value hierarchy.

		5,901,091,447	5,901,091,447

Commercial property

The fair value of certain commercial property are determined on the basis of the appraisals performed by an independent appraiser with appropriate qualifications and recent experience in the valuation of similar properties in the relevant locations. To some extent, the valuation process was conducted by the appraiser in discussion with the Group's management with respect to the determination of the inputs such as the size, age, and condition of the land and buildings, and the comparable prices in the corresponding property location.

In estimating the fair value of investment property, management takes into account the market participant's ability to generate economic benefits by using the assets in their highest and best use. Based on management assessment, the best use of the Group's non-financial assets indicated above is their current use. In 2024 and 2023, the Level 3 fair value of commercial area under investment properties was determined using the cost approach which considers a substitute for the purchase of a given property, the possibility of constructing another property that is a replica of, or equivalent to, the original or one that could furnish equal utility with no undue cost resulting from delay.

The fair values of the commercial property as at June 30, 2025 and December 31, 2024 were based on the latest appraisal report dated October 3, 2023 using the cost approach for the Group.

Land

The fair value of certain parcels of land are determined on the basis of the appraisals performed by an independent appraiser with appropriate qualifications and recent experience in the valuation of similar properties in the relevant locations. To some extent, the valuation process was conducted by the appraiser in discussion with the Group's management with respect to the determination of the inputs such as the size, age, and condition of the land, and the comparable prices in the corresponding property location. The fair value of other parcels of land was derived using the market comparable approach that reflects the recent transaction prices for similar properties in nearby locations. Both valuation processes were applied as sale comparable method.

In estimating the fair value of investment property, management takes into account the market participant's ability to generate economic benefits by using the assets in their highest and best use. Based on management assessment, the best use of the Group's non-financial assets indicated above is their current use. In 2025 and 2024, the Level 3 fair value of commercial area under investment properties was determined using the cost approach which considers a substitute for the purchase of a given property, the possibility of constructing another property that is a replica of, or equivalent to, the original or one that could furnish equal utility with no undue cost resulting from delay.

Valuations are performed with sufficient regularity at least once every three (3) years enough to ensure that the fair value of the revalued asset does not differ significantly from its carrying value.

29 Capital management objectives, policies and procedures

The Group's capital management objectives are to ensure the Group's ability to continue as a going concern and to provide an adequate return to shareholders by pricing services commensurate with the level of risk.

The Group monitors capital on the basis of the carrying amount of equity as presented on the consolidated statements of financial position.

The Group sets the amount of capital in proportion to its overall financing structure, equity and liabilities. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares, re-issuance of treasury shares or sell assets to reduce debt.

30 Basis of Preparation of Condensed Interim Consolidated Financial Statements

These condensed interim consolidated financial statements as at and for the six-month reporting period ended June 30, 2025 have been prepared in accordance with PAS 34, *"Interim Financial Reporting"*.

The condensed interim consolidated financial statements do not include all the notes normally included in annual consolidated financial statements. Accordingly, these condensed interim financial statements are to be read in conjunction with the annual consolidated financial statements as at and for the year ended December 31, 2024 and any public announcements made by the Company during the six-month period ended June 30, 2025.

The accounting policies adopted are consistent with those of the previous financial year. The same accounting policies and methods of computation are followed in the interim report as compared with the most recent annual financial statements.

30.1 Adoption of Amended Standards

(a) New standards, amendments and interpretations applied by the Group

The Group has applied the following amendments for the first time for their annual reporting period commencing January 1, 2025:

- Amendments to PAS 21 - Lack of Exchangeability

The Financial and Sustainability Reporting Standards Council (FSRSC) has approved on October 10, 2023 the adoption of amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates, Lack of Exchangeability issued by the International Accounting Standards Board (IASB) in August 2023 as amendments to PAS 21 The Effects of Changes in Foreign Exchange Rates, Lack of Exchangeability.

The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of financial statements to understand the impact of a currency not being exchangeable. An entity shall apply the amendments for annual reporting periods beginning on or after January 1, 2025.

The adoption did not have a significant impact on the Group's financial statements as at June 30, 2025 and December 31, 2024.

(b) New standards, amendments and interpretations not yet adopted by the Group

Certain new accounting standards, amendments to accounting standards and interpretations have been published that are not mandatory for June 30, 2025 reporting period and have not been early adopted by the Group.

- PFRS 18 Presentation and Disclosure in Financial Statements (*Effective beginning on or after January 1, 2027*)

PFRS 18 will replace PAS 1 Presentation of financial statements, introducing new requirements that will help to achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Even though PFRS 18 will not impact the recognition or measurement of items in the financial statements, its impacts on presentation and disclosure are expected to be pervasive, in particular those related to the statement of financial performance and providing management-defined performance measures within the financial statements.

There are no other new standards, interpretations and amendments to existing standards not yet effective as at June 30, 2025 and December 31, 2024 reporting periods. These standards, amendments or interpretations are not expected to have a material impact on the Group in the current or future reporting periods and on foreseeable future transactions.

31 Events after the end of the reporting period

Preferred Shares Dividends

The Parent Company's BOD approved the declaration of dividends at a rate of P1.4375 per share on July 22, 2025 with August 8, 2025 as the record date and August 27, 2025 as the payment date which shall be taken out of the unrestricted earnings of the Group.

There were no other significant post period-end events after June 30, 2025 except for the information that were disclosed in the respective notes.

32 Reclassification

The following accounts for the six-month period ended June 30, 2024 have been adjusted to conform with the current year presentation:

- a.) Reclassification of interest income received amounting to P2,786,564 previously presented as cash flows from investing activities to cash flows provided by operating activities.
- b.) Reclassification of effects of changes in foreign exchange rate on cash and cash equivalent as a separate line item from the net increase (decrease) in cash and cash equivalents.

This reclassification did not impact previously reported interim consolidated net income, total retained earnings, equity, and net cash flows as at and for the six-month period ended June 30, 2024.
