UNION BANK OF THE PHILIPPINES
GENERAL NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2026

1. Corporate Information

Union Bank of the Philippines (the Bank, UnionBank or the Parent Bank) was incorporated in the Philippines on August 16, 1968 and operates as a universal bank through its universal banking license acquired in July 1992.

The Bank provides expanded commercial banking products and services such as loans and deposits, cash management, retail banking, foreign exchange, capital markets, corporate and consumer finance, investment management and trust banking.

As of March 31, 2026, the Bank and its subsidiaries (collectively referred to as the “Group”) has 387 branches and 423 on-site and 173 off-site automated teller machines (ATMs), located nationwide.

The Bank’s common shares are listed in The Philippine Stock Exchange, Inc. (PSE). The Bank is effectively 49.99% owned by Aboitiz Equity Ventures, Inc. (AEVI), a company incorporated and domiciled in the Philippines. AEVI is the holding and management company of the Aboitiz Group of Companies.

2. Summary of Significant Accounting Policies

The significant accounting policies that have been used in the preparation of these financial statements are summarized below. These policies have been consistently applied to all the years presented unless otherwise stated.

Basis of Preparation of Financial Statements

The accompanying interim consolidated financial statements have been prepared on a historical cost basis except for financial assets at fair value through profit or loss (FVTPL), financial assets at fair value through other comprehensive income (FVOCI) and derivative financial instruments that are measured at fair value. The unaudited interim consolidated financial statements are presented in Philippine peso (₱). All values are rounded to the nearest thousands in peso except when otherwise indicated.

Statement of Compliance

The unaudited interim consolidated financial statements of the Group have been prepared in accordance with Philippine Accounting Standards (PAS) 34, *Interim Financial Reporting*. Accordingly, the unaudited interim consolidated financial statements do not include all of the information and disclosures required in the annual audited financial statements and should be read in conjunction with the Group’s annual audited financial statements as at and for the year ended December 31, 2025.

Basis of Consolidation

The Group’s unaudited interim consolidated financial statements comprise the accounts of the Parent Bank and its subsidiaries, after the elimination of material intercompany transactions. All intercompany resources and liabilities, equity, income, and expenses and cash flows relating to transactions with subsidiaries are eliminated in full. Unrealized profits and losses from intercompany transactions that are recognized in the separate

financial statements are also eliminated in full. Intercompany losses that indicate impairment are recognized in the Group's unaudited interim condensed financial statements.

The Group controls an entity when it has the power over the entity, it is exposed, or has rights to, variable returns from its involvement with the entity, and it has the ability to affect those returns through its power over the entity.

The financial statements of the subsidiaries are prepared on the same reporting period as the Parent Bank using consistent accounting policies.

The Bank's subsidiaries are all incorporated in the Philippines, except for UBX SG and UBX Remit, and the Bank's effective percentage of ownership and the nature of the subsidiaries' businesses as of March 31, 2026 are as follows:

Name of Subsidiary	Percentage of Ownership	Nature of Business
City Savings Bank, Inc. (CSB)	99.81%	Thrift bank
PetNet, Inc. (PETNET) ^(a)	51.00%	Foreign currency trader and remittance business

Unionbank Financial Services and Insurance Brokerage Philippines, Inc. (UFSI)	100.00%	Insurance and securities brokerage

(a) Subsidiary through CSB and UIC, with 40% and 11% share in ownership, respectively

(b) Non-operating subsidiaries

(c) Wholly-owned subsidiary through UIC

(d) Wholly-owned subsidiary of UBX

(e) Wholly-owned subsidiary of UBX SG

(f) 24.96% owned by the Parent Bank; 49% and 23.79% owned through CSB and UIC, respectively

Business Acquisitions and Related Investments

Other relevant information about the subsidiaries' nature of businesses and their status of operations are discussed in the sections that follow:

- a. In May 2025, following BSP's approval of the transactions last April 2025, the Parent Bank paid ₱300.0 million to ATR KimEng AMG Holdings, Inc. and ATR Asset Management, Inc. (AAMI). This was funded by the proceeds from the sale of the Parent Bank's ownership interest in Unionbank Investment Management and Trust Corporation (UBIMTC) of ₱300.0 million.
- b. On October 8, 2025, the Board of Directors (BOD) of the Parent Bank approved the infusion of up to ₱1.5 billion capital to CSB to support its growth and ongoing business

operations. Subsequently on November 28, 2025 and December 19, 2025, the Parent Bank infused capital amounting to ₱1.2 billion and ₱300.0 million, respectively.

- c. On February 28, 2025 and December 19, 2025, the BOD of the Parent Bank approved the infusion of additional capital of up to ₱1.2 billion and another up to ₱1.3 billion, respectively, in UnionDigital to support its ongoing business operations and enable it to deliver sustainable growth.

Pursuant to the aforementioned approvals, June 30, 2025, August 29, 2025, September 15, 2025 and October 27, 2025, the Parent Bank infused capital totaling ₱1.2 billion and on January 30, 2026, the Parent Bank infused capital amounting to ₱400.0 million.

As of March 31, 2026 and December 31, 2025, the Parent Bank's total equity investment in UnionDigital amounted to ₱8.9 billion and ₱8.5 billion, respectively.

- d. The BOD of FUPI and the stockholders, on May 9, 2025 and August 7, 2025, respectively, approved the dissolution of the company by way of an amendment to its Articles of Incorporation (AOI) through shortening its corporate term until December 31, 2025. The Insurance Commission favorably endorsed said dissolution on November 7, 2025. On December 10, 2025, the Securities and Exchange Commission (SEC) approved the said dissolution.
- e. On June 5, 2025, the SEC approved and issued the certificate of amended AOI pertaining to Article IV shortening the term of FUDC's existence thereby dissolving the corporation.
- f. On July 15, 2025, the BOD of FUIFAI approved to suspend and cease its business operations effective August 31, 2025. Pursuant to said cessation, the BOD likewise approved on July 15, 2025, the dissolution of FUIFAI which will be done by way of amendment of its Amended AOI through shortening its corporate term until May 31, 2026.

Non-controlling Interests

Non-controlling interest represents portion of profit or loss and net assets not owned, directly or indirectly, by the Parent Bank.

The Group's transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions - that is, as transaction with the owners of the Group in their capacity as owners. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of the net assets of the subsidiary is recognized in capital funds and presented in "Other reserves". Disposals of equity investments to non-controlling interests may result in gains and losses for the Group that are also recognized in capital funds and presented in "Other reserves".

When the Group ceases to have control over a subsidiary, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognized in the statement of income. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related resources or liabilities. This may mean that

amounts previously recognized in other comprehensive income are reclassified to profit or loss.

Changes in Accounting Policies and Disclosures

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended December 31, 2025, except for the adoption of new standards, interpretations and amendments effective as of January 1, 2026. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Unless otherwise indicated, adoption of these new standards did not have an impact on the interim condensed consolidated financial statements of the Group.

- Amendments to Illustrative Examples on PFRS 7, PFRS 18, PAS 1, PAS 8, PAS 26 and PAS 37, *Disclosures about Uncertainties in the Financial Statements*
- Amendments to PFRS 9 and PFRS 7, *Classification and Measurement of Financial Instruments*
- Amendments to PFRS 9 and PFRS 7, *Contracts Referencing Nature-dependent Electricity*
- Annual Improvements to PFRS Accounting Standards – Volume 11
 - Amendments to PFRS 1, *Hedge Accounting by a First-time Adopter*
 - Amendments to PFRS 7, *Gain or Loss on Derecognition*
 - Amendments to PFRS 9, *Lessee Derecognition of Lease Liabilities and Transaction Price*
 - Amendments to PFRS 10, *Determination of a “De Facto Agent”*
 - Amendments to PAS 7, *Cost Method*

The amendments are effective for annual reporting periods beginning on or after January 1, 2026 and apply retrospectively.

3. Significant Accounting Judgments and Estimates

The preparation of the Group's interim consolidated financial statements in accordance with PFRS Accounting standards requires management to make judgments and estimates that affect the amounts reported in the interim consolidated financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately differ from these estimates.

Critical Management Judgments in Applying Accounting Policies

In the process of applying the Group's accounting policies, management has made the following judgments that are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended December 31, 2025 apart from those involving estimation, which have the most significant effect on the amounts recognized in the financial statements.

Among those significant judgments applied for the three months ended March 31, 2026 are discussed below:

Evaluation of business model in managing financial instruments

The Group manages its financial assets based on business models that maintain adequate level of financial assets to match its expected cash outflows, largely arising from customers' withdrawals and continuing loan disbursements to borrowers, while maintaining a strategic portfolio of financial assets for investment and trading activities consistent with its risk appetite.

In determining the classification of a financial instrument under PFRS 9, the Group developed business models which reflect how it manages its portfolio of financial instruments. The Group's business models need not be assessed at entity level or as a whole but applied at the level of a portfolio of financial instruments (i.e., group of financial instruments that are managed together by the Group) and not on an instrument-by-instrument basis (i.e., not based on intention or specific characteristics of individual financial instrument). The Group evaluates in which business model a financial instrument or a portfolio of financial instruments belong to taking into consideration the objectives of each business model established by the Group.

PFRS 9 emphasizes that if more than an infrequent and more than an insignificant sale is made out of a portfolio of financial assets carried at amortized cost, an entity should assess whether and how such sales are consistent with the objective of collecting contractual cash flows. In making this judgment, the Group considers certain circumstances documented in its business model manual to assess that an increase in the frequency or value of sales of financial instruments in a particular period is not necessarily inconsistent with a held-to-collect business model if the Group can explain the reasons for those sales and why those sales do not reflect a change in the Group's objective for the business model.

Determining functional and presentation currency

The financial statements of the Group and the Parent Bank include the accounts maintained in the Regular Banking Unit (RBU) and Foreign Currency Deposit Unit (FCDU). The functional currency of RBU and FCDU is Philippine Peso (PHP) and United States Dollar (USD), respectively. For financial reporting purposes, FCDU accounts and foreign currency-denominated accounts in the RBU are translated into their equivalents in PHP (see accounting policy on Foreign Currency Translation).

The financial statements of these units are combined after eliminating inter-unit accounts. These are presented in Philippine pesos, and all values are presented in thousands of Philippine Pesos except when otherwise indicated.

Items included in the financial statements of the Group are measured using its functional currency, the currency of the primary economic environment in which the Group operates.

Testing the cash flow characteristics of financial assets

In determining the classification of financial assets under PFRS 9, the Group assesses whether the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal outstanding, with interest representing time value of money and credit risk associated with the principal amount outstanding. The assessment as to whether the cash flows meet the test is made in the currency in which the financial asset is denominated. Any other contractual term that changes the timing or amount of cash flows (unless it is a variable

interest rate that represents time value of money and credit risk) does not meet the amortized cost criteria. In cases where the relationship between the passage of time and the interest rate of the financial instrument may be imperfect, known as modified time value of money, the Group assesses the modified time value of money feature to determine whether the financial instrument still meets the SPPI criterion. The objective of the assessment is to determine how different the undiscounted contractual cash flows could be from the undiscounted cash flows that would arise if the time value of money element was not modified (the benchmark cash flows). If the resulting difference is significant, the SPPI criterion is not met.

In view of this, the Group considers the effect of the modified time value of money element in each reporting period and cumulatively over the life of the financial instrument.

Determining the lease term of contracts with renewal and termination options – Group as lessee

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. The Group determined that generally, the options to extend or terminate the lease are not included in the determination of the lease term. These optional periods are not enforceable, as the Group cannot enforce the extension of the lease without the agreement from the lessor, and therefore, the Group does not have the right to use the asset beyond the non-cancellable period.

Key Sources of Estimation Uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period.

Estimation of impairment losses on Loans and other receivables, Financial assets at amortized cost and Financial assets at FVOCI

The measurement of impairment losses under PFRS 9 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's expected credit loss (ECL) calculations are outputs of complex model with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies.

Significant factors affecting the estimates on the ECL model include:

- The Group's internal rating system, which assigns probability of default (PD) to individual grades. Qualitative assessments were also considered during risk rating to account for other relevant potential drivers of credit risk.
- The Group's criteria for assessing if there has been a Significant Increase in Credit Risk (SICR) which is the basis for measuring allowances for financial assets on a Lifetime Expected Credit Loss (LTECL) basis. There are also qualitative assessments to

consider significant increase in credit risk based on the identified risk profiles of their accounts and portfolios. The Group's definition of default. The Bank considers the regulatory requirement and the Bank's indicators of loss.

- Development of ECL models, including the various formulas and the choice of inputs. Models have been developed, reviewed and/or revised as appropriate based on latest reviews, economic outlook and studies from external sources. The provisioning methodology for Wholesale Stage 3 accounts are also enhanced to consider specific factors affecting its recoverability which includes the expected life of the financial asset, expected recoveries and impact of credit enhancements extended by any party.

The determination of associations between macroeconomic scenarios and economic inputs, such as unemployment levels, level of government spending, and collateral values, and their effect on ECL calculation is enhanced by Management overlays based on expert judgment. These overlays are an integral part of the process and are applied specifically to address model risk arising from data issues and inherent model limitations. As the economy evolves, analyses and forecasts were continuously reviewed and updated as needed with management overlays applied where necessary to ensure continued appropriateness of the ECL outcomes.

Fair value of derivatives

Management applies valuation techniques to determine the fair value of derivatives that are not quoted in active markets. This requires management to develop estimates and assumptions based on market inputs, using observable data that market participants would use in pricing the instrument. Where such data is not observable, management uses its best estimate. Estimated fair values of financial instruments may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

Valuation techniques are used to determine fair values which are validated and periodically reviewed. To the extent practicable, models use observable data, however, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions could affect reported fair value of financial instruments. The Group uses judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period.

Recognition of deferred tax assets

Deferred tax assets are recognized for all unused tax losses and temporary differences to the extent that it is probable that future taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with future tax planning strategies.

Change in segment reporting

The Group's Management Committee monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profits or losses and is measured consistently with operating profit or losses in the consolidated financial statements. However, income taxes are managed on a group basis and are not allocated to operating segments. Interest income is reported net as management primarily relies on net interest revenue as a performance along with the gross income and expenses. Transfer prices between operating segments are based on the Bank's internal pricing framework.

As a result of a change in internal reporting, entities may change individual elements of their segment reporting. When an entity changes any of its segment measures, including the definition of segment profit, or changes the allocation of income, expenses, assets or liabilities to segments, without a change to the composition of its reportable segments, the general principles of PAS 1 for changes in presentation or classification of items apply. Therefore, comparative information would be restated, unless this is impracticable.

The Group changed its segment approach to better reflect the underlying business dynamics and enhance clarity in the Group's segment performance measurement. Retail Banking Center (RBC) deposit products are now allocated across Consumer Banking and Institutional Banking, based on their respective sub-product segments: Retail Personal and SME under Consumer Banking, and Retail Commercial and Retail Corporate under Institutional Banking.

The change in reporting structure altered the composition of cash generating units (CGU) associated with the goodwill, requiring the goodwill to be reallocated in accordance with PAS 36. The reallocation was performed based on the allocation approach that estimated the expected economic benefits from the reconstituted CGUs.

Impairment of goodwill

The Group conducts an annual review for any impairment in the value of goodwill. Goodwill is written down for impairment where the recoverable amount of the related CGU is insufficient to support its carrying value. The Group determines the recoverable value of the CGU to which goodwill is allocated by discounting the estimated free cash flows using the weighted-average cost of capital (WACC) as the discount rate. The Group estimates the discount rate used for the computation of the net present value by reference to industry cost of capital.

The recoverable amount of the CGU is determined based on a value-in-use calculation using cash flow projections from financial budgets covering a five-year period. Financial budget for the immediately succeeding year is approved by senior management and BOD of the Parent Bank, while the financial budgets for the other years of cash flow projections are determined by corporate planning group and the relevant business units.

The discount rates used for the computation of the value in use for various CGUs are based on the pre-tax discount rates ranging from 15.2% to 54.3% as of December 31, 2025. The long-term growth used are 4.5% to 5.4% as of December 31, 2025.

Though management believes that the assumptions used in the estimation of fair values reflected in the financial statements are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable values and any resulting impairment loss could have a material adverse effect on the results of operations.

Valuation of post-employment and other benefits

The determination of the Group's obligation and cost of pension and other post-employment benefits is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include, among others, discount rates, expected rates of salary increase, and employee turnover rate. A significant change in any of these actuarial assumptions may generally affect the recognized expense, other comprehensive income or loss and the carrying amount of the post-employment benefit obligation in the next reporting period.

The Group also estimates other employee benefit obligations and expenses, including the cost of paid leaves based on historical leave availments of employees, subject to the Group and the Parent Bank policies. These estimates may vary depending on future changes in salaries and actual experiences during the year.

4. Risk Management Objectives and Policies

Risks are inherent in the business activities of the Group. Among its identified top risks are credit risk, operational risk, regulatory compliance risk, interest rate risk on banking book (IRRBB), liquidity risk and market risk. These are managed through a risk management framework and governance structure that provides comprehensive controls and management of major risks on an ongoing basis.

Risk management comprises the systematic identification, assessment, and monitoring of risks across the Group. It provides a consistent and transparent framework for evaluating which risks are accepted or mitigated, in alignment with the risk appetite set up by the BOD. The framework supports disciplined risk-taking while allowing business units to pursue sustainable value creation and maximize risk-adjusted returns.

Risk Management Structure

The BOD excises oversight of the Bank's risk management process as a whole and through its various risk committees. For the purpose of day-to-day management of risks, the Bank has established independent risk management units (RMUs) that objectively review and ensure compliance with the risk parameters set by the BOD. They are responsible for the monitoring and reporting of risks to senior management and the various Board-level committees of the Bank.

The BOD is primarily responsible for setting the risk appetite, approving risk parameters, risk policies, and investment guidelines, as well as establishing the overall risk-taking capacity of the Bank. To fulfill its responsibilities in risk management, the BOD has established the following committees, whose functions are described below.

- (a) The Executive Committee (EXCOM) is composed of seven (7) members of the BOD. The EXCOM exercises certain functions as delegated by the BOD, including among others, the approval of credit and loan transactions, asset recovery, real and other properties acquired (ROPA) sales, and such other transactions as may be initiated by the Bank units within the EXCOM's delegated limits.
- (b) The Risk Management Committee (RMC) is composed of at least seven (7) members of the BOD, majority of whom are independent directors including the Chairman, who cannot be the chairman of the board or any other board committee. The RMC advises the BOD regarding the Bank's overall current and future risk appetite, oversees Senior Management's adherence to the risk appetite statement, and reports on the state of risk culture of the Parent Bank. The RMC oversees the Bank's risk management framework and the risk management function. The RMC also provides oversight, direction, and guidance to the other risk committees, specifically the Market Risk Committee (MRC) and the Operational Risk Management Committee (ORMC).
- (c) The MRC is composed of nine (9) members of the BOD, majority of whom are independent directors, including the Chairman. The MRC is primarily responsible for reviewing the risk management policies and practices relating to market risk including interest rate risk in the banking book and liquidity risk.

- (d) The ORMC, composed of at least seven (7) non-executive Board members (including an independent Chair), oversees the Bank's operational risk management. This oversight includes policy review and approval of the Operational Risk Management Framework (a component of the Enterprise Risk Management System), as well as ensuring its implementation across all business and functional units, including insourced, outsourced, and external services. The ORMC's objective is to minimize financial losses, exceed customer expectations, and maintain operational resilience. Furthermore, it fosters a culture of operational risk accountability through a framework emphasizing proactive prevention, root cause analysis, and lessons learned.
- (e) The Audit Committee is composed of seven (7) members, all non-executive and majority of whom are independent, including the Chairman, most of whom are with accounting, auditing, or related financial management expertise or experience. The skills, qualifications, and experience of the committee members are appropriate for them to perform their duties as laid down by the BOD.

The Audit Committee serves as principal agent of the BOD in ensuring independence of the Parent Bank's external auditors and the internal audit function. It also oversees the Parent Bank's financial reporting process on behalf of the BOD. It assists the BOD in fulfilling its fiduciary responsibilities as to accounting policies, reporting practices and the sufficiency of auditing relative thereto, and regulatory compliance.

To effectively perform these functions, the Audit Committee obtains a good understanding of the Parent Bank's business, including its structure, controls, and the types of transactions or other financial reporting matters applicable to the Parent Bank as well as to determine whether the controls are adequate, functioning as designed, and operating effectively. It also considers the potential effects of emerging business risks and their impact on the Parent Bank's financial position and results of operations.

Among the responsibilities of the Audit Committee are:

- *Oversight of the financial reporting process.* The Audit Committee ensures that the Parent Bank has a high-quality reporting process that provides transparent, consistent, and comparable financial statements. In this regard, the Audit Committee works closely with management especially the Office of the Financial Controller, the Internal Audit Group (IAG), as well as the external auditors, to effectively monitor the financial reporting process and resolution of any significant financial reporting issues and concerns.
- *Monitoring and evaluation of internal control.* The Audit Committee requires management to maintain a comprehensive Internal Control Framework. The Audit Committee, through the IAG, monitors and evaluates the adequacy and effectiveness of the internal control framework, the integrity of financial reporting, and security of physical assets, and ensures that a proactive and forward-looking approach to evaluation of risks and controls is taken. The Audit Committee ensures that periodic assessment of the internal control system is conducted to identify weaknesses and evaluates its robustness considering the risk profile and strategic direction of the Parent Bank.

- *Oversight over the Internal Audit Function.* The Audit Committee ensures the independence and effectiveness of the internal audit function by establishing its reporting line to the Audit Committee and approving its charter, audit plans, and allocated resources. It ensures unrestricted access for audit activities, oversees the appointment and remuneration of the Chief Audit Executive, and monitors adherence to audit standards. The Committee also mandates periodic external quality reviews, evaluates governance structure across subsidiaries, and approves group-wide audit strategies to strengthen risk oversight.
- *Conduct of Executive Sessions.* The Audit Committee conducts executive sessions with the Board and the Chief Audit Executive, and separately with external auditors, to discuss matters deemed appropriate for private discussion without the Chief Executive Officer (CEO) or other members of management present. These sessions address the effectiveness and efficiency of the Bank's internal control system, significant internal audit reports and recommendations, and matters relating to fraud risk management and the whistleblowing mechanism.
- *Oversees the implementation of Corrective Actions.* The Audit Committee monitors management's implementation of timely and effective corrective actions on audit recommendations. This oversight ensures that identified weaknesses, policy and regulatory non-compliance, and other issues raised by auditors and control functions are addressed promptly and adequately to maintain sound governance and risk management.
- *Oversight over External Audit.* The Audit Committee exercises oversight over the external audit process by reviewing the appointment, scope, approach, and fees the external auditor. The Audit Committee evaluates auditor independence, performance, and compliance with auditing standards, including restrictions on non-audit services. The Committee also monitors internal control issues raised by the external auditors and ensures timely, complete communication between management and the external auditors.
- *Oversight of the outsourced internal audit activities.* The Audit Committee oversees the performance of internal audit service providers and ensures that they comply with sound internal auditing standards and other supplemental standards issued by regulatory authorities as well as with relevant codes of ethics.
- *Oversees the Implementation of Group Internal Audit Policy.* The Audit Committee oversees the implementation of the policy through the periodic reports on oversight of the Group Internal Audit and takes appropriate action on any group internal oversight issues identified. The Audit Committee reviews and evaluates the group internal audit policy, and any amendments thereto, and endorses the same to the BOD for approval.
- *Oversight of the Establishment of a Whistleblowing Mechanism.* The Audit Committee oversees the establishment of a whistleblowing mechanism in the Bank by which officers and staff shall in confidence raise concerns about possible improprieties or malpractices in matters of financial reporting, internal control, auditing, or other issues, to persons or entities that have the power to take corrective action. It also ensures that arrangements are in place for the independent investigation, appropriate follow-up, action, and subsequent resolution of complaints.

The Audit Committee regularly reports to the BOD about committee activities in relation to its responsibilities and how they were discharged, issues, and related recommendations. The Audit Committee also assesses the continuing adequacy of the Audit Committee Charter and confirms annually that all responsibilities outlined therein have been carried out.

In the performance of these functions, the Audit Committee is supported by the IAG. The Chief Audit Executive derives authority from and is directly accountable to the Audit Committee. However, administratively, the Chief Audit Executive reports to the President of the Parent Bank.

The internal audit function is entirely independent from all the other organizational units of the Parent Bank, as well as from the personnel and work that are to be audited. It operates under the direct control of the Audit Committee and is given an appropriate standing within the Parent Bank to be free from bias and interference. IAG is free to report its findings and appraisals internally at its own initiative to the Audit Committee.

The IAG is authorized by the Audit Committee to have unrestricted access to all functions, records, property, and personnel of the Bank subject to existing mandates and applicable laws. This includes the authority to allocate resources, set audit frequencies, select subjects, determine scope of work, and apply the techniques required to accomplish the audit engagement objectives.

The IAG is also authorized to obtain the necessary assistance from personnel within the Parent Bank units where they perform audits, as well as other specialized services within or outside the Parent Bank.

The IAG presents its risk-based and forward-looking audit plan consistent with the Parent Bank's strategic plans and priorities every quarter for approval by the Audit Committee.

At least once a month, the Audit Committee meets to discuss the results of the assurance and advisory engagements, and case investigations by IAG. Financial reporting and Controllership related topics are also included as needed. The results of these meetings are regularly reported by the Audit Committee Chairman to the BOD in its monthly meetings.

- (f) The Corporate Governance Committee (CGC) is primarily responsible for helping the BOD fulfill its corporate governance and compliance responsibilities. It is responsible for ensuring the BOD's effectiveness and due observance of corporate governance principles and of oversight over the compliance risk management. It assists in the establishment of a compliance program that facilitates the escalation and resolution of compliance issues expeditiously. The CGC also acts as the Bank's Nomination Committee and reviews the qualifications of and screens candidates for the board including nominees for independent directors and key officers of the Parent Bank. The CGC likewise reviews the qualifications of and screens candidates of its nominees to its subsidiaries. It also oversees the succession plan for board members and senior officers, and directs the alignment of the latter's remuneration with corporate and individual performance.

The CGC is composed of nine (9) members of the BOD, all non-executive, majority of whom, including its Chairman, are independent directors. Its specific duties include, among others, making recommendations to the BOD regarding continuing education of directors, providing a communication channel for its subsidiaries and affiliates to ensure that the Bank, as the Parent company, is kept well abreast of material issues, and overseeing the periodic performance evaluation of the 1) Board; 2) Board Committees; 3) Individual Directors; 4) Management-level Committees (through the respective committee secretariats); and 5) Chief Compliance and Corporate Governance Officer (CCO).

The CGC also performs oversight functions over the Compliance and Corporate Governance Office (CCGO) and the following management-level committees: 1) Anti-Money Laundering Committee; 2) Discipline Committee; 3) Personnel Committee; 4) Retirement Committee; and 5) Employee Loans Committee. Furthermore, the Sustainability Team of the Enterprise Risk and Management (ERM) unit regularly reports the status of the Bank's sustainability compliance to the CGC, pursuant to the Committee's mandate to ensure that ESG principles and sustainability objectives remain relevant to the business.

Senior management, through the CCGO, periodically reports to the CGC the status of regulatory audit and compliance testing findings until their closure. Any material breaches of the compliance program are reported to and promptly addressed by the CCO within the mechanisms defined by the Compliance Manual.

The Parent Bank's CCO defines the Group's governance and compliance requirements and works closely with the subsidiaries' Chief Compliance Officers in the execution of these standards.

The Parent Bank's CCO and designated Compliance Officers assist the CGC in fulfilling its functions by apprising the same of (1) pertinent regulations and other issuances relating to compliance and corporate governance, (2) related regulatory issues and compliance initiatives affecting the various units and the status of the corrective action plans, and (3) continuously giving updates thereon. In addition, the CCO keeps the CGC abreast of best governance practices and discusses issues brought up among private organizations and individuals advocating good governance philosophy.

(g) The Related Party Transactions Committee is a board-level committee composed of five (5) members, all of whom are independent directors, including its Chairman. The Committee assists the BOD in the fulfillment of its corporate governance responsibilities on related party transactions by ensuring among others, that:

- Related Party Transactions (RPTs) are transacted at arm's length, in the ordinary course of business, and in accordance with existing policies and regulations.
- RPTs are reviewed and endorsed to the Board for approval or confirmation, as applicable
- RPTs are monitored, and subsequent changes in relationships with counterparties (from non-related to related and vice versa) are captured. Related parties, RPTs, and changes in relationships are reflected in the relevant reports to the board and regulators.

The major risk types identified by the Group are discussed in the following sections:

Credit Risk

Credit risk is the risk of loss resulting from the failure of a borrower or counterparty to honor its financial or contractual obligation to the Group. The risk may arise from lending, trade finance, treasury, investments, derivatives and other activities undertaken by the Group. Credit risk is managed through strategies, policies and limits that are approved by the respective BOD and/or Credit Committee of the various companies within the Group. With respect to the Parent Bank, it has a well-structured and standardized credit approval process and credit scoring system for each of its business and/or product segments.

The ERM undertakes independent oversight and review responsibilities in credit risk management. It performs independent assessments and evaluations of credit risk practices across consumer, commercial, and corporate financial products, providing effective challenge and ensuring consistency with the Parent Bank's approved risk assessment framework. It also ensures that the Parent Bank's credit risk policies and procedures are adequate and are constantly updated to meet the changing demands or risk profiles of the business units. The ERM also reports to the Board's RMC.

The ERM's portfolio management function involves the review of the Parent Bank's loan portfolio, including the portfolio risks associated with particular customer segment, industry sectors, regions, loan size and maturity, and the development of a strategy for the Parent Bank to achieve its desired portfolio mix and risk profile. The ERM reviews the Parent Bank's loan portfolio quality in line with the Parent Bank's policy of avoiding significant concentrations of exposure to specific industries or groups of borrowers. Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features. Concentrations indicate the relative sensitivity of the Parent Bank's performance to developments affecting a particular industry or geographical location.

The Group and the Parent Bank consider concentration risk to be present when the total exposure to a particular industry exceeds 30.0% of the total exposure, which is similar to the BSP requirement. As of March 31, 2026 and December 31, 2025, the Group and the Parent Bank did not exceed the limit in any of its industry concentration.

In order to avoid excessive concentrations of risk, the Parent Bank's policies and procedures include guidelines for maintaining a diversified portfolio mix (e.g., concentration limits). Identified concentrations of credit risks are controlled and managed accordingly. The ERM also monitors compliance to the BSP's limit on exposures.

The following summarizes the Group's credit risk management practices and the relevant quantitative and qualitative financial information regarding the credit exposure according to portfolios:

Credit risk management practices and credit quality disclosures

Corporate Loans

Corporate lending activities are undertaken by the Parent Bank's Corporate Banking Center. The customer accounts under this group belong to the top-tier corporations, conglomerates, and large multinational companies.

The Parent Bank undertakes a comprehensive procedure for the credit evaluation and risk assessment of large corporate borrowers based on its obligor risk rating master scale.

The Parent Bank currently utilizes the same single rating system for both Corporate and Commercial accounts. In addition, the result on the latter is further refined through a second model to take more careful account of the nuances between the commercial bank portfolio with that of the corporate loan book.

The rating system assesses default risk based on financial profile, management capacity, industry performance, and other factors deemed relevant. Significant changes in the credit risk considering movements in credit rating, among other account-level profile and performance factors, define whether the accounts are classified in either Stage 1, Stage 2, or Stage 3 per PFRS 9 loan impairment standards. In 2023, the Parent Bank updated the stage assessment to enhance the considerations related to movements in the borrower's credit rating when determining significant increase in credit risk, which include rating threshold triggers.

Based on foregoing factors, each borrower is assigned a Borrower Risk Rating (BRR), from AAA to D. In addition to the BRR, the Parent Bank assigns a loan exposure rating (LER), a 100-point system which consists of a Facility Tenor Rating (FTR) and a Security Risk Rating (SRR). The FTR measures the maturity risk based on the length of loan exposure, while the SRR measures the quality of the collateral and risk of its potential deterioration over the term of the loan. The FTR and the SRR, each a 100-point scoring system, are given equal weight in determining the LER.

Once the BRR and the LER have been determined, the credit limit to a borrower is determined under the Risk Asset Acceptance Criteria (RAAC) which is a range of acceptable combinations of the BRR and the LER. Under the RAAC system, a borrower with a high BRR will have a broader range of acceptable LERs.

The credit rating for each borrower is reviewed annually or earlier when there are extraordinary or adverse developments affecting the borrower, the industry and/or the Philippine economy such as the COVID-19 pandemic. Any major change in the credit scoring system, the RAAC range and/or the risk-adjusted pricing system is presented to and approved by the RMC.

Commercial Loans

The Parent Bank's commercial banking activities are undertaken by its Commercial Banking Center (ComBank). These consist of banking products and services rendered to customers which are entities that are predominantly middle market companies. These products and services are similar to those provided to large corporate customers, with the predominance of trade finance-related products and services.

The non-financial ComBank accounts use an adjusted obligor rating scale derived from the one applied for corporate loans, and follows the same RAAC framework, while ComBank accounts classified as banks and non-bank financial institutions are still rated using the 2018 rating scale.

Consumer Financial Products

The Consumer loan portfolio of the Parent Bank is composed of five main product lines, namely: Home Loans, Credit Card, Personal Loans, Small and Medium Enterprise (SME) financial products and Auto Loans.

In particular, SME portfolio is composed of business lines and a small portion from emerging products.

Each of these products has established credit risk guidelines and systems for managing credit risk across all products. Credit models are constantly reviewed and updated as necessary supported by enhanced data analytics to improve portfolio quality and product offers.

For the subsidiary, CSB an accredited lending institution of the Department of Education (DepEd), provides salary loans to teachers under an agreement with DepEd for payroll deductions. CSB also provides motorcycle loans as a result of its acquisition and subsequent merger with Philippine Resources Savings Banking Corporation (PR Savings Bank).

Exposure to credit risk is managed through diligent assessment upon onboarding and regular portfolio and segment analysis of the ability of borrowers to meet interest and principal repayment obligations and by changing these lending limits when appropriate.

The Consumer products' respective masterscale is defined by the credit scoring models, which consider demographic variables and behavioral performance, to segment the portfolio according to risk masterscale per product. The stages are defined by the approved SICR for Consumer which takes into account the following: non-performing loans (NPL) status, days past due, and credit score rating for Application Score (point of application) and Behavior Score (monthly credit performance).

Home Loans (excluding Contract to Sell – CTS accounts) use a rating scale of 1 to 6, while CTS accounts follow the Corporate rating framework, which uses scores from 1 to 9. For Credit Cards, both Blue and Legacy portfolios apply the NR1 to NR7 scale for non-restructured accounts and the R1 to R6 scale for restructured accounts. Personal Loans utilize a broader rating scale ranging from 1 to 17. Auto Loans use a rating scale of 1 to 5. Meanwhile, the SME portfolio no longer uses a masterscale rating and instead applies a simplified PD assignment approach, where the probability of default is directly determined based on the account's stage classification.

CSB Salary Loans

For CSB salary loans, which relates to the DepEd loans of CSB, each borrower is assigned a credit score with E as minimal risk, D as low risk, C as moderate risk, B as average Risk and A as high risk.

The description of each credit quality grouping for the credit scores is explained further as follows:

High grade (minimal to low risk) – These are receivables which have a high probability of collection. The counterparty has the apparent ability to satisfy its obligation and the security on the receivables is readily enforceable.

Standard grade (moderate to average risk) – These are receivable where collections are probable due to the reputation and the financial ability of the counterparty to pay but with experience of default.

Substandard (high risk) – Accounts classified as “Substandard” are individual credits or portions thereof which appear to involve a substantial and unreasonable degree of risk to CSB because of unfavorable record or unsatisfactory characteristics. There exists in such accounts the possibility of future loss to CSB unless given closer supervision. Those classified as “Substandard” must have a well-defined weakness or weaknesses that

jeopardize their liquidation. Such well-defined weaknesses may include adverse trends or development of financial, managerial, economic or political nature, or a significant weakness in collateral.

Other receivables from customers

Other receivables from customers of the Group and the Parent Bank include small portfolios such as, with respect to the Parent Bank (i) HR loans, (ii) bills purchased and (iii) customer liabilities under acceptances, (iv) home credit receivables, (v) teacher's loans acquired from CSB, (vi) high-net-worth individual loans, (vii) corporate retail loans and, with respect to the subsidiaries, (i) personal loans, and (ii) motorcycle loans. Each of the products has established credit risk guidelines and systems for managing credit risk across all businesses.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment of obligations and by changing these lending limits when appropriate.

Each product was risk rated using techniques appropriate to the Group's and Parent Bank's credit experience. Such methods consider the payment history that are reflected in aging, delinquency, and/or change in rating. These provide the bases for the ECL stage determination.

Investments and Placements

Investments and placements include financial assets at amortized cost, debt financial assets through other comprehensive income, due from BSP, interbank loans receivable, and due from other banks. Each has established credit risk guidelines and systems for managing credit risk across all businesses.

Collateral Held as Security and Other Credit Enhancements

The Group holds collateral against loans and other receivables from customers and SPURRA in order to mitigate risk. The collateral may be in the form of mortgages over real estate property, chattels, inventory, cash, securities and/or guarantees. The Bank regularly monitors and updates the fair value of the collateral depending on the type of credit exposure. Estimates of the fair value of collateral are considered in the review and assessment of the adequacy of allowance for credit losses. In general, the Bank does require collateral for loans and advances to other banks, except when securities are held as part of reverse repurchase agreements.

Liquidity Risk

Liquidity risk is the risk that there are insufficient funds available to adequately meet the credit demands of the Group's customers and repay deposits on maturity. The Asset and Liability Committee (ALCO) and the Treasurer of the Group ensure that sufficient liquid assets are available to meet short-term funding and regulatory requirements. Liquidity is monitored by the Group on a daily basis and under stressed situations. A contingency plan is formulated to set out the amount and the sources of funds (such as unused credit facilities) that are available to the Group and the circumstances under which the Group may use such funds.

Liquidity ratios are used to monitor and manage the Bank's liquidity. The MRC approves the ratios to be used for monitoring the performance of the Bank and for mapping out areas where improvements are needed. These ratios include Liquid Assets to Deposits Ratio, Liquidity ratio, Leverage Ratio and Intermediation Ratio.

The Group also manages its liquidity risks through the use of a Maximum Cumulative Outflow (MCO) limit which regulates the outflow of cash on a cumulative basis and on a tenor basis. To maintain sufficient liquidity in foreign currencies, the Group has also set an MCO limit for certain designated foreign currencies. The MCO limits are endorsed by the MRC and approved by the BOD. The Bank has separate limits for the short term (generally less than 30 days) and the medium-term tenor (from 30 days to one year).

Market Risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rate, foreign exchange rates and equity prices. The Group classifies exposures to market risk into either trading book or banking book. The market risk for the trading portfolio is managed and monitored based on a Value-at-Risk (VaR) methodology. Meanwhile, the market risk for the non-trading positions are managed and monitored using other sensitivity analyses.

The Parent Bank applies a VaR methodology to assess the market risk of positions held and to estimate the potential economic loss based upon a number of parameters and assumptions for various changes in market conditions. VaR is a method used in measuring financial risk by estimating the potential negative change in the market value of a portfolio at a given confidence level and over a specified time horizon.

The Bank uses a 10-day 99% VaR historical simulation with full revaluation approach. The historical simulation with full revaluation approach is the general market accepted methodology in the measurement of VaR. This methodology recalculates the market value of each financial product for each scenario by applying simulated risk factors based on historical movements to the market-accepted valuation methodology defined for each product.

VaR may also be underestimated or overestimated due to the assumptions placed on risk factors and the relationship between such factors for specific instruments. Even though positions may change throughout the day, the VaR only represents the risk of the portfolios at the close of each business day, and it does not account for any losses that may occur beyond the 99% confidence level.

The VaR figures are backtested daily against actual and hypothetical profit and loss of the trading book to validate the robustness of the VaR model. To supplement the VaR, the Parent Bank performs stress tests wherein the trading portfolios are valued under extreme market scenarios not covered by the confidence interval of the Parent Bank's VaR model.

Since VaR is an integral part of the Parent Bank's market risk management, VaR limits are established annually for all financial trading activities and exposures against the VaR limits and are monitored on a daily basis. Limits are based on the tolerable risk appetite of the Parent Bank.

Interest Rate Risk

Interest rate risk in the banking book (IRRBB) is the current and prospective risk to earnings and capital arising from adverse movements in interest rates that affect the bank's banking book positions. When interest rates change, the present value and timing of future cash flows change. This, in turn, changes the underlying value of the Bank's assets, liabilities and off-balance sheet items, and hence its economic value. On the other hand, changes in interest rates also affect the Bank's earnings by altering interest rate-sensitive income and expenses, affecting its net interest income (NII). The ALCO

establishes appropriate asset and liability pricing in support of the Bank's balance sheet objectives.

The Group employs "gap analysis" to measure rate-sensitivity of the income and expenses, also known as Earnings-at-Risk (EaR). This sensitivity analysis is performed at least every month. The EaR measures the impact on the net interest income for any mismatch between the amounts of interest-earning assets and interest-bearing liabilities within a one-year period. The EaR is calculated by first distributing the interest-sensitive assets, liabilities, and off-balance sheet items based on the current balance sheet composition into tenor buckets based on time remaining to the next repricing date or the time remaining to maturity if there is no repricing and then subtracting the liabilities from the assets to obtain the repricing gap. The repricing gap per tenor bucket is then multiplied by the assumed interest rate shock and appropriate time factor to derive the EaR per tenor. The 1st year (one-year) EaR is derived from the summation of the EaR per tenor within one year is subject to the established EaR limit per currency. EaR limits are reviewed and updated regularly to ensure that the risks brought by the changes in the balance sheet and liquidity strategies are within the risk appetite of the Bank.

The Bank also calculates EaR for the 2nd and 3rd years in order to measure medium-term vulnerabilities, i.e., those occurring in the 2nd and 3rd years. In addition, EaR is also calculated based on the current balance sheet composition plus projections to provide additional valuable insights in managing IRRBB. However, these are not subject to the EaR limit but are for monitoring purposes only.

Non-maturing or repricing assets or liabilities are considered to be non-interest rate sensitive and are not included in the measurement.

A positive gap occurs when the amount of interest rate-sensitive assets exceeds the amount of interest rate-sensitive liabilities while a negative gap occurs when the amount of interest rate-sensitive liabilities exceeds the amount of interest rate-sensitive assets. Accordingly, during a period of rising interest rates, an entity with a positive gap will have more interest rate-sensitive assets repricing at a higher interest rate than interest rate-sensitive liabilities which will be favorable to it. During a period of falling interest rates, an entity with a positive gap will have more interest rate-sensitive assets repricing at a lower interest rate than interest rate sensitive liabilities, which will be unfavorable to it.

EaR is complemented by stress tests which are conducted quarterly. It involves subjecting the total interest rate-sensitive assets and liabilities within one year to probable short-term and medium-term interest rate movements, assuming parallel and non-parallel shifts (flatteners and steepeners, short rates up and short rates down) in the yield curve.

Additionally, the Bank also monitors long-term sensitivity to interest rate risk of the Bank's balance sheet through the Delta Economic Value of Equity (EVE) method at least on a monthly basis. EVE measures the economic value which provides a more comprehensive view of potential long-term effects of changes in interest rates. EVE is defined as the net cash flows of the Bank's assets and liabilities which affect the Bank's capital. Delta EVE is calculated as the change in the Bank's long-term economic value assuming certain interest rate shocks.

Similar to EaR, Delta EVE is also complemented by stress tests conducted quarterly. It involves subjecting the Bank's total interest rate sensitive assets and liabilities to probable short, medium and long-term interest rate movements, assuming parallel and non-parallel (flattener, steepener, short rates up and short rates down) in the yield curve.

The Bank's interest rate sensitive asset and liability positions are analyzed based on its cash flows, and its present value are computed using appropriate market rates which include the current risk-free rate plus the corresponding margin. On the other hand, the present values of non-interest sensitive assets and liabilities will be kept at their carrying values.

The Bank's IRRBB models and its assumptions are validated by an independent party prior to use. The Bank's risk management program includes measuring and monitoring the risks associated with fluctuations in market interest rates on its net interest income and capital ensuring that the exposures in interest rates are kept within acceptable limits.

Foreign Exchange Risk

Foreign exchange risk is the risk to earnings or capital arising from changes in foreign exchange rates.

The Group's net foreign exchange exposure, taking into account any spot or forward exchange contracts, is computed as foreign currency assets less foreign currency liabilities. The foreign exchange exposure is limited to the day-to-day, over-the-counter buying and selling of foreign exchange in the Group's branches, as well as foreign exchange trading with corporate accounts and other financial institutions. The Group is permitted to engage in proprietary trading to take advantage of foreign exchange fluctuations.

The Parent Bank's policy is to maintain foreign currency exposure within acceptable limits and within existing regulatory guidelines. The Parent Bank believes that its profile of foreign currency exposure on its assets and liabilities is within conservative limits for a financial institution engaged in the type of business in which the Parent Bank is involved.

Operational Risk

Operational risk is the risk of loss arising from inadequate or failed internal processes, people and systems, or external events. This definition includes legal risk but excludes strategic and reputational risks.

BSP Circular 900 Guidelines on Operational Risk Management serves as the groundwork for the Bank's Operational Risk Management (ORM) Framework. This is to standardize the approach undertaken by the Bank in order to facilitate consistently strong ORM practices across the organization.

Key to the effective implementation of the ORM Framework is a governance structure that transparently defines the lines of responsibility from the Board down to the business and functional unit as follows:

Operational Risk Management Committee (ORMC)

The ORMC is a Board-level committee whose principal responsibility is to review risk management policies and practices relating to bank-wide operational risk.

Operational Risk Management (ORM)

ORM, as the second line of defense, shall support management in its endeavor to oversee the operational risks of the Bank, including integration of E&S related operational risk requirements, and ensure that operational risk policies and procedures are designed and executed adequately and consistently across the organization. ORM reports directly to the Chief Risk Officer.

Business/Functional Unit

Business and functional units act as the first line of defense where the responsibility to manage risks resides. It sees to it that the controls and practices implemented within the lines of operations conform to the enterprise-wide policies and procedures that address operational risks.

Other Operational Risk-related Functions

Specialist departments e.g., Legal, Compliance, Human Resources Group, Enterprise Fraud Management, AI and Data Privacy Office, Information Security Office, and Finance functions have dual responsibilities to manage both the operational risks within their own functions as well as provide support to other departments for operational risk management.

The Bank has a mechanism in place for operational risk identification and assessment, risk measurement, risk control/mitigation, and risk monitoring and reporting. There is regular monitoring of its operational risk profiles and material exposures to losses to ensure that it is still within the approved thresholds. In doing so, it utilizes operational risk tools.

Legal Risk and Regulatory Risk Management

Legal risk pertains to the Parent Bank's exposure to losses arising from cases decided not in favor of the Parent Bank where significant legal costs have already been incurred, or in some instances, where the Parent Bank may be required to pay damages. The Parent Bank is involved in litigation to enforce its collection rights under loan agreements in case of borrower default. The Parent Bank may incur significant legal expenses as a result of these events, but the Parent Bank may still end up being unable to collect or enforce its claims, depending on the outcome of litigation.

The Parent Bank has established measures to avoid or mitigate the effects of these adverse decisions and engages several qualified legal advisors, who were endorsed to and carefully approved by senior management. At year-end, the Parent Bank also ensures that material adjustments or disclosures are made in the financial statements for any significant commitments or contingencies which may have arise from legal proceedings involving the Parent Bank.

Regulatory risk refers to the potential risk for the Parent Bank and its subsidiaries to suffer financial loss due to changes in the laws, monetary, tax, or other governmental regulations of the country. Compliance risk is the Bank's potential exposure to legal penalties, financial forfeiture and material loss resulting from its failure to act in accordance with industry laws and regulations, internal policies or prescribed best practices. While the proper and consistent implementation of these rules and regulations is the primary responsibility of the respective units within the Bank and its subsidiaries, the monitoring of the latter's compliance with these regulations rests on the entity's CCO. The study of the potential impact of new laws and regulations is coordinated by the CCO with the Legal Group. The CCO is responsible for communicating and disseminating new rules and regulations to all units, analyzing and addressing potential compliance issues, performing periodic compliance testing, and regularly reporting to the CGC and the BOD.

5. Fair Value Measurement

Fair Value Hierarchy

In accordance with PFRS 13, *Fair Value Measurement*, the fair value of financial assets and liabilities and non-financial assets which are measured at fair value on a recurring or non-recurring basis and those assets and liabilities not measured at fair value but for which fair value is disclosed in accordance with other relevant PFRS, are categorized into three levels based on the significance of inputs used to measure the fair value. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the resource or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and,
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

For purposes of determining the market value at Level 1, a market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

For investments which do not have quoted market price, the fair value is determined by using generally acceptable pricing models and valuation techniques or by reference to the current market of another instrument which is substantially the same after taking into account the related credit risk of counterparties, or is calculated based on the expected cash flows of the underlying net asset base of the instrument.

When the Group uses valuation technique, it maximizes the use of observable market data where it is available and relies as little as possible on entity specific estimates. If all significant inputs required to determine the fair value of an instrument are observable, the instrument is included in Level 2. Otherwise, it is included in Level 3.

For assets and liabilities that are recognized at fair value in the statement of financial position on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The financial assets and financial liabilities measured at fair value in the consolidated statements of financial position are grouped into the fair value hierarchy (amounts in millions of Philippine pesos):

	March 31, 2026 (Unaudited)				December 31, 2025 (Audited)			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Resources								
Financial Assets at FVTPL								
Debt securities	₱21,519	₱-	₱-	₱21,519	₱22,521	₱-	₱-	₱22,521
Derivative assets	-	2,194	57	2,251	-	912	56	968
Equity securities	35	350	23	408	35	350	23	408
Financial Assets at FVOCI								
Debt securities	41,347	-	-	41,347	39,037	-	-	39,037
Equity securities	-	-	297	297	-	-	300	300
Liabilities								
Derivative liabilities	-	1,623	-	1,623	-	2,497	-	2,497

The following table summarizes the carrying amounts and fair values of those financial resources and liabilities not presented in the statement of financial position at their fair values (amounts in millions of Philippine pesos):

	March 31, 2026 (Unaudited)				
	Carrying Value	Level 1	Level 2	Level 3	Total
Financial Assets					
Financial Assets at amortized cost	₱316,409	₱291,588	₱-	₱-	₱291,588
Loans and other receivables - net	553,568	-	-	506,659	506,659
Financial Liabilities					
Deposit liabilities	751,718	-	-	760,022	760,022
Bills payable	133,016	-	129,416	-	129,416
Notes and bonds payable	39,691	-	39,812	-	39,812

	December 31, 2025 (Audited)				
	Carrying Value	Level 1	Level 2	Level 3	Total
Financial Assets					
Financial Assets at amortized cost	₱308,752	₱292,573	₱-	₱-	₱292,573
Loans and other receivables - net	537,682	-	-	495,547	495,547
Financial Liabilities					
Deposit liabilities	734,034	-	-	738,109	738,109
Bills payable	132,010	-	132,871	-	132,871
Notes and bonds payable	39,662	-	40,060	-	40,060

For Cash and other cash items, Due from BSP and other banks, Interbank loans receivable, SPURRA and Returned checks and other cash items, and Other liabilities such as Manager's checks, Bills purchased, Accounts payable, Accrued interest payable and Payment orders payable and Due to Treasurer of the Philippines, management considers that the carrying amounts approximate their fair value due to their short-term nature. Accordingly, these are not presented in the tables above.

6. Segment Information

Business Segments

The Group's main operating businesses are organized and managed separately according to the nature of products and services provided and the different markets served, with each segment representing a strategic business unit. These are also the basis of the Group in reporting to its chief operating decision-maker for its strategic decision-making activities.

The Group's main business segments are presented below.

- (a) **Consumer Banking** - This segment principally handles individual customer deposits, funds transfer facilities and provides consumer type loans, such as personal loans, automobiles and mortgage financing, and credit card facilities and small and medium enterprises loan products.
- (b) **Institutional Banking** - This segment principally handles loans and other credit facilities and deposit and current accounts for corporate, institutional and middle market customers.
- (c) **Mass Market/Digital Banking** - Mass Market banking primarily provides a range of mass market financial products and services such as salary loans, pension loans, seafarer loans, motorcycle loans, company loans, LGU salary loans, and traditional deposits. Digital Banking offers retail financial products, including deposits and loans, on a highly secure digital banking platform.
- (d) **Treasury Banking** - This segment is principally responsible for managing the Bank's liquidity and funding requirements, and handling transactions in the financial markets covering foreign exchange, fixed income trading and investments, and derivatives.
- (e) **Trust and Insurance** - The segment handles trust, asset management and fiduciary services provided by the Bank to its customers.
- (f) **Headquarters** - This segment includes corporate management, support and administrative units not specifically identified with the above-mentioned segments.

These segments are the basis on which the Group reports its primary segment information. Transactions between segments are conducted at estimated market rates on an arm's length basis.

Segment resources and liabilities comprise operating resources and liabilities including items such as taxation and borrowings. Revenues and expenses that are directly attributable to a particular business segment and the relevant portions of the Group's revenues and expenses that can be allocated to that business segment are accordingly reflected as revenues and expenses of that business segment.

In 2025, the Bank revised its segment reporting related to the deposit products within its Retail Banking Center (RBC). Previously, all RBC deposits were reported under the Consumer Banking segment. To better reflect the underlying business dynamics and enhance clarity in the Group's segment performance measurement, the Group restructured its reporting approach. RBC deposit products are now allocated across

Consumer Banking and Institutional Banking, based on their respective sub-product segments: Retail Personal and SME under Consumer Banking, and Retail Commercial and Retail Corporate under Institutional Banking. As a result, the comparative segment reporting for the three months ended March 31, 2026 and as of December 31, 2025.

Segment information of the Group as of March 31, 2026 and December 31, 2025 and for the periods ended March 31, 2026 and 2025 is presented as follows (amounts in millions of Philippine pesos):

Segment Information as of March 31, 2026	Consumer Banking	Mass Market / Digital Banking	Institutional Banking	Treasury Banking	Trust & Insurance	Headquarters	Total
<i>Results of operations</i>							
Net interest income and other income	P10,860	P4,353	P5,671	P2,021	P495	(P1,668)	P21,732
Other expenses	6,105	2,958	2,964	432	177	(155)	12,481
Income before provision for credit losses and income tax	4,755	1,395	2,707	1,589	318	(1,513)	9,251
Provision for credit losses							(4,499)
Tax expense							(919)
Net income for the period							<u>P3,833</u>
Segment assets, March 31, 2026	P266,806	P190,972	P214,110	P447,769	P1,356	P56,613	P1,177,626
Segment liabilities, March 31, 2026	P231,408	P162,540	P412,487	P150,463	P408	P18,224	P975,530

Segment Information as of March 31, 2025	Consumer Banking	Mass Market / Digital Banking	Institutional Banking	Treasury Banking	Trust & Insurance	Headquarters	Total

Segment assets, December 31, 2025	P265,644	P185,865	P208,043	P438,599	P1,426	P59,888	P1,159,465
Segment liabilities, December 31, 2025	P299,001	P158,335	P403,785	P144,075	P352	P21,065	P956,613

7. Capital Funds

The Bank's capital stock as of March 31, 2026 and December 31, 2025 consists of the following:

	Shares		Amount (in thousands)	
	March 31, 2026	December 31, 2025	March 31, 2026	December 31, 2025
Common - P10 par value				
Authorized	5,030,785,238	5,030,785,238	P50,307,852	P50,307,852
Issued and Outstanding	3,316,405,584	3,316,405,584	33,164,056	33,164,056
Preferred - P100 par value, non-voting				
Authorized	100,000,000	100,000,000	P10,000,000	P10,000,000
Issued and Outstanding	-	-	-	-

The authorized capital stock of the Bank is P60.3 billion comprised of 5.0 billion common shares at P10 par value and 100.0 million preferred shares at P100 par value. The Bank's outstanding common stock as of March 31, 2026 is 3.3 billion common shares. No preferred shares have been issued to date.

The following is a summary of the cash dividends declared and distributed by the Bank in 2026 and 2025 (amounts in thousands):

Date of Declaration	Date of Record	Date of Payment	Dividend per Share	Shares Outstanding	Total Amount
27-Feb-26	16-Mar-26	23-Mar-26	P1.00	3,316,405,584	P3,316,406
31-Jan-25	17-Feb-25	24-Feb-25	1.00	3,316,405,584	3,316,406

In compliance with BSP regulations, the Bank ensures that adequate reserves are in place for future bank expansion requirements. The foregoing cash dividend declarations were made within the BSP's allowable limit of dividends.

8. Related Party Transactions

Related Party Transactions are transactions or dealings with related parties, regardless of whether a price is charged. These cover all types of transactions both on and off-balance sheets and regardless of which side of the transaction/deal of the bank is acting.

Parties are said to be related if one has direct or indirect control as well as significant influence over the other. Related Parties of the Bank include, but is not limited to: (a) DOSRI, subsidiaries, affiliates, and any party that directly or indirectly has control over or is subjected to the control of the Bank as well as those with direct and indirect linkages to it, (b) the Bank's and its affiliated companies' directors, officers, stockholders, and their related interests and close family members, and (c) other persons and juridical entities whose interests may pose potential conflict with the Bank.

The Related Party Transaction Committee is a board-level committee composed of five (5) members, all of whom are independent directors, including its Chairman. The Committee assists the BOD in the fulfillment of its corporate governance responsibilities on related party transactions by ensuring among others, that:

1. RPTs are transacted at arm's length, in the ordinary course of business, and in accordance with existing policies and regulations.
2. RPTs are reviewed and endorsed to the Board for approval or confirmation, as applicable
3. RPTs are monitored, and subsequent changes in relationships with counterparties (from non-related to related and vice versa) are captured. Related parties, RPTs, and changes in relationships are reflected in the relevant reports to the board and regulators.

The Bank established an independent RPT review and advisory function to ensure that all related party transactions (RPTs) are properly reviewed and vetted, thereby ensuring that such transactions are conducted on an arm's length basis. The Bank enhanced its RPT reporting policies and processes, further strengthening oversight and reinforcing sound governance practices.

It is the policy of the Bank to ensure that all transactions entered into by the Bank with its related parties are undertaken only on an arm's length basis and subjected to appropriate oversight of the BOD and relevant committees so as to protect the Bank from conflicts of interest and abusive RPTs that may arise.

9. Commitments and Contingent Liabilities

In the normal course of the Group's operations, there are various outstanding commitments and contingent liabilities such as guarantees, commitments to extend credit, which are not reflected in the accompanying financial statements. The Group recognizes in its books any losses and liabilities incurred in the course of its operations as soon as these become determinable and quantifiable. Management believes that, as of March 31, 2026, no additional material losses or liabilities are required to be recognized in the accompanying financial statements as a result of the above commitments and transactions.

There are several suits, assessments or notices and claims that remain unsettled. Management believes, based on the opinion of its legal counsels, that the ultimate outcome of such suits, assessments and claims will not have a material effect on the Group's and the Parent Bank's financial position and results of operations.

Following is a summary of the Group's commitments and contingent accounts (amounts in thousands):

	March 31, 2026	December 31, 2025
	(Unaudited)	(Audited)
Commitments	P571,734,240	P547,546,423
Forward exchange bought	79,773,584	74,945,703
Forward exchange sold	23,746,341	40,861,069
Inward bills for collections	38,803,454	34,603,487
Other derivatives	35,463,391	35,603,487
Unused commercial letters of credit	5,299,808	5,389,057
Spot exchange bought	5,169,785	3,911,446
Spot exchange sold	4,275,067	3,904,437
Outstanding guarantees issued	1,172,017	1,234,426
Other commitment and contingent accounts	18,400	76,963

10. Earnings Per Share

Basic earnings per share were computed as follows:

	March 31, 2026	March 31, 2025
Net income attributable to equity holders of the Parent Company	P3,804,293	P1,406,005
Divided by the weighted average number of outstanding common shares	3,316,406	3,316,406
Basic earnings per share	P1.15	P0.42
Annualized basic and diluted earnings per share	P4.59	P1.70

As of March 31, 2026 and 2025, the Group has no outstanding potentially dilutive securities, hence, basic earnings per share are equal to diluted earnings per share.

11. Other Matters

None to report.

12. Events After the Reporting Period

Capital Infusion to UnionDigital

On April 15, 2026, the Parent Bank infused additional capital amounting to P200.0 million out of the approved amount of P1.3 billion in December 2025 to UnionDigital to support its ongoing business operations.

UNION BANK OF THE PHILIPPINES
SEC FORM 17-Q
FOR THE THREE MONTHS ENDED MARCH 31, 2026

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

Statement of Income for the Three Months Ended March 31, 2026 vs March 31, 2025

Union Bank of the Philippines posted a net income of ₱3.8 billion for the first three months of 2026, a 167% increase from the ₱1.4 billion in the same period last year.

Net revenues, consisting of **Net Interest Income** and **Other Income**, expanded to ₱21.7 billion, a 12% increase from ₱19.4 billion in the prior year. **Net interest income** rose by 9% to ₱16.8 billion, supported by a 34 basis points expansion of **Net Interest Margins** to 6.7%, driven by a lower cost of funds and volume growth of total earning assets.

Interest Income increased by 2% to ₱21.2 billion. **Interest Income from Loans and Other Receivables** increased by 5% to ₱16.2 billion. **Income from Investment Securities at Amortized Cost and FVOCI** declined by 1% to ₱4.2 billion, reflecting lower average balances. **Interest Income from Cash and Cash Equivalents** fell by 42% to ₱0.3 billion, while **Trading Securities at FVTPL** rose by 5% to ₱0.2 billion. **Income from Interbank Loans and SPURRA** declined by 9% to ₱0.3 billion.

Interest Expense dropped by 18% to ₱4.4 billion. **Interest Expense on Deposit Liabilities** fell by 6% to ₱2.2 billion, benefiting from the lower policy rates and the Bank's shift to more efficient funding sources. **Interest Expense on Bills Payable and Other Liabilities** declined by 27% to ₱2.3 billion.

Provision for Credit Losses amounted to ₱4.5 billion, an 18% decrease, as asset quality indicators continue to improve. Consequently, **Net Interest Income after Provision for Credit Losses** rose by 24% to ₱12.3 billion.

Other Income increased by 23% to ₱5.0 billion. **Service Charges, Fees, and Commissions** grew by 3% to ₱3.9 billion, driven by higher recurring fees from our growing client base. **Gains on Trading and Investment Securities at FVTPL and FVOCI** declined by 164% to a loss of ₱0.1 billion. **Miscellaneous Income** increased by 31x the same period last year to ₱1.2 billion, mainly due to foreign exchange-related gains.

Operating Expenses totaled ₱12.5 billion, an 8% increase from the previous year. **Salaries and Employee Benefits** rose by 19% to ₱4.1 billion, while **Depreciation and Amortization** increased by 28% to ₱1.1 billion, largely due to higher software amortization. **Occupancy Costs** declined by 2% to ₱0.3 billion, and **Miscellaneous Expenses** went up 1% to ₱5.5 billion, reflecting higher volume-related costs. **Taxes and Licenses** declined by 0.1% to ₱1.5 billion.

Profit before Tax rose by 96% to ₱4.8 billion, while **Income Tax Expense** declined by 7% to ₱0.9 billion, partly driven by timing-related tax adjustments recognized in the quarter.

Net Income Attributable to Non-controlling Interests increased by 6% to ₱29.0 million, while **Net Income Attributable to Equity Holders of the Parent Bank** was ₱3.8 billion, up 171% from ₱1.4 billion in 2025.

Statement of Comprehensive Income for the Three Months Ended March 31, 2026 vs March 31, 2025

Total Comprehensive Income was ₱2.7 billion, compared to ₱1.6 billion in the same period last year, a 62% increase. This was due to higher **Net Income** partly offset by **Other Comprehensive Loss**.

Other Comprehensive Income recorded a loss of ₱1.2 billion, a turnaround from of ₱0.2 billion income in 2025. This was mainly driven by **Unrealized Mark-to-market Loss on Investment Securities at FVOCI**, at ₱1.3 billion, and **Realized Losses on the Sale of FVOCI** securities of ₱0.04 billion. Remeasurement gains on retirement plans added ₱0.2 billion, almost double the prior year's ₱0.06 billion.

Total Comprehensive Income Attributable to Equity Holders of the Parent Bank was ₱2.6 billion, while that **Attributable to Non-controlling Interests** amounted to ₱31.2 million.

Statement of Condition as of March 31, 2026 vs December 31, 2025

As of March 31, 2026, the Bank's **Total Resources** stood at ₱1.18 trillion, higher by 2% than the ₱1.16 trillion level as of year-end 2025.

Cash and other cash items declined by 5% to ₱10.8 billion. **Due from Bangko Sentral ng Pilipinas** increased by 63% to ₱66.6 billion due to a transfer of funds from **Interbank Loans Receivable and Securities Purchased under Resale Agreements** which fell significantly to ₱16.2 billion from ₱41.2 billion as a result. **Due from Other Banks** declined by 22% to ₱27.4 billion, reflecting reduced working balances in foreign banks.

Trading and Investment Securities increased by 3% to ₱382.2 billion. **Financial Assets at Fair Value Through Profit or Loss (FVTPL)** rose by 1% to ₱24.2 billion. **Financial Assets at Fair Value Through Other Comprehensive Income (FVOCI)** increased by 6% to ₱41.6 billion, while **Financial Assets at Amortized Cost** increased by 2% to ₱316.4 billion.

Loans and Other Receivables – net was higher by 3% at ₱553.6 billion compared to ₱537.7 billion as of year-end 2025. The Bank's loan-to-deposit ratio was at 73.6% versus 73.3% previously.

Bank Premises, Furniture, Fixtures, and Equipment decreased slightly to ₱11.4 billion, while **Investment Properties** remained stable at ₱10.1 billion. **Investment in Associates** likewise remained flat at ₱1.0 billion. **Other Resources** declined slightly by 0.2% to ₱44.3 billion.

Total Liabilities amounted to ₱975.5 billion, a 2% increase from year-end 2025. **Deposit Liabilities** increased by 2% to ₱751.7 billion. **Demand Deposits** decreased by 4% to ₱255.7 billion, and **Savings Deposits** increased slightly to ₱233.8 billion. **Time Deposits** increased by 12% to ₱262.1 billion. The Bank's CASA ratio stood at 65.1% compared to 68.1% at year-end 2025.

Bills Payable increased by 1% to ₱133.0 billion, while **Notes and Bonds Payable** remained at ₱39.7 billion. **Other Liabilities** increased by 0.4% to ₱51.1 billion.

Total Capital Funds declined slightly to ₱202.1 billion from ₱202.9 billion at year-end 2025. **Surplus Free** rose by 1% to ₱105.2 billion, primarily reflecting year-to-date earnings net of dividends. **Surplus Reserves** declined 2% to ₱2.7 billion. The **Net Unrealized Fair Value Loss**

on Investment Securities at FVOCI worsened to ₱2.6 billion from ₱1.2 billion at year-end 2025. **Remeasurements of Retirement Plans** of a ₱1.8 billion loss is lower by 7% than year-end 2025. **Other Reserves** remained steady at ₱0.3 billion. **Non-controlling Interests** declined to ₱0.7 billion from ₱0.8 billion.

Key performance indicators of the Bank are as follows:

	<u>March 2026*</u>	<u>March 2025*</u>
Return on Average Assets	1.3%	0.5%
Return on Average Equity	7.5%	2.9%
Cost-to-Income Ratio	57.4%	59.3%
	<u>March 2026*</u>	<u>December 2025</u>
Net Non-Performing Loan Ratio	3.1%	3.0%
Common Equity Tier 1 Ratio	13.8%	15.0%
Capital Adequacy Ratio	14.6%	15.9%

**Based on unaudited figures*

The manner by which the Bank calculates the above indicators is as follows:

Return on Average Assets:	Net income divided by average total resources for the period indicated
Return on Average Equity:	Net income divided by average total capital funds for the period indicated
Cost-to-Income Ratio:	Total operating expenses divided by the sum of net interest income and other income
Net Non-Performing Loan Ratio:	(Total non-performing loans less specific loan loss reserves for NPL) divided by (total loans inclusive of interbank loans receivables)
Common Equity Tier 1 Ratio:	Total common equity tier 1 capital divided by total risk-weighted assets (inclusive of credit, market and operational risk charge)
Capital Adequacy Ratio:	Total qualifying capital divided by total risk-weighted assets (inclusive of credit, market and operational risk charge)

As to material event/s and uncertainties, the Bank has nothing to disclose on the following apart from those already disclosed elsewhere or presented in the accompanying audited financial statements:

- Any known trends, demands, commitments, events or uncertainties that will have a material impact on the issuer's liquidity.
- Any events that will trigger direct or contingent financial obligation, including any default or acceleration of an obligation.
- Any material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company.
- Any material commitments for capital expenditures, the general purpose of such commitments and the expected sources of funds for such expenditures.
- Any known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales/revenues/income from continuing operations.
- Any significant elements of income or loss that did not arise from the issuer's continuing operations.

- Any seasonal aspects that had a material effect on the financial condition or results of operations.
