Rizal Commercial Banking Corporation (RCB) will be releasing to the press the attached statement entitled "RCBC achieves Php 10.6 billion net income in FY 2025, driven by core business growth".

Rizal Commercial Banking Corporation (RCBC) achieved an 11% growth in net income to Php 10.6 billion. This was propelled by a 32% increase in net interest income and a 25% rise in service fees.

Net interest income uplift was due to a more diverse funding base, which lowered costs. Furthermore, consumer loans expanded by 29%, contributing to a better yield on earning assets. This resulted in an 89 basis point improvement

in Net Interest Margin (NIM), which reached 4.77%. Focus on this loan segment also led to higher service fees.

Gross customer loans grew by 7%. Consumer loans now account for 49% of the total, in part driven by the 32% expansion of the credit card receivables. This growth was fueled by the successful acquisition of affluent customers, resulting in an 18% increase in issued cards. The sustained double-digit receivables growth was achieved through the strategic use of data analytics to deepen cardholder engagement and loyalty. RCBC was among the first to introduce key payment solutions for customers and merchants: Google Pay to enhance the digital experience of the Bank's credit cardholders, and Tap-to-Phone, a solution that allows merchants to accept card payments using mobile phones as a point of sale terminal.

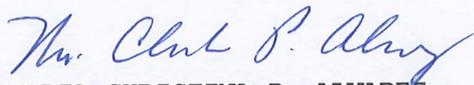

Key profitability metrics also saw improvement: Return on Equity (ROE) increased by 62 basis points to 6.65%, and Return on Assets (ROA) improved by 6 basis points to 0.81%.
