FINAL

Meat processing firm King Sue Ham powers its next century of growth with renewable energy from ACEN RES

- King Sue Ham & Sausage Co., Inc. transitions its Caloocan City production facility to 100% renewable energy under a retail electricity supply agreement with ACEN RES.
- With almost a century in the business, the shift allows the long-standing meat processor to adopt sustainability, lower electricity costs, and manage operational expenses as it prepares for its next 100 years.

13 November 2026 – Meat processing firm King Sue Ham & Sausage Co., Inc. (King Sue Ham) has partnered with ACEN RES, the retail electricity supply arm of the Ayala group's listed energy platform ACEN, to power its main manufacturing operations with renewable energy.

Under the retail electricity supply agreement, ACEN RES will supply 100% renewable energy to King Sue Ham's production facility in Caloocan City. The transition is made possible through the government-backed Retail Competition and Open Access (RCOA) program, which allows qualified electricity consumers to select their preferred energy supplier.

The switch enables King Sue Ham, a family-owned enterprise with almost a century in food manufacturing, to secure lower power generation rates and reduce operating expenses across its energy-intensive processing operations.

"Powering cold storage and food manufacturing requires significant energy resources," said Sheila Mina, Vice President and Head of Account Management at ACEN RES. "By partnering with ACEN RES, King Sue Ham achieves greater operational cost efficiency while actively contributing to the country's transition toward renewable energy. Our goal at the Ayala group is to make green energy accessible and commercially viable for growing Philippine businesses."

The switch aligns with King Sue Ham's long-term business strategy as it prepares for future facility expansions.

"As we approach our centenary in 2030, preparing for the next 100 years means adopting sustainable ways of doing business," said Richie King, Operations Manager at King Sue Ham. "Partnering with ACEN RES allows us to optimize our operating expenses with lower electricity rates while modernizing our operations. Growth comes with responsibility, and this partnership gives us a strong, sustainable foundation as we expand our production capability."

###

About ACEN RES

ACEN RES is the retail electricity unit of ACEN, the Ayala group's listed energy company and one of the fastest-growing renewable energy companies in Asia Pacific, with the Philippines as its core and largest market. It also has a significant presence in Australia, Vietnam, India, and Lao PDR, along with strategic investments in Indonesia and other markets. The company

currently has 7.5 GW of attributable renewable energy capacity spanning projects in operation, under construction and with signed agreements.

As a developer, builder, and operator, ACEN leverages its agility and collaborative approach to accelerate the energy transition. The company has 100% renewable energy generation and aims to achieve Net Zero greenhouse gas emissions by 2050—turning bold ambitions into real impact for businesses, communities, and indigenous groups.

About King Sue Ham & Sausage Co., Inc.

Established in 1930, King Sue Ham & Sausage Co., Inc. is a premier Filipino food manufacturing company specializing in high-quality cured meats, hams, sausages, and traditional cold cuts. Operating state-of-the-art processing facilities, King Sue supplies commercial, retail, and food service markets nationwide while maintaining a strong commitment to quality, product excellence, and operational efficiency.
