Alternergy Holdings Corporation ("ALTER"), a Philippine pioneer in renewable power development, during its Annual Shareholders Meeting ("ASM") conducted in-person at New World Hotel, Makati City, highlighted significant progress across four (4) renewable energy projects and stronger financial performance as it prepares to bring its two largest wind developments into commercial operations and advance a 464-megawatt (MW) pipeline. The 28-megawatt ("MWp") Balsik Solar Farm commenced commercial operations in February 2026, followed by the 4.6 MW Dupinga Run-of-River Hydro Power Plant in March. Meanwhile, the 64 MW Alabat Wind Farm and the 128 MW Tanay Wind Farm have both started generating commissioning revenues ahead of full commercial operations. Alabat is scheduled to begin commercial operations in December this year, followed by Tanay in January 2027. Beyond its current projects, Alternergy is advancing its next phase of development through projects awarded under the Department of Energy's fourth Green Energy Auction ("GEA 4").

In the same ASM, veteran banker Valentino Bagatsing was elected as independent director of ALTER. Mr. Bagatsing has more than four decades of experience in corporate finance, capital markets, development finance, and infrastructure investments, further strengthening ALTER's Board as the company enters its next phase of growth.

MEDIA RELEASE
10 November 2026

Alternergy advances four projects, sets sights on 464 MW growth pipeline

- Alternergy advanced four renewable energy projects: 28 MW Balsik Solar and 4.6 MW Dupinga Run-of-River Hydro now in commercial operations; 64 MW Tanay Wind and 128 Alabat Wind have begun generating commissioning revenues
- Fiscal year 2026 revenues grew 31% to P471.8 million, EBITDA increased 39% to P553 million while net income rose 2% to P168.2 million, and total assets expanded 38% to P24.6 billion.
- Advancing a 462 MW pipeline awarded under the DOE's GEA4 as it continues to pursue its One Green Gigawatt by 2030 growth target

Alternergy Holdings Corporation (PSE: ALTER), a Philippine pioneer in renewable power development, highlighted significant progress across four renewable energy projects and stronger financial performance at its Annual Stockholders' Meeting, as it prepares to bring its two largest wind developments into commercial operations and advance a 464-megawatt (MW) pipeline.

Themed "Power in Motion: From Ambition to Impact," the gathering marked the company's first in-person stockholders' meeting since its 2023 listing on the Philippine Stock Exchange. In his report, Alternergy president Gerry Magbanua outlined the company's progress in translating its investments into operating assets while building the organization to support its ambition of One Gigawatt by 2030.

Four projects move closer to full operations

The 28-megawatt (MW) Balsik Solar Farm commenced commercial operations in February 2026, followed by the 4.6 MW Dupinga Run-of-River Hydro Power Plant in March. More than a decade in the making, Dupinga's completion marked the culmination of years of development work and perseverance through setbacks, adding another operating asset to Alternergy's portfolio of wind, solar and run-of-river hydro projects. The project also puts Alternergy's Triple Play into motion, strengthening its balanced portfolio across three renewable energy technologies.

Meanwhile, the 64 MW Alabat Wind Farm and the 128 MW Tanay Wind Farm have both started generating commissioning revenues ahead of full commercial operations. Alabat is scheduled to begin commercial operations in December this year, followed by Tanay in January 2027.

Stronger financial foundation

For fiscal year 2026, Alternergy's consolidated revenues grew 31% to P471.8 million, while earnings before interest, taxes, depreciation and amortization (EBITDA) increased 39% to P553.8 million. Net income rose 2% to P168.2 million, and total assets expanded 38% to P24.6 billion.

These results reflect the company's continuing investments in its renewable energy platform and expanding asset base. Alternergy emphasized, however, that growth in assets must ultimately translate into stronger operating performance, cash generation and sustainable returns.

With Alabat and Tanay already earning commissioning revenues, their transition to commercial operations is expected to convert substantial development investments into recurring electricity sales and operating cash flows.

Next phase of growth

Beyond its current projects, Alternergy is advancing its next phase of development through projects awarded under the Department of Energy's fourth Green Energy Auction (GEA 4), with a combined generating capacity of 464 MW.

These projects provide a substantial foundation for the company's ambition to reach One Gigawatt by 2030.

Alongside investments in new capacity, Alternergy is strengthening its capabilities, systems and governance to support a larger operating portfolio.

The company has also institutionalized environmental, social and governance practices across the life cycle of its projects, integrating ESG considerations into how it develops, builds and operates its assets.

Delivering value to shareholders

The meeting highlighted a pivotal moment in the company's growth journey with newly completed projects that are now contributing to operations, its largest wind developments generating commissioning revenues, and a sizeable development pipeline setting the course for further expansion.

Under the theme "Power in Motion: From Ambition to Impact," Alternergy reaffirmed its focus on translating project milestones into sustained operating performance, long-term shareholder value, and a growing contribution to the country's renewable energy transition.

pioneer in renewable power

About Alternergy

- Alternergy is a renewable power pioneer with projects across multiple technologies, including wind, run-of-river hydro, utility-scale and commercial rooftop solar, and battery energy storage systems.
- Alternergy is led by a seasoned management team of renewable energy pioneers headed by former Energy Secretary Vince Pérez and president Gerry Magbanua.
- Alternergy ("ALTER") debuted on the Philippine Stock Exchange in March 2023. In August 2024, ALTER was included in the PSE Industrial Index. In December 2024, the company declared its first dividend payments to preferred shareholders, including the Government Service Insurance System (GSIS).
- Alternergy has four projects commencing commercial operations by 2026: the 4.6 MW Dupinga Run-of-River Hydro Power Plant and the 28 MW Balsik Solana Solar Project, while the 64 MW Alabat Wind Project and the 128 MW Tanay Wind project are slated to begin commercial operations later this year.
- In September 2026, Alternergy had its maiden public debt issue of P2 billion Enrolled Green Corporate Notes.
- Alternergy has received Certificates of Award from the DOE for its five projects with a combined capacity of up to 500 MW under the fourth Green Energy Auction (GEA 4).
- With a robust project pipeline, Alternergy is on track to achieve its One Green Gigawatt target by 2030.

MEDIA RELEASE
10 November 2026

Alternergy welcomes veteran banker Valentino Bagatsing as Independent Director

Alternergy Holdings Corporation (PSE: ALTER), a Philippine pioneer in renewable power development, announced the appointment of veteran banker Valentino Bagatsing as independent director.

Mr. Bagatsing has more than four decades of experience in corporate finance, capital markets, development finance, and infrastructure investments, further strengthening Alternegy's Board as the company enters its next phase of growth.

"Val Bagatsing is a veteran banking professional whose expertise will be invaluable as Alternergy becomes more active in the debt and equity capital markets," said Vicente Pérez, chairman of Alternergy Holdings Corporation.

"As independent director, Val Bagatsing brings extensive experience in corporate finance, capital markets and development finance. He is also a strong champion of sustainability and environmental social governance (ESG). We are proud to welcome him to the Alternergy board and look forward to working with him," he added.

Mr. Bagatsing previously served as chairman & CEO of Investment & Capital Corporation of the Philippines (ICCP). Prior to joining ICCP, he held various senior leadership positions in multiple countries for the International Finance Corporation (IFC) of the World Bank group. His assignments included serving as Investment Officer for the Philippines, Lao PDR, Resident Representative and Head of Office for IFC Nepal before heading back to the Philippines as Principal Investment Officer.

During his tenure at the World Bank Group, Mr. Bagatsing led investment teams focused on private sector development, infrastructure, energy, and public-private partnerships across emerging markets.

He began his career in commercial and mortgage banking in the United States and worked on several landmark investment banking transactions in the Philippines.
